GAGNON, Lucian, Canadian patriot, b. in Pointe-à-la Mule, parish of St. Valentine, Canada; d. in Champlain, N. Y., 7 Jan., 1842. He was among the first to take part in the agitation in Canada against the British government, was present at the assembly of the six confederate counties at St. Charles, 23 Oct., 1837, and left the meeting convinced that insurrection was the only remedy for Canadian grievances. He then travelled through every part of the parish of St. Valentine and the neighboring parishes, preparing the people for the struggle. The chiefs of the insurrection, who had fled to the United States on being defeated at St. Charles, decided, after reaching Swanton, to return to Canada, as they were convinced that Robert Nelson was waiting for them at St. Cesaire at the head of a considerable force. As they were not numerous enough to venture on such an incursion, Gagnon offered to go to Canada and return with a sufficient number to give the enterprise a chance of success. He crossed the frontier during the night, raised his native parish, as well as the surrounding ones, and succeeded in organizing a band of fifty determined men with whom he managed to recross the frontier, although it was well guarded. The band entered Swanton, where it was received with enthusiasm by the refugees and by the Americans who at this point did everything to help the insurgents. Between 70 and 80 men passed into Canada; but, on their way to join Nelson, they met 400 volunteers who were waiting for them at Moore's Corner. In the fight that ensued, Gagnon was twice wounded, and escaped across the frontier with great difficulty. He was soon afterward joined by his wife, her mother, and his eight children, who had been driven, almost naked, from their home under circumstances of great barbarity. On 28 Feb. he attempted to enter Canada with a band of 300 men which had been organized by Nelson. They were arrested at the frontier by U. S. troops, and tried for violating the neutrality laws, but, as they were without arms, they were acquitted. Gagnon afterward entered Canada and was charged by Nelson with the duty of keeping up free communication between Rouse's Point and Napierville. He was present at the fight

at Odelltown, 10 Nov., 1838, and succeeded in reaching the United States afterward. The privations that he had endured caused consumption, which ultimately ended his life.

GAILLARD, Edwin Samuel, physician, b. in Charleston district, S. C., 16 Jan., 1827; d. in Louisville, Ky., 1 Feb., 1885. He was graduated at the University of South Carolina in 1845, and at the medical college of the same state in 1854. He removed to Florida during the latter year, and practised there until 1857, when he took up his residence in New York city, and later visited Europe. On his return, he again settled in New York city, and in 1860 received the "Fiske" fund prize for an essay on ozone. In the spring of 1861 he removed to Baltimore, and afterward joined the Confederate army, in which he filled various professional offices until the close of the war. In May, 1865, he began to practise in Richmond, Va., and the following year established the "Richmond Medical Journal," which he removed to Louisville in 1868, and published there under the title of the "Richmond and Louisville Medical Journal." In July, 1874, he also established the "American Medical Weekly." In June, 1867, he was made professor of general pathology and pathological anatomy in the Medical college of Virginia, and in May, 1868, he was elected to the same chair in the Kentucky school of medicine at Louisville. The following year he was appointed professor of the principles and practice of medicine, and general pathology, in the Louisville medical college, of which he was the first dean. Having lost his right hand at the battle of Seven Pines, in May, 1862, Dr. Gaillard performed his professional and literary work under the greatest difficulties. He was a member of many medical societies, and received a prize for an essay on diphtheria. In 1873 the University of North Carolina conferred on him the degrees of M. A. and LL. D.

GAILLARD, John, senator, b. in St. Stephen's district, S. C., 5 Sept., 1765; d. in Washington, D. C., 26 Feb., 1826. He was of Huguenot descent. He was elected to the U. S. senate in place of Pierce Butler, resigned, and served from 31 Jan., 1805, until his death. He voted for the war of 1812, and was chosen, on account of the death of two vice-presidents, Clinton and Gerry, during his term, to preside over the senate *pro tempore* in every congress from the 11th to the 18th, inclusive. He thus filled the president's chair for fourteen years. Thomas H. Benton, in his "Thirty Years' View," says: "Urbane in his manners, amiable in temper, scrupulously impartial, uniting absolute firmness of purpose with the greatest gentleness of manners—such were the qualifications which commended him to the presidency of the senate. There was probably not an instance of disorder or a disagreeable scene in the chamber during his long-continued presidency. He classed democratically, but was as much the favorite of one side of the house as of the other, and that in the high party times of the war with Great Britain, which so much exasperated party spirit."

GAILLARD, Peter Cordes, physician, b. in Charleston, S. C., 29 Aug., 1815; d. there, 14 Jan., 1859. His mother, Rebecca Foster, was the daughter of Mrs. Brewton, who was noted for her patriotism during the Revolution. Dr. Gaillard was graduated at the College of South Carolina, Columbia, in 1834, and at the medical college of the same name in Charleston in 1837, after visiting Paris in the interval. He subsequently returned to the latter city, where he studied his profession for several years. He then settled in Charleston and spent his life there. He succeeded Dr. S. H. Dickson in 1858 as professor of medicine in South Carolina medical college, and was also assistant editor of the "Charleston Medical Journal," and president of the South Carolina medical society. He made a specialty of hygiene and sanitary science, and believed that yellow fever is imported and, to a certain extent, contagious.

GAILLARDET, Théodore Frédéric, journalist, b. in Auxerre, France, 7 April, 1808; d. in Plessis-Bouchard, France, 13 Aug., 1882. He began his literary career as a story-writer toward the end of the Restoration. He then turned his attention to the stage, and the drama "La tour de Nesle," written jointly by M. Gaillardet and Alexander Dumas, the elder, in 1832, involved the former in a lawsuit with that author in the same year. He subsequently emigrated to the United States, and became the proprietor and editor of the "Courrier des États-Unis," published in New York. After revisiting France in 1848 in an unsuccessful attempt to obtain a seat in the constituent assembly, he returned to New York, but subsequently disposed of his interest in the "Courrier." He spoke for Horace Greeley in the presidential canvass of 1872, and in 1880 returned to France. M. Gaillardet was decorated with the red ribbon of the legion of honor in 1843. Besides writing portions of "La tour de Nesle," he wrote "Struensée, ou le médecin de la reine" (1832), a drama in five acts; and "Georges, ou le criminel par amour," a drama in three acts (1833). Besides his dramatic productions, he wrote the "Mémoires du Chevalier d'Eon," drawn from family archives; "Profession de foi et considérations sur le système républicain des États-Unis," presented to the electors of the Yonne (1848); a series of articles and letters, principally on Louisiana, Mississippi, and Texas, appearing in the Paris "Débats" (1839); and another series, published in the "Constitutionnel" and "La Presse" (1856–'60).

GAINE, Hugh, printer, b. in Ireland in 1726; d. in New York city, 25 April, 1807. He began business as a printer and bookseller in New York city in 1750, and in 1752 established the "Mercury," a weekly publication. Gaine was compositor, pressman, folder, and distributer of his paper, which had a circulation of from three to four hundred copies. He began to edit this journal in the interest of the Whig party, and when the British troops neared New York city, retreated with his press to Newark, N. J. He soon returned, however, and thereafter devoted his "Mercury" to the interest of the royal cause, choosing for his sign the "Bible and Crown." At the termination of the Revolutionary war Gaine's petition to remain in New York was granted; but he was compelled to relinquish the publication of his sheet, and confine himself to the printing and bookselling business. After a career of forty years he retired with a handsome estate. Although Hugh Gaine and his "Mercury" are frequently alluded to by historians, his career was, of itself, an uneventful one. He led an exemplary life, and was a man of active business habits; but he seems to have been almost without conscientious convictions.

GAINES, Edmund Pendleton, soldier, b. in Culpepper county, Va., 20 March, 1777; d. in New Orleans, La., 6 June, 1849. James Gaines, his father, commanded a company in the Revolutionary war, was a member of the North Carolina legislature, and took part in the convention that ratified the Federal constitution. Edmund early showed a preference for a military life. Having joined the U. S. army, he was appointed 2d lieutenant of the

6th infantry on 10 Jan., 1799, and in April, 1802, was promoted to 1st lieutenant. He was for many years actively employed on the frontier, and was instrumental in procuring the arrest of Aaron Burr. He was collector of the port of Mobile in 1805, and was promoted to captain in 1807. About 1811 he resigned from the army, intending to become a lawyer, but at the beginning of the war of 1812 returned, and became major on 24 March. He became colonel in 1813, and at Chrysler's Field, on 11 Nov., covered with his regiment the retreat of the American forces. Later in the same year he was made adjutant-general, with the rank of colonel. He was promoted to brigadier-general, 9 March, 1814, and, for gallant conduct in the defence of Fort Erie, in August, 1814, when he was severely wounded, "repelling with great slaughter the attack of a British veteran army superior in number," he was brevetted major - general, and received the thanks of congress, with a gold medal. Similar honor was done him by the states of Virginia, of Tennessee, and of New York. He was appointed, in 1816, one of the commissioners to treat with the Creek Indians. He was in command of the southern military district in 1817, when the Creeks and Seminoles began to commit depredations on the frontiers of Georgia and Alabama, and, having moved against them, was in desperate straits when he was joined by Gen. Jackson — a circumstance which may be regarded as the initiative of those measures which in 1820 added Florida to the United States. In the troubles which arose with the Seminoles in 1836, and which cost Gen. Thompson his life, he was again engaged, and was severely wounded at Ouithlacoochie. When the Mexican war began, some ten years later, he made himself trouble with the government by assuming the liberty of calling out a number of the southern militia without orders, and was tried by court-martial, but not censured. He was a man of simplicity and integrity of character.—His wife, **Myra Clark,** heiress, b. in New Orleans, La., in 1805; d. there, 9 Jan., 1885, is known from the extraordinary lawsuit with which her name is associated. Her father, Daniel Clark, born in Sligo, Ireland, about 1766, emigrated to New Orleans, where he inherited his uncle's property in 1799. He was U. S. consul there before the acquisition of Louisiana, and represented the territory in congress in 1806–'8. He died in New Orleans, 16 Aug., 1813, and his estate was disposed of under the provisions of a will dated 20 May, 1811, which gave the property to his mother, Mary Clark, who had followed him to the United States, and was living at Germantown, Pa. His business partners, Relf and Chew, were the executors. Clark was reputed a bachelor, but was known to have had a liaison with a young French woman of remarkable beauty, Zulime des Granges, during the absence of her reputed husband in Europe. Two daughters were born of this connection, one at Philadelphia in April, 1802, the other (Myra) in New Orleans in 1805. The latter was taken to the house of Col. Davis, a friend of Clark's, nursed by a Mrs. Harper, and in 1812 went with Davis's family to reside in Philadelphia, where she passed by the name of Myra Davis. In 1830, Davis, being then in the legislature, sent home for certain papers, and Myra, in searching for them, discovered letters that partially revealed the circumstances of her birth. In 1832 she married W. W. Whitney, of New York, who, in following up the discovery, received from Davis an old letter that contained an account of a will made by Clark in 1813, just before his death, giving all his large estate to Myra and acknowledging her as his legitimate daughter. Whitney and his wife went to Matanzas, Cuba, saw the writer of the letter, and, after collecting other evidence, instituted suits to recover the estate, which included some of the most valuable property in New Orleans. On the trial of one of these causes, Mrs. Harper testified that, four weeks before his death, Clark showed her the will he had just made in favor of Myra, permitting her to read it from beginning to end, and acknowledged the child's legitimacy. Baron Boisfontaine testified that Clark told him the contents of the will and acknowledged the child. On this and other similar evidence the lost or destroyed will was received by the supreme court of Louisiana (18 Feb., 1856) as the last will of Daniel Clark, though of the document itself no vestige had ever appeared. But by the law of Louisiana a testator can not make devises to his illegitimate child. It was proved by the testimony of two sisters of Myra's mother, one of whom swore she was present at the ceremony, that Clark privately married her in Philadelphia in 1803, a Catholic priest officiating; she having previously learned that Des Granges, her supposed husband, had a prior wife living, and was therefore not legally her husband. Clark's contemplated acknowledgment of the marriage was said to have been frustrated by suspicions of her fidelity; and, deserted by him, she contracted a third marriage. In another suit the U. S. supreme court decided that the fact of the marriage and legitimacy was established. Mrs. Whitney survived her husband, married Gen. Gaines in 1839, and survived him also. In 1856 she filed in the supreme court of the United States a bill in equity to recover valuable real estate then in the possession of the city of New Orleans, and a decision in her favor was rendered at the December term of 1867. The value of the property claimed was estimated in 1861 at $35,000,000, of which Mrs. Gaines had up to 1874 obtained possession of $6,000,000, and numerous actions for ejectment were still in progress. Only a small part of this came into the possession of the claimant, the rest having been swallowed up in the interminable legal proceedings that preceded the final victory. In April, 1877, Judge Billings, of the U. S. circuit court at New Orleans, rendered a decision in which he recognized the probate of the will of Daniel Clark of 1813. The decree commanded the city of New Orleans and other defendants to account to a master in chancery for all the income from the property during their possession, and deprived them of their titles and of all accumulation therefrom. The master made a report from which an appeal was taken, and in May, 1883, judgment was again given in favor of Mrs. Gaines for $1,925,667, with $566,707 as interest. From this decision a fresh appeal was taken to the U. S. supreme court in the month of June follow-

Edmund P. Gaines

ing, and thus the matter stood at her death. Under a previous decision, Mrs. Gaines could have turned out of their homes over 400 families occupying land and holding titles from the city; but, although greatly in need of money, she preferred obtaining judgment against the city to taking harsh measures. With this view she steadily declined several tempting offers of money from those who would have shown little mercy to the innocent holders of the disputed property. Although wealthy at the time of Gen. Gaines's death, his widow spent her entire fortune in the effort to free her mother's name from stain and secure the millions that were finally decided to be rightfully hers. See Wallace's "Cases Argued and Adjudged in the Supreme Court of the United States," vol. vi.

GAINES, John P., governor of Oregon, b. in Walton, Boone co., Ky.; d. in Oregon in 1858. He studied law, was admitted to the bar, and began practice at Walton. He served in the Mexican war as major of Marshall's Kentucky cavalry volunteers, and was made prisoner at Incarnacion in January, 1847. He was subsequently appointed aide-de-camp to Gen. Scott, and distinguished himself at the battle of Molino del Rey. While he was in captivity he was elected to the 30th congress as a Whig, serving from 6 Dec., 1847, till 3 March, 1849. He was then appointed by President Fillmore governor of the territory of Oregon, and filled the office from 1850 till 1853. He never returned to the eastern states, but remained in Oregon until his death.

GAINZA, Gavino (gah-een'tha), Spanish soldier, b. in Biscay about 1760; d. in Mexico about 1824. He came to Peru in 1784 as officer of the regiment of Estremadura, and in 1809 was colonel of the regiment of Lima. He became brigadier-general in 1813, and in 1814 became commander-in-chief of the Spanish forces of the South of Chili, against the Independents. One of his officers, Ildefonso Elorreaga, occupied Tacna on 14 March. Instead of marching on Santiago, which road was open to him and undefended, he lost time trying to prevent the juncture of the forces of O'Higgins with Col. Mackenna. He was defeated by the former, and found himself in a perilous position, when the British commodore, Hillyar, offered his mediation, and the treaty of Lircay was finally signed, by which the Chilians recognized Ferdinand VII. and the council of regency during his captivity, under the condition that the Spanish troops should evacuate Chilian territory within thirty days. The viceroy disapproved of this treaty, and ordered the arrest of Gainza, and his transportation to Lima, where he remained a prisoner till his case was brought before a court-martial, 27 May, 1816. Sentence was pronounced on 14 June, ordering him to be put at liberty and to proceed to Spain, to await the disposition of the minister of war. After the promulgation of the constitution of 1820 he was sent as sub-inspector of the army to Guatemala. The Spanish majority of the provincial assembly there induced the feeble Captain-General Urrutia to resign, and appointed Gainza in his place in March, 1821. When the news of the declaration of the independence of Mexico by the plan of Iguala, 24 Feb., 1821, arrived, Gainza, convinced that it was impossible to resist public opinion, and trying to save the province for Spain, convoked a meeting of all the authorities and delegates from the municipalities for 15 Sept., 1821. After long debate, the independence from Spain was proclaimed, and Gainza was intrusted temporarily with the supreme command. He afterward favored the annexation of Guatemala to Mexico, and went to that country to live.

GAITHER, Henry, soldier, b. in Montgomery county, Md., in 1751; d. in Georgetown, D. C., 22 June, 1811. He was a captain in the Revolutionary army, and took part in nearly every battle of the war. He was commissioned major in the "levies of 1791," and served under Gen. St. Clair against the Miami Indians in November of that year. In 1793 he was appointed lieutenant-colonel of the 3d infantry, serving until 1 June, 1802. In the interval he was in command at Fort Adams, the barrier posts on the Mississippi, and Fort Stoddart on the Mobile river. At the end of a long and honorable career in the army, Col. Gaither returned to his native county, where he resided until his death. In professional life he was noted for his strictness as a disciplinarian.—His nephew, **Henry Chew,** patriot, b. in Maryland in 1777; d. in Locust Grove, Md., 12 Feb., 1845, represented his county in the legislature for many years, but is chiefly remembered for his heroic conduct in defence of free-speech during the disgraceful assault by a mob on the office of the "Baltimore Federalist," 26 July, 1812. Mr. Gaither was the eldest of three brothers who aided in repelling the attack, and when, on promise of protection by the authorities, the defenders of the office allowed themselves to be made prisoners, he succeeded in escaping, while on the way to the jail, by stepping into the shop of a friend and changing his hat and clothing, which had been spotted by the blood of his brother, Ephraim, who received a flesh-wound in the arm. The latter, who was confined in the jail with his younger brother, William, made his way out as the mob entered the room in which they were confined, mingled with the crowd, and, by stepping backward whenever a vacant place afforded him an opportunity, finally reached the street without being again arrested. William was not so fortunate. After being knocked down and otherwise maltreated by the rioters, he feigned death and was thrown out with others as dead into the prison-yard. They were afterward stabbed in the hands with penknives to test whether or not they were actually dead. William bore the marks of these wounds until his death, and never entirely recovered from nervous shock produced by the horrors of that night. (See Hanson, Alexander C.)—**William Lingan,** legislator, son of Henry Chew, b. in Locust Grove, Montgomery co., Md., 21 Feb., 1813; d. at Berkley Springs, Va., 2 Aug., 1858, was educated at Thornton Hill, Va., and Hagerstown, Md. He was early elected to the legislature, and served sixteen years, a portion of the time in each branch. In 1851 he was chosen president of the senate, and the same year was appointed one of the board of visitors to the U. S. military academy. He was also made a director of the Baltimore and Ohio railroad on behalf of the state, and by his watchfulness and energy saved many thousands of dollars to the commonwealth. He was a presidential elector on the Harrison and Tyler ticket, and also on the Clay ticket, carrying the state for his candidates on both occasions. He became general of militia.

GALBERRY, Thomas, R. C. bishop, b. in Naas, County Kildare, Ireland, in 1833; d. in New York city, 10 Oct., 1878. When he was three years old his parents emigrated to the United States and settled in Philadelphia. He was educated at Villanova college, Pa., studied theology, and was ordained priest by Bishop Newmann, 20 Dec., 1856. His first mission was at Lansingburg, N. Y., where he built a Gothic church at an expense of over $33,000, and near it a convent for the Sisters of St. Joseph. He had become a member of the Augustinian order, and on 30 Nov., 1866, was appointed

superior of the commissariat of Our Lady of Good Council, the mission of the order in the United States. He also held the office of pastor at Lawrence, Mass., where he completed a church building. He was next elected president of Villanova college, and during his incumbency rebuilt the college and entirely reorganized the course of studies. He was elected provincial of the Augustinian order when that body was formed into the province of Villanova in 1874. Shortly afterward he was nominated bishop of Hartford by the pope. He sent his resignation to Rome, as he did not wish to be separated from his religious brethren, but he was required to obey, and was consecrated by Archbishop Williams, 19 March, 1876. His application to his new duties weakened a constitution never strong, and, feeling that his health was failing, he set out to seek rest at Villanova. When near New York he was seized with a hæmorrhage, which proved fatal shortly afterward.

GALBRAITH, Andrew, colonist, b. in the north of Ireland about 1692; d. after 1747. His father, James, was of Scotch descent, and accompanied William Penn on his second visit to America. Andrew came to this country with his father, and settled in 1718, with other Scotch-Irish colonists, in Lancaster county, Pa., where he had received from the Penns a patent for 212 acres of land. He organized the Donegal church, was its first ruling elder, and selected the site for its building, which is represented in the accompanying illustration. This church was built about 1730 in place of a temporary log structure, of ten years before, and is of rough stone, laid in mortar. The Donegal settlement became the nursery of Presbyterianism in a large part of Pennsylvania, Virginia, and North Carolina. Mr. Galbraith was the first coroner of Lancaster county, and a justice of common pleas for six years. He was elected to the general assembly in 1732, and was a justice of the peace from 1730 till 1747, when he sold his farm and removed to a place west of the Susquehanna river.

GALE, Benjamin, physician, b. on Long Island, N. Y., in 1715; d. in Killingworth, Conn., 21 May, 1790. He was graduated at Yale in 1733, and studied medicine under Dr. Jared Eliot, of Killingworth, marrying the daughter of his instructor and settling in that town. He ranked high in his profession, and was also skilful in agriculture, inventing a drill plough, for which he received a medal from an English society. He also took a lively interest in politics, and wrote frequently for the press. He published "A Dissertation on Inoculation" (1763), and his method of prescribing a preparatory course of mercury was commended in England, and subsequently followed in this country. The same year he contributed to the Philadelphia "Transactions" a paper on the "Bite of Rattlesnakes." He wrote essays in the "Transactions" of the New Haven medical society, and also "A Dissertation on the Prophecies."

GALE, George Washington, educator, b. in Northeast, Dutchess co., N. Y., 3 Dec., 1789; d. in Galesburg, Ill., 13 Sept., 1862. He was graduated at Union in 1814, and licensed as a Presbyterian clergyman in October, 1819, when he took charge of the church at Adams, Jefferson co., N. Y. His pastorate was distinguished by a powerful revival of religion, in which Charles G. Finney and other eminent men were among the converts. He resigned his charge in 1823, and afterward established the Oneida manual labor institute at Whitesboro, N. Y., where he remained from 1827 till 1834. His life work was the organization of Knox college at Galesburg, Ill., in 1835. He was a man of strong prejudices and acute intellect. He received the degree of D. D.

GALE, Levin, lawyer, b. in Cecil county, Md., in 1824; d. in Baltimore, Md., 28 April, 1875. He was the son of Levin Gale, who represented the Elkton district in congress from 3 Dec., 1827, till 3 March, 1829. The son studied law, was admitted to the bar, and settled at Elkton, Md. Meeting with great success in his profession, he secured a large practice, and argued many cases before the Maryland court of appeals. Mr. Gale is the author of "A List of English Statutes Supposed to be Applicable to the Several States of the Union."

GALE, Samuel, Canadian jurist, b. in St. Augustine, Florida, in 1783; d. in Montreal, 15 April, 1865. His father, a native of Hampshire, England, came to America in 1770, as assistant paymaster to the British forces. The son was educated at Quebec, and in 1802 began the study of law in the office of Chief-Justice Sewell in Montreal. He was admitted to the bar in 1808, and, having been appointed a magistrate in the Indian territories, accompanied Lord Selkirk to the northwest in 1815. Later, when Lord Dalhousie was attacked for his administration of Canadian affairs, Mr. Gale went to Britain as the bearer of memorials from the English-speaking residents of the eastern townships and other sections of Lower Canada, defending the viceroy's conduct. In 1829 he became chairman of the quarter sessions, and in 1831 was appointed a judge, which office he held until ill health forced him to retire in 1849. While upon the bench, he maintained the right of the crown to establish martial law in 1837. He was deeply interested in the freedom of the slave, and when the Anderson case was before the Upper Canada courts, was one of the most active among those who aroused agitation. When the Prince of Wales visited Canada, he prepared a congratulatory address from the colored people of the country, which, however, was not received, as the prince was desired by the Duke of Newcastle not to recognize differences of race and creed unless it were imperative. He fought a duel with Sir James Stuart and was severely wounded. He was the author of a series of letters to the "Montreal Herald," over the signature of "Nerva," which were strongly conservative in tone, and made a powerful impression.

GALE, Theophilus, benefactor of Harvard college, d. in 1677. He was a doctor of divinity, a classical scholar, and a learned theologian and philosopher. When he died, he left his library to the college, more than doubling its collection of books, which had been already enriched by gifts of Gov. Winthrop, Richard Bellingham, John Lightfoot, Sir Kenelm Digby, Richard Baxter, and others.

GALES, Joseph, journalist, b. in England in 1760; d. in Raleigh, N. C., 24 Aug., 1841. He was originally a printer and bookseller at Sheffield, where he established and published the "Register." His democratic principles having involved him in

difficulty with the government, he sold his journal in 1793 to James Montgomery, the poet, who had been brought up in his family, and emigrated to the United States, settling in Philadelphia. There he edited the "Independent Gazetteer," in which, being a proficient stenographer, he first printed short-hand reports of the debates in congress. In 1799 he sold the paper to Samuel Harrison Smith and removed to Raleigh, N. C., where he founded a new "Register," the publication of which he continued until he had reached an advanced age, when he transferred it to his third son, Weston, and went to Washington to spend the remainder of his life with his eldest son, Joseph. Here he became interested in African colonization, and was an active member of the American colonization society almost to the day of his death.—His son, **Joseph,** journalist, b. in Eckington, near Sheffield, Eng., 10 April, 1786; d. in Washington, D. C., 21 July, 1860, was educated at the University of North Carolina, learned printing in Philadelphia, and in 1807 became the assistant, and afterward the partner, of Samuel Harrison Smith, who had removed the "Independent Gazetteer" to Washington and changed its name to the "National Intelligencer." In 1810 he succeeded to the sole proprietorship of the journal, which was then published tri-weekly. In 1812 he formed a partnership with his brother-in-law, William Winston Seaton, and in January, 1813, began the daily issue of the "Intelligencer," which was finally suspended, after the death of both partners, in 1869. From the time of their coming together up to 1820, Gales and Seaton were the exclusive reporters as well as the editors of their journal, one devoting himself to the house, the other to the senate. As a rule they only published running reports, but on special occasions the proceedings were given entire. But for their industry, a most important part of our national record would now be lost. Notably was this true in the case of the memorable debate between Hayne and Webster. The original notes of the latter's speech form a volume of several hundred pages, and, corrected and interlined by the statesman's own hand, were carefully treasured by Mr. Gales. At this period he had abandoned the practice of reporting, and the full reproduction of that particular oration was an exception to the custom of the office. The "Intelligencer" was a strong advocate of the war of 1812, and when the British under Admiral Cockburn entered Washington, the anger of that officer seemed to be especially aroused against the journal, one of whose editors was English by birth. He at first proposed burning the office, but being dissuaded by occupants of the adjoining houses, wreaked his revenge upon the printing materials and other property. He ordered the valuable library to be taken into the street and burned, himself assisting in the work of destruction, the type thrown from the upper windows, and the presses broken, thus causing the proprietors a loss of several thousand dollars.—Another son, **Seaton,** journalist, b. in Raleigh, N. C., 17 May, 1828; d. in Washington, D. C., 29 Nov., 1878, was graduated at the University of North Carolina in 1848. A month later, on the death of his father, he took editorial charge of the Raleigh "Register." At the beginning of the war he entered the Confederate army and served four years as adjutant-general of a brigade in northern Virginia, being present at nearly all the battles fought in that locality. After the war he returned to journalism, and from 1866 till 1869 was connected with the Raleigh "Sentinel." At the time of his sudden death he was superintendent of the document-room of the U. S. house of representatives, having been appointed at the opening of the 45th congress.

GALI, Francisco, Spanish navigator, b. in Sevilla in 1539; d. in the city of Mexico in 1591. The want of a port on the coast of California, where ships arriving from the Philippines could revictual, had long been felt. In 1585 Pedro Moya de Contreras, archbishop of Mexico and provisional viceroy of New Spain, fitted out two frigates at Acapulco, and gave the command to Gali, enjoining him not only to select a place for a port, but to examine the whole coast of North America, which some believed to extend to China, while others thought it was separated by the Strait of Anian. Gali, who had sailed as far as Japan, gives the following reasons for believing that there was a strait: "When we were 300 leagues northeast of Japan, we found a very deep sea with a current coming from the north and northwest; the waves were long and high; from whatever side the wind blew, the current and the waves always followed the same direction. In this way we sailed 700 leagues; it was only when we were within 200 leagues of the coast of Mexico that we no longer felt this sea and current, and this fact makes me think that a channel or strait will be found between the continent of New Spain and the countries of Asia and Tartary. Moreover, we met in this interval of 700 leagues a large number of whales, besides bonitos and other such fish as are always found in the Straits of Gibraltar; for they prefer opening their way through quarters where there are strong currents; this confirms me still more in the opinion that there is a strait." Gali, after visiting the Ladrones, Manila, Macao, and the Liu-Kiu islands, sailed eastward, and on 14 Oct., landed on the coast of America at 37° 30′ north latitude. He saw a high land well wooded and totally free from snow; then, on his route to Acapulco, he saw fires along the coast during the night, and smoke in the daytime, from which he concluded that all this country was inhabited. On his return, he found that the archbishop was no longer in office, and the project of founding a port on the coast of California was abandoned. The relation of Gali, written in Spanish, was sent to the viceroy of the Indies; it fell into the hands of Linschot, who translated it into Dutch and inserted it in his work on the "Track Charts of the Indies" (Amsterdam, 1596). Hackluyt has a translation in his collection, and there is also a French translation from Linschot (Amsterdam, 1610). In all these works Gali is called Gualle. There is also a Spanish translation taken from the French version (Madrid, 1802). Gali intended to give a fuller account of his voyage, and some think that he did write a larger work, which has been lost; there are fragments of it in the national library of Mexico, under the title: "Viaje, descubrimientos y observaciones de Acapulco á Filipinas y desde allí á Macao y por la costa de Nipón á la Nueva España." The narrative in existence proves him an experienced navigator and a talented observer. He had on board his vessel a skilful astronomer, Juan Jayme, who used an instrument of his own invention for finding the variation of the needle.

GALINÉE, clergyman. He was a member of the order of St. Sulpice, and accompanied La Salle on his voyage to this country. In 1670 he visited the site of Detroit, and is said to have been the first white man to arrive at that locality. He parted with La Salle at the head of Lake Ontario, and with a fellow-priest, named Dollier, coasted the southern shore of Lake Erie, and entered the Detroit river. At one of their camping-places the

altar service was washed into the lake, and this calamity was attributed directly to the evil one. It happened that on reaching Detroit they stumbled upon a stone image, which Galinée believed to be a representation of the devil, whereupon, in his exasperation, he demolished the image, and, with the help of his "coureurs des bois," buried the fragments in the river. He prepared a map of the great lakes, according to which he does not seem to have known that Michigan was a peninsula. This was the second map made of this district, the first having been drawn by Champlain in 1632.

GALLAGHER, Hugh P., clergyman, b. in Killygordan, County Donegal, Ireland, in 1815; d. in San Francisco, Cal., in March, 1882. He came to the United States in 1837 and completed his theological studies at the seminary of St. Charles Borromeo, Philadelphia. He was appointed professor of classics a few months afterward, and in 1840 was ordained priest. He was placed in charge of Pottsville, where he effected great reforms among the miners, and established a temperance society which soon had over 5,000 members. After having charge of another parish in Pennsylvania, he was made president of the theological seminary in Pittsburg in 1844, and also given charge of a large parish there. He founded and edited for some time the "Pittsburg Catholic," and in 1844 founded St. Francis's college for boys. In 1850 he introduced the Sisters of Mercy, for whom he established St. Aloysius's academy for girls. He also founded "The Crusader," at Summitville, Cambria co. In 1852 he was appointed theologian to the first plenary council of Baltimore, and in the autumn of the same year went to California. Here he built a church at Benicia, aided in erecting the cathedral of St. Mary in San Francisco, and began a church in Oakland. In 1853 he established the "Catholic Standard," the first Roman Catholic journal on the Pacific coast, and edited it for several months. He went to Europe in 1853, secured a large number of priests for the Californian mission, and placed fourteen students in ecclesiastical colleges to be educated for the same purpose. While in Ireland he secured the services of Sisters of Mercy and nuns of the Presentation order for the schools and hospitals he intended to establish in California. After obtaining large donations on the continent he returned to California in 1854. The failure of Adams's express and banking company in 1855, by which large numbers of the working classes were impoverished, made it necessary for them to seek a safer place of deposit for their savings afterward. Father Gallagher was selected as their banker, and he acted in this capacity for several years, during which time several million dollars passed through his hands. His health suffered, and in 1860 he was obliged to retire to the northern part of the state, where he purchased a large building at Yreka, and converted it into a church. In the same year he built churches in Carson City, Genoa, and Virginia City. He returned in 1861 to San Francisco and at once set about building St. Joseph's church, St. Joseph's free schools, and St. Joseph's hall. The schools formed the most important work of his life. In 1865 he founded the Magdalen asylum, which he placed in charge of the Sisters of Mercy. He had previously been instrumental in founding St. Mary's hospital. During the commercial stagnation of 1869–'70 he laid before the legislature a plan for the improvement of Golden Gate park, and obtained an appropriation for the purpose.

GALLAGHER, Nicholas Aloysius, R. C. bishop, b. in Temperanceville, Belmont co., Ohio, 19 Feb., 1846. He was educated at Mount St. Mary's of the West, and, after finishing his theological studies, was ordained priest at Columbus in 1868. In 1869 he was stationed at St. Patrick's church, Columbus, attending at the same time the chapel of St. Joseph's cathedral. In 1872 he was appointed president of the seminary of St. Aloysius, near Columbus, and, when Bishop Rosecrans fixed his residence at St. Joseph's, he was made pastor of St. Patrick's and vicar-general of the diocese of Columbus. He was administrator of the see during the vacancy from October, 1878, to August, 1880. He was next named titular bishop of Canopus, and appointed administrator of the diocese of Galveston. He was consecrated, 30 April, 1882. Bishop Gallagher has done much to restore order in the diocese intrusted to his care, but finds difficulty in keeping pace with the tide of emigration flowing into Texas. In 1884 there were forty priests, fifty churches and chapels, several female academies conducted by Ursuline nuns and others, and about 38,000 Roman Catholics under his jurisdiction.

GALLAGHER, William Davis, journalist, b. in Philadelphia, Pa., 21 Aug., 1808. His father, who was implicated in the Irish rebellion of 1798, emigrated to this country, and died soon afterward. His widow removed to Cincinnati, where young Gallagher was apprenticed in a printing-office in 1821. Four years later he began to write occasionally for the press, and edited the "Backwoodsman," at Xenia, Ohio, in 1830; the "Cincinnati Mirror," in 1831, to which he contributed a number of prose tales and poems that attracted much attention; the Cincinnati "Western Literary Journal and Monthly Review," in 1836; "The Hesperian: A Monthly Miscellany of General Literature," while also engaged in the management of the Columbus "Ohio State Journal," in 1838; and in 1839 became associate editor of the Cincinnati "Gazette," maintaining that connection until 1850, in which year he accompanied Hon. Thomas Corwin to Washington in a confidential capacity, the latter having just been appointed secretary of the treasury. In 1853 Mr. Gallagher removed to Louisville, and in 1854 joined the editorial staff of the "Daily Courier," but withdrew within a few years, and retired to a farm near that city, where he wrote much on agriculture. During the civil war he was again employed in the U. S. treasury department. Since that date he has been a resident of Louisville and its neighborhood. Mr. Gallagher first became known as a writer in 1828 by the publication of "A Journey through Kentucky and Mississippi," in the "Cincinnati Chronicle." His first poetical contribution that attracted general attention was "The Wreck of the Hornet." This was reprinted in a collection of his poems entitled "Errato" (3 vols., Cincinnati, 1835–'7). He edited "Selections from the Poetical Literature of the West" (Cincinnati, 1841). In 1849 he delivered the annual address before the Ohio historical and philosophical society, of which he was president, on "The Progress and Resources of the Northwest." One of the most elaborate of his agricultural essays is his "Fruit Culture in the Ohio Valley." His latest volume is "Miami Woods: A Golden Wedding and Other Poems" (Cincinnati, 1881). His next and concluding volume will comprise "Ballads of the Border," "Civile Bellum," being poems of the civil war, and "New Fables of the Old Fairies."

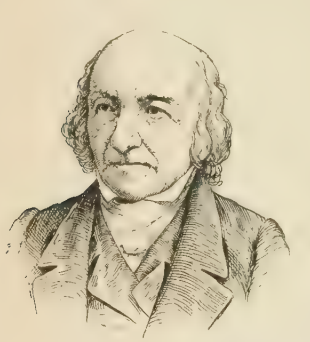
GALLAHER, John Nicholas, P. E. bishop, b. in Washington, Ky., 17 Feb., 1839. He was educated at the University of Virginia, and entered on the study of law in Lexington, Va., but soon afterward went to the General theological seminary,

New York city. He was ordained deacon by Dr. Cummins, assistant bishop of the diocese, in Christ church, Louisville, Ky., 7 June, 1868, and priest by Bishop J. P. B. Wilmer, in Trinity church, New Orleans, La., 30 May, 1869. During his diaconate he served as assistant minister in Christ church, Louisville, and on his ordination to the priesthood became rector of Trinity church, New Orleans. He was subsequently, for a short time, rector of Memorial church, Baltimore, Md., and afterward of Zion church, New York city. In 1875 he received the degree of S. T. D. from Columbia. In 1879 he was elected bishop of Louisiana, and was consecrated in Trinity church, New Orleans, 5 Feb., 1880.

GALLARDO, Aurelio Luís (gal-yar'-do), Mexican poet, b. in León, Guanajuato, 3 Nov., 1831; d. in Napa, Cal., 27 Nov., 1869. In his earliest youth his parents settled in Guadalajara, and he studied in the seminary of that city. After his marriage he gave himself up entirely to literature, and published many minor poems and pieces for the theatre, which were well received. His style is simple and natural, and in his patriotic poems he shows an enthusiastic belief in the ulterior success of the republic and the overthrow of the empire. These productions attracted the persecution of the Imperialists, and in 1866 he was forced to emigrate to San Francisco, Cal. There he continued his poetical labors, contributed to the Spanish papers of the state, and in 1868 founded, in San Francisco, "El Republicano." His works are three volumes of poems, "Sueños y Sombras" (Mexico, 1856), "Nubes y Estrellas" (Guadalajara, 1865), and "Leyendas y Romances" (San Francisco, 1868); also a collection of poems, "Leyendas íntimas," and a novel, "Adah, ó el Amor de un Angel," published in the literary section of his paper in California. He also wrote about twenty comedies, of which the best known are "El Pintor de Florencia," "Abrojos del Corazon," "Los Mártires de Tacubaya," "La Hechicera de Córdoba," and the drama "María Antonieta de Lorena," which by many is considered his best production.

GALLATIN, Albert, statesman, b. in Geneva, Switzerland, 29 Jan., 1761; d. in Astoria, L. I., 12 Aug., 1849. He was descended from an ancient patrician family of Geneva, whose name had long been honorably connected with the history of Switzerland. His father, Jean Gallatin, was engaged in trade, and died when the boy was two years old, while his mother, Sophie Albertine Rolaz du Rosey, survived her husband seven years. Young Albert, who had been baptized by the name Abraham Alfonse Albert, was confided to the care of Mademoiselle Pictet, a relative of his father, and from her he received his early education. In 1773 he was sent to a boarding-school, and a year later entered the University of Geneva, where he was graduated in 1779, standing first in mathematics, natural philosophy, and Latin translation. The liberal spirit of the times was not without its influence on the young man. His grandmother, Madame Susanne Gallatin-Vaudenet, was a woman of strong character, with many friends, among whom were Frederick, landgrave of Hesse Cassel, and Voltaire. Through her influence, a commission of lieutenant-colonel in the Hessian troops, then serving in America, was offered to Gallatin; but he declined it, saying that he would "never serve a tyrant." In opposition to the wishes of his family, he secretly left Geneva in April, 1780, with his college friend, Henri Serre, for America, where they might "drink in a love for independence in the freest country of the universe." He sailed from l'Orient late in May, 1780, and reached Boston on 14 July. His experiences for the ensuing year or so were far from encouraging; he wandered from Boston to Maine, where he engaged in trading. He served as a volunteer against a threatened invasion by the British, and at one time was in temporary command of a small fort in Passamaquoddy. His trading ventures failed, and he returned to Boston with a reduced purse in October, 1781. Here for a time he supported himself by giving instruction in the French language, and in July, 1782, was granted permission to teach the students of Harvard in that language, receiving from the corporation a compensation of $300 for his services. When peace was restored, he left Boston and went to Philadelphia, by way of New York, to deliver the letters to eminent Americans which he had received in Paris. In Philadelphia, through the influence of his friend, Savary de Valcoulon, he was led to invest in large tracts of land in West Virginia. This venture proved successful, and in February, 1784, he settled in Fayette county, Pa., then a part of Virginia, where he opened a country store. During the next few years he was constantly engaged in purchasing property and in locating claims for others, spending his winters generally in Richmond, then the gayest city in the Union. He appears to have been interested in politics, and his ideas seem to have influenced the speeches of John Smilie, who represented Fayette county in the convention of ratification held in September, 1787. Two years later he was a member of the State constitutional convention held in Philadelphia, and was among those who shared the anti-federalist views then prevalent. This was his entrance into the public service. In 1790 he was sent to the legislature from Fayette county, and was re-elected in the two following years. He took an active part in its proceedings, and in 1793 was elected to the U. S. senate; but, after serving two months, he was declared ineligible by a strict party vote on the ground that he had been a citizen of the United States only eight years, having taken the oath of allegiance in October, 1785. In November, 1793, he married Hannah, the daughter of Com. James Nicholson, and this alliance greatly widened his political connection. A year later, through his tact, courage, and fidelity, he succeeded in bringing about a peaceful settlement of the "Whiskey Insurrection." Indeed, historians have agreed in giving to Gallatin the honor of preventing a more serious outbreak. At the subsequent election he was chosen to represent Fayette county in the Pennsylvania legislature, and also was elected to congress. His election to the legislature was contested, and finally declared void after a long debate, during which he made his speech "on the western elections." Another election was then held, in which Gallatin was victorious. After remaining in the legislature till 12 March, he obtained leave of absence. He entered congress on 7 Dec., 1795, as a follower of James Madison, who was then the leader of the Republican opposition, and continued a member of that body until his appointment as secretary of the treasury in 1801. One of the first measures introduced by him was a bill calling for the precise condition of the treasury. His object was to establish the expenses of the government in each department of the service on a permanent footing, for which annual appropriations should be made, and for any important expenditure to insist on a special appropriation. He also came into prominence when the house demanded from the president papers connected with the treaty of 1796 with Great Britain. The presi-

dent returned answer that he considered it a dangerous precedent to admit the right of the house to see the papers, and absolutely refused compliance with the request. In the debate that followed, Gallatin charged John Jay and other Federalists with having pusillanimously surrendered the honor of their country. In reply to this, Uriah Tracy, of Connecticut, said: "I cannot be thankful to that gentleman for coming all the way from Geneva to give Americans a character for pusillanimity." Throughout his congressional career Gallatin participated in all of the important debates, but always made the treasury department and its control, past and present, the object of his unceasing criticism. The establishment of the committee of ways and means was due to his suggestion, and he was ever a warm advocate of internal improvements. His third term closed in 1801. In the first term he asserted his power, and took his place in the councils of the party. In his second, he became its acknowledged chief. In the third, he led its forces to final victory. Besides maintaining his views in debate, he published pamphlets on "A Sketch of the Finances of the United States" (Philadelphia, 1796) and "Views of the Public Debt, Receipts and Expenditures of the United States" (1800). When Thomas Jefferson became president, Gallatin was made secretary of the treasury, and held the office continuously until 1813. He at once applied himself to the mastery of the details of the public finances, and undertook not only the reduction of the debt, but also of the taxes. His management of the treasury department was eminently successful, and he soon obtained a reputation as one of the greatest financiers of the age. The public debt on 1 Jan., 1802, was $86,712,632.25, and this he reduced until, on 1 Jan., 1812, it was only $45,209,737.90. In his annual reports, which were models of clearness, he pointed out methods for the gradual extinction of the debt. In 1812 his report says: "The redemption of principal has been effected without the aid of any internal taxes, either direct or indirect, without any addition during the last seven years to the rate of duties on importations, which, on the contrary, have been impaired by the repeal of the duty on salt, and notwithstanding the great diminution of commerce during the last four years." The war of 1812 then occurred, and the national debt increased steadily until it reached, on 1 Jan., 1816, $127,334,933.74. After negotiating several loans, he severed his connection with the treasury department, and he was sent with James A. Bayard to St. Petersburg as U. S. commissioner to treat for peace with Great Britain under the mediation which the emperor Alexander had offered to the United States. The British government refused to accept the intervention of a foreign power, and the conference was not held. Meanwhile he was continued as commissioner, and subsequently was associated in the negotiations conducted at Ghent. After months of tedious delay, during which the British, flushed with their successes on the continent over Napoleon, made exorbitant demands, a treaty was signed on Christmas day of 1814. Gallatin's biographer, Henry Adams, says: "Far more than contemporaries ever supposed, or than is now imagined, the treaty of Ghent was the special work and the peculiar triumph of Mr. Gallatin." John Austin Stevens says: "By his political life Mr. Gallatin acquired an American reputation; by his management of the finances of the United States he placed himself among the first political economists of the day; but his masterly conduct of the treaty of Ghent showed him the equal of the best of European statesmen on their own peculiar ground of diplomacy." His services were rewarded with the appointment of minister to France in February, 1815, but he spent some time in travel both in Europe and in the United States, finally entering on the duties of his office in January, 1816. Meanwhile he took part in the commercial convention held in London during the summer of 1815. During his career in Paris he aided John Quincy Adams in preparing a commercial treaty with Great Britain, and also was associated with William Eustis in negotiating a treaty with the Netherlands in 1817. He left France in 1823, and returned to the United States, where he was occupied for some time in attention to his private affairs, refusing a seat in the cabinet as secretary of the navy, and declining to be a candidate for the vice-presidency, to which he was nominated by the Democratic party. In 1826, at the solicitation of President Adams, he accepted the appointment of envoy extraordinary to Great Britain, and negotiated commercial treaties by means of which full indemnification was obtained from England for injuries that had been sustained by citizens of the United States in consequence of violations of the treaty of Ghent. On his return to the United States he settled in New York city, where from 1831 till 1839, he was president of the National bank of New York. In 1831 he published his "Considerations on the Currency and Banking System of the United States," and during the same year he was a member of the free-trade convention held in Philadelphia, preparing for that body the memorial which was submitted to congress. Mr. Gallatin was likewise associated in the movement which led in October, 1830, to the foundation of the New York university. He became the first president of the council, but resigned at the end of the year. After his resignation from the bank, his life was devoted to literature, and especially to historical and ethnological researches. In 1839 he prepared an argument in behalf of the United States to be laid before the king of the Netherlands as an umpire on the Maine boundary question, and in connection with this undertaking he collected a statement of the facts, which he revised and, together with the speech of Daniel Webster, a copy of the Jay treaty, and eight maps, published at his own expense as the "Right of the United States to the Northeastern Boundary" (New York, 1840). He presided in 1844 at a meeting held in New York to protest against the annexation of Texas, and, in the course of the address which he made, said that "the resolution of the house declaring the treaty of annexation by the United States of America and the republic of Texas to be the fundamental law of union between them was a direct and undisguised usurpation of power and a violation of the constitution." The war with Mexico he regarded as "the only blot



upon the escutcheon of the United States," and he published "Peace with Mexico" (1847) and "War Expenses" (1848), pamphlets of which 150,000 were gratuitously circulated, and which had undoubted influence in bringing about peace. In 1846, when Lord Ashburton visited the United States in connection with the treaty which bears his name, Mr. Gallatin published a pamphlet on the "Oregon Question," which was distinguished by impartiality, moderation, and power of reasoning. It put before the people, as well as the negotiators, the precise merits of the controversy, and powerfully contributed to the ultimate peaceful settlement. In 1842 he was associated in the establishment of the American ethnological society, becoming its first president, and in 1843 he was elected to hold a similar office in the New York historical society, an honor which was annually conferred on him until his death. His scientific publications include "Synopsis of the Indian Tribes within the United States east of the Rocky Mountains, and in the British and Russian Possessions in North America" (Cambridge, 1836) and "Notes on the Semi-Civilized Nations of Mexico, Yucatan, and Central America, with Conjectures on the Origin of Semi-Civilization in America" (New York, 1845). John Austin Stevens says of him: "To a higher degree than any American, native or foreign born, unless Franklin, with whose broad nature he had many traits in common, Albert Gallatin deserves the proud title, aimed at by many, reached by few, of Citizen of the World." See "Writings of Albert Gallatin," by Henry Adams (3 vols., Philadelphia, 1879); "Life of Albert Gallatin," by Henry Adams (1879); and "Albert Gallatin," by John Austin Stevens, in "American Statesman Series" (Boston, 1883).

GALLAUDET, Thomas Hopkins, educator, b. in Philadelphia, 10 Dec., 1787; d. in Hartford, Conn., 9 Sept., 1851. His family was of Huguenot origin. At an early age he moved with his parents to Hartford, Conn. He was graduated at Yale in 1805, and after hesitating for some time as to whether he should study law, engage in trade, or study divinity, entered the Theological seminary at Andover in 1811. He was licensed to preach in 1814. His attention having been called to the neglected condition of the deaf and dumb in this country, he went to Europe in 1815, visiting in succession London, Edinburgh, and Paris. The work which had been begun in France in 1760, by De l'Epée, was successfully carried on by the Abbé Sicard; and that which had been begun near Edinburgh, at an earlier date, by Thomas Braidwood, and later transferred to London, was under the charge of Dr. Joseph Watson, a nephew of Braidwood. Gallaudet made himself familiar with the methods in use at both establishments, and, returning to the United States in 1816, he brought with him as assistant Laurent Clerc, a deaf-mute, and pupil of Sicard. In the following year, his arrangements having been completed, he began work in Hartford, Conn., with seven pupils. His school soon became a prosperous asylum, and its founder, amid much encouragement, remained in charge as president until 1830, when he resigned on account of ill health. He continued, however, to take an active part in the management of the institution, as one of its directors, and to give it the benefit of his wisdom and experience. In 1838 he became chaplain of the Connecticut retreat for the insane at Middletown, which office he retained till his death. During his lifetime he published extensively. Among his works are "Sermons Preached to an English Congregation in Paris" (London, 1818); "Bible Stories for the Young"; "Child's Book of the Soul" (3d ed., 1850); "Youth's Book of Natural Theology," and other similar works. He edited also six volumes of "Annals of the Deaf and Dumb" (Hartford). A biography of Gallaudet was published by Heman Humphrey, D. D. (New York, 1858).—His wife, **Sophia Fowler,** b. in New England in 1798; d. in Washington, D. C., 13 May, 1877, was one of Mr. Gallaudet's deaf-mute pupils. She gave hearty aid both to her husband and to her son, Edward M. Gallaudet, in the schools of which they respectively had charge.—Their son, **Thomas,** clergyman, b. in Hartford, Conn., 3 June, 1822, was graduated at Trinity college in 1842. He taught in the New York institution for deaf-mutes from 1843 till 1858, and in the mean time took orders in the Protestant Episcopal church, being ordained deacon in June, 1850, and priest in June, 1851. He founded St. Ann's church for deaf-mutes in October, 1852, and in 1859 a church and rectory were secured in Eighteenth street, near Fifth avenue. In addition to his many other duties, Gallaudet accepted the pastorate of the Sisterhood of the Good Shepherd in April, 1869, and the chaplaincy of the "midnight mission" in November, 1871. In October, 1872, "The Church Mission to Deaf-Mutes" was incorporated, and he was appointed its general manager. In this capacity he has been the pioneer of church work among deaf-mutes throughout the country, and institutions similar to St. Ann's have grown up in Philadelphia, Baltimore, Albany, Boston, and other cities. He has attended all the conventions of teachers of deaf-mutes held in this country, and was present at the convention held at Milan in September, 1880, and at that held in Brussels in August, 1883. In the summer of 1886 he visited California in the interest of deaf-mutes. In December, 1885, he founded the "Gallaudet Home for Deaf-Mutes," on a farm on the Hudson river, between New Hamburg and Poughkeepsie, especially intended for the aged and infirm. He resigned the chaplaincy of the midnight mission in 1874, but continues to hold his other offices (1887). Trinity gave him the degree of D. D. in 1862, and he has been a trustee of that college since 1883. He has prepared from the first the annual reports of the "Church Mission," and has been a contributor to the "American Annals of the Deaf and Dumb," and other periodicals.—Another son, **Edward Miner,** educator, b. in Hartford, Conn., 5 Feb., 1837, was educated at Trinity, but not graduated. He began to teach in 1856 in the Hartford institution which his father had founded, and in 1857, at the invitation of Amos Kendall, went to Washington, D. C., with his mother, and organized the Columbian institution for the deaf, dumb, and blind. In 1864 he aided in establishing the National deaf-mute college, became its president, and in 1865 also professor of moral and political science. He visited the principal deaf and dumb institutions of Europe in 1867, and in 1868, after his return, published an elaborate report of his observations. In 1880, in compliance with a request made by principals of schools for the deaf and dumb in this country, he attended the international congress of instructors of deaf-mutes held at Milan, Italy. In 1881 he succeeded James A. Garfield as president of the literary society at Washington, D. C. He was president of the Convention of American instructors of deaf-mutes, held at Jacksonville, Ill., in 1883. In 1886 he visited England, at the request of the British government, and gave information to the royal commission on the education of the blind,

deaf, and dumb, regarding the system pursued in the United States. Trinity college, Hartford, gave him the degree of LL. D. in 1869, and Columbian university that of Ph. D. in the same year. He is the author of a popular "Manual of International Law" (1879), and he has nearly ready for publication (1887) a memoir of his father.

GALLISON, John, lawyer, b. in Marblehead, Mass., in October, 1788; d. 25 Dec., 1820. After he was graduated at Harvard, in 1807, he studied law and practised in Marblehead, and then removed to Boston. For several years he edited the "Weekly Messenger," and advocated plans for the gradual abolition of slavery in the United States. He published "Reports in the Circuit Court" (2 vols., 1807; 2d ed., Boston, 1845), and an "Address" to the Peace society, of which he was a member.

GALLITZIN, Demetrius Augustine, clergyman, b. in the Hague, Holland, 22 Dec., 1770; d. in Loretto, Cambria co., Pa., 6 May, 1841. His father was Russian ambassador to Holland. The Gallitzin family was one of the oldest and noblest in Russia, and had always exercised a great and sometimes a controlling influence in the affairs of that country. The mother of the young prince was a daughter of Field-Marshal Count von Schmettau, one of the favorite generals of Frederick the Great. Both father and mother were admirers of Voltaire and Diderot, and their son was brought up without religious training. In 1786 the princess, after a severe illness, returned to the Roman Catholic church, of which she had once been a member. A year afterward Demetrius also became a Christian, taking the name of Augustine on his conversion. He served as aide-de-camp to the Austrian general, Van Lilien, in 1792, in the first campaign against France. Before its close he was dismissed, the Austrian government having decided to discharge foreign officers. His parents now wished him to travel, and the unsettled state of the continent determined them to send Demetrius to the United States. The Rev. Felix Brosius was appointed his tutor. To avoid the inconvenience of rank, he took the name of Augustine Schmettau, which was afterward Americanized into Smith, and was borne by him for some time after his ordination. Supplied with letters of introduction from the prince-bishops of Hildesheim and Paderborn to Bishop Carroll, to whom his mother confided him, he sailed from Rotterdam, 18 Aug., 1792. He arrived in Baltimore on 28 Oct., shortly afterward expressed a wish to become a priest, and entered the seminary of St. Sulpice, Baltimore, with this intention. Both his parents were dissatisfied with his choice, and his father, who had procured him a commission in the Russian army, begged him to come home, saying that his becoming a priest would of itself prevent his succession to the family inheritance. The young prince, however, persevered, and was ordained on 18 March, 1795. He was the second priest ordained in the United States, and the first who received holy orders in this country, as the Rev. Theodore Bazin had been made deacon in France before coming to America. Desiring to remain in the seminary, Father Gallitzin, or Father Smith, as he was then called, became a member of the order of Sulpitians. But Bishop Carroll, with a view to recruiting his health, sent him to the mission at Port Tobacco. Finding that he was not improving, the bishop directed him to go to the extensive mission of which Conewago was the centre, and at which his friend, Father Brosius, then was. His reply to the bishop was of such a character as to call forth a severe reprimand and a summons to Baltimore. Here he was placed in charge of all the German Catholics of the city. In 1796 he entered on the Conewago mission, residing in Taneytown, and visiting several places in Maryland and Pennsylvania. The zeal of the young priest was not always according to prudence. His too great haste to correct abuses, and the complaints made of his arbitrary measures, called forth a second letter of admonition from Bishop Carroll in 1798. In 1799 the Roman Catholics of Maguire's settlement petitioned the bishop for a resident pastor. Father Gallitzin was appointed, and at once set about the work of establishing a Roman Catholic colony. The district he selected for this purpose was one of the wildest and most uncultivated of the Alleghanies, in what is now Cambria county, Pa. It contained hardly a dozen Roman Catholic families. In 1800 he had a church built of pine logs, the only one between Lancaster and St. Louis. He bought more than 20,000 acres, and invited settlers, supplying them with homes on easy terms, and waiting until such time as they would be able to pay for them. But his expectation of realizing from his inherited estates made him incur obligations which for a long time were a source of humiliation and embarrassment. His father died in 1803, and his relatives in Russia immediately took possession of the estates. It was thought by his mother that his presence in Russia would be advantageous to his interests, but no consideration could prevail on him to leave the settlement he had founded. By her advice he appointed three noblemen his agents, with full power of attorney to bring suit against his relatives, while she, in the event of failure, took steps to secure the property for herself, through her contract of marriage. He built a village, which he named Loretto, in 1803, on his own land. It is situated about four miles northwest of Cresson station, on the Pennsylvania railroad, and at the time of his death had a population of 150. He used his influence to have it made the capital of Cambria county when the latter was laid out, but without success, and, as he was the agent for several firms in Philadelphia and other large cities for the sale of lands in western Pennsylvania, the formation of the new county only multiplied his business and increased his embarrassments. Up to the death of his mother in 1806 he had received remittances from her regularly. Although the emperor of Russia decided in 1808 that, having become a Roman Catholic priest, he could inherit no part of his father's property, his sister, the Princess Maria, continued for some time to send him large sums, which he employed in meeting his engagements, but on her marriage with the penniless Prince of Salm this resource also failed. Meanwhile his colony began to branch out and lay the foundation of other congregations at Ebensburg, Carrolltown, St. Augustine, Wilmore, Summitville, and several other parts of Pennsylvania, and as, owing to the scarcity of priests, he could not obtain an assistant, his labors were unceasing. In 1809 he passed from the jurisdiction of the archbishop of Baltimore to that of the newly appointed bishop of Philadelphia. His real name also had become generally known, and as he had been naturalized as Augustine Smith, the legislature, on his petition, gave him the right to resume that of Demetrius Augustine Gallitzin. In 1811 he was visited by Bishop Egan, of Philadelphia, and confirmation was administered for the first time in the part of the diocese of Pittsburg lying west of the Alleghanies. The name of Father Gallitzin had now become famous, and he was spoken of for the see of Bardstown, Ky. He was actually nominated

for that of Detroit, but probably refused the honor. Although after 1817 he no longer received remittances from his relatives in Europe, his financial situation improved considerably in the years following. There still remained a valuable collection of Greek and Roman antiquities which had been left by his mother in the hands of a trusty friend to be disposed of for his benefit. It was purchased by his old friend and school-mate, the king of the Netherlands. With the proceeds from this sale and some subscriptions from friends in Europe and the United States, he was enabled to free his colony from debt after expending $150,000 on its creation. He was appointed vicar-general of the diocese of Philadelphia in 1821, and Bishop Conwell offered later to make him his coadjutor bishop, but the offer was declined. The appointment of Dr. F. P. Kenrick to be coadjutor was displeasing to Father Gallitzin, and he wrote a very plain but respectful letter to the new prelate on the subject. The action of the bishop in regard to certain irregularities in one or two congregations was so little in harmony with his ideas that he resigned his vicar-generalship. The rest of his life was passed in the performance of duties of the most arduous and self-sacrificing character. In spite of a few harmless eccentricities and some errors of policy, the character of Father Gallitzin affords a fine type of zeal combined with tenderness of heart. "If he had possessed a heart of gold," said one who knew him well, "he would have given it to the unfortunate." While engaged in duties that would have taxed the endurance of the most zealous clergyman, he found time to write works that are still popular among his co-religionists. They are "Defence of Catholic Principles in a Letter to a Protestant Clergyman" (1816); "Letter to a Protestant Friend on the Holy Scriptures" (Ebensburg, 1820); "Appeal to the Protestant Public"; and "Six Letters of Advice" (1834). There are several lives of Father Gallitzin, the best being "Leben und Wirken des Prinzen Demetrius Augustin Gallitzin," by the Rev. Henry Lemcke (Münster, 1861); "Memoir of the Life and Character of the Rev. Prince Demetrius A. de Gallitzin," by Very Rev. Thomas Heyden; and "Life of Demetrius Augustin Gallitzin, Prince and Priest," by Sarah M. Brownson.—His cousin, Princess **Elizabeth,** b. in St. Petersburg, Russia, in 1795; d. in St. Michael's, La., 8 Dec., 1843, became a convert to the Roman Catholic faith at the age of twenty, and was received into the community of the Sacred Heart at Metz in 1826. In 1840 she was sent out as visitor of the houses of the Sacred Heart in the United States. She founded a convent in New York and several schools throughout the United States, as well as a mission among the Pottawattamie Indians.

GALLOP, John, soldier, d. in what is now South Kingston, R. I., 19 Dec., 1675. He was employed by the magistrates of Boston to accompany John Mason in an expedition against a company of pirates, under command of a man named Bull. Severe cold delayed the measures for bringing the pirates to justice, and, after spending two months in searching for Bull in their pinnace, Mason and Gallop were compelled to return without him, as he had escaped to England. Capt. Gallop afterward went to Connecticut, where he was associated with Mason in several exploits against the Indians, and was also employed as a pilot. While sailing in his bark of twenty tons from Connecticut to Long Island, on 20 July, 1636, with one man and two boys, he captured near Block island a pinnace belonging to John Oldham, a trader, on board of which were fourteen Indians, who had murdered Oldham, and were carrying off his vessel. After firing on them with such effect that the Indians sought refuge under the hatches, he ran on the pinnace, and struck her on the quarter with such force as almost to overturn her. This frightened the Indians so that six of them leaped over and were drowned. After repeating this action several times, only four Indians remained under the hatches. He then ventured to board the pinnace, and bound two of the savages. Remembering their wonderful adroitness in untying each other, he threw one of his prisoners overboard. He found the body of Oldham still warm, and cleft through the brains, with hands and feet cut off. After removing the goods and sails he took the vessel in tow, but was obliged to part her on account of the strong wind, and she drifted to the Narragansett shore. Gallop afterward took part with the Connecticut troops in King Philip's war, was foremost in the assault on the swamp fort, and was shot dead just inside the entrance.

GALLOWAY, Charles B., M. E. bishop, b. in Mississippi about 1849. He was educated at the University of Mississippi, became an itinerant minister of the M. E. church, and was a popular and impressive preacher, and a strong advocate of prohibitory liquor-legislation. During the yellow-fever epidemic of 1878 he remained at his post, and suffered a severe attack of the disease. In 1882 he was elected editor of the New Orleans "Christian Advocate," and in 1886 was ordained a bishop of the Methodist Episcopal church, south.

GALLOWAY, Joseph, lawyer, b. near West River, Anne Arundel co., Md., about 1729; d. in Watford, Herts, England, 29 Aug., 1803. After a course of preliminary study, during which he seems to have acquired a taste for religious speculating, which remained with him through life, he studied law and began to practise in Philadelphia, where he acquired distinction in his profession. He was an intimate friend of Benjamin Franklin, and when the latter went to England, in 1764, he placed in Galloway's hands his valuable letter-books and other papers for safe keeping. He was chosen to the assembly of Pennsylvania in 1757, and almost continuously thereafter until the Revolution, and was its speaker from 1766 till 1774, being usually elected by a unanimous vote. In 1769 Princeton gave him the degree of LL. D. In his capacity of member of the state legislature he made a speech in opposition to John Dickinson and in favor of changing the government from the proprietary to the royal form. In the early part of the colonial struggle he exhibited sympathy for the crown, and grew to be an active Tory. Through his influence as speaker of the assembly he had himself chosen, with his friend, Chief-Justice Allen, who also became a Tory, to the Provincial congress, with the purpose, no doubt, of influencing that body in favor of the king. As a member of the congress in 1774 he proposed a scheme of government, to consist of a president-general, to be appointed by the king, and to hold office during his pleasure, and a grand council, to be chosen once in three years by the assemblies of the various colonies. In December of the same year he was chosen to the congress to meet the next May, and soon thereafter published "A Candid Examination of the Mutual Claims of Great Britain and the Colonies: with a Plan of Accommodation on Constitutional Principles" (New York; reprinted in London, 1780). After serving in the congress of 1775 he retired to his country-seat, where Dr. Franklin visited him, and unavailingly sought to

induce him to join the cause of independence. In December, 1776, he joined Gen. Howe, the British commander, and accompanied him in his advance through New Jersey, serving his cause by procuring intelligence and giving advice. On the taking of Philadelphia he was appointed superintendent of the police of the city and suburbs, of the port, and of the prohibited articles, and thus became the head of the civil government during the British occupation. At the evacuation of the city he retired with the enemy, and in the following October went to England, and never returned. In 1779 he was examined before the house of commons on the conduct of the war in America, and made accusations against the British commander, and printed three letters to a nobleman on the same subject, charging that the failure of the British was because of Gen. Howe's incompetency. The Pennsylvania assembly in 1788 attainted Galloway of high treason, and ordered the sale of his estates, worth, according to his testimony before a parliamentary committee, £40,000. He also published, besides several pamphlets, "Historical and Political Reflections on the American Rebellion" (London, 1780), and "Brief Commentaries upon such Parts of the Revelation and other Prophecies as immediately refer to the Present Times, in which the Several Allegorical Types and Expressions of those Prophecies are translated into Three Literal Meanings" (1802). To the latter book Dean Whitaker made a caustic reply, which called forth from Galloway an answer entitled: "The Prophetic or Anticipated History of the Church of Rome. . . Prefaced by an Address, Dedication, Expostulatory and Critical, to the Rev. Mr. Whitaker, Dean of Canterbury" (London, 1803).

GALLOWAY, Samuel, lawyer, b. in Gettysburg, Pa., 20 March, 1811; d. in Columbus, Ohio, 5 April, 1872. He was of Scotch-Irish parentage. After removing to Ohio in 1819, he was graduated at Miami in 1833, at the head of his class, and in the following year taught a classical school at Hamilton, Ohio. In 1835 he was elected professor of ancient languages in Miami, but resigned in consequence of ill health in 1836. He resumed teaching in 1838, first at Springfield, Ohio, and later as professor of ancient languages at South Hanover college, Indiana. In 1841 he returned to Ohio, where he studied law, and was admitted to the bar in 1842. He practised in Chillicothe, Ohio, until 1844, when he was elected to be secretary of state and removed to Columbus. He held this office for eight years, and after declining a re-election resumed his profession. In 1854 he was elected to congress as a Republican and served one term. He was defeated by S. S. Cox in 1856, and again in 1858. Mr. Galloway took an active part in the political conflicts arising out of the Kansas question. He rendered important legal services to the war department during the civil war. He was active in religious matters, and was for thirteen years a ruling elder in the Presbyterian church.

GALLUP, Joseph Adams, physician, b. in Stonington, Conn., 30 March, 1769; d. in Woodstock, Vt., 12 Oct., 1849. He was graduated at Dartmouth medical school with its first class in 1798, and practised his profession in Hartland and Bethel, Vt., until 1800, when he removed to Woodstock. Dartmouth gave him the degree of M. D. in 1814. From 1820 till 1823 he was president of the Castleton medical college, and its professor of theoretical and practical medicine. In 1827 he established a clinical school of medicine at Woodstock, which was incorporated as the Vermont medical college in 1835, and in 1827–'34 was a professor there. His first writings were printed in 1802 in the "Vermont Gazette," a paper published in Windsor, and attracted much attention. His other publications were "Sketches of Epidemic Diseases in the State of Vermont," to which are added "Remarks on Pulmonary Consumption" (1803, re-published in London); "Pathological Reflections on the Supertonic State of Disease" (1822), and other pamphlets; and "Outlines of the Institutes of Medicine" (2 vols., Boston, 1839).

GALLY, Merritt (gaw'-ly), inventor, b. near Rochester, N. Y., 15 Aug., 1838. His father, a Presbyterian clergyman, died in 1844, and in his eleventh year the boy became a printer. He observed the methods of engravers who came into the office to take proofs of cuts, and, with some old files and a grindstone, managed to construct a set of tools, with which he soon did all the engraving of the office, and thus earned money to obtain the books and appliances needed for the study of mechanics and engineering. At sixteen years of age he constructed a printing-press, and, in partnership with an older brother, established a newspaper, of which the boys were respectively editor and printer. This venture was fairly successful, but Merritt, desiring a more complete education, left the business to his brother, and, with no other capital than his engraving tools, set out to work his way through college. With these, and by his talent for portrait-painting, he earned sufficient money to enable him to take the full college course. He was graduated at Rochester in 1863, became a student at Auburn theological seminary, and in 1866 was ordained by the presbytery of Lyons. For three years he served as a pastor, but, owing to loss of voice, was obliged to retire from the pulpit. He then returned to his former pursuits, and constructed a press for artistic printing. This was known as the "Universal" printing-press, and its success was such that he established a manufactory for building the presses in 1869. In the progress of this enterprise he invented and constructed a large number of tools and mechanical appliances specially designed to render the presses perfectly interchangeable in every part. In 1876 he established himself in New York city, sending his presses to all parts of the world, and from this time forward he has devoted himself to invention. Over four hundred patent claims have been granted him for improvements in printing machinery, electric and telegraphic instruments and devices, philosophical apparatus, and musical instruments. He has invented a multiplex telegraph, and in 1873 patented a device for converting the variable velocity of machinery into constant velocity. In 1876 his attention was directed to the growing demand for automatic musical instruments. His first important improvement consisted in a set of pneumatic appliances acted upon by a succession of small, graded perforations in a sheet of paper passing over a tubed "tracker-range." The perforations in the paper control the pressure of air in the pneumatic apparatus, enabling the instrument not only to produce automatically the notes of the music, but to render every gradation of tone almost as perfectly as if produced by a skilful performer. His experiments resulted in the production of the "Orchestrone," the success of which has warranted the establishment of extensive works for manufacturing the instruments.

GALT, John, Scottish novelist, b. in Irvine, Ayrshire, Scotland, 2 May, 1779; d. in Greenock, Scotland, 11 April, 1839. He was educated in Greenock, and, after spending some years in mercantile pursuits, began the study of law at Lin-

coln's Inn, London. In 1809 he set out on a tour of nearly three years in southern Europe and the Mediterranean, and while in the Levant his attempt to introduce British goods into the continent by way of Turkey, in defiance of the Berlin and Milan decrees, led to considerable diplomatic correspondence. While abroad, he formed the acquaintance of Lord Byron and Mr. Hobhouse, and travelled much with them over land and water. On his return to England, he first appeared before the public as an author, and the published results of his observations while on the continent obtained a large degree of popularity. From this time until 1826, when he went to Canada, he published many works, which, though not uniformly successful, gained him public favor. His connection with Canada was through his appointment as an agent to urge on the imperial government the claims for compensation of Canadians who had sustained losses during the war of 1812. The resulting negotiations and investigations led to the organization of the Canada land company, with a capital of £1,000,000. This association procured a grant of 1,100,000 acres in one block, and a scheme for emigration on an extensive scale was adopted. Mr. Galt, in honor of whom the town of Galt, Ont., is named, was appointed superintendent of the company, and in 1827 began the work of colonization by founding what is now the city of Guelph. He then took an extended voyage on Lake Huron, visiting Detroit, Buffalo, and other places in the United States, and on his return to Canada caused a road to be constructed through the dense forest lying between Lake Ontario and Lake Huron. Notwithstanding Mr. Galt's energy, the affairs of the Canada land company did not prosper, and in 1829 he was recalled, and, after contributing signally to the prosperity of Canada, was obliged to take advantage of the insolvent debtors' act. On his return to England he resumed writing, produced many books, and contributed largely to newspapers and magazines. As a novelist he had no classic predilections, and was less distinguished for literary finish and the skilful elaboration of his plot than for rough common sense and a mild element of interest always sufficiently strong to secure his stories a reading. He wrote altogether about forty-five works, including "Lawrie Todd," a novel relating some of his Canadian experiences (1830); an "Autobiography" (2 vols., 1833); and "Literary Life and Miscellanies of John Galt" (3 vols., 1834).—His son, **Thomas,** Canadian jurist, b. in London, England, 12 Aug., 1815, was educated in England and in Scotland, and in 1828 emigrated to Canada with his father's family. Two years afterward he returned to Great Britain, remained there three years, and then, returning to Toronto, entered the employ of the Canada land company, in which he remained six years. He then began the study of law in the office of Justice Draper, and was called to the bar of Upper Canada in 1845. He at once took a prominent place in his profession, in 1858 was created a queen's counsel, and in 1869 was made a judge of the court of common pleas.—Another son, Sir **Alexander Tilloch,** Canadian statesman, b. in Chelsea, London, England, 6 Sept., 1817, was educated in England and Canada, and early displayed literary ability, contributing to "Fraser's Magazine" when only fourteen. He emigrated to Canada when a boy, and in 1833 became a clerk in the service of the British and American land company, whose operations were limited to the eastern townships of Lower Canada. He was appointed commissioner of the company in 1844, and held the office for twelve years, and under his management the business of the corporation became prosperous. In 1849 Mr. Galt was elected a member of parliament for the county of Sherbrooke, and though he was then a Liberal in politics, he opposed the administration of Messrs. Baldwin and Lafontaine, voted against the rebellion losses bill, and, despairing at that time of Canada's future, signed the annexation manifesto. When Toronto became the seat of government, after the destruction of the parliament buildings at Montreal, Mr. Galt resigned, and did not re-enter politics till 1853, when he was again elected for Sherbrooke, and continued in parliament till his resignation in 1872. On the resignation of the Brown-Dorion government in August, 1858, the governor-general, Sir Edmund W. Head, called upon Mr. Galt to form an administration, but he declined. The same year he proposed resolutions in parliament in favor of a federal union of the British North American colonies, and these became the basis of the policy of the Cartier-Macdonald government, which he joined the same year. Together with Sir George E. Cartier and John Rose, he went as a delegate to Great Britain to urge the confederation of the British North American provinces, and the construction of the Intercolonial railway before the imperial government. He was a member of the executive council, and minister of finance, from August, 1858, till May, 1862, when the ministry was defeated on the militia bill, and held the same office again from March, 1864, till August, 1866, when he resigned in consequence of his opposition to the educational policy of the administration relative to the British population of Lower Canada. He became a third time a member of the privy council, and minister of finance of the Dominion on 1 July, 1867, but resigned on 4 November of that year, for private reasons. He was a delegate to the Charlottetown union conference in 1864, and to that of Quebec the same year; a member of the confederate council of trade held in Quebec in 1865; a delegate to Washington respecting the renewal of the reciprocity treaty in 1866; and to the London colonial conference in 1866–'7. In 1868 he went to London with Dr. (now Sir Charles) Tupper, to confer with the imperial government on the Nova Scotia question, and again became finance minister on the resignation of Sir John Rose in 1869. He was a member of the fisheries commission of 1877, appointed under the treaty of Washington; conducted negotiations on behalf of Canada for a commercial treaty with France and Spain in 1879, and in 1881 was the delegate for Canada at the international monetary conference in Paris. He was Canadian high commissioner to Great Britain from 1880 till 1883. Sir Alexander is a fluent speaker, and is regarded as one of the ablest ministers of finance Canada has ever had. His monetary statements always have been noted for clearness. The most noticeable features of his financial administration were the consolidation of the public debt, with provisions for its redemption; the

encouragement of direct foreign trade; the abolition of the canal and Lake St. Peter tolls; and the issuing of provincial notes as currency. He was president of the St. Lawrence and Atlantic railway in 1852–'3, and carried out the amalgamation of that line with the Quebec and Richmond, Toronto and Guelph, and Montreal and Toronto, forming the railway system now known as the Grand Trunk railway, of which line he was in 1857–'8 a government director. He declined the honor of the C. B. (civil) in 1867, but in 1869 was created a K. C. M. G., and in May, 1878, was advanced to the dignity of Knight Grand Cross. He is an honorary LL. D. of Edinburgh university, and received a diploma for special services in connection with the international fisheries exhibition in London in 1883. During the early part of his political career Sir Alexander was a Liberal in politics, but from 1857 he has allied himself to the Liberal Conservatives. He is the author of "Canada from 1849 to 1859," and several pamphlets.

GALUSHA, Jonas, statesman, b. in Norwalk, Conn., 11 Feb., 1753; d. in Shaftsbury, Vt., 24 Sept., 1834. He removed to Shaftsbury in 1775, and in the battle of Bennington led two companies. Besides filling many minor offices, he was councillor for thirteen years, judge of the supreme court for two years, and governor of the state from 1809 till 1813, and again from 1815 till 1820. In 1808, 1820, and 1824 he was a presidential elector. He was president of the constitutional conventions of 1814 and 1822. In his religious sentiments Gov. Galusha took an interest in the affairs of the Baptist church, of which he was a member.—His son, **Elon,** clergyman, b. in Shaftsbury, Vt.; d. in Lockport, N. Y., 13 June, 1859, was ordained to the Baptist ministry in early life, and served as pastor of churches in Whitesborough, Utica, Rochester, and Lockport, N. Y. At one time he was president of the Baptist missionary convention of New York. He was an attractive preacher, and one of the most widely known and esteemed among the Baptist ministers of his generation.

GÁLVEZ, José de (gal'-veth), Marquis of Sonora, Spanish lawyer and statesman, b. in Velez-Málaga in 1729; d. in Madrid in 1786. He was graduated in law at the University of Alcalá de Henares, and gained considerable distinction by his eloquence in the defence of several lawsuits. He became acquainted in Madrid with the French ambassador, Marquis de Duras, who engaged him as an assistant in the prosecution of claims at the Spanish court. There Galvez attracted the attention of Charles III.'s prime minister, the Marquis of Grimaldi, and became his private secretary. In 1764 he was appointed a member of the council of the Indies, and in 1771 sent on a mission to Mexico to settle difficulties that had arisen between the audiencia and the proprietors of the mines regarding revenue. He soon arranged everything satisfactorily, introduced improvements into the administration, which saved several millions yearly to the government, and made several voyages into the interior to study the situation and the necessities of the country. He returned to Spain in 1774, and next year was appointed president of the council of the Indies, in which office, the most important in the kingdom after that of prime minister, he rendered great service to the state and the colonies. In 1779 he founded in the valley of Sonora in Mexico a colony, which soon prospered, and for which he was created a marquis.—His brother, **Matias,** b. in Velez-Malaga in 1731; d. in the city of Mexico, 3 Nov., 1784, entered the administration through the influence of his brother José, and obtained rapid promotion, being appointed in 1781 captain-general of Guatemala. There he laid in 1782 the foundation of the new cathedral, after the removal of the capital from old Guatemala, which had been ruined by the earthquakes of 1773. In the same year war began with England, and the British forces occupied several places on the Atlantic coast, but Galvez in 1782–'3 successively drove them from Omoa, Roatan, San Juan, Rio Tinto, and Bluefields, and in recompense was appointed in the latter year viceroy of Mexico. During his short administration he had the streets of the capital cleaned and paved, and patronized the Academy of fine arts, for which he ordered from Italy plaster models of the principal art-treasures. During his administration Alejandro Valdes began to publish "La Gazeta," the first newspaper of Mexico. He also proposed to the home government the establishment of a bank of loans, for which he had abundant subscriptions, and, although the idea was not executed in his time, he may be considered as the originator of the banking system in Spanish America. In 1784 the small-pox ravaged Mexico, and Galvez was active in mitigating the sufferings of the poorer class.—His son, **Bernardo,** b. in Malaga in 1755; d. in the city of Mexico, 30 Nov., 1786, was called to court at the age of sixteen years by his uncle, the minister, and entered as cadet in the regiment of Walloon guards. Wishing to perfect himself in military science, he obtained leave of absence in 1772 and went to France, where he served three years in the regiment of Cantabria, and was promoted lieutenant. In 1775, when Charles III. declared war against Algiers, Galvez returned to Spain and served as captain in the expedition of Gen. O'Reilly. He distinguished himself in several encounters with the Moors, rose to the rank of colonel, and on his return in the same year was given the rank of brigadier. Early in 1776 he was appointed second in command to the governor of Louisiana, Luis de Unzaga, and after the promotion of the latter to be captain-general of Caracas, toward the end of the year, took charge of the government. He made great improvements in several branches of the administration, and gathered and colonized several tribes of wandering Indians, whom he succeeded in civilizing. In 1778 the Continental congress sent Capt. Willing as agent to New Orleans, and Galvez assisted him secretly with arms and ammunition and $70,000 in cash. Spain offered her mediation between the colonies and Great Britain, and, her offer being repulsed by the latter, declared war on 16 June, 1779. Galvez immediately formed a plan of campaign, and, although he had only a small military force under his command, he did not wait for re-enforcements, but, organizing volunteer regiments, marched northward on the eastern river bank. He took Fort Manchac on 27 Aug., and in September captured Baton Rouge, Fort Panmure, and Fort Natchez. In October he received re-enforcements from Havana, and was made a major-general. He then in-

El Conde de Galvez

vested Mobile with his combined forces, and in Feb., 1780, captured Fort Charlotte, forcing the city to surrender. His army, with the organized militia, soon rose to 14,000 men, and he invaded the northwestern part of Florida, defeating the British in several encounters, and besieged Pensacola, but, being unable to attack it from the sea-side for want of siege artillery and a fleet, went in January, 1781, to Havana, and returned in February with the necessary material. The British capitulated on 9 May, and, together with 800 prisoners and the armament, the whole west coast fell into the hands of the Spanish. This feat of Galvez was celebrated by M. de Poydras in a poem which was published at the expense of the king of France. After the signature of peace at Versailles, 3 Sept., 1783, Galvez was rewarded by the title of count and the rank of lieutenant-general, and was appointed captain-general of Cuba. On the death of his father he was promoted viceroy of Mexico, taking charge of the government, 17 June, 1785. He improved the working of the mines, augmenting the crown revenue from them, while at the same time he protected their owners from the unjust exactions of the revenue officers, rebuilt the old theatre, and repaired the causeways of the Piedad and Tlalpam. In 1785 a famine desolated the province, and an epidemic broke out in the following year, and Galvez did all in his power to alleviate the public sufferings, giving large contributions from his private purse for the relief of the poor. He also constructed on the site of the ancient summer palace of the Montezumas, Chapultepec, a palace for himself and his successors at the expense of over $300,000, and, as it was built like a strong fortress with bastions and heavy artillery, his enemies calumniated him at the court, insinuating that he intended to declare himself independent of Spain. The home government began to manifest some distrust, and this preyed on Galvez's mind. He became melancholy and reserved, seeking his only distraction in the chase. In consequence of violent overexertion he fell ill and died after a few days in the archiepiscopal palace of Tacubaya.

GÁLVEZ, Mariano, b. in Guatemala in the latter part of the 18th century; d. in Mexico about 1850. He was a foundling, and was adopted by a rich family, whose name he assumed. He received his early education in the convent-school of Guatemala, but afterward studied law in the university of that city, and was graduated as doctor in 1819. He was private counsellor of Gov. Gainza (*q. v.*), and it is probably due to his influence that the latter did not oppose the popular movement for liberty. Galvez favored the annexation of Guatemala to Mexico, but when the first Federal congress of Central America met in Guatemala in 1825, he was one of the deputies, and became president. In the civil war of 1826, Galvez took part with the Federalists, and headed a revolutionary movement against the Unitarian government, which, although promptly suppressed, hastened the invasion of Guatemala by Morazan, whose forces Galvez joined in Ahuachapam. On 24 Aug., 1831, Galvez was elected chief of the state of Guatemala, and under his administration science, arts, and education were fostered, and many public improvements made. In February, 1835, he was re-elected for a second term, during which the Asiatic cholera afflicted the country, and the reactionary party persuaded the uneducated people of the interior that the disease was caused by the poisoning of the springs by order of the government. Several revolutionary movements began, and in January, 1838, the city of Antigua, Guatemala, pronounced against Galvez's government. On the 13th the revolutionary forces of Sacatepeque occupied the city of Guatemala, and Galvez left the country for Mexico, where he practised law for some years with distinction.

GAMA, Antonio León de, Mexican astronomer, b. in the city of Mexico in 1735; d. there, 12 Sept., 1802. He studied in the College of San Ildefonso, early showing a taste for astronomy. As the means for a course in that science were wanting at that time in Mexico, he instructed himself by reading the works of Newton, Woebler, Gravesand, Muschembrock, Bernaulis, La Caille, and other eminent writers. He was for many years a clerk in the office of the secretary of the supreme court, and nothing would have been known of his scientific work if the astronomer La Lande had not published in his "Connaissement des temps" Gama's name as that of the author of the first exact observation of the longitude of Mexico, and eulogized his calculation of the eclipse of the sun of 6 Nov., 1771, which he promised to publish in the memoirs of the Academy of Paris. At the same time he commissioned Gama to take observations of the satellites of Jupiter, and of the tides on the Pacific coast from Acapulco to Valparaiso. This called the public attention to the merits of Gama, and the scientist Joaquin Velasquez de Leon, at the foundation of the Mining school, appointed him professor of mechanics, pyrotechnics, and aerometry, and commissioned him to make observations upon the impending eclipse of the sun and other celestial phenomena. The viceroy, Manuel Flores, who was himself a distinguished mariner and geographer, commissioned him to calculate the probable date of appearance of a comet, which had been predicted by the London astronomers for 1788. The necessity of providing for his family forced Gama to give time to mechanical pursuits, which would have been better employed in the service of science. But he still found leisure to write on experimental physics, medicine, mathematics, and Mexican antiquities, of which he exhibited profound knowledge. When in 1790 the Aztec calendar-stone was discovered, he published an essay about it, "Historical and Chronological Description of Two Stones that were found in the Plaza of Mexico upon the Occasion of laying the New Pavement," explaining for the first time its use among the Indians. Also, a treatise on their arithmetic, gnomonics, and hieroglyphics. Prescott praises Gama as treating his subject, not with the accustomed credulity of the antiquarian, but with the caution of a mathematician, who demonstrates whatever he asserts. Gama's only work preserved in book-form is "Descripción Orográfica del Eclipse del Sol, el 24 de Junio de 1778" (Mexico, 1778).

GAMA, José Basilio da, Brazilian poet, b. in the district of Rio-das-Mortes, Brazil, in 1740; d. in Lisbon, Portugal, 31 July 1795. He belonged to a poor family, was brought to Rio Janeiro at an early age by a monk of St. Francis, and was educated by the Jesuits, who afterward received him into their order. He was reduced to great poverty after the missionaries were expelled from Brazil, but finally succeeded in entering a seminary, where he studied the scholastic philosophy. He then went to Portugal, and from there to Italy. He returned to Portugal in 1775, being called by the marquis of Pombal to celebrate the unveiling of an equestrian statue of king José I., in an ode, which was awarded the prize, and Gama was given a place in the department of state and a patent of nobility. After the downfall of Pombal, Gama left his office and went to Brazil, where he founded an academy of Arcadians modelled after that of

Rome, which was dissolved by the viceroy, Count of Rezende, under suspicion that it was a political association. Gama was sent as a prisoner to Portugal in 1785, narrowly escaped banishment to Angola, and was only set at liberty in 1786. About this period he became an enemy of the Jesuits, and published his poem of "Uruguay" (1789), the object of which is to show that they had attempted to found an independent state among the Indians of that province. The poem of "Uruguay" contains some clever descriptions of the forest scenery of South America, but, while inveighing against the Jesuits, says nothing of the civilization they introduced, or of its destruction by their banishment from the colonies of Spain and Portugal. Da Gama afterward was elected a member of the Academy of Lisbon. He is buried in the church of Boa Hora in that city. He also published "Lenitivo da Sandade do principe D. José" (1788), and "Quitubia," another poem, named after a negro chief who assisted the Portuguese in an expedition against Angola (1791).

GAMA, José Bernardo Fernández, Brazilian historian, b. in Pernambuco in 1802; d. in Rio de Janeiro in 1852. In his youth he entered the army, participated in the constitutional revolution of Bahia, 10 Feb., 1821, and also in forcing the Portuguese troops to abandon Brazil, 15 Feb., 1822, and the subsequent declaration of independence at Ipiranga, 7 Sept., 1822. For the action of Bahia he was decorated with the military medal that was instituted in commemoration of that movement, and in 1837 received the order of the Cruceiro; but, as he was of humble family and had no friends in government circles, he never advanced above the rank of lieutenant of the staff, and as such was retired in 1842. He then gave up his time to historical researches, and published a work which established his name as a writer, "Memorias Historicas da Provincia de Pernambuco, precedidas de um ensaio topographico-historico" (4 vols., Pernambuco, 1844–'9). As he was too poor to have this work printed, the provincial assembly of Pernambuco authorized him, in 1843, to establish a quarterly lottery to the extent of fifteen contos de reis (about $7,500), the proceeds of which were to be invested in its publication.

GAMARRA, Agustín (gah-mar'-ra), Peruvian soldier, b. in Cuzco, 27 Aug., 1785; d. in Ingavi, Bolivia, 18 Nov., 1841. He studied theology in the college of San Buenaventura of his native city, but entered the Spanish army in 1809 as a volunteer. He rose gradually to the rank of lieutenant-colonel, served in Bolivia against the Argentine forces, and in 1821 came to Lima in command of the 2d battalion of the regiment of Cuzco. He then joined the Independents, was promoted colonel and then brigadier, and served as chief of the staff of the Peruvian contingent under Bolivar and Sucre in 1824. He was promoted general of division, appointed prefect of Cuzco, and in 1828 was commander-in-chief of the army in the campaign against Bolivia, concluding the war by the treaty of Piquisa, for which he was rewarded with the rank of grand marshal. He afterward pronounced against Lamar, president of Peru, was declared provisional president in 1829, and in the same year elected president for four years. His administration was progressive, although constantly interrupted by revolutionary movements. When his term was finished he delivered the executive to Gen. Orbegozo, but soon headed a rebellion against him. He acknowledged the government of Orbegozo in 1834, and emigrated to Bolivia. When Gen. Santa Cruz interfered in the Peruvian struggle between Orbegozo and Salaverry, Gamarra opposed the intervention with a force that he had raised in the south of Peru, but was defeated by Santa Cruz at Yanacocha, and banished to Chili in June, 1835. When war was declared between Chili and Peru in 1837, Gamarra joined the second Chilian expedition, and in 1839 was again elected president of Peru. In 1841, when the Bolivians overthrew the government of Ballivian and pronounced again in favor of Santa Cruz, Gamarra invaded the neighboring republic at the head of an army, but was defeated and killed in battle at Ingavi.

GAMARRA Y DÁVALOS, Juan Benito (gamar'-rah), Mexican author, b. in Zamora, Mexico, in 1745; d. in the city of Mexico, 1 Nov., 1793. He studied in the College of San Ildefonso in the city of Mexico, and in November, 1764, entered the congregation of San Felipe Neri in the town of San Miguel. Here his superiors appointed him their attorney-general, and sent him to Madrid and Rome to conclude arrangements for the final establishment and endowment of the congregation in Mexico. Pope Clement XIII. made him apostolic prothonotary, and he was given the degree of doctor of theology by the University of Pisa, and elected a member of the Academy of Bologna. On his return to Mexico he brought a collection of paintings, drawings, a large library, and a collection of physical instruments for his college. He reorganized the plan of studies of the college, and was also the first in Spanish America to introduce a course of lectures on modern philosophy. He took great interest in the advancement of instruction in New Spain, and was the founder of many new colleges. The viceroy proposed him for several high offices, but Gamarra refused them all. At the time of his death he was preparing a plan for the organization of another university for the viceroyalty. He published "Musa Americana" (Cadix, 1769); "Elementa recentioris Philosophiæ" (Mexico, 1774); "Académias filosóficas" (1774); "Las antigüedades de Xochicalco" (Bologna, 1774); "Errores del Intendimiento Humano" (Puebla, 1776); "Máximas de Educacion" (Mexico, 1780); "Reflexiones Criticas sobre las Historias Escojidas del Antiguo Testamento" (1781); and left others in manuscript, which are preserved in the National library of Mexico and by private collectors.

GAMBIER, James, admiral, b. in the Bahama islands, 13 Oct., 1756; d. in Iver, near Uxbridge, England, 19 April, 1833. His ancestors were French Protestants, who were expatriated by the revocation of the edict of Nantes, and his father was lieutenant-governor of the Bahamas. James entered the navy at an early age and obtained the rank of post-captain in 1778. He commanded the frigate "Raleigh" and was engaged in the reduction of Charleston, S. C., in 1780. In the following year he aided in repelling the French attack upon Jersey. He was appointed to command the "Defence," of 74 guns, in 1793, and aided Lord Howe against the French fleet, which was commanded by Villaret de Joyeuse. The "Defence" was the first to break through the enemy's line in the engagement, which took place on 1 June, 1794. He was advanced to the rank of rear-admiral in 1795, of vice-admiral in 1799, and was third in command of the channel fleet in 1801. In 1802 he was appointed to be the governor of Newfoundland. Having been raised to the rank of full admiral in 1805, he commanded the fleet during the three days' bombardment of Copenhagen in September, 1807. He captured the Danish forces, and in return for his services was made a baron and offered a pension, which he declined. In

1808 he was appointed to command the channel fleet, and prepared a code of signals and general instructions for the discipline of the navy. He attacked the French squadron in Aix roads in 1809 and burned five of its ships. In consequence of a disagreement with Lord Cochrane, who had charge of the British fire-ships, Lord Gambier requested a court-martial, by which he was acquitted. In 1814 he was placed at the head of the commissioners to negotiate a treaty with the United States, which was concluded at Ghent, 24 Dec., 1814. Subsequently he lived in retirement, received the grand cross of the Bath in 1815, and was made admiral of the fleet on the accession of William IV.

GAMBLE, Hamilton Rowan, governor of Missouri, b. in Winchester, Va., 29 Nov., 1798; d. in Jefferson City, Mo., 31 Jan., 1864. His education was received principally at Hampden Sidney, and when about eighteen years of age he was admitted to the bar of Virginia. In 1818 he went to Missouri, and resided several years in Franklin, Howard co. He was elected secretary of state in 1824, which office he held one year. He then became a successful lawyer in St. Louis, served on the bench from 1851 till 1855, and was presiding judge of the supreme court of Missouri. At one time he was a member of the state house of representatives. In 1861 he was elected to the State constitutional convention, which body appointed him provisional governor of Missouri, the regular governor, Claiborne F. Jackson, having joined the secession party. He held this office until his death. In the State convention of 1861, as chairman of the committee on Federal relations, Gov. Gamble made a report expressing a hope for an amicable adjustment of the existing difficulties without civil war. He pronounced the president's call for troops unconstitutional, and appealed to the legislature to unite for the preservation of the state. Later the governor was authorized to receive a loan of $500,000 and to purchase ammunition, and the state military was put under his command, On 12 June, 1861, he issued a proclamation calling into service 50,000 of the state militia "for the purpose of repelling invasion, and for the protection of the lives, liberty, and property of the citizens." On 12 June, 1862, the State convention passed a resolution expressing confidence in the integrity and patriotism of the governor and state officers. On 13 June he submitted a message to the convention, declaring that he would furnish aid to any state that would adopt a measure of emancipation. On 22 July, Gov. Gamble summoned the militia to defend the state against Confederate guerillas. He called the adjourned State convention to reassemble in June, 1863, to consult and act on the subject of emancipation, and, after expressing a desire for peace, offered his resignation, which was not accepted. Gov. Gamble in 1838 organized the 2d Presbyterian church in St. Louis.

GAMBLE, James, jurist, b. in Lycoming county, Pa., 28 Jan., 1809; d. in Williamsport, Pa., 22 Feb., 1822. He received a public-school education, studied law, and was admitted to the bar in 1832. He was elected to the legislature in 1841, and re-elected in the following year, serving as chairman of the committee of ways and means, when the appropriation for the Portage railroad over the Alleghany mountains was made. He was then elected to congress as a Democrat, serving from 1851 till 1855. He was made president-judge of the district composed of Clinton, Centre, and Clearfield counties in 1859, but retired to private life in the following year. He was elected president-judge of Lycoming district in 1868, and served ten years.

GAMBLE, Thomas, naval officer, d. 10 Oct., 1818. He was the son of Maj. William Gamble, an officer of the Revolution. The son was appointed midshipman in 1804, lieutenant in 1810, and commander in 1816. He died while commanding the "Erie" in the Mediterranean.—His brother, **John M.,** b. about 1791; d. in Brooklyn, N. Y., 11 Sept., 1836, was appointed midshipman, and 2d lieutenant of the marine corps in 1809. He became 1st lieutenant in 1811, captain in 1814, major by brevet in 1816, major in 1834, and lieutenant-colonel by brevet, 3 March, 1827.—Another brother, **Peter,** d. 11 Sept., 1814, was appointed midshipman in 1809 and became lieutenant in 1814. He was killed in the battle of Lake Champlain, while acting 1st lieutenant of the flag-ship. —Another brother, **Francis G.,** an officer in the U. S. navy, died in the West Indies, 29 Sept., 1824.

GAMBOA, Francisco Javier (gam-bo'-ah), Mexican lawyer, b. in Guadalajara, 17 Dec., 1717; d. in the city of Mexico, 4 June, 1794. He came of a rich family, but was left an orphan in his early youth, and his fortune was squandered by the executors. He began his studies at the College of San Juan, in his native city, continued at that of San Ildefonso, Mexico, and finished them in the university of that city in 1739. He then entered the practice of law, and soon became famous by his successful defence of a complicated suit. In May, 1755, he was sent by the tribunal of commerce on a commission to Madrid, to arrange some intricate questions at court, and there studied mining engineering, afterward writing a treatise on subterranean geometry, which appeared as part of his work on law. He was treated with distinction by Charles III., and commissioned president of the supreme court of Santo Domingo, where he arranged the ordinances of the court, and composed the famous "Black Code" for the government of the slaves. On being promoted to the presidency of the supreme court of Mexico, he reformed the forensic practice, introduced a clear style of pleading, and was the founder of a new school of jurists. To simplify the proceedings still further, he labored for many years on a codification of the mining laws, which appeared under the title of "Comentarios á las ordenanzas de minas, dedicadas al Rey Don Carlos III." (Madrid, 1761), accompanied by an alphabetical list of mines, their distance from the capital, and of the most common mining terms of the province, that differ from those used in Spain. The arguments in two of the most famous lawsuits that he defended were printed (Mexico, 1753 and 1754), and he left many manuscripts, which are preserved in the National library.

GAMMELL, William, educator, b. in Medfield, Mass., 10 Feb., 1812. He was graduated at Brown in 1831, and for the three years following was a tutor there. He was chosen professor of rhetoric and English literature in 1835, and in 1880 was transferred to the chair of history and political economy. In 1859 Rochester university gave him the degree of LL. D. Prof. Gammell's service in Brown university covered a term of thirty years. Since his retirement from the university in 1864 he has devoted much attention to the affairs of various educational and charitable institutions. He has written a life of Roger Williams (Boston, 1846), and one of Gov. Samuel Ward, for Sparks's "American Biographies"; also a "History of American Baptist Missions," at the request of the American Baptist missionary union. For a time he was one of the editors of the "Christian Review," and he has written extensively for that and other periodicals.

GANA, José Francisco, Chilian soldier, b. in Santiago, 13 Nov., 1791; d. in Nuñoa, 10 Feb., 1862. He entered military service in 1806 as a cadet, and in 1808 was promoted 2d lieutenant of the king's regiment, in which he served during the apprehension of an English invasion in 1809, and after the declaration of independence in 1810 till 1812, when he retired to give himself entirely to study. In 1820 Gana entered the service again on 3 May, and took part in the expedition of Gen. San Martin. Gana with his battalion captured the city of Huaras with the whole garrison, and, as the provinces of Trujillo, Lambayeque, and Piura pronounced for the insurrection, the whole northern portion of Peru was separated from the rule of the viceroy. The viceroy, La Serna, abandoned the capital on 6 July, and on the 12th San Martin occupied the city, and independence was solemnly proclaimed on 28 July. Meanwhile Gana took part in the assault of Callao, 14 Aug., and after the final surrender of 21 Sept. was promoted major. Gana participated in Gen. Sucre's expedition to the south, and commanded a column that attacked the Spanish forces at Quilca, 14 Aug., 1823, and, notwithstanding the loss of one third of his troops, routed the enemy and pursued him toward Arequipa. In October he returned to Chili, and in 1825 was sent with his battalion under Col. Sanchez to garrison Talca against the attacks of the bandit Pincheira, whom he surprised and defeated. In December of the same year he was promoted colonel, and his battalion formed part of Gen. Freire's expedition to Chiloe, which archipelago was still held by the Spanish under Gen. Quintanilla. He participated in the decisive battle of Bellavista, 14 Jan., 1826, and was commissioned by Freire to sign the capitulation of Pudeto on 19 Jan., which surrendered the rest of Chilian territory to the independent forces. In 1830 he joined the rising of his party under Freire, and, after their defeat at Lircay on 17 April, declined to serve under the government of the conservatives, and retired from active service. He was called into service again by the government of Gen. Bulnes, 7 Nov., 1842, and assigned to the presidency of the military college. Twice he represented the district of Talca in congress, and in 1849 was appointed intendant of the province of Atacama. In September, 1851, he was called by the new president, Manuel Montt, to the secretaryship of the army and navy, and in 1853 was appointed president of the military court of appeals, being promoted in 1854 to brigadier-general. At the same time he was dean of the philological faculty of the university, a literary honor which no other Chilian general ever attained. In 1856 he was sent as minister to Ecuador, and on his return in 1857 again took charge of the portfolio of the army and navy. In 1858 he was sent on a special mission to Spain. In 1860 he was elected senator of the republic, and in 1861 appointed counsellor of state.

GÁNDARA Y NAVARRO, José de la (gan'-da-ra-e-nav-ar'-ro), Spanish soldier, b. in Bilbao, 15 Oct., 1820. He entered the military college as a cadet in 1832, joined the army in 1834 as sublieutenant, and served in the campaign against the Carlists till 1839, participating in all the battles. Afterward he served with distinction in the colonies, and, after reaching the rank of brigadier, was appointed, in 1857, governor of the islands of Fernando Póo and Annobon y Corisco. In 1862 he became major-general, and in November of that year was made military governor and commander-in-chief of the province of Santiago de Cuba. The insurrection against the Spanish domination of Santo Domingo, which had been annexed in 1861, began in the department of Cibao in February, 1863; the troops were soon driven into the coast-towns, and the interior cities wrested from them. Gándara, without waiting for orders from the home-government, despatched re-enforcements to his comrades by the frigate "Isabel II.," then in port. He afterward received orders to march with all the forces at his command to the assistance of the commander-in-chief. He landed in Puerto Plata, 17 Sept., 1863, driving the insurgent forces back, and afterward occupied the city of Santo Domingo and San Cristobal, the latter after a series of bloody engagements with the enemy. In 1864 he was promoted to lieutenant-general and appointed captain-general and commander-in-chief of the island, and in that year won the battle of Montecristi. The provisional government now began peace negotiations, which, however, led to no favorable issue. Meanwhile the home government resolved to abandon the struggle, and in May, 1865, Gandara, with his troops, evacuated the island. He subsequently received the appointment of governor-general of the Philippine islands, and, after the restoration of the Bourbon monarchy, was military chief of the king's household, and captain-general of Castile. He published "Historia de la Anexión y Guerra de Santo Domingo."

GANNEAKTENA, Catharine, Indian convert, b. in northern New York; d. in La Prairie, Canada, in 1673. She was by birth an Erie Indian, but had been adopted into the Oneida tribe. Her husband was a Christian Huron, and she showed a desire to embrace Christianity when Father Bruyas preached the gospel to the Oneidas in 1668. Catharine had long been esteemed for her modesty and gentleness, and was of great assistance to the missionary in learning the language of the tribe. She was ill treated by her relatives because of her inclination to Christianity, and to escape persecution she set out for Montreal in company with her husband, and afterward went to Quebec, where she was baptized by the name of Catharine, and confirmed by Bishop Laval. During her stay at Montreal she received instruction from Father Raffeix, who requested her to found a village in which Indians from the Five Nations that were afraid to acknowledge their conversion to Christianity might settle. At the close of 1669 she was joined by several members of her family, who had become converts, and founded the colony of La Prairie. The village received constant accessions from the missions in the Iroquois cantons, and in 1670 had become so important that a regular government was organized. A system of laws was promulgated, according to which no one was allowed to reside in the village except he renounced three things—belief in dreams, polygamy, and drunkenness. Any Indian violating these rules was expelled. The little colony was long noted for the piety and innocent life of its inhabitants, who regarded their founder as a saint and reverenced her as a mother.

GANNETT, Ezra Stiles, clergyman, b. in Cambridge, Mass., 4 May, 1801; d. near Boston, Mass., 25 June, 1871. He was a grandson of President Ezra Stiles of Yale. He was graduated at Harvard with first honors in 1820, studied divinity, and in 1824 became the colleague of Dr. William E. Channing in Boston, finally succeeding him as pastor. He was a foremost figure in the Unitarian controversy which agitated the New England churches in 1825–'35, but in the latter year was driven by illness to Europe, and during the summer following his return was seized with a paralytic stroke, which left him a cripple for life. He became co-editor of the "Christian Examiner," and his lectures on

Unitarian doctrines were the delight of Boston theologians. He delivered the annual election sermon in 1842, in 1843 the "Dudleian lecture," and in that year was given the degree of D. D. by Harvard. He took part in a second controversy which arose in the Unitarian denomination, and, circumscribed as he was by his infirmity, he did a large amount of ministerial and literary work. He was president of the American Unitarian association in 1847–'51, of the Benevolent fraternity of churches in 1857–'62, and an overseer of Harvard in 1835–'58. On the bronze bas-reliefs of the soldiers' monument on Boston common his face appears in the sanitary commission group; and the Freedman's aid society had his best labors in its behalf. He was killed by a railway accident.

GANNON, Mary, actress, b. in New York city, 8 Oct., 1829; d. there, 22 Feb., 1868. She was placed on the stage by her parents when she was three years of age, in the Richmond Hill theatre, and at the age of six appeared at the Bowery theatre. For years she played child's parts, and later appeared in medley performances that involved song, dance, and rapid changes of character. In 1854 Miss Gannon married George W. Stephenson, a lawyer of New York city, who soon died. Resuming her maiden name, she became successively a member of several stock companies, and was valued for her sprightliness and versatility. She excelled in comedy and burlesque, but was not without ability to render sentimental and pathetic characters effectively.

GANO, John, clergyman, b. in Hopewell, N. J., 22 July, 1727; d. near Lexington, Ky., in 1804. He was of Huguenot extraction, his great-grandfather, Francis Gevneaux, having escaped from the island of Guernsey during the persecution of the Protestants and settled at New Rochelle, N. Y. His education was irregular and limited. He was ordained, 29 May, 1754, as pastor of the Scotch Plains, N. J., Baptist church, and shortly afterward travelled and preached extensively in the southern colonies, and was settled as pastor for two years in North Carolina. In 1760 he returned to New Jersey, and also preached for a while in Philadelphia and New York. When, in 1762, the 1st Baptist church in New York was organized, he became its pastor and continued successfully in this relation for twenty-six years. Mr. Gano was an ardent patriot, and in the war of the Revolution served for some time as chaplain to Gen. Clinton's New York brigade. In the conflict on Chatterton Hill he was continually under fire, displaying a cool and quiet courage, which commanded the admiration of officers and men. Returning to New York at the close of the war he found his church scattered and greatly reduced, but prosperity soon returned. In May, 1788, he removed to Kentucky, and became pastor of the Town Fork church, near Lexington, where he remained till his death. He was twice married; his first wife was the sister of the wife of Dr. Manning, first president of Brown university. It has been said of him that, "as a minister of Christ, he shone like a star of the first magnitude in the American churches."—His son, **Stephen,** clergyman, b. in New York city, 25 Dec., 1762; d. in Providence, R. I., 18 Aug., 1828, was prevented by the Revolutionary war from receiving a collegiate education, and pursued a short course of study with reference to the medical profession. He was appointed a surgeon in the army at the age of nineteen, and for two years was in the public service. While practising as a physician at Tappan, now Orangetown, N. Y., he was converted, and, at once feeling it his duty to give himself to the Christian ministry, was ordained 2 Aug., 1786. After preaching for a time in the vicinity of New York he was called, in 1792, to the pastorate of the 1st Baptist church in Providence, R. I. He accepted the call and spent the remainder of his days in ministering, with distinction and success, to this, the oldest Baptist church in the United States. He was one of the overseers of Brown university from 1794 till his death.

GANSE, Hervey Doddridge, clergyman, b. in Fishkill, N. Y., 7 Feb., 1822. He was graduated at Columbia in 1839 and at the New Brunswick seminary in 1843. He was licensed to preach in 1843, and had charge of Dutch Reformed churches in Freehold, N. J., and New York city till 1876, when he became pastor of the first Presbyterian church in St. Louis. This charge he resigned in 1883, to become first secretary of the Presbyterian board of aid for colleges and academies, in Chicago, Ill. In 1861 the degree of D. D. was conferred upon him by Rutgers college. His publications are "Bible Slave-holding not Sinful," a reply to "Slave-holding not Sinful" by Dr. Samuel B. How (1856), and various sermons and hymns.

GANSEVOORT, Peter, soldier, b. in Albany, N. Y., 17 July, 1749; d. there, 2 July, 1812. He was appointed major of the 2d New York regiment, 19 July, 1775, and in August joined the army that invaded Canada under Montgomery. He was made lieutenant-colonel, 19 March, 1776, colonel of the 3d regiment, 21 Nov., 1776, and appointed to the command of Fort George. In April, 1777, he had charge of Fort Schuyler, previously called Fort Stanwix, and gallantly defended it against the British and Indians under St. Leger, whose co-operation with Burgoyne he prevented. The siege lasted twenty days, and for his vigorous service he received a vote of thanks from congress. In the spring of 1779 he was ordered to join Sullivan in his western expedition. He distinguished himself at the head of a body of picked men by surprising the lower Mohawk castle, and captured all the Indian inhabitants by the dexterity of his movements. He was appointed brigadier-general in 1781 by the legislature of New York. In 1783 he accompanied Gen. Washington on his tour to the northern battle-fields. During the controversy caused by the New Hampshire land grants, many of the insurgent regiments belonged to Gen. Gansevoort's brigade. These disturbances arose in Schaghticoke, St. Coych, and adjacent regions. He repaired to Saratoga and solicited troops from Gen. Stark, but the latter refused to interfere unless ordered by Gen. Heath, his superior officer. With what volunteers he could raise, Gansevoort advanced to St. Coych, where he found a force of 500 men ready to support the insurgent militia. Having only 80 men, he retired five miles, and attempted, by writing to the leaders, to induce them to lay down their arms, but his request was in vain, and the so-called rebels remained undisturbed. Gen. Gansevoort filled several important offices. He was commissioner of Indian affairs, commissioner for fortifying the frontiers, and military agent. He was made a brigadier-general in the U. S. army in 1809.—His brother, **Leonard,** b. in Albany in 1751; d. there in 1810, was a delegate to the Continental congress from New York during 1787–'8. He was also a member of the New York provincial congress, state senator in 1791–'3 and 1797–1802, and member of assembly in 1778–'9 and 1788. His country-seat of White Hall, near Albany, formerly renowned for its generous hospitality, was occupied by his descendants until recently, when it was destroyed by fire.—Peters'

cousin, **Leonard,** b. in 1754; d. in 1834, was first judge of Albany county in 1794–'7.—Peter's grandson, **Guert,** naval officer, b. in Gansevoort, Saratoga co., N. Y., 7 June, 1812; d. in Schenectady, N. Y., 15 July, 1868, was the son of Leonard H. Gansevoort. He was appointed midshipman in 1823; lieutenant in 1837; commander, 14 Sept., 1855; captain, 16 July, 1862; and commodore in 1866. He was lieutenant on the brig "Somers" when Commander Alexander S. Mackenzie executed Midshipman Spencer for mutiny (see MACKENZIE), and was one of the council of officers that approved and sustained the act. He rose to prominence during the Mexican war, in which he distinguished himself in command of the "John Adams." He was engaged in the Indian war of 1856, and did honorable service in the battle of Sitka on the Pacific coast. For some time after the beginning of the civil war he was chief of the ordnance department at the Brooklyn navy-yard, but subsequently was in command of the iron-clad "Roanoke." His last cruise ended in September, 1864, and he retired as commodore on 28 Jan., 1867. His service in the navy covered a period of forty-five years, eighteen being spent at sea.

GANTT, Edward, clergyman, b. in Prince George county, Md., in 1746; d. near Louisville, Ky., about 1837. He studied medicine, received the degree of M. D., and entered on the practice of his profession in Somerset county, Md. His attention was next turned to the ministry, for which he made due preparation. He then went to England, where he obtained orders in 1770. Returning home, he officiated for a time in his native parish, and in 1776 went to All Hallow's parish, Worcester county. Four years later he became rector of his native parish, and sustained himself on his estate by the practice of medicine. In 1795 he removed to Georgetown, D. C., and occupied himself in the duties of the ministry. After 1800 he was repeatedly chosen chaplain to the U. S. senate. About 1807, under the auspices of Bishop Claggett, he went to Kentucky, in the interests of the Protestant Episcopal church, and died there at an advanced age.

GARAKONTHIE, Daniel, chief of Onondaga Indians, d. in Onondaga, N. Y., in 1676. After the flight of the French missionaries from Onondaga in 1658, Garakonthie, who, although not yet a Christian, had examined with care the customs of the French colonists, and the doctrines of the missionaries, became openly the protector of the Christians and an earnest advocate for peace. In 1661 he persuaded the Onondagas to send an embassy to Quebec, and to restore some of their captives as a preliminary to peace. Father Le Moyne accompanied the embassy on its return, and was received with great honor by Garakonthie, who converted his cabin into a chapel for the missionary. The chief then set out on an embassy to Montreal with nine of the French prisoners. He was well received, restored his captives, and obtained the liberation of several of his countrymen. On his return he baffled the efforts of the chiefs who wished to make war on the French, frustrated a plot against Le Moyne's life, and prepared to conduct the missionary and the remaining captives to the St. Lawrence in 1662. During the war that followed the departure of Le Moyne, Garakonthie endeavored to procure the release of French captives, and protected the little body of Christians at Onondaga as far as his authority extended. In the spring of 1664 he succeeded in obtaining a decree of the council for another embassy, the object of which was to restore the French prisoners and solicit peace; but the French, while expressing their gratitude for the efforts of Garakonthie, avoided making terms. In August, however, an agreement was made for an exchange of prisoners, and he set out with the French captives, but his party was attacked by the Algonquins, and, after severe loss, compelled to return. Although always friendly to the French, and feeling the truth of Christianity, he did not show any desire to become a Christian until 1669. Then, at a conference with the French governor in Quebec, he declared his love for Christianity, and that he renounced "polygamy, the vanity of dreams, and every kind of sin." He was baptized with great pomp in the cathedral of Quebec by Bishop Laval, the governor being his godfather, and Mlle. Bouteroue, the daughter of the intendant, his godmother. He received the name of Daniel at the font, and was then entertained with honor in the castle. His conversion produced a great effect, not only at Onondaga, but in the other settlements. Some of the sachems endeavored to diminish his influence, declaring that he was no longer a man, and that the black robes had disordered his intellect; but when any embassy was to be sent, or an eloquent speaker was desired for any occasion, Garakonthie quickly recovered all his power. His influence was recognized even by the English governors of New York, who asked his mediation to effect a peace between the Mohawks and Mohegans. He was frequently engaged on embassies to New York and Albany, as well as to Quebec and Montreal. He opposed the superstitions and dances of the tribes, and did much to check them. When he found his end approaching he gave his last counsels to his family, and ordering the funeral banquet to be prepared, he invited to it the chiefs of Onondaga, and sang his death-song. Then he exhorted the sachems to become Christians and to banish liquor from the cantons. In order to induce his countrymen to follow his precepts, Garakonthie had adopted many European customs, and had learned to read and write, although advanced in years.

GARAY, Francisco de, Spanish explorer, d. in Mexico in 1523. He was a companion of Columbus on his second voyage, was afterward famed for his opulence, and became governor of Jamaica. In 1519 Alvaro Alonso de Pineda commanded a fleet of four ships which were sent out by Garay to Yucatan. The ostensible object of the voyage was to search for a strait west of Florida, but pecuniary gain was the real purpose. The strait was not found, and the ships, turning toward the west, explored rivers and ports, and communicated with the inhabitants. They finally reached Vera Cruz, and a pillar was set up between that place and Tampico to commemorate the discoveries of Garay. After eight months of exploration, the navigators took possession of the region for 300 leagues along the coast in the name of the crown of Castile. The Mississippi, then called "Espiritu Santo," was shown distinctly on the maps of Garay's pilots. When Charles V. examined the account of the explorer, a royal edict was issued in 1521 granting Garay the privilege of colonizing at his own cost the region he had discovered, the limits of the grant being to a point south of Tampico and the extreme discovery of Ponce de Leon, near the Alabama coast. This did not satisfy Garay, and in 1523 he lost fortune and life in a personal dispute with Cortes for the control of the region on the river Panuco.

GARAY, Juan de, Spanish soldier, b. in the Basque provinces in 1541; d. in South America in 1584. He was born of an illustrious but poor family, and, in the hope of bettering his fortunes, embarked with other adventurers for America.

The governor of Paraguay appointed him his secretary, but he soon became dissatisfied with his position, and unsuccessfully requested employment in the army. Shortly afterward he discovered that the Indians were about to attack the town, and with forty Spaniards put to flight several hundred of the savages. He was then appointed captain, and sent with eighty Spaniards to sail up the Parana. After undergoing numerous dangers and discovering an immense country, he founded, near this river, in July, 1573, the city of Santa-Fe de Vera-Cruz, but before finishing it he was obliged to hasten to the aid of his government against the Charruas Indians. He gave battle near the river Uruguay, and defeated them completely. As a reward for these services he was named lieutenant-general by Philip II., and was afterward appointed governor of Assuncion in 1576. Having visited the old site of Buenos Ayres, he founded that city anew in 1580 on the ruins of the old, and surrounded it with fortifications. Seeing that he was obliged to meet frequent attacks by the Indians, he thought the best way to spare the effusion of blood was to try to civilize them. Accompanied by missionaries, he travelled over the different countries of his government with this object. He formed the Indians into colonies, built villages, gave them laws and established among them chiefs who, by their conduct, made the Spanish name loved among the natives. The latter looked on the Spanish governor as their protector, and were always ready to arm in his defence. He then sailed up the Parana in order to reach Assuncion, but, meeting with a storm, he was obliged to land in an unknown country about the 30th degree of latitude. Here, during the night, he was surprised by savages who massacred him and thirty-nine of his companions.

GÁRCES, Julian (gar'-thes), Mexican R. C. bishop, b. in Munebrega, Aragón, in 1457; d. in Puebla, Mexico, 11 Dec., 1547. He belonged to a distinguished family, and in his youth entered the Dominican order in San Pedro de Calatayud. His superiors sent him to France to perfect his studies, and he was graduated as doctor of theology of the Sorbonne in 1488. In 1497 he was appointed by Isabella I. professor at Alcala, and at the same time acquired fame as one of the principal pulpit orators of the kingdom. Charles V. made him his chaplain and court-preacher, and in 1519 appointed him to the bishopric of Yucatan, but, owing to continuous warfare with the Indians, that see was not constituted till many years afterward, and in 1526 Garces was assigned to the newly created bishopric of Tlaxcala, the third in the New World since the discovery. He was consecrated at Badajoz in 1527, and in February, 1529, took possession of the see. He converted and baptized many thousand Indians, and from the beginning constituted himself a zealous defender of the race, representing to the emperor the unhappy condition of the aborigines, and even trying to interest the pope in their favor by his open letter of 1536, of which a translation has been published by Davila in his history. This letter was much commented on, as it revealed for the first time in Europe the true state of affairs in the New World, and excited the apprehension of the government, so that Charles V. wrote an autograph letter to Garces, admonishing him to avoid for the future public discussion of American affairs. Garces, however, continued his course in favor of the Indians, although with less publicity, and to his endeavors with the authorities was probably due the more merciful policy that was observed toward the Indians of Mexico, and their liberty from the servitude imposed on Peruvian Indians. During Garces's administration the city of Puebla de los Angeles was founded, to which he transferred the seat of the bishopric. He wrote a commentary on the works of St. Augustin, the manuscript of which existed in 1824 in the library of Tlaxcala. According to the historian, Ferdinand Denis, there exists also at the library of the Escorial (Madrid) a manuscript history of the conquest of Mexico by Garces.

GARCÍA, Alexo (gar-the'-ah), Portuguese explorer, b. in Oporto in 1485; d. in Ipare, Uruguay, in 1526. He came to South America with the expedition of Diaz de Solis in 1516, and when that explorer was killed, Garcia escaped, married an Indian woman, and soon gained influence with the neighboring tribes. With their help he explored the country watered by the rivers Plate, Uruguay, and Parana, and in 1524 ascended the Paraguay river nearly to its sources. In the next year he penetrated as far as the Andes, and acquired from the Indians some bars of silver, which subsequently fell into the hands of Sebastian Cabot, and caused the latter to name the river Plate. In 1526 Garcia resolved to reach the kingdom of the Incas, of which he had heard. He carried with him his wife and son, but was attacked by hostile Indians, and assassinated. His son was carried into captivity, but liberated in 1543 by Alvar Nuñez Cabeza de Vaca, and became one of the most useful interpreters of the colonial government.

GARCÍA, Diego, Portuguese navigator, b. in Lisbon in 1471; d. in Madrid in 1529 (according to Sala, about 1535). He entered the Spanish service in his youth, and undertook in 1511 an expedition to South America, the accounts of which have been lost. Garcia was at Palos de Moguer when Charles V. resolved to send an expedition to explore the southern seas under Sebastian Cabot, and at the same time the mercantile company, formed for the spice-trade at Coruña, fitted out an expedition, of which the command was given to Garcia. He sailed with three vessels, 15 Jan., 1526, from Cape Finisterre, and, after a long and stormy passage, anchored in San Vicente, 11 Jan., 1527. There he found a Portuguese settler, João Romalho, who had been abandoned on the coast by the first discoverer of Brazil, Pedro Alvarez Cabral, and from him obtained provisions. After exploring the Uruguay river, and sailing up the Parana as far as 27° S., he met, in July, 1527, a launch, manned by Europeans, from whom he learned that Sebastian Cabot, whose expedition had left Spain after him, was besieged by Indians farther down the river. Garcia sailed immediately to his aid, and, after defeating the Indians in several battles, continued to explore the upper course of the river, and, leaving his ships at the mouth of the Paraguay, ascended that river in his boats as far as 18° S. He fought continuous battles with the Indians, and, not finding any precious metals, abandoned his exploration, and in October, 1528, sailed for Spain. He is said to have made, about 1532, a voyage to the East Indies, in which he discovered the fertile island named after him, situated about 400 miles from Mauritius. Garcia's narrative of his expedition, with a map, was published in the 15th volume of the "Revista do instituto histórico é geográphico do Brasil." See also Adolpho de Varnhagen's "Historia Geral do Brasil," and Ferdinand Denis's "Le Brésil."

GARCÍA, Manuel, Chilian soldier, b. in Santiago in 1803; d. near Santiago, 4 March, 1872. In 1817 he became a cadet in the military school established by O'Higgins, took part in the battle of

Maypu, 5 April, 1818, and in December, 1825, took part in Freire's second expedition against Chiloe, for which he was promoted captain. In 1827 he assisted in the campaign against the Indians of Mariluan, and in 1828 against the bandit Pincheira, and was afterward appointed military commander of Constitucion. He participated in the first and second expeditions against Peru, and for his gallantry was promoted colonel, and obtained two gold medals. In 1851, although retired from service, he took command of the troops against the revolutionists. In 1854 he was promoted general of brigade, and in 1857 appointed secretary of war and the navy, which place he held till 1862. In that year he was promoted to general of division, and then retired to private life, but for one term was a deputy to the national congress.

GARCÍA, Manuel de Populo Vicente, vocalist, b. in Seville, Spain, 22 Jan., 1775; d. in Paris, 2 June, 1832. He began his musical course at the age of six as a chorister in the cathedral of his native city. Before attaining manhood he had become known throughout Spain as a tenor and a composer of church music and comic operas. In 1808 he appeared in Paris for the first time in Italian opera, and for many years continued a favorite in most European capitals. Garcia's career is memorable for his experimental introduction of the earliest Italian opera-company in the United States. It was in 1825, when they sang in the New York Park theatre. This served to present before the American public his daughter, Maria Felicia, afterward Madame Malibran. Garcia's troupe continued in this country nearly two years, singing occasionally in concert and oratorio. The company then departed for Mexico, where they remained about a year, and on their way homeward, between the capital and Vera Cruz, were robbed by a party of brigands of all their money and valuables. Garcia soon again found himself in the Italian opera-company in Paris. The quality of his voice was not remarkable, and, as it had become worn and newer favorites attracted the public, he determined to establish a school for instruction in vocal music. In this he was pre-eminently successful. Garcia wrote, in all, forty-three operas, furnishing the words to most of them. His daughters, Maria and Paulina, became celebrated singers.

GARCÍA-CALDERÓN, Francisco, Peruvian statesman, b. in Arequipa, 18 April, 1829. In 1842 he entered the college of the Independencia in his native city, where he was graduated in law, and was appointed professor of philosophy and mathematics in 1849. In 1850 he obtained the degree of LL. D., and in 1852 was admitted to the bar of the superior court of Arequipa, being appointed in 1854 professor of jurisprudence of the university. He was elected deputy to congress and president of the chamber in 1867, and in 1868 was secretary of the treasury. After the occupation of Lima by the Chilians, 16 Jan., 1881, the conquerors refused to treat for peace with Pierola, and the citizens started a movement for the election of a provisional government. The Chilian governor favored the idea, and Garcia-Calderon was elected. He called together the old congress, which had been elected before the war, but only a few representatives answered his summons. The congress refused to authorize the president to consent to any permanent cession of Peruvian territory, and was dissolved by an order of Admiral Lynch on 23 Aug. Meanwhile Garcia was buoyed up with the hope of an intervention by the United States, and was arrested by order of the Chilian governor, on 6 Nov., on the pretext that he had solicited foreign intervention. A few days afterward they were transported to Chili, and kept prisoners on parole in Santiago till the end of the year, when Garcia returned to Lima. On the instalment of Yglesias's government in 1884, Garcia was elected to the senate and appointed president of that body, which position he still holds (1887). He is a corresponding member of the Spanish academy, member of many South American literary and scientific societies, has contributed largely to current literature, and has published a "Diccionario de la Legislacion Peruana" (1859–'62).

GARCIA-CONDE, Pedro, Mexican soldier, b. in Arispe, 8 Feb., 1806; d. there, 19 Dec., 1851. His father was Spanish military governor of the northwest inland provinces. He became a cadet in the regiment of Cerro-Gordo in Durango in 1817. He was promoted until he held the rank of captain, when independence was declared, 27 Sept., 1821. In 1835 he took part in the campaign against Texas, and after the defeat and capture of Santa Anna, 21 April, 1836, was appointed inspector-general of militia. On 30 June, 1838, he was promoted colonel and appointed director of the military college, which post he held till 1844, introducing many reforms. On 23 Oct., 1841, he obtained the full rank of general. In 1844 he was elected to congress for the state of Sonora, but took part in the revolution of 6 Dec. against Santa Anna, and, being appointed by Gen. Herrera secretary of war, resigned the direction of the military college. As secretary he began the reorganization of the army, but, before he could conclude it, a new revolution, headed by Gen. Paredes, in 1846, overthrew the government. While Garcia was in banishment in Chihuahua, the war with the United States began. He offered his services to the government, was appointed commander of the cavalry on the northwestern frontier, and as such assisted in the battle of Sacramento. He was elected senator in 1847, and joined congress in November in Querétaro, where it was in session during the occupation of the capital by the American forces. After the treaty of peace, Garcia became president of the commission to fix the new boundary between Mexico and the United States. His death was probably hastened by the privations that he endured while fulfilling this duty.

GARCÍA-CUBAS, Antonio, Mexican scientist; b. in Mexico in 1832. He studied in the College of San Ildefonso, and in the Academy of mines, was commissioned by the government to do important geodetical work and explored the ruins of Mitlatoyuca, in the northern part of the state of Vera Cruz. He was ordered to make a design of these ruins and plan a road to be built from Tulancingo to Mitlatoyuca. He is a member of several scientific societies in America and Europe, and has contributed many papers on archæology. He has published "Cuadro Geográfico, Estadístico, Descriptivo é Histórico de los Estados Unidos Mejicanos" (Mexico, 1857; with Spanish, English, and French text, 1885); "Mapa General de Mexico" (1863); "Atlas Pintoresco" (1885); and many other works of topographical drawing; archæology, history, and geography.

GARCÍA DE QUEVEDO, José Heriberto, South American author, b. in Coro, Venezuela, in March, 1819; d. in Paris in June, 1871. In 1825 his parents removed to Porto Rico, where he received his primary education. Later he continued his studies in France and Spain. In 1861 he removed to Paris, and, on his return from a journey during the siege by the troops of the Versailles government in 1871, he insisted, against the

advice of his friends, on entering the city, was wounded by a shot fired from one of the barricades, and died soon afterward. His poems include "Á Colón," "Á la Libertad," "Á Pio IX," "Delirio," "La Segunda Vida," and "El Proscrito." He also wrote several dramas, which were represented in the theatres of Madrid, and were well received, and is the author of the novels "El amor de una niña," and "Dos duelos á 18 años de distancia." A complete edition of his works was published in Paris in 1863.

GARCÍA DE SAN VICENTE, Nicolás, Mexican educator, b. in Acaxochitlan, 23 Nov., 1793; d. in Toluca, 23 Dec., 1845. He entered the Seminary of Puebla in 1809, and then studied civil and canonical law in the University of Mexico, where he was graduated in 1818. He was then appointed professor of etymology in Puebla, and in 1821 was ordained priest and obtained the chair of grammar and geography. In 1823 he was elected deputy for the district of Tulancingo to the congress of Puebla. During 1828 and 1829 he was president of the Society for the protection of public instruction, which he had founded. In 1839 and 1840 he was professor of Latin and Spanish grammar at the College of Tulancingo, where he continued till his death. He wrote a great number of text-books for schools, nearly all in verse. These include "Extracto de Ortografía" (Mexico, 1830); "Geografía de los Niños" and "Cosmografía" (1839); "Geografía Física y Política" (1840); "Ortología según Sicilia" (1843); "Reglas de Etimología y Sintáxis Castellana" (1845). He left unfinished "Lecciones de Geometría," and also translated from the French the Bible of Vencé, and from the Italian the "History of California," by Clavijero.

GARCÍA-GRANADOS, Miguel (gar-the'-ah-grah-nah'-dos), president of Guatemala, b. about 1825; d. in 1878. In May, 1871, he headed a revolution against the reactionary government of Gen. Vicente Cerna, and on 30 June was proclaimed president, with Barrios as vice-president. Garcia persecuted no person for his political opinions and confiscated no property, and the country soon recovered tranquillity. In 1872 he invaded Honduras, and in the same year decreed full liberty of the press, the extinction of religious orders, and the expulsion of the Jesuits. In February, 1873, there was an attempt at rebellion, which was promptly put down. On 8 May of that year, Garcia convened the National assembly for the election of a constitutional president, which election resulted in favor of Gen. Jose Barrios.

GARCÍA-MORENO, Gabriél, South American statesman, b. in Guayaquil, Ecuador, in 1821; d. in Quito, 6 Aug., 1875. He was graduated in medicine in the University of Quito, and went to Europe to finish his studies in natural science. On his return he became professor of chemistry and physics in the University of Quito, and in 1857 was elected its rector. In 1859, when the government of President Robles was overthrown, he became a member of the provisional government, and in 1861 was elected president for four years. Although his character was violent, and he committed numerous cruelties, his administration was beneficial to the republic. The signing of a concordat with Rome in 1864 called forth numerous revolutionary outbreaks, and, being invested by congress with unlimited power, he proclaimed himself dictator on 30 Aug. In 1865 he defeated an armed invasion of Gen. Urbina, near Tambeli, and in the elections of the same year favored the presidency of Geronimo Carrillo, who was installed in August, but Garcia-Moreno retained the actual direction of public affairs. In 1867 he was appointed minister to Chili; but, after the fall of the government of Carrillo in 1869, headed a revolution, and again assumed dictatorial powers. In 1874 he issued a decree, giving to the pope the ten per cent. of the revenue which belonged to the state. In 1875 he was again elected president for another term of six years, but on the eve of his reinstallation he was attacked in the gallery of the treasury building by three persons and fatally wounded.

GARCÍA-REYES, Antonio, Chilian lawyer, b. in Santiago, Chili, in 1817; d. in Lima, Peru, 16 Oct., 1855. He studied law in the college of his native city, and on his graduation entered the employ of the government. He was appointed professor of philosophy and literature in the National institute in 1837, and founded in 1838 "El Agricultor," in 1841 the "Gaceta de los Tribunales," and in 1842 the first literary paper published in Chili, "El Semanario," of which he remained a contributor for many years. He had been admitted to the bar in 1840, and in 1843 he was a member of the commission to form the military code. In 1847 he was elected deputy to the National congress, where he became noted for his eloquence, and was appointed secretary of the treasury. He was a member of the commission to revise the civil code, and to edit the criminal code in 1852, and in 1855 was appointed minister to France, England, Rome, and the United States, but declined on account of failing health.

GARCÍAS, Gregorio, clergyman, b. in Cozar, Spain, in 1554; d. in Baeza, Spain, in 1627. He belonged to the Dominican order, was sent as a missionary to America, and lived nine years in Peru, where he was noted for his success in spreading the gospel among the Indians. On his return to Europe at the beginning of the 17th century he was named professor of moral theology in the Dominican convent of Baeza. He published "Orígen de los Judíos del Nuevo Mundo, examinado con un discurso sobre las Opiniones Relativas" (Valencia, 1607; Madrid, 1729), of which translations have appeared in English, French, and German; "Predicación del Evangelio en el Nuevo Mundo, viviendo los Apóstoles" (Baeza, 1625); "Ensayo Cronológico para la Historia general de Florida" (Baeza, 1617); and "Historia de la Monarquía de los Incas del Perú" (2 vols., Madrid, 1729).

GARCILASO (or GARCIAS-LASO) **DE LA VEGA, Sebastián,** Spanish soldier, b. in Badajoz, Spain, about 1495; d. in Cuzco, Peru, in 1559. He was of the same family as the Spanish poet of the same name. Sebastian went to Mexico with Pedro de Alvarado, and when the latter returned to Guatemala, after the invasion of Quito, Garcilaso remained in Peru, and became a follower of Francisco Pizarro. After Pizarro's assassination he joined the royal governor, and was wounded at the battle of Chupas, 16 Sept., 1542. He then joined Gonzalo Pizarro, and was forced by him, on pain of death, to assist in his insurrection against the viceroy, Pedro de la Gasca. In the decisive battle of Xaquixaguana, 9 April, 1548, Garcilaso went over to Gasca's side at the turning-point of the contest, and was afterward appointed governor of Cuzco, which office he held until his death. He was noted for his humanity to the Indians, and founded a hospital and other benevolent institutions for them. He married an Indian princess, the niece of Huaina Capac, who was the son of the Tupac, Yupauqui.—Their son, surnamed **The Inca,** Peruvian historian, b. in Cuzco, 12 April, 1537. The time of his death is uncertain, but it is supposed that he died in Cordova, Spain, a few years

after 1617. He was educated by a learned priest, who was his father's chaplain. He became interested in the history of his country at an early age, collecting all the traditions he could gather from the Indians, making journeys through every part of Peru, and transcribing the oldest songs and hymns of the country. His mother assisted him in his researches, and furnished whatever details she was acquainted with concerning her unfortunate family. A short time after the death of his father he embarked at Callao for Spain, 21 Jan., 1560. He served with credit, under Juan de Austria, in the war against the Moors in Granada, and, after wasting the best years of his life in military service, found himself poor and needy. In 1584 he translated the "Dialogues on Love" of Leon Abravanel, and at the same time employed himself in writing the "History of Florida," which he published in Lisbon. In 1600 he began the first part of the "Comentarios Reales" (Lisbon, 1609), and in 1612 concluded the second part (Cordova, 1617), which forms a general history of Peru. His works have been translated into German, French, and English. As a Peruvian historian, he had unusual facilities for acquiring accurate information. Many of the conquerors were in the habit of meeting in his father's house in Cuzco and recounting their valiant deeds, and he knew intimately Gonzalo Pizarro, brother of the conqueror. He often exhibits such an ardent patriotism and love of liberty that it appears strange his works should have been allowed to be published in any part of the Spanish empire during the reign of Philip II. He protests against the destruction of ancient buildings and records, and, although he hints that he has been compelled to restrain himself in his exposition of Spanish cruelty in the expression "No todo se dice" (all is not told), his history of the ancient Peruvians is the most thorough as well as the most correct that we have. He published "La traducción del Indio de los tres Diálogos de Amor de León Abravanel, por Garcilaso Inca de la Vega, dirijidos á la sacra Católica Real Magestad, Don Felipe II°" (Madrid, 1590); "La Flórida del Inca, Historia del Adelantado Hernando de Soto, y de otros heróicos Caballeros españoles é indios" (Lisbon, 1605; Madrid, 1723 and 1804). The "History of Florida" was translated into French by Richelet (Paris, 1670; reprinted in 1707, with a preface by the Abbé Lenglet-Dufresnoy). It was translated into German by H. L. Meier (Zelle, 1753). "Primera Parte de los Comentarios Reales, que tratan del origen de los Incas, Reyes que fueron del Peru," etc. (Lisbon, 1609); translated into French by Dabilard (Paris, 1744). The German translation by G. C. Böttger (Nordhausen, 1787) is not complete. The second part, entitled "Historia General del Peru," appeared at Cordova in 1617, and numerous editions have since been published in Lisbon and Madrid. An English translation by Sir Paul Ricaut, knight, was published in London in 1688. It was translated into French by Baudoin (Paris, 1633, 1650, 1658). An Amsterdam edition of this translation (1737) is very much sought after on account of its engravings by Bern.

GARDEN, Alexander, clergyman, b. in Scotland about 1685; d. in Charleston, S. C., 27 Sept., 1756. He was educated in his native country, and became a clergyman of the church of England. He came to America in 1719, and shortly afterward was elected rector of St. Philip's parish in Charleston, S. C., and subsequently he was commissary under the bishop of London. Mr. Garden began the so-called "annual meetings of the clergy" which was then necessitated by the rapid increase of the Episcopal church in the province. The clergy were first convened on 20 Oct., 1731, when they exhibited to the commissary their letters of orders and license to perform the ministerial functions in the province. Mr. Garden resigned his office in 1748, but the clerical convocations continued. In 1735 he was compelled to take a respite from his labors, and visited the northern provinces. The assembly in 1736 made an appropriation for the support of an assistant to Mr. Garden, and the Rev. William Orr was elected. In 1740 he began a controversial correspondence with Rev. George Whitefield, which attracted much attention. Mr. Garden was interested in the instruction of the colored people. In 1743 he solicited aid from the Society for propagating the gospel, in behalf of the negro school in Charleston, which then consisted of thirty children. A large contribution of Bibles, prayer-books, and text-books was at once made, and in 1750 Mr. Garden gave to the society a favorable report of the progress of the school. In 1754 he resigned the rectorship of St. Philip's, and was presented by his vestry with a valuable set of plate. Shortly after this Mr. Garden embarked for England, where he intended to remain, but subsequently returned to Charleston and died there. He published "Six Letters to the Rev. Geo. Whitefield," the first, second, and third of which were on the subject of "Justification" (1740), and "Two Sermons" (1742). —His son, **Alexander,** naturalist, b. in Edinburgh, Scotland, about 1730; d. in London, England, 15 April, 1791, was graduated at the University of Aberdeen in 1748, and, after studying medicine, settled as a practitioner in Charleston, S. C., in 1752. He subsequently rose to eminence as a physician and botanist, and acquired wealth during his residence there. In 1754 he went to New York, where a professorship in the newly organized King's college (now Columbia) was offered him. On his return he settled in Charleston. Dr. Garden adhered to the royal cause in the Revolution. He was a congratulator of Cornwallis on his success at Camden in 1780, and went to England in 1783. His property was confiscated, but was afterward given to his son by the state of South Carolina. He had been elected a fellow of the Royal society of London, and on his arrival there in 1783 was appointed one of its council, and subsequently was one of its vice-presidents. He was eminent as a botanist and zoölogist, and in 1755 began a correspondence with Linnæus, to whom he furnished information on the natural history of South Carolina, and who named the genus "Gardenia" in honor of him. He introduced into medical use the pink-root as a vermifuge, and published an account of its properties, together with a botanical description (1764). He also published accounts of the Helesia; of the male and female cochineal insects; of the mud iguana, or siren of South Carolina, an amphibious animal; of two new species of tortoises; and of the Gymnotus electricus. To extend his knowledge of natural history, he accompanied Gov. Glen into the Indian country, and discovered an earth which was deemed in England equal to the finest porcelain. The knowledge of the spot has been lost.—Dr. Garden's son, **Alexander,** soldier, b. in Charleston, S. C., 4 Dec., 1757; d. there, 29 Feb., 1829, was educated at Westminster and the University of Glasgow, and travelled on the continent of Europe. He returned to South Carolina in July, 1780, and joined the Revolutionary army. He was at one time aide-de-camp to Gen. Greene, and a lieutenant in Lee's legion in February, 1782. His father's confiscated property

was given him after the war. He published "Anecdotes of the Revolutionary War, with Sketches of Character of Persons most Distinguished in the Southern States for Civil and Military Services," containing much original information (Charleston, 1822; new eds., 1828 and 1865).

GARDINER, Addison, jurist, b. in Rindge, N. H., 19 March, 1797; d. in Rochester, N. Y., 5 June, 1883. He was taken to Manlius, N. Y., in his early years, and received his education there. After studying law, he removed, in 1822, to Rochester, and was the first justice of the peace. He was appointed district attorney for Monroe county in 1825, and was afterward judge for the eighth circuit, comprising eight counties in western New York, but resigned in 1838, and resumed his practice in Rochester. In 1844 and 1846 he was lieutenant-governor of New York, but resigned his office in the latter year, having been elected a judge of the court of appeals. He served until 1855, declining a renomination. An appeal from his decisions, or a reversal of judgment, rarely occurred.

GARDINER, James Terry, civil engineer, b. in Troy, N. Y., 6 May, 1842. He was educated at the Rensselaer polytechnic institute and at the Sheffield scientific school, after which he became sub-assistant engineer on the Brooklyn water-works. In 1861–'2 he was inspector in the U. S. ordnance corps, and was engaged in 1863–'4 in the construction of earthworks around the harbor of San Francisco. During the three following years he was topographical assistant on the geological survey of California, and at this time he made a topographical survey of Yosemite valley and laid out the limits of the reservation. Subsequently he was associated with Clarence King in the U. S. geological survey of the 40th parallel, and was chief of the geographical and topographical departments until the completion of the work. In 1872 he was appointed U. S. geographer in charge of such work on the U. S. geological survey of the territories, under Ferdinand V. Hayden, and conducted the field-work of the surveys until 1875. From 1876 till 1886 he was director of the state survey of New York, and from 1880 till 1886 a member of the New York state board of health. He then became consulting engineer to the state board of health, and he also holds the office of consulting engineer in all mining matters, especially concerning coal, to the Atchison, Topeka, and Santa Fé, the Mexican Central, the Atlantic and Pacific, and the Mexican National railroads. Mr. Gardiner is a member of scientific societies, and was secretary in 1876 of the American geographical society. His publications are principally reports of his work, which have appeared as public documents.

GARDINER, Lion, military engineer, b. in England in 1599; d. in Easthampton, N. Y., in 1663. He was an officer of the English army, and served in the Netherlands. While thus employed he was persuaded by Hugh Peters, and other Englishmen then residing in that country, to enter the service of a company of lords and gentlemen, the proprietors of a tract of land lying at the mouth of the Connecticut river. He was to serve for four years, and to be employed in drawing plans for a city, towns, and forts in that locality, and to have 300 able-bodied men under his control. On his arrival in Boston on 28 Nov., 1635, the authorities requested him to draft designs for a fort. This he did, and a committee was appointed to supervise the erection of the work, each citizen being compelled to contribute two days' labor. Gardiner then sailed for his destination and proceeded to build a fort, which he named Saybrook, after Lord Say and Seal and Lord Brook. Here he remained for four years during the exciting period of the Pequot war. In 1639 he purchased from its Indian owners an island called by them Manchonat, which he renamed the Isle of Wight, but which has since been known as Gardiner's Island. This was the first English settlement within the present boundaries of New York state. While at Saybrook a son was born to him, 29 April, 1636, which was the first white child born in Connecticut. His daughter, Elizabeth, who was born in the "Isle of Wight," was the first white child born in New York. The original grant by which Gardiner acquired proprietary rights in the island made it an entirely separate and independent "plantation," in no way connected either with New England or New York. He was empowered to draft laws for church and state, observing the forms, so ran the instrument, "agreable to God, to the king and to the practices of the country." Several other patents were subsequently issued, the last by Gov. Dongan, erecting the island into a lordship and manor to be called "Gardiner's Island," giving Gardiner full powers to hold "court leet and court baron, distrain for rents, exercise the rights of advowson," etc. The island is now a part of the township of Easthampton, Suffolk co., N. Y., and is nine miles long and a mile and a half wide, containing about 3,300 acres. Lion Gardiner was a man of sterling qualities,

and acquired the esteem of all with whom he came in contact. In the autumn of 1886 a recumbent effigy was erected to his memory, and his grave was opened. In it his skeleton was found to be intact. It was that of a man over six feet in height, with a broad forehead and strong jaws. The island was entailed on the first male heirs of the Gardiner family, and was never to be alienated. These conditions were observed up to the close of the last century, David Johnson, the eighth lord of the manor, who died in 1829, being the last to receive the property by entail. His brother, John Griswold, succeeded as ninth lord, but died, unmarried and intestate, in 1861. The third brother, Samuel Buel, having purchased the interest of his sister, Mrs. Sarah Diodati Thompson, became the tenth proprietor. At his death, in 1882, the island was left to his eldest son, David Johnson, as eleventh lord of the manor; but it is now (1887) owned by the latter's brother, John Lyon. This is the only illustration of the practical working of the law of primogeniture in this country, covering so long a period. The manor-house, built in 1774, is shown in the accompanying illustration. During the life of John, the third owner, the island was visited by Capt. Kidd, who deposited goods and treasure there, which were secured by Gov. Bellomont after Kidd's death. (See Kidd, William.) During the early part of the last century the island was frequently visited and pillaged by privateersmen, smugglers, and free-booters, and suffered greatly from their depredations. The British fleet

made Gardiner's bay a rendezvous during the Revolution, and took supplies from the island. The same thing occurred during the war of 1812–'15 between the United States and England, and in 1869 it was selected as the rallying-point of an expedition intended to liberate Cuba from the Spanish yoke.

GARDINER, Sylvester, physician, b. in South Kingston, R. I., 29 June, 1707; d. in Newport, 8 Aug., 1786. After studying medicine in London and Paris he became a practitioner in Boston, a lecturer on anatomy, and a drug merchant. In the sale of drugs he acquired a large fortune, and became proprietor of a part of "Plymouth Purchase" on the Kennebeck river. His efforts to settle this domain were unceasing from 1753 to the Revolution. About the middle of the century he colonized it with Germans, and settled the town of Pittston, from which the present city of Gardiner, Me., was afterward set off, annually furnishing the colonists with supplies. He also contributed liberally to the erection of King's chapel, Boston, of which he was a warden, and promoted the introduction of inoculation for the small-pox. He was the compiler and publisher of a prayer-book, built and endowed Christ church, the first Episcopal church in Pittston, Me., and presented that town with a valuable library, which afterward became scattered. He was one of those who signed the address to Gov. Hutchinson in 1774, approving that officer's course, and in the year following he became an active supporter of the royal cause. When the British army evacuated Boston in 1776, he left that city and went to Halifax. In 1778 his name appeared in the proscription and banishment act. He removed to England during the war, taking with him but a small proportion of his property, and settled in Poole. About 100,000 acres of his great estate were confiscated and sold, but his heirs recovered it many years afterward. After the war, in 1785, Dr. Gardiner returned to this country and settled in Newport, R. I. His remains were interred under Trinity church in that city, and in the Episcopal church in Gardiner, Me., there is a cenotaph to his memory.—His eldest son, **John,** lawyer, b. in Boston in 1731; d. near Cape Ann, Mass., 15 Oct., 1793, studied law at the inner temple, London, and was admitted to practice in the courts of Westminster Hall. He became intimate with Churchill, the satirist, with Lord Mansfield, and with John Wilkes, in whose cause he appeared as junior counsel in 1764. He also appeared for Breadmore and Meredith, who, for writings in support of Wilkes, had been imprisoned on a general warrant. He practised a short time with success in the Welsh circuit, and then procured in 1766 the appointment of attorney-general in the island of St. Christopher, West Indies, where he remained until after the American Revolution, when he returned, in 1783, to Boston. A few years later he removed to Pownalboro', Me., and represented that town in the Massachusetts legislature until his death. While a member of that body he procured the abolition of the law of primogeniture, promoted several legal reforms, and was earnest but unsuccessful in his arguments for the repeal of the statutes of 1750 against theatrical entertainments. The law that he sought to abolish remained in force until 1793, when it was repealed. Mr. Gardiner was one of the most influential of the early Unitarians of Boston, and prominently participated in the transformation of King's chapel, of which his father was one of the founders, from an Episcopal into a Unitarian Congregational church. He met his death by drowning while on his way to the general court of Massachusetts. In connection with his efforts to repeal the anti-theatrical laws while he was a member of the Massachusetts legislature, he published a "Dissertation on the Ancient Poetry of the Romans," with incidental observations on certain superstitions. He also wrote a political tract in verse entitled "Jacobinial," a satire on the republican clubs of Boston, a revision of which by the author was published in Boston in 1795.—His son, **John Sylvester John,** clergyman and scholar, b. in Haverford West, South Wales, in June, 1765; d. in Harrowgate, England, 29 July, 1830. At an early age, about 1770, he was sent to his grandfather, Dr. Sylvester Gardiner, in Boston, for education. Shortly after the opening of the Revolution, and after visiting his father in the West Indies, he was removed to England, and placed in 1776 under the care of Dr. Samuel Parr, by whom he was instructed until 1782. He returned to the United States in 1783 by way of the West Indies, and was accompanied by his father to Boston, where he began the study of law. Subsequently, in 1787, he was ordained deacon in the Protestant Episcopal church by Bishop Provoost, in St. Paul's church, New York. He then became pastor of the parish of St. Helena, near Beaufort, S. C. He took priest's orders in 1791, became assistant rector of Trinity church, Boston, in 1792, and on the death of Bishop Parker, in 1805, succeeded him as rector, continuing to hold that post until his death. While assistant rector, he taught a large classical school, and afterward instructed a few pupils in his own house. He died while on a foreign tour for his health. He received the degree of A. M. from Harvard in 1803, and that of D. D. from the University of Pennsylvania in 1813. In 1805–'11 he was president of the Anthology club, which was organized at his house, and for several years conducted the "Anthology and Boston Monthly Review," which was one of the ablest literary periodicals in the United States, and assisted greatly in elevating the standard of letters in this country. It was the remote precursor of the "North American Review," to which Dr. Gardiner was a contributor. To the Anthology club belongs the honor of founding the Boston athenæum. Dr. Gardiner was a classical scholar of eminence and an eloquent preacher, and exerted a wide influence. He published numerous sermons, delivered before various societies (1802–'23).—Another grandson of Sylvester, **Robert Hallowell,** b. in Bristol, England, about 1782; d. in Gardiner, Me., 22 March, 1864, came to this country in 1792. He was the son of Dr. Sylvester Gardiner's daughter Hannah, and Robert Hallowell, but took the surname of Gardiner in 1802, in obedience to the will of his uncle, on inheriting the latter's estate. He was fitted for college in the Boston Latin-school, and graduated at Harvard in 1801, after which he travelled abroad for sixteen months, and in 1803 returned and settled on his estate, giving much of his time to its cultivation and to advancing the interests of the town of Gardiner, to which he gave a church, a lyceum, and a public library. He was an active member of the Maine historical society, and was its president from 1846 till 1855.

GARDNER, Caleb, sea-captain, b. in Newport, R. I., in 1739; d. there, 24 Dec., 1806. Living near the harbor and owning a boat, he was in boyhood familiar with the waters and islands of Narragansett bay, and as a young man became a sea-captain, sailing his own ship to China, to the East Indies, and made other long voyages. Before the beginning of the Revolution he had retired from the sea and engaged in mercantile pursuits in his

native town. The war found him a strong Whig. He raised a company, was assigned with it to Richmond's regiment, of which he presently became lieutenant-colonel, and was later a member of the council of war and of the Rhode Island state government. He was residing in Newport in 1778, when the French squadron under Count d'Estaing was blockaded there by the greatly superior British fleet under Admiral Howe. A sudden and dense fog prevented an immediate attack by the English; but they occupied both entrances to the harbor, and waited for daylight. Capt. Gardner had noted from his housetop, through a spy-glass, the disposition of the hostile fleets, and, as soon as it was dark, rowed himself to the ship of the French admiral, offered to pilot him to a safe position, and with his own hand steered the admiral's ship through a channel which he had known from boyhood, the other vessels, with all lights extinguished, following singly in his wake. Having piloted the French beyond the enemy and to clear water, he returned to the island, reached his own house before daylight, and was among the groups along the water-front who marvelled, when the fog lifted, at the disappearance of the French fleet. Count d'Estaing's report of the affair to Louis XVI. was confidential, since its disclosure would have exposed his guide to the dangerous displeasure of the English government, and of the Tory element in Rhode Island; but the king, through his ambassador in the United States, the Chevalier de la Luzerne, sent to the amateur pilot a sum of money, with which the latter bought an estate near Newport, and built upon it a house, portions of which still remain in the cottage known to the visitor of to-day as "Bateman's." Throughout the war Capt. Gardner was a trusted adviser of the French officers in Rhode Island, and of Gen. Washington, who was his friend and correspondent. After peace was declared he was made French consul at Newport, where he resided until his death, being president of a bank, warden of Trinity church, and head of the volunteer fire department of the town.—His great-grandson, **Dorsey,** b. in Philadelphia, 1 Aug., 1842, is a grandson of Dr. John Syng Dorsey, noticed elsewhere. He removed to Trenton, N. J., in 1854, and entered Yale in 1860, but was not graduated. In 1864–'5 he published the "Daily Monitor," a journal established at Trenton in support of the Lincoln administration in the conduct of the war, and with the special purpose of creating public sentiment through New Jersey against the extension of the exclusive privilege of transportation between New York and Philadelphia, which was then possessed by the Camden and Amboy railroad company. In 1866–'8 he was one of the editors and proprietors of the "Round Table," a weekly literary and critical journal published in New York. After spending several months in Europe, he held editorial positions on the "Commercial Advertiser" and the "Christian Union," of New York, until he removed to Florida in 1869. Returning thence to Philadelphia in 1872, he became one of the secretaries of the U. S. centennial commission, and was charged with the publication of all the official documents relating to the International exhibition of 1876, including its catalogue and eleven volumes of final reports. Subsequently he assisted, in the state department at Washington, in the preparation of the official report on the Paris international exhibition of 1881 by the U. S. commissioner-general, Richard C. McCormick. He has published "Quatre Bras, Ligny, and Waterloo: a Narrative of the Campaign in Belgium, 1815" (Boston and London, 1882), and "A Condensed Etymological Dictionary of the English Language," a rearrangement, on an etymological basis, of the "American Dictionary of the English Language" of Dr. Noah Webster (Springfield, Mass., and New York, 1884; London, 1886).

GARDNER, Charles K., soldier, b. in Morris county, N. J., in 1787; d. in Washington, D. C., 1 Nov., 1869. He entered the army as ensign in the 6th U. S. infantry in May, 1808. In the war of 1812 he was promoted captain of the 3d infantry, and was adjutant-general of the division of the north, under Gen. Jacob Brown. He participated in the battles of Chrystler's Field, Chippewa, and Niagara, was at the siege of Fort Erie, and in February, 1815, was promoted lieutenant-colonel for distinguished service. At the battle of Niagara, in which Gen. Winfield Scott was severely wounded, Col. Gardner carried him off the field. In 1816 he was appointed adjutant-general of the northern division of the army, which post he resigned in 1827. During both terms of Gen. Jackson's administration he was first assistant postmaster-general, and he was auditor of the treasury in the post-office department under President Van Buren from 1836 till 1841. During the administration of President Polk he was postmaster of the city of Washington. In 1850 he was transferred to the treasury department, where he remained until advanced age compelled his resignation in 1867. He is the author of "A Dictionary of Commissioned Officers who have served in the Army of the United States from 1789 to 1853" (New York, 1853); "A Compendium of Military Tactics"; and "A Permanent Designation of Companies, and Company Books, by the First Letters of the Alphabet."

GARDNER, Elizabeth Jane, artist, b. in Exeter, N. H., in 1842. She has spent most of her professional life in Paris, studying under Merle, Bouguereau, and Lefebre. Miss Gardner's specialty is ideal figure-pieces. Among her important works are "Cornelia and her Jewels"; "Cinderella," exhibited at the Paris salon (1872); "Corinne" (Paris, 1874); "Moses in the Bulrushes" (Paris, 1878); and "Maud Muller" (1879). The "Fortune Teller" and "Corinne" received a medal at the Philadelphia exhibition of 1876.

GARDNER, George, British botanist, b. in Glasgow, Scotland, in 1812; d. in Ceylon in 1849. In 1836 he visited Brazil and other parts of South America, and explored the interior as far as the tributaries of the Amazon, and from near the equator to the twenty-third degree of south latitude. Some of this region had never been visited by a European. During his travels he collected many rare botanical specimens, with which he returned to England in 1841. In 1848 he went to Ceylon in search of botanical specimens, and died there the next year. He was the author of "Travels in the Interior of Brazil" (London, 1846).

GARDNER, George Warren, clergyman, b. in Pomfret, Vt., 8 Oct., 1828. He was graduated at Dartmouth in 1852, and in 1853 became principal of the New London, N. H., institution, continuing in that relation until 1861. He was ordained as a minister of the gospel in 1858, and in November, 1861, installed pastor of the 1st Baptist church in Charlestown, Mass. He left this place in 1872 to become corresponding secretary of the American Baptist missionary union. From 1876 till 1878 he was pastor of the 1st Baptist church in Cleveland, Ohio, and from 1881 till 1885 president of the Central university of Iowa. During 1870 he visited Europe, extending his travels to Egypt, Palestine, and Greece. He has performed editorial

service in connection with the "Missionary Magazine" and the "Watchman" newspaper, besides writing tracts and review articles. He received the degree of D. D. from Dartmouth in 1867.

GARDNER, Henry, statesman, b. in Stowe, Middlesex co., Mass., about 1730; d. in Boston in 1782. He was graduated at Harvard in 1750, and was a strong Liberal throughout the Revolution, entering into politics in 1775, and continuing in public life until his death. Mr. Gardner was a member of the Middlesex convention of February, 1774, which met to consult for the common defence and welfare of the country. This and several other assemblies, held during the same month in the New England states, recommended a provincial congress, which accordingly convened in Salem in October, 1774, and the next day adjourned to Concord, N. H. He served in this and in the congresses of February and May, 1775, which met in Watertown, Mass., and was chosen treasurer of the province by the 1st congress. In after-life he was a member of the Academy of arts and sciences in Boston, and devoted much of his time to literary and scientific pursuits in that city.

GARDNER, John Lane, soldier, b. in Boston, Mass., 1 Aug., 1793; d. in Wilmington, Del., 19 Feb., 1869. He entered the army in 1812 as lieutenant of infantry, saw his first active service in Canada, and was wounded at the battle of La Colle Mill, 30 March, 1814, while serving under Gen. James Wilkinson. After the war he was transferred to the artillery. In 1820–'30 he was assistant quartermaster-general, with the rank of captain, and in 1833 was brevetted major of artillery for ten years' faithful service. He served with his regiment during the Florida war, and was reported to the department as having shown "the utmost activity, skill, and intrepidity" at the battle of Wahoo Swamp, 21 Nov., 1832. He was promoted major in 1845, commanded his regiment throughout the Mexican war, was brevetted lieutenant-colonel for service at the battle of Cerro Gordo, 18 April, 1847, and colonel at Contreras on 20 Aug., where he commanded the right column of attack. From 1842 till 1850 he was in command of the district of Florida, became lieutenant-colonel in 1852, and some years later was stationed at Charleston harbor, where he was in command in 1860. Though mustering fewer than fifty men at Fort Moultrie, he effected an arrangement with Col. Joseph P. Taylor, commissary-general, for six months' provisions, and announced his intention to defend the fort to the last extremity against the secessionists. Secretary of War John B. Floyd thereupon relieved him from command, and ordered him to report to Gen. David E. Twiggs, in Texas. Maj. Robert Anderson succeeded to the command at Fort Moultrie, and on Christmas eve removed the garrison to Fort Sumter. In 1861 he was promoted colonel of the 2d artillery, and the next year was, by his own request, placed on the retired list, and employed in recruiting service. In 1865 he was brevetted brigadier-general "for long and faithful service."

GARDNER, Joseph, member of the Continental congress, b. in Honeybrook township, Chester co., Pa., in 1752; d. in Elkton, Md., in 1794. He studied medicine, and was one of the first to attend the lectures given at the medical department of the University of Pennsylvania, after which he settled in the practice of his profession in his native place. At the beginning of the Revolutionary war he raised a company of volunteers, and afterward was given command of the 4th battalion of Chester county militia. He also served on the general committee of safety from July, 1776, till December, 1777, and was appointed in July, 1776, one of the board of commissioners of Chester county by the Pennsylvania constitutional convention, also becoming in November, 1777, one of the commissioners to collect clothing for the army. Dr. Gardner was a member of the Pennsylvania assembly in 1776–'8, and in 1779 was chosen a member of the supreme executive council. In 1784 he was elected to the Continental congress, and served for one year. Subsequently, until 1792, he resided in Philadelphia, and there followed his profession. He then removed to Elkton, Md., where he spent the remainder of his life.

GARDNER, Samuel Jackson, editor, b. in Brookline, Mass., in 1788; d. in the White Mountains, N. H., 14 July, 1864. He was graduated at Harvard in 1809, and afterward practised law for many years in Roxbury, Mass., where he held several county and state offices. In 1838 he removed to Newark, N. J., and in the succeeding year edited the "Advertiser," a daily paper, which failing health compelled him to resign in 1861. Many of his essays, under the signature of "Decius," were collected and published under the title of "Autumn Leaves" (New York, 1859).—His son, **Augustus Kingsley,** physician, born in Roxbury, Mass., 13 July, 1812; d. in New York city, 7 April 1876, was graduated in medicine at Harvard in 1844. He then visited Europe, and studied three years. Returning to the United States, he established himself in New York, and was elected professor of diseases of women and children, and of midwifery, in the New York medical college. Dr. Gardner gave special attention to the importation of foreign birds, as destroyers of insect larvæ; to the establishment of drinking-fountains in New York city; to the reformation of the established code of medical ethics; and the investigation of the swill-milk business. He was the first physician in the United States that gave chloroform in labor, and practised it successfully while professor of midwifery in the New York medical college. In consequence of a consultation with a homœopathic physician, he had a rupture with the Academy of physicians, and resigned. He is the author of "Hours of a Medical Student in Paris" (New York, 1848); "Causes and Treatment of Sterility" (1850); "Our Children" (Hartford, 1872); and "Translation of Scanzoni's Diseases of Females." He edited Tyler Smith's "Lectures," and contributed many professional and scientific papers to current literature.

GARDNER, Thomas, soldier, b. in Cambridge, Mass., in 1724; d. in Boston, 18 June, 1775. He ranked among the most zealous sons of liberty, and was a member of the convention of Middlesex county, in 1774, held to consult on measures for public safety and defence, and of the Provincial congress of Massachusetts of October, 1774, and February, 1775. By this congress he was appointed one of the committee of safety chosen to act instead of the council and governor, who were believed to be mere tools of the British. In May, 1775, he raised a regiment according to the instructions of the Provincial congress, and was commissioned its colonel. At the battle of Bunker Hill, 17 June, 1775, while hastening with a part of his regiment to the redoubt, and in the act of descending the hill, he received a mortal wound, of which he died the next day.

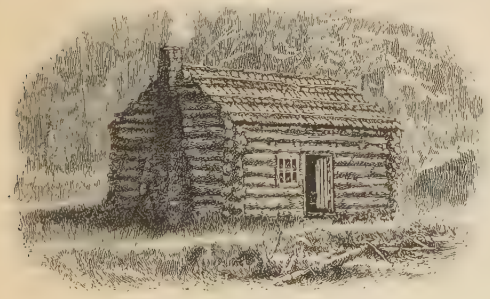
GARDNER, William Henry, naval officer, b. in Maryland in 1800; d. in Philadelphia, 18 Dec., 1870. He entered the navy in 1814 as a midshipman, was commissioned lieutenant in 1825, served on the "Vandalia," of the British squadron, in

J. A. Garfield.

1829–'30, was commissioned commander in 1841, commanded the receiving-ship "Norfolk" in 1843, and of the "Vandalia," in the Pacific squadron, between 1850 and 1852. In September, 1855, he was commissioned captain, commanded the steam frigate "Colorado," of the home squadron, in 1859–'60, was commandant at Mare Island, Cal., in 1861, and on special service in 1862. In July of that year he was commissioned commodore, and retired. He was light-house inspector from 1863 till 1869.

GARESCHI, Julius Peter, soldier, b. in Cuba in 1821; d. near Stone River, Tenn., 31 Dec., 1862. He was graduated at the U. S. military academy in 1841, and entered the army as 2d lieutenant of the 4th artillery. From 1841 till 1846 he served on frontier and garrison duty, and afterward with distinction in the Mexican war. He was appointed assistant adjutant-general in 1855. At the beginning of the civil war he applied for active service, and was appointed chief of staff to Gen. William S. Rosecrans, of the Army of the Cumberland. He had previously declined the commission of brigadier-general of volunteers, and remained a lieutenant-colonel in the regular army. At the battle of Stone River, in Tennessee, 31 Dec., 1862, in a gallant attempt to regain the day which then appeared to be lost, Col. Gareschi dashed forward at the head of his column, but was struck in the head by a cannon-ball and instantly killed. He was a founder and liberal beneficiary of the Society of St. Vincent de Paul, at Washington.

GARFIELD, James Abram, twentieth president of the United States, b. in Orange, Cuyahoga co., Ohio, 19 Nov., 1831; d. in Elberon, N. J., 19 Sept., 1881. His father, Abram Garfield, was a native of New York, but of Massachusetts ancestry, descended from Edward Garfield, an English Puritan, who in 1630 was one of the founders of Watertown. His mother, Eliza Ballou, was born in New Hampshire, of a Huguenot family that fled from France to New England after the revocation of the Edict of Nantes, in 1685. Garfield, therefore, was from lineage well represented in the struggles for civil and religious liberty, both in the Old and in



the New World. Abram Garfield, his father, moved to Ohio in 1830, and settled in what was then known as "The Wilderness," now as the "Western Reserve," which was occupied by Connecticut people. Abram Garfield made a prosperous beginning in his new home, but died, after a sudden illness, at the age of thirty-three, leaving a widow with four small children, of whom James was the youngest. In bringing up her family, unaided in a lonely cabin (see accompanying illustration), and impressing on them a high standard of moral and intellectual worth, Mrs. Garfield displayed an almost heroic courage. It was a life of struggle and privation; but the poverty of her home differed from that of cities or settled communities—it was the poverty of the frontier, all shared it, and all were bound closely together in a common struggle, where there were no humiliating contrasts in neighboring wealth. At three years of age James A. Garfield went to school in a log hut, learned to read, and began that habit of omnivorous reading which ended only with his life. At ten years of age he was accustomed to manual labor, helping out his mother's meagre income by work at home or on the farms of the neighbors. Labor was play to the healthy boy; he did it cheerfully, almost with enthusiasm, for his mother was a staunch Campbellite, whose hymns and songs sent her children to their tasks with a feeling that the work was consecrated; but work in winter always yielded its claims to those of the district school, where he made good progress, and was conspicuous for his assiduity. By the time he was fourteen, young Garfield had a fair knowledge of arithmetic and grammar, and was particularly apt in the facts of American history, which he had eagerly gathered from the meagre treatises that circulated in that remote section. Indeed, he read and re-read every book the scanty libraries of that part of the wilderness supplied, and many he learned by heart. Mr. Blaine attributes the dignity and earnestness of his style to his familiarity with the Bible and its literature, of which he was a constant student. His imagination was especially kindled by the tales of the sea; a love for adventure took strong possession of him. He so far yielded to it that in 1848 he went to Cleveland and proposed to ship as a sailor on board a lake schooner. But a glance showed him that the life was not the romance he had conceived. He turned promptly from the shore, but, loath to return home without adventure and without money, drove some months for a boat on the Ohio canal. Little is known of this experience, except that he secured promotion from the tow-path to the boat, and a story that he was strong enough and brave enough to hold his own against his companions, who were naturally a rough set. During the winter of 1849–'50 he attended the Geauga seminary at Chester, Ohio, about ten miles from his home. In the vacations he learned and practised the trade of a carpenter, helped at harvest, taught, did anything and everything to get money to pay for his schooling. After the first term, he asked and needed no aid from home; he had reached the point where he could support himself. At Chester he met Miss Lucretia Rudolph, his future wife. Attracted at first by her interest in the same intellectual pursuits, he quickly discovered sympathy in other tastes, and a congeniality of disposition, which paved the way for the one great love of his life. He was himself attractive at this time, exhibited many signs of intellectual superiority, and was physically a splendid specimen of vigorous young manhood. He studied hard, worked hard, cheerfully ready for any emergency, even that of the prize-ring; for, finding it a necessity, he one day thrashed the bully of the school in a stand-up fight. His nature, always religious, was at this period profoundly stirred in that direction. He was converted under the instructions of a Campbellite preacher, was baptized and received into that denomination. They called themselves "The Disciples," contemned all doctrines and forms, and sought to direct their lives by the Scriptures, simply interpreted as any plain man would read them. This sanction to independent thinking, given by religion itself, must have had great influence in creating that broad and catholic spirit in this young disciple which kept his earnest nature out

of the ruts of moral and intellectual bigotry. From this moment his zeal to get the best education grew warmer; he began to take wider views, to look beyond the present into the future. As soon as he finished his studies in Chester, he entered (1851) the Hiram eclectic institute (now Hiram college), at Hiram, Portage co., Ohio, the principal educational institution of his sect. He was not very quick of acquisition, but his perseverance was indomitable, and he soon had an excellent knowledge of Latin and a fair acquaintance with algebra, natural philosophy, and botany. He read Xenophon, Cæsar, and Virgil with appreciation; but his superiority was more easily recognized in the prayer-meetings and debating societies of the college, where he was assiduous and conspicuous. Living here was inexpensive, and he readily made his expenses by teaching in the English departments, and also gave instruction in the ancient languages. After three years he was well prepared to enter the junior class of any eastern college, and had saved $350 toward the expenses of such an undertaking out of his salary. He hesitated between Yale, Brown, and Williams colleges, finally choosing Williams on the kindly promise of encouragement sent him by its president, Mark Hopkins. It was natural to expect he would choose Bethany college, in West Virginia, an institution largely controlled and patronized by the "Disciples of Christ." Garfield himself seems to have thought some explanation for his neglect to do so necessary, and with particularity assigns as reasons that the course of instruction at Bethany was not so extended as in the old New England colleges; that Bethany was too friendly in opinion to slavery; and—most significant of all the reasons he gave—that, as he had inherited by birth and association a strong bias toward the religious views there inculcated, he ought especially to examine other faiths. Entering Williams in the autumn of 1854, he was duly graduated with the highest honors in the class of 1856. His classmates unite with President Hopkins in testifying that in college he was warm-hearted, large-minded, and possessed of great earnestness of purpose and a singular poise of judgment. All speak, too, of his modest and unassuming manners. But, outside of these and other like qualities, such as industry, perseverance, courage, and conscientiousness, Garfield had exhibited up to this time no signs of the superiority that was to make him a conspicuous figure. But the effects of twenty-five years of most varied discipline, cheerfully accepted and faithfully used, begin now to show themselves, and to give to history one of its most striking examples of what education—the education of books and of circumstances—can accomplish. Garfield was not born, but made; and he made himself by persistent, strenuous, conscientious study and work. In the next six years he was a college president, a state senator, a major-general in the National army, and a representative-elect to the National congress. American annals reveal no other promotion so rapid and so varied.

On his return to Ohio, in 1856, he resumed his place as a teacher of Latin and Greek at Hiram institute, and the next year (1857), being then only twenty-six years of age, he was made its president. He was a successful officer, and ambitious, as usual, beyond his allotted task. He discussed before his interested classes almost every subject of current interest in scholarship, science, religion, and art. The story spread, and his influence with it; he became an intellectual and moral force in the Western Reserve. It was greatest, however, over the young. They keenly felt the contagion of his manliness, his sympathy, his thirst for knowledge, and his veneration for the truth when it was found. As an educator, he was, and always would have been, eminently successful; he had the knowledge, the art to impart it, and the personal magnetism that impressed his love for it upon his pupils. His intellectual activity at this time was intense. The canons of his church permitted him to preach, and he used the permission. He also pursued the study of law, entering his name, in 1858, as a student in a law-office in Cleveland, but studying in Hiram. To one ignorant of the slow development that was characteristic of Garfield in all directions, it would seem incredible that he now for the first time began to show any noticeable interest in politics. He seems never to have even voted before the autumn of 1856. No one who knew the man could doubt that he would then cast it, as he did, for John C. Frémont, the first Republican candidate for the presidency. As moral questions entered more and more into politics, Garfield's interest grew apace, and he sought frequent occasions to discuss these questions in debate. In advocating the cause of freedom against slavery, he showed for the first time a skill in discussion, which afterward bore good fruit in the house of representatives. Without solicitation or thought on his part, in 1859 he was sent to represent the counties of Summit and Portage in the senate of Ohio. Again in this new field his versatility and industry are conspicuous. He makes exhaustive investigations and reports on such widely different topics as geology, education, finance, and parliamentary law. Always looking to the future, and apprehensive that the impending contest might leave the halls of legislation and seek the arbitrament of war, he gave especial study to the militia system of the state, and the best methods of equipping and disciplining it.

The war came, and Garfield, who had been farmer, carpenter, student, teacher, lawyer, preacher, and legislator, was to show himself an excellent soldier. In August, 1861, Gov. William Dennison commissioned him lieutenant-colonel in the 42d regiment of Ohio volunteers. The men were his old pupils at Hiram college, whom he had persuaded to enlist. Promoted to the command of this regiment, he drilled it into military efficiency while waiting orders to the front, and in December, 1861, reported to Gen. Buell, in Louisville, Ky. Gen. Buell was so impressed by the soldierly condition of the regiment that he gave Col. Garfield a brigade, and assigned him the difficult task of driving the Confederate general Humphrey Marshall from eastern Kentucky. His confidence was such that he allowed the young soldier to lay his own plans, though on their success hung the fate of Kentucky. The undertaking itself was difficult. Gen. Marshall had 5,000 men, while Garfield had but half that number, and must march through a state where the majority of the people were hostile, to attack an enemy strongly intrenched in a mountainous country. Garfield, nothing daunted, concentrated his little force, and moved it with such rapidity, sometimes here and sometimes there, that Gen. Marshall, deceived by these feints, and still more by false reports, which were skilfully prepared for him, abandoned his position and many supplies at Paintville, and was caught in retreat by Garfield, who charged the full force of the enemy, and maintained a hand-to-hand fight with it for five hours. The enemy had 5,000 men and twelve cannon; Garfield had no artillery, and but 1,100 men. But he held his own until re-

enforced by Gens. Graner and Sheldon, when Marshall gave way, leaving Garfield the victor at Middle Creek, 10 Jan., 1862, one of the most important of the minor battles of the war. Shortly afterward Zollicoffer was defeated and slain by Gen. Thomas at Mill Spring, and the Confederates lost the state of Kentucky. Coming after the reverses at Big Bethel, Bull Run, and the disastrous failures in Missouri, Gen. Garfield's triumph over the Confederate forces at Middle Creek had an encouraging effect on the entire north. Marshall was a graduate of West Point, and had every advantage in numbers and position, yet seems to have been out-generaled at every point. He was driven from two fortified positions, and finally completely routed—all within a period of less than a fortnight in the month of January, 1862. In recognition of these services, especially acknowledged by Gen. Buell in his General Order No. 40 (20 Jan., 1862), President Lincoln promptly made the young colonel a brigadier-general, dating his commission from the battle of Middle Creek. During his campaign of the Big Sandy, while Garfield was engaged in breaking up some scattered Confederate encampments, his supplies gave out, and he was threatened with starvation. Going himself to the Ohio river, he seized a steamer, loaded it with provisions, and, on the refusal of any pilot to undertake the perilous voyage, because of a freshet that had swelled the river, he stood at the helm for forty-eight hours and piloted the craft through the dangerous channel. In order to surprise Marshall, then intrenched in Cumberland Gap, Garfield marched his soldiers 100 miles in four days through a blinding snow-storm. Returning to Louisville, he found that Gen. Buell was away, overtook him at Columbia, Tenn., and was assigned to the command of the 20th brigade. He reached Shiloh in time to take part in the second day's fight, was engaged in all the operations in front of Corinth, and in June, 1862, rebuilt the bridges on the Memphis and Charleston railroad, and exhibited noticeable engineering skill in repairing the fortifications of Huntsville. The unhealthfulness of the region told upon him, and on 30 July, 1862, under leave of absence, he returned to Hiram, where he lay ill for two months. On 25 Sept., 1862, he went to Washington, and was ordered on court-martial duty, and gained such reputation in this practice that, on 25 Nov., he was assigned to the case of Gen. Fitz-John Porter. In February, 1863, he returned to duty under Gen. Rosecrans, then in command of the Army of the Cumberland. Rosecrans made him his chief-of-staff, with responsibilities beyond those usually given to this office. In this field, Garfield's influence on the campaign in Middle Tennessee was most important. One familiar incident shows and justifies the great influence he wielded in its counsels. Before the battle of Chickamauga (24 June, 1863), Gen. Rosecrans asked the written opinion of seventeen of his generals on the advisability of an immediate advance. All others opposed it, but Garfield advised it, and his arguments were so convincing, though pressed without passion or prejudice, that Rosecrans determined to seek an engagement. Gen. Garfield wrote out all the orders of that fateful day (19 Sept.), excepting one—and that one was the blunder that lost the day. Garfield volunteered to take the news of the defeat on the right to Gen. George H. Thomas, who held the left of the line. It was a bold ride, under constant fire, but he reached Thomas and gave the information that saved the Army of the Cumberland. For this action he was made a major-general, 19 Sept., 1863, promoted for gallantry on a field that was lost. With a military future so bright before him, Garfield, always unselfish, yielded his own ambition to Mr. Lincoln's urgent request, and on 3 Dec., 1863, resigning his commission, and hastened to Washington to sit in congress, to which he had been chosen fifteen months before, as the successor of Joshua R. Giddings. In the mean time Thomas had received command of the Army of the Cumberland, had reorganized it, and had asked Garfield to take a division. His inclination was to accept and continue the military career, which had superior attractions; but he yielded to the representations of the President and Sec. Stanton, that he would be more useful in the house of representatives.

Gen. Garfield was thirty-two years old when he entered congress. He found in the house, which was to be the theatre of his lasting fame, many with whom his name was for the next twenty years intimately associated. Schuyler Colfax was its speaker, and Conkling, Blaine, Washburne, Stevens, Fenton, Schenck, Henry Winter Davis, William B. Allison, and William R. Morrison were among its members. His military reputation had preceded him, and secured for him a place in the committee on military affairs, then the most important in congress. His first speech (14 Jan., 1864), upon a motion to print extra copies of Gen. Rosecrans's official report, was listened to with attention; and, indeed, whenever he spoke upon army matters, this was the case. But the attention was given to the man for the information he possessed and imparted rather than to the orator; for in effective speech, as in every other matter in which Garfield succeeded, he came to excellence only by labor and practice. He was soon regarded as an authority on military matters, and his opinion was sought as an expert, experienced and careful. To these questions he gave all necessary attention, but they did not exhaust his capacity. He began at this time, and ever afterward continued, a thorough study of constitutional and financial problems, and to aid him in these researches he labored to increase his familiarity with the German and French languages. In this, his first session, he had to stand almost alone in opposition to the bill that increased the bounty paid for enlistment. He advocated liberal bounties to the veterans that reenlisted, but would use the draft to secure raw recruits. History vindicated his judgment. In the same session he spoke on the subject of seizure and confiscation of rebel property, and on free commerce between the states. On 13 Jan., 1865, he discussed exhaustively the constitutional amendment to abolish slavery.

In the 39th congress (1865) he was changed, at his own request, from the committee on military affairs to the ways and means committee, which then included Messrs. Morrison, of Illinois, Brooks and Conkling, of New York, and Allison, of Iowa. His reason for choosing this new field was that, the war being ended, financial questions would have supreme importance, and he wished to have his part in their solution. In the 40th congress (1867) he was restored to his old committee on military affairs, and made its chairman. In March, 1866, he made his first speech on the question of the public debt, foreshadowing, in the course of his remarks, that republican policy which resulted in the resumption of specie payment, 1 Jan., 1879. From this moment until the treasury note was worth its face in gold, he never failed, on every proper occasion, in the house and out, to discuss every phase of the financial question, and to urge upon the National conscience the

demands of financial honor. In May, 1868, he spoke again on the currency, dealing a staggering blow to the adherents of George H. Pendleton, who, under the stress of a money panic, were clamoring for the government to "make the money-market easier." It may be said that he was at this, as at later times, the representative and champion of the sound-money men in congress, and first and last did more than any one else, probably, in settling the issues of this momentous question. In 1877 and 1878 he was again active in stemming a fresh tide of financial fallacies. He treated the matter this time with elementary simplicity, and gave in detail reasons for a hard-money policy, based not so much upon opinion and theory as upon the teachings of history.

In the 41st congress a new committee—that on banking and currency—was created, and Garfield was very properly made its chairman. This gave him new opportunities to serve the cause in which he was heartily enlisted, and no one now seeks to diminish the value of that service. The most noticed and most widely read of these discussions was a speech on the National finances, which he delivered in 1878, at Faneuil hall, Boston. It was circulated as a campaign document by thousands, and served to win a victory in Massachusetts and to subdue for a while the frantic appeals from the west for more paper money. He served also on the select committee on the census (a tribute to his skill in statistics) and on the committee on rules, as an appreciation of his practical and thorough knowledge of parliamentary law. In the 42d and 43d congresses he was chairman of the committee on appropriations. In the 44th, 45th, and 46th congresses (the house being Democratic) he was assigned a place on the committee of ways and means. In reconstruction times, Garfield was earnest and aggressive in opposition to the theories advocated by President Johnson. He was a kind man, and not lacking in sympathy for those who, from mistaken motives, had attempted to sever their connection with the Federal Union; but he was not a sentimentalist, and had too earnest convictions not to insist that the results won by so much treasure and blood should be secured to the victors. An old soldier, he would not see Union victories neutralized by evasions of the constitution. On these topics no one was his superior in either branch of congress, and no opponent, however able, encountered him here without regretting the contest.

In 1876, Gen. Garfield went to New Orleans, at President Grant's request, in company with Senators Sherman and Matthews and other Republicans, to watch the counting of the Louisiana vote. He made a special study of the West Feliciana parish case, and embodied his views in a brief but significant report. On his return, he made, in January, 1877, two notable speeches in the house on the duty of congress in a presidential election, and claimed that the vice-president had a constitutional right to count the electoral vote. He was opposed to an electoral commission; yet, when the commission was ordered, Gen. Garfield was chosen by acclamation to fill one of the two seats allotted to Republican representatives. His colleague was George F. Hoar, of Massachusetts. Garfield discussed before the commission the Florida and Louisiana returns, on 9 and 16 Feb., 1877. Mr. Blaine left the house in 1877 for the senate, and this made Garfield the undisputed leader of the Republican party in the house. He was at this time, and subsequently, its candidate for speaker.

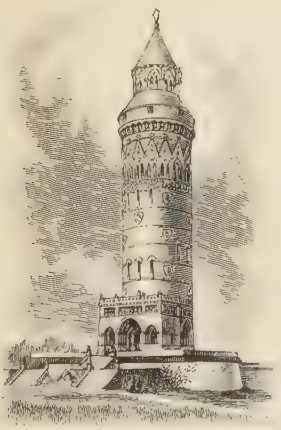
The struggle begun in the second session of the 45th congress (1879), when the Democratic majority sought to control the president through the appropriations, gave Garfield a fine opportunity to display his powers as a leader in opposition. The Democratic members added to two general appropriation bills, in the shape of amendments, legislation intended to restrain the use of the army as a posse to keep the peace at elections, to repeal the law authorizing the employment of deputy U. S. marshals at the elections of members of congress, and to relieve jurors in the U. S. courts from the obligation of the test oath. The senate, which was Republican, refused to concur in these amendments, and so the session ended. An extra session was promptly called, which continued into midsummer. Contemporary criticism claims that, in this contest, Gen. Garfield reached, perhaps, the climax of his congressional career. A conservative man by nature, he revolted at such high-handed measures, and in his speech of 29 March, 1879, characterized them as a "revolution in congress." Against this insult to the spirit of the law he protested with unwonted vigor. Like Webster in 1832, he stood the defender of the constitution, and his splendid eloquence and resistless logic upheld the prerogatives of the executive, and denounced these attempts by the legislature to prevent or control elections, however disguised, as an attack upon the constitution. He warned the house that its course would end in nullification, and protested that its principle was the "revived doctrine of state sovereignty." (See speeches of 26 April, 10 and 11 June, and 19 and 27 June, 1879.) The result of it was that the Democrats finally voted $44,600,000 of the $45,000,000 of appropriations originally asked—a great party victory, to which Gen. Garfield largely contributed. His arguments had the more weight because not partisan, but supported by a clear analysis and statement of the relations between the different branches of the government. His last speech to the house was made on the appointment of special deputy marshals, 23 April, 1880. At the same time he made a report of the tariff commission, which showed that he was still a sincere friend to protection. He was already United States senator-elect from Ohio, chosen after a nomination of singular unanimity, 13 Jan., 1880.

Where there is government by party, no leader can escape calumny; hence it assailed Garfield with great venom. In the presidential canvass of 1872, he, with other Republican representatives, was charged with having bought stock in the Credit Mobilier, sold to them at less than its value to influence their action in legislation affecting the Union Pacific railroad. A congressional investigation, reporting 13 Feb., 1875, seemed to establish these facts so far as Garfield was concerned. He knew nothing of any connection between the two companies, much less that the Credit Mobilier con-

trolled the railway. Garfield denied that he ever owned the stock, and was vaguely contradicted by Oakes Ames, who had no evidence of his alleged sale of $1,000 worth of the stock to Garfield, except a memorandum in his diary, which did not agree with Ames's oral testimony that he paid Garfield $329 as dividend on the stock. Garfield admitted that he had received $300 in June, 1868, from Ames, but claimed that it was a loan, and that he paid it in the winter of 1869. It was nowhere claimed that Garfield ever received certificate, or receipt, or other dividends, to which, if the owner of the stock, he was entitled, or that he ever asked for them. The innocence of Gen. Garfield was generally recognized, and, after the circumstances became known, he was not weakened in his district. Another investigation in the same congress (43d) gave calumny a second opportunity. This was the investigation into the conduct of the government of the District of Columbia. It revealed startling frauds in a De Golyer contract, and Garfield's name was found to be in some way connected with it. The facts, corroborated in an open letter by James M. Wilson, chairman of the committee, were: In May, 1872, Richard C. Parsons, a Cleveland attorney, then marshal of the supreme court in Washington, having the interests of the patents owned by De Golyer in charge, was called away. He brought all his material to Garfield, and asked him to prepare the brief. The brief was to show the superiority of the pavement (the subject of patent) over forty other kinds, and did not otherwise concern the contract or have anything to do with its terms. The fraud, as is generally understood, was in the contract, not in the quality of the pavement. Garfield prepared the brief and delivered it to Parsons; but did not himself make the argument. Parsons sent Garfield subsequently $5,000, which was a part of the fee Parsons had received for his own services. As thoughtful people reviewed the case, there was no harsher criticism than that suggested by Gen. Garfield's own lofty standard of avoiding even the appearance of evil—that he had not shown his usual prudence in avoiding any connection, even the most honest, in any way, with any matter that could in any shape come up for congressional review. It was the cruel and unjust charges made in connection with these calumnies which sent the iron into his soul, and made wounds which he forgave but never forgot.

In June, 1880, the Republican convention to nominate a successor to President Hayes was held in Chicago, and to it came Garfield, naturally, at the head of the Ohio delegation. He sympathized heartily with the wish of that delegation to secure the nomination for John Sherman, and labored loyally for that end. There could be no criticism of his action, nor could there be any just criticism of his loyalty to his candidate, except (and that he never concealed) that he wished more to defeat the nomination of Grant than to secure that of Senator Sherman. He believed a third term such a calamity that patriotism required the sacrifice of all other considerations to prevent it. That view he shared with Mr. Blaine, also a candidate in this convention, whose instructions to his friends were, "Defeat a third term first, and then struggle for the prize of office afterwards. Success in the one case is vital; success in the other is of minor importance." On the thirty-third ballot Grant had 306 votes, the remaining 400 being divided between Blaine, Edmunds, and Washburne. The hope of the Grant men or the Blaine men to secure the prize faltered, and in the thirty-fourth ballot Wisconsin broke the monotony by announcing thirty-six votes for James A. Garfield. This put the spark to fuel that had been unconsciously prepared for it by the events of the long struggle. In all the proceedings, peculiar fitness had put Garfield to the front as the counsellor and leader of the anti-Grant majority, and the exhibition of his splendid qualifications won increasing admiration and trust. His tact and readiness in casual debate, and the beauty and force of the more elaborate effort in which he nominated Sherman, won the wavering convention. On the thirty-sixth ballot the delegates broke their ranks and rushed to him. He received 399 votes, and then his nomination (8 June, 1880) was made unanimous. Gen. Garfield left the convention before the result was announced, and accepted the nomination by letter. This was a thoughtful document, and acceptable to the Republican voters. Disregarding precedent, he spoke in his own behalf in Ohio, New York, and other states. He spoke sensibly and with great discretion, and his public appearance is thought to have increased his popularity. He was elected (2 Nov., 1880) over his competitor, Gen. Winfield Scott Hancock, by the votes of every northern state except New Jersey, Nevada, and California. His inaugural address, 4 March, 1881, was satisfactory to the people generally, and his administration began with only one cloud in the sky. His cabinet was made up as follows: James G. Blaine, of Maine, secretary of state; William Windom, of Minnesota, secretary of the treasury; Wayne MacVeagh, of Pennsylvania, attorney-general; Thomas L. James, of New York, postmaster-general; Samuel J. Kirkwood, of Iowa, secretary of the interior; Robert T. Lincoln, of Illinois, secretary of war; William H. Hunt, of Louisiana, secretary of the navy. There was bitter dissension in the party in New York, and Garfield gave much consideration to his duty in the premises. He was willing to do anything except yield the independence of the executive in his own constitutional sphere. He would give to the New York senators, Conkling and Platt, more than their share of offices; but they should not be allowed to interfere with or control the presidential right of nomination. He made nominations to the senate—as many, it is said, as twelve—in that interest, and then (23 March, 1881) sent in the name of William H. Robertson, a leader in the other faction, as collector of the port of New York. Senator Conkling protested, and then openly resisted his confirmation. Yielding to him in the interest of senatorial courtesy, his Republican colleagues, in caucus, 2 May, 1881, agreed to let contested nominations lie over practically until the following December. This was a substantial victory for Mr. Conkling; but it was promptly met by the president, who, a few days afterward (5 May), withdrew all the nominations that were pleasing to the New York senator. This brought the other senators to terms. Mr. Conkling, recognizing defeat, and Mr. Platt with him, resigned their offices, 16 May, 1881. On 18 May, Collector Robertson was confirmed. The early summer came, and peace and happiness and the growing strength and popularity of his administration cheered the heart of its chief. At a moment of special exaltation, on the morning of 2 July, 1881, he was shot by a disappointed office-seeker. The avowed object was to promote to the presidential chair Vice-President Arthur, who represented the Grant or "stalwart" wing of the party. The president was setting out on a trip to New England, anticipating especial pleasure in witnessing the commencement exercises of his alma mater at Williamstown. He was passing through

the waiting-room of the Baltimore and Potomac depot, at nine o'clock that morning, leaning on the arm of Mr. Blaine, when the assassin fired at him with a pistol. The first ball passed through his coat-sleeve; the second entered by the back, fractured a rib, and lodged deep in the body. The president was carried to the White House, where, under the highest medical skill, and with every comfort that money and devotion could bring, he lingered for more than ten weeks between life and death. The country and the world were moved by the dastardly deed; and the fortitude and cheerfulness with which the president bore his suffering added to the universal grief. Daily bulletins of his condition were published in every city in the United States and in all the European capitals. Many of the crowned heads of Europe sought by telegraphic inquiry more particular news, and repeated their wishes for his recovery. A day of national supplication was set apart and sacredly observed, and the prayers at first seemed answered. His physicians were hopeful, and gave expression to their hope. His condition seemed to improve; but when midsummer came, the patient failed so perceptibly that a removal was hazarded. On 6 Sept., 1881, he was taken to Elberon, N. J., by a special train. He bore the journey well, and for a while, under the inspiration of the invigorating sea-breezes, seemed to rally. But on 15 Sept., 1881, symptoms of blood-poisoning appeared. He lingered till the 19th, when, after a few hours of unconsciousness, he died peacefully. A special train (21 Sept.) carried the body to Washington, through a country draped with emblems of mourning, and through crowds of reverent spectators, to lie in state in the rotunda of the capitol two days, 22 and 23 Sept. The final services held here were never surpassed in solemnity and dignity, except on 27 Feb., 1882, when, in the hall of representatives, at the request of both houses of congress, his friend, James G. Blaine, then secretary of state, delivered a memorial address, in the presence of the president and the heads of all the great departments of the government, so perfect that the criticism of two continents was unqualified praise. In a long train, crowded with the most illustrious of his countrymen, which in its passage, day or night, was never out of the silent watch of mourning citizens, who stood in city, field, and forest, to see it pass, Garfield's remains were borne to Cleveland and placed (26 Sept., 1882) in a beautiful cemetery, which overlooks the waters of Lake Erie. The accompanying illustration represents the imposing monument that is to mark his last resting-place.



His tragic death assures to Garfield the attention of history. It will credit him with great services rendered in various fields, and with a character formed by a singular union of the best qualities —industry, perseverance, truthfulness, honesty, courage—all acting as faithful servants to a lofty and unselfish ambition. Without genius, which can rarely do more than produce extraordinary results in one direction, his powers were so many and well-trained that he produced excellent results in many. If history shall call Garfield great, it will be because the development of these powers was so complete and harmonious. It has no choice but to record that, by the wise use of them, he won distinction in many fields: a teacher so gifted that his students compare him with Arnold of Rugby; a soldier, rising by merit in rapid promotion to highest rank; a lawyer heard with profit and approbation in the supreme court; an eloquent orator, whose own ardent faith kindled his hearers, speaking after thorough preparation and with practised skill, but refusing always to win victory by forensic trick or device; a party leader, failing in pre-eminence only because his moral honesty would not let him always represent a party victory as a necessity of national well-being. In all these characters he was the friend of learning and of virtue, and would probably ask no other epitaph than the tribute of a friend, who said that, "among the public men of his era, none had higher qualities of statesmanship and greater culture than James A. Garfield."

Garfield's speeches are almost a compendium of the political history of the stirring era between 1864 and 1880. Among those worthy of special mention, on account of the importance of the subjects or the attractive and forcible presentation of them, are the following: On the Enrolling and calling out of the National Forces (25 Jan., 1864); on the Reconstruction of the Southern States (February, 1866); on Civil-Service Reform, in the congress of 1870 and other congresses; on the Currency and the Public Faith (April, 1874); on the Democratic Party and the South (4 Aug., 1876), of which a million copies were distributed as a campaign document; the speech in opposition to the Wood bill, which was framed to break down the protective tariff (4 June, 1878); the speeches on Revolution in Congress (4 March and 4 April, 1879); on Congressional Nullification (10 June, 1879); on Treason at the Polls (11 June, 1879); and on the Democratic Party and Public Opinion (11 Oct., 1879). Among his speeches in congress, less political in character, were that on the National Bureau of Education (8 June, 1866); a series on Indian Affairs, covering a period of several years; one on the Medical and Surgical History of the Rebellion (2 March, 1869); two on the Census (6 April and 16 Dec., 1879); one on Civil-Service Reform; many addresses on the silver question; and one on National aid to education (6 Feb., 1872). He found time to make frequent orations and addresses before societies and gatherings outside of congress. His address on College Education, delivered before the literary societies of Hiram college (14 June, 1867), is an admirable plea for a liberal education, and on a subject in which the author was always deeply interested. On 30 May, 1868, he delivered an address on the Union Soldiers, at the first memorial service held at Arlington, Va. A eulogy of Gen. Thomas, delivered before the Army of the Cumberland, 25 Nov., 1870, is one of the happiest of his oratorical efforts. On the reception by the house of the statues of John Winthrop and Samuel Adams, he spoke with a great wealth of historical allusion, and all his memorial addresses, especially those on his predecessor in congress, Joshua R. Giddings, Lincoln, and Profs. Morse and Henry, are worthy of study. But in all this series nothing will live longer than the simple words with which, from the balcony of the New York custom-house,

he calmed the mob frenzied at the news of Lincoln's death: "Fellow-citizens: Clouds and darkness are around him; His pavilion is dark waters and thick clouds; justice and judgment are the establishment of his throne; mercy and truth shall go before his face! Fellow-citizens! God reigns, and the Government at Washington lives."

After the death of President Garfield, a popular subscription for his widow and children realized over $360,000. The income of this fund is to be paid to Mrs. Garfield during her life, after which the principal is to be divided among the children —four sons and a daughter. More than forty of Garfield's speeches in congress have been published in pamphlet-form, as has also his oration on the life of Gen. George H. Thomas. A volume of brief selections, entitled "Garfield's Words," was compiled by William R. Balch. (Boston, 1881). His works have been edited by Burke A. Hinsdale (2 vols., Boston, 1882). The most complete life of President Garfield is that by James R. Gilmore (New York, 1880).

A monument to President Garfield, designed by John Q. A. Ward, was erected in Washington, D. C., by the Society of the army of the Cumberland, and dedicated on 12 May, 1887. It consists of a bronze statue of Garfield, 10½ feet high, standing on a circular pedestal, 18 feet in height, with buttresses, on which are three reclining figures, representing a student, a warrior, and a statesman. The U. S. government gave the site and the granite pedestal, besides contributing to the cost of the statues, and furnishing cannon to be used in their casting. (See page 604.) The unusual attitude of the arms is explained by the fact that Gen. Garfield was left-handed.—His wife, **Lucretia Rudolph,** b. in Hiram, Portage co., Ohio, 19 April 1832, was the daughter of a farmer named Rudolph. She first met her husband when both were students at Hiram, Ohio, and was married 11 Nov., 1858, in Hudson, Ohio, soon after his accession to the presidency of the college. Seven children were born to them, of whom four sons and one daughter are living (1887).

Lucretia R. Garfield.

GARLAND, Augustus Hill, cabinet officer, b. in Tipton county, Tenn., 11 June, 1832. His parents removed to Arkansas before he was a year old. He was educated at St. Mary's college, Lebanon, Ky., and St. Joseph's college, Bardstown, Ky., read law there and in Arkansas, and was admitted to the bar in Washington, Ark., in 1853. After practising in that place for three years, he removed to Little Rock. He was a Whig in politics, and in 1860 was an elector on the Bell and Everett ticket. He was an opponent of the secession ordinance in the State convention, but after its passage he espoused the southern cause, and was a member of the Provisional congress that met in Montgomery, Ala., in May, 1861. He was chosen a delegate to the 1st Confederate congress, and afterward served in the senate, in which he had a seat when the Confederacy fell. In 1865 he petitioned the U. S. supreme court for the right to practise without taking the "iron-clad" oath, presenting an argument on which the question was decided in his favor in December, 1867. He was elected U. S. senator for the term beginning on 4 March, 1867, but was not permitted to take his seat. In 1874, after serving a short time as acting secretary of state, he was elected by a large majority governor of Arkansas under the new state constitution. In January, 1876, he was sent to the U. S. senate, succeeding Powell Clayton, a Republican, and re-elected in 1883, serving from 5 March, 1877, to 5 March, 1885, when he took his seat in the cabinet, having been appointed by President Cleveland attorney-general of the United States. His successful test-oath case is reported in Wallace's "Supreme Court Reports," vol. iv.

A. H. Garland.

GARLAND, John, soldier, b. in Virginia in 1792; d. in New York city, 5 June, 1861. He was appointed 1st lieutenant of infantry on 31 March, 1813, served through the war with Great Britain, became a captain on 7 May, 1817, was made major by brevet in 1827, attained the full rank of major on 30 Oct., 1836, and that of lieutenant-colonel on 27 Nov., 1839. He won distinction in the Florida war under Gen. Worth, and served through the Mexican war, distinguishing himself in six battles, and commanding a brigade at Monterey and through Gen. Scott's subsequent campaign. He was severely wounded at the taking of the city of Mexico. He was brevetted colonel for gallantry at Palo Alto and Resaca de la Palma, and brigadier-general for meritorious and gallant conduct at Contreras and Churubusco. He was promoted colonel on 9 May, 1861.—His cousin, **Hugh A.,** lawyer, b. in Nelson county, Va., 1 June, 1805; d. in St. Louis, Mo., 15 Oct., 1854, was graduated at Hampden Sidney college in 1825, was professor of Greek there for the next five years, and became afterward a successful lawyer, practising in Mecklenburg county, Va. He sat in the Virginia assembly for five years, and was chosen clerk of the National house of representatives in 1838. At the opening of congress in 1839 he called the roll, as clerk of the last house, but omitted five Whigs, elected from New Jersey, whose seats were contested, thus securing a Democratic majority. A scene of uproar resulted, which was continued on succeeding days, until John Q. Adams was elected chairman *pro tempore.* In 1841 he settled on a farm near Petersburg, and engaged in mercantile business, by which he lost his property. In 1845 he removed to St. Louis, and resumed the practice of the law. He was the author of a "Life of John Randolph" (New York, 1850).—The son of Hugh A., **Hugh A.,** lawyer, d. at Franklin, Tenn., 30 Nov., 1864, studied and practised law in St. Louis, Mo. He joined the Confederate army, was made a colonel, participated in the actions between the forces of Gens. Hood and Thomas in middle Tennessee, and fell at Franklin, Tenn., while leading his command. —The brother of Hugh A., **Landon Cabell,** edu-

cator, b. in Nelson county, Va., 21 March, 1810, was graduated at Hampden Sidney college in 1829. From 1830 to 1833 he was professor of chemistry in Washington college, Va. In 1833 he became professor of physics, and in 1835 president of Randolph Macon college, which post he held till 1847. From 1847 till 1866 he filled the chair of mathematics and physics in the University of Alabama, of which he became president in 1855. He was next professor of physics and astronomy in the University of Mississippi till 1875, when he was chosen chancellor and professor of physics in Vanderbilt university, Nashville, Tenn. In 1875 he travelled through Europe to purchase the physical and astronomical apparatus of that university. He has contributed largely to the magazines of the southern Methodist Episcopal church, and has published a treatise on "Trigonometry, Plane and Spherical" (Philadelphia, 1841).—Hugh A.'s nephew, **Samuel**, soldier, b. in Lynchburg, Va., 16 Dec., 1830; d. at South Mountain, Md., 14 Sept., 1862, was educated at the Virginia military institute, was graduated in law from the University of Virginia in 1851, and practised with success in Lynchburg. He was chosen captain of a volunteer company that was organized in 1859, after John Brown's raid, was commissioned a colonel by the governor of Virginia on the secession of the state, and was engaged at the first battle of Bull Run, at Drainsville, and at the battle of Williamsburg, where he was wounded. He was promoted brigadier-general, and when he had recovered from his wound sufficiently to take the field, was given the command of a North Carolina brigade, which formed part of Gen. D. H. Hill's division. He was engaged in the battle of Seven Pines, the battles around Richmond, especially that of Gaines's Mill, the battle of Manassas, and led the van of Lee's army in the Maryland campaign, where he fell in the battle of South Mountain.

GARMAN, Samuel, naturalist, b. in Indiana county, Pa., 5 June, 1846. He was graduated at the Illinois state normal university in 1870, and for the following year was principal of the Mississippi state normal school. In 1871 he became professor of natural sciences in Ferry Hall seminary, Lake Forest, Ill., and a year later became a special pupil of Louis Agassiz in natural history. He was appointed in 1873 assistant in herpetology and ichthyology in the museum of comparative zoölogy in Cambridge, and still holds that office. In connection with his work he has made various explorations to South and Central America, and also geological expeditions to the Rocky and Sierra Nevada mountains. He is a member of scientific societies in the United States and Europe, and has been president of the Boston scientific society. His publications, besides many monographs on the nomenclature, anatomy, classification of new species of fishes, selachians, batrachians, reptiles, and similar topics, include "The Reptiles and Batrachians of North America" (Cambridge, 1883); "Check List of the North American Reptiles and Batrachians" (Salem, 1884); "The Reptiles of Bermuda" (Washington, 1884); and "A Living Species of Cladodont Shark" (Cambridge, 1885).

GARNEAU, François Xavier, Canadian author, b. in Quebec, 15 June, 1809; d. 3 Feb., 1866. He was educated at Quebec seminary, studied law, and was admitted as a notary in 1830. Subsequently he became clerk of the legislative assembly, member of the council of public instruction, and city clerk of Quebec, which office he held from 1845 till his death. He was an honorary member of literary and historical societies in the United States and Canada, and for several years president of the Institut Canadien of Quebec. He wrote "Histoire du Canada, depuis sa découverte jusqu' à nos jours" (3 vols., Quebec, 2d ed., 1852, also translated into English); and "Voyage en Angleterre et en France dans les années 1831, '32, '33."

GARNEAU, Pierre, Canadian capitalist, b. in Cap Santé, Quebec, 8 May, 1823. He was educated in his native place, and became a merchant. He is a director of the Quebec and Gulf ports steamship company, and of La banque nationale; is president of the Quebec street railway company, and a member of the Quebec board of trade. He was a government director of the North Shore railway, was mayor of the city of Quebec in 1870–'3, and a member of the canal commission in 1870. He was appointed a member of the executive council and commissioner of agriculture and public works for the province of Quebec in September, 1874, and of crown lands in January, 1876. He was elected to the legislative assembly in March, 1873, re-elected in 1875, and again in 1882.

GARNER, Peter M., abolitionist, b. in Lancaster county, Pa., 4 Dec., 1809; d. in Columbus, Ohio, 12 June, 1868. He removed to Fairview, Guernsey co., Ohio, with his parents, became a teacher, and was a pioneer in the anti-slavery movement in Ohio. In 1845, with two other citizens, he was seized by Virginians and taken to Parkersburg and thence to Richmond, and held in confinement six months, on a charge of assisting slaves to escape, but was finally released on his own recognizance. From 1847 till 1860 he taught in the Ohio penitentiary at Columbus, and during the war had charge of the military prisoners.

GARNET, Henry Highland, clergyman, b. in New Market, Md., 23 Dec., 1815; d. in Monrovia, Liberia, 13 Feb., 1882. He was a pure-blooded negro of the Mendigo tribe, of the Slave Coast, and born in slavery. His parents escaped with him to Bucks county, Pa., where they remained a year, and in 1826 settled in New York city. He was educated in Canaan academy, N. H., and the Oneida institute, near Utica, N. Y., where he was graduated with honor in 1840. He taught in Troy, N. Y., studied theology under Dr. Nathaniel S. S. Beman, was licensed to preach in 1842, and was pastor of a Presbyterian church in Troy for nearly ten years. For a short time he also published "The Clarion," a newspaper. In 1846 he was employed by Gerrit Smith to distribute a gift of land among colored people. He went to Europe in 1850 in the interest of the free-labor movement, and lectured in Great Britain on slavery for three years. In 1851 he was a delegate to the peace congress at Frankfort. He went to Jamaica as a missionary for the United Presbyterian church of Scotland in 1853, but returned to the United States on account of failing health, and in 1855 entered on the pastorate of Shiloh Presbyterian church in New York city. In 1865 he accepted a call to a church in Washington, D. C. After a successful pastorate of four years he resigned to become president of Avery college, but gave up that post soon afterward, and returned to Shiloh church. President Garfield offered him the appointment of minister and consul-general to Liberia, and after the accession of President Arthur the nomination was made and confirmed by the senate. He arrived at Monrovia on 23 Dec., 1881, and entered auspiciously upon his diplomatic duties, but soon succumbed to the climate. A memorial school, organized by his daughter, Mrs. M. H. Garnet Barboza, was endowed in honor of him at Brewersville, Liberia.

GARNETT, James Mercer, agriculturist and politician, b. in Essex county, Va., 8 June, 1770; d. there in May, 1843. He was a founder and the first president of the U. S. agricultural society, and wrote extensively on rural economy. He was also interested in educational progress, maintained a female seminary in his own house for twelve years, and was active in introducing into Virginia improved methods of instruction. He acted with the Democratic party, and engaged in a controversy with Matthew Carey, the protectionist. He was an intimate friend of his colleague in congress, John Randolph, of Roanoke. After serving for several years in the Virginia legislature he was twice elected to the National house of representatives, and served from 2 Dec., 1805, to 3 March, 1809. In 1829 he was a member of the Virginia constitutional convention.—His youngest brother, **Robert Selden,** b. in Essex county, Va., was educated at Princeton, studied law, began practice at Lloyds, and was elected as a Democrat to congress, and four times re-elected, serving from 1 Dec., 1817, to 3 March, 1827. On the question of recognizing the South American republics he voted alone. He was a political supporter and personal friend of Andrew Jackson.—His nephew, **Richard Brooke,** soldier, b. in Virginia in 1819; d. near Gettysburg, Pa., 3 July, 1863, was graduated at the U. S. military academy in 1841, entered the army as lieutenant of infantry, served in the Florida war and on the Texas frontier, became a captain on 9 May, 1855, was engaged in Kansas in 1856–'7, and in the Utah expedition of 1858, and resigned on 17 May, 1861, to join the Confederate army. He was engaged in many of the battles in Virginia, was afterward attached to Gen. Lee's army, with the rank of brigadier-general, and fell in the battle of Gettysburg.—Another nephew, **Robert Selden,** son of Robert S., soldier, b. in Essex county, Va., 16 Dec., 1819; d. at Carrick's Ford, Va., 13 July, 1861. He was graduated at the U. S. military academy in 1841, appointed 2d lieutenant of artillery, and from July, 1843, to October, 1844, was assistant instructor of infantry tactics at the military academy. He was aide-de-camp to Gen. Wool in 1845, distinguished himself in the battles of Palo Alto and Resaca de la Palma, was promoted 1st lieutenant in 1846, was aide-de-camp to Gen. Taylor through the Mexican war, and was brevetted captain and major for gallant and meritorious conduct at Monterey and Buena Vista. He was transferred to the infantry in 1848, and promoted captain in 1851. From 1852 till 1854 he was commandant of the corps of cadets and instructor in infantry tactics at West Point. He was commissioned as major on 27 March, 1855, was the commander in the operations against the Indians on Puget's sound, Washington territory, in 1856, and commanded the Yakima expedition in 1858. At the beginning of the civil war he returned from Europe, where he had been travelling on sick leave, resigned his commission in the U. S. army on 30 April, 1861, and was appointed adjutant-general, with the rank of colonel, to organize the Virginia troops. On 6 June, 1861, he was commissioned as brigadier-general in the Confederate army, and sent to command the forces in the western part of the state. He found himself confronted by Gen. McClellan with a much superior force, consisting of U. S. regulars and Indiana riflemen. After Gen. Pegram, with a part of his command, had been surrounded, he attempted to retreat with the remainder on Beverly. When the National troops overtook him at Carrick's Ford, on Cheat river, he took command of the detachment with which he attempted to cover the retreat. His army was routed, and he was killed in the engagement.—Another nephew, **Alexander Yelverton Peyton,** physician, b. in Essex county, Va., 20 September, 1820, was graduated in medicine at the University of Pennsylvania in 1841, entered the U. S. navy as assistant surgeon on 8 Sept., 1841, was promoted surgeon in 1848, and resigned on 21 Oct., 1850, in order to accept the professorship of clinical medicine in the National medical college at Washington, D. C. He married in 1848 the eldest daughter of Henry A. Wise. In 1861 he left Washington, and became a member of the examining board of surgeons for the Confederate army, and afterward surgeon in charge of the two military hospitals in Richmond. He was the family physician of Jefferson Davis and of all his cabinet officers, and accompanied Mr. Davis after the evacuation of Richmond. Afterward he returned to Washington, and was again elected a professor in the medical college in 1867, but resigned in 1870, and was made an emeritus professor. He was elected a vice-president of the American medical association in 1885. He has contributed to medical literature papers on the claims of "Condurango as a Cure for Cancer," "The Potomac Marshes and their Influence as a Pathogenic Agent," "Epidemic Jaundice among Children," "The Sorghum Vulgare or Broom-Corn Seed in Cystitis," "Nelaton's Probe in Gunshot Wounds," and "Coloproctitis treated by Hot-Water Douche and Dilatation or Division of the Sphincters."—James Mercer's grandson, **Muscoe Russell Hunter,** politician, b. in Essex county, Va.; d. in Virginia about 1863, was graduated at the University of Virginia, studied law, was admitted to the bar, and practised at Loretto, Va. He was a delegate to the State convention for revising the constitution in 1850, and a member of the Virginia house of delegates from 1853 till 1856. He was a delegate to the Democratic national conventions of 1852 and 1856, and elected to congress to serve out an unexpired term, and twice re-elected, serving from 1 Dec., 1856, to 3 March, 1861. After the formation of the southern confederacy he was elected to the 1st congress at Richmond.

GARNIER, Charles, clergyman, b. in Paris in 1605; d. in Canada, 7 Sept., 1649. He entered the Society of Jesus, 7 Dec., 1624, and was sent to Canada in 1636. The rest of his life was spent on the Huron mission. He was stationed at Etharita, a settlement of the Tontiate Hurons, when an attack was made on it, 7 Sept., 1649, by the Iroquois. The town was defenceless, as the Tontiate braves had gone in another direction to meet the enemy. The Iroquois set fire to it and slaughtered every one they met. Meanwhile, Father Garnier was everywhere exhorting and baptizing the wounded, regardless of danger. At last he fell mortally wounded, but, seeing a wounded Tontiate some paces from him, he rallied his strength, dragged himself to the wounded man, and, while giving him absolution, fell dead on his body. As a Huron scholar Father Garnier had no superior among the whole body of his fellow-missionaries, with the exception of Brebeuf.

GARNIER, Julian, clergyman, b. in Connerai, France, about 1643; d. in Canada after 1722. He entered the Society of Jesus, and came to Canada, while still a scholastic, in October, 1662. He taught for some years, and, after finishing his studies, was ordained in April, 1666, being the first Jesuit ordained in Canada. He then prepared himself for missionary work among the Indians, and, after passing his examination successfully, was sent among the Oneidas in 1667. After a few months'

stay he was ordered to pass on to the Onondagas to ascertain whether there was any prospect of rebuilding the church of St. Mary's, which had been destroyed. He was received with enthusiasm by this tribe, and especially by their chief, Garaconthie (*q. v.*). They begged him to remain among them, and on his declaring that he could not do so except a church should be built, they at once acceded to his demand. He met with great success in converting the Onondagas, and on the arrival of two other missionaries he set out to evangelize the Senecas. He did not meet with much success in his labors, and returned to Canada in 1683. In 1702 the Senecas petitioned for the return of the missionaries, and Father Garnier was one of those who returned. He remained some years among them, but, being at length exhausted by his labors, he went back to Canada. He was the last missionary who preached among the Senecas.

GARONHIAGUÉ, Louis, styled Hot Cinders by the French, Oneida chief, d. in New York state in 1687. He took part in the torture and murder of Father de Brebeuf in 1649. Afterward, having quarrelled with another Oneida sachem, he went to Canada, and, on hearing of his brother's death, resolved never to return to his tribe. He stopped on his journey at the Christian Indian village of La Prairie. Here his wife was converted, and soon persuaded her husband to become a Christian. After his baptism he was elected fourth chief of the mission, and, although the youngest, soon became head-chief. His eloquence and fervor produced such effect in the village that he was made catechist. He then went among the heathen tribes, and, with the aid of religious pictures, made numerous converts. He frequently visited his people, and persuaded many of his old adherents to follow him to La Prairie. In 1677 he rescued the famous convert Catharine Tegakonita from the persecution of her uncle, and brought her from Gandawagué to La Prairie. In 1687 he accompanied Denonville, at the head of fifty braves from Caughnawaga, in his invasion of the Seneca country. The French army, while passing through a defile, fell into an ambuscade of 800 Senecas. The Christian Indians bore the brunt of the attack, and Garonhiagué fell mortally wounded.

GARRARD, James, governor of Kentucky, b. in Stafford county, Va., 14 Jan., 1749; d. in Bourbon county, Ky., 9 Jan., 1822. While engaged as a militia officer in the Revolutionary war he was called from the army to a seat in the Virginia legislature. Here he was a zealous advocate of the bill for the establishment of religious liberty. Having removed with the early settlers to Kentucky, in 1783, and settled on Stoner river, near Paris, he became there a political leader, and was a member of the convention which framed the first constitution of the state. Here he was ordained to the Baptist ministry. In 1791, pending the convention just named, he was chairman of a committee that reported to the Elkhorn Baptist association a memorial and remonstrance in favor of excluding slavery from the commonwealth by constitutional enactment. He was elected governor in 1796, and re-elected in 1800, serving eight years.—His grandson, **Theophilus Toulmin,** soldier, b. near Manchester, Ky., 7 June, 1812. He was a member of the lower house of the Kentucky legislature in 1843–'4, served through the Mexican war as a captain in the 16th U. S. infantry, went to California, on the discovery of gold in 1849, by the overland route, remained in the mines fifteen months, and then returned by way of Panama to Kentucky. He was elected to the state senate in 1857, resigned to become a candidate for congress, and elected a state senator again in 1861. He was appointed a colonel of the 3d Kentucky U. S. volunteer infantry, promoted brigadier-general in March, 1863, and mustered out on 4 April, 1864.—A great-grandson, **Kenner,** soldier, b. in Cincinnati, Ohio, in 1830; d. there, 15 May, 1879, was graduated at the U. S. military academy in 1851, entered the dragoons, became a captain on 3 March, 1855, was engaged in frontier service in Texas, and captured by the Confederates on 12 April, 1861, being placed on parole until exchanged as a prisoner of war on 27 Aug., 1862. He served meanwhile as instructor and commandant of cadets at West Point. He was commissioned on 27 Sept., 1862, as colonel of the 146th regiment of New York volunteers, and engaged in the principal battles of the Rappahannock and Pennsylvania campaigns. On 23 July, 1863, he was promoted brigadier-general of volunteers, took part at Rappahannock Station and in the Mine Run operations, and in 1864 commanded a cavalry division of the Army of the Cumberland, and participated in the operations around Chattanooga and the invasion of Georgia, being constantly engaged in detached expeditions. He was brevetted colonel in the U. S. army for services in the expedition to Covington, Ga. From December, 1864, till the end of hostilities he commanded the 2d division of the 16th army corps. He distinguished himself at the battle of Nashville, earning the brevets of major-general of volunteers and brigadier-general in the regular army, participated in the operations against Mobile, led the storming column that captured Blakely, and was in command of the district of Mobile until after he was mustered out of the volunteer service on 24 Aug., 1865. He received the brevet of major-general, U. S. army, for services during the war. On 9 Nov., 1866, he resigned his commission in the regular army.

GARRETSON, Freeborn, clergyman, b. in Maryland, 15 Aug., 1752; d. in New York, 26 Sept., 1827. In 1775 he became a minister of the Methodist Episcopal church, and in December, 1784, he was ordained an elder, and volunteered as a missionary to Nova Scotia. In 1788, with twelve young ministers, he began the work of evangelizing eastern New York and western New England. He married Miss Catherine Livingston, of Rhinebeck, in 1791, and henceforth his labors were confined to New York city. He was eminently successful as a minister, and preached in almost all the eastern states from Nova Scotia to the Gulf of Mexico. He emancipated several slaves belonging to him, and made provisions in his will for the perpetual support of a missionary. See Bang's "Life of F. Garretson" (New York, 1832).—His daughter, **Mary Rutherford,** b. in 1783; d. near Rhinebeck, N. Y., 7 March, 1879, was of marked intellectual ability, and was noted for her works of benevolence and smallness of stature.

GARRETSON, James Edmund, author, b. in Wilmington, Del., 4 Oct., 1828. He was educated at Mantua classical institute, and at the University of Pennsylvania, where he was graduated in medicine in 1859. He afterward established himself in practice in Philadelphia, making a specialty of oral surgery. He successfully introduced many new operations and appliances, and was the first to use the surgical engine, and to introduce it into general practice. Dr. Garretson was a lecturer in the Philadelphia school of anatomy in 1861–'3, and on oral surgery in the University of Pennsylvania in 1866–'9, and has been dean of the Philadelphia dental college since 1879. He became president of

the medical and chirurgical society in 1883, is professor of general clinical surgery in the medico-chirurgical college, and surgeon-in-chief of the hospital of oral surgery. In addition to clinical discourses on surgical subjects, which have been printed in the United States and in Europe, he has published "System of Oral Surgery" (Philadelphia and London, 1869); "Odd Hours of a Physician" (Philadelphia, 1873); "Thinkers and Thinking" (1873); "Two Thousand Years After" (1875); "Hours with John Darby" (1877); "Brushland" (1882); and "Nineteenth Century Sense" (1887); and has contributed largely to general literature. His non-medical books were written under the pen-name of "John Darby."

GARRETT, Alexander Charles, P. E. bishop, b. in Ballymot, County Sligo, Ireland, 4 Nov., 1832. He was graduated at Trinity college, Dublin, in 1855, and took the Divinity testimonium on 19 Dec. of the same year. He was ordained deacon by the bishop of Winchester in the chapel of Farnham castle, Surrey, England, 6 July, 1856, and priest by the same bishop, 7 July, 1857. He was appointed to the curacy of East Worldham, in Hampshire, and held this place till September, 1859. He then sailed as missionary to British Columbia, where he remained for ten years, engaged in active service among the Indians and the white population. In December, 1869, he went to California, and became rector of St. James's church, San Francisco. Here he remained until 1872, when he accepted the rectorship of Trinity cathedral and dean of the cathedral chapter, Omaha, Nebraska. He received the degree of D. D. from Nebraska college in 1872, and from Trinity college, Dublin, in 1882, and that of LL. D. from the University of Mississippi in 1876. Dr. Garrett was elected missionary bishop of northern Texas by both houses of the general convention in 1874, and was consecrated in Trinity cathedral, Omaha, 20 Dec., 1874. He entered on his new duties at once, and has since continued them with zeal and diligence. Bishop Garrett has published several occasional sermons, a "Charge to the Clergy and Laity of Northern Texas" (1875), and "Historical Continuity, a Series of Sketches on the Church" (1875).

GARRETT, John Work, railroad president, b. in Baltimore, Md., 31 July, 1820; d. in Deer Park, Garrett co., Md., 26 Sept., 1884. His father, Robert Garrett, an enterprising merchant, from a small beginning had amassed a large fortune. The son entered Lafayette in 1834, but left in the following year. He then entered his father's counting-room, and in 1839 became a partner in the firm of Robert Garrett and Sons. Mr. Garrett took a great interest in the development of the Baltimore and Ohio railroad. He was elected one of its directors in 1857, and was its president from 1858 till his death. When he took charge of the road, it was in an embarrassed condition, but during the first year of his presidency the increase in its net gain reached $725,385; for the first time since its existence the company paid a dividend, and has continued to pay a semi-annual dividend ever since. In another year the entire floating debt was removed. During the civil war the road was constantly at the mercy of Confederate raiders, and parts of it were frequently destroyed. But the losses on the main stem were more than made up by the large business done by the Washington branch in carrying troops and provisions. After the war numerous branches and connecting roads were built or acquired, forming the present Baltimore and Ohio system. Mr. Garrett was also active in securing a regular line of steamers between Baltimore and Bremen, and between Liverpool and Baltimore. Shortly before his death the Baltimore and Ohio express company and the Baltimore and Ohio district telegraph company were organized. Mr. Garrett was one of the most active trustees of the Johns Hopkins university, and a liberal contributor to the funds of the Baltimore young men's Christian association.—His son, **Robert,** b. in Baltimore, Md., 9 April, 1847, was graduated at Princeton in 1867, travelled in Europe, and, after receiving a business training in the banking-house of his father, became in 1871 president of the Valley railroad of Virginia. He was made third vice-president of the Baltimore and Ohio in 1879, and in 1881 first vice-president. In 1884 he succeeded his father as president, having for some time discharged the functions of that office during his father's absence. Under his management the business and prosperity of the railroad have largely increased. He has directed several memorable contests with rival corporations. Since his accession the extension of the railroad to New York, and the extension of the Baltimore and Ohio telegraph and express business throughout all sections of the country, have been accomplished. He resides in Baltimore, where he has built one of the largest and most luxurious residences in the country, and is identified with many commercial, benevolent, and artistic undertakings in that city.

John W. Garrett

GARRETT, Thomas, abolitionist, b. in Upper Darby, Pa., 21 Aug., 1783; d. in Wilmington, Del., 23 Jan., 1871. He was of Quaker parentage, learned his father's trade, that of an edge-tool maker, removed to Wilmington in 1820, and became a wealthy iron merchant. He was devoted to the cause of emancipation from the time when a colored female servant was kidnapped from his father's house, in 1807, and for forty years gave aid and succor to fugitive slaves, and concealed their flight so skilfully that slave-owners usually gave up the chase when they learned that their runaways had fallen into his hands. As many as 3,000 fugitives from Delaware, Maryland, and Virginia owed their liberty to him. He never enticed negroes to escape, and shrewdly avoided any breach of the law that could be proved against him. In May, 1848, however, he was compelled to pay heavy damages to owners of escaped slaves, and, after the passage of the fugitive-slave law, incurred the penalty of a fine that swept away the remainder of his fortune. In answer to the reprimand of the U. S. district judge before whom he was tried, he said that he had always helped a fellow-being to liberty when he could, and should continue to do so. His fellow-townsmen readily advanced him the capital to begin business again, and before he died he had again acquired a competence. In accordance with his dying instructions, his body was borne to the grave by colored men of Wilmington.

GARRIGUES, Henry Jacques, physician, b. in Copenhagen, Denmark, 6 June, 1831. He was graduated at the University of Copenhagen in

1850, and then studied medicine for four years, until sickness forced him to discontinue his studies. During the next four years he travelled in Europe and America, and on his return to his native country he was appointed professor of French in the military academy of Copenhagen. In 1869 he was graduated in medicine and practised in Copenhagen until 1875, when he came again to the United States, and has since remained here. He first settled in Brooklyn, but in 1879 removed to New York city. He was appointed physician to the gynecological department of the German dispensary in 1879, obstetric surgeon to the Maternity hospital in 1881, obstetrician to the Infant asylum in 1884, gynecologist to the German hospital in 1885, and in 1886 professor of practical obstetrics in the Post-graduate medical school and hospital. Dr. Garrigues is a member of numerous medical societies, and has taken an active part in their proceedings. Besides numerous papers on gynecology in the "American Journal of Obstetrics" and the "Transactions of the Gynecological Society," he has published "Gastro-Elytrotomy" (New York, 1878); "Diagnosis of Ovarian Cysts by means of the Examination of the Contents" (1882); "Practical Guide in Antiseptic Midwifery" (Detroit); and part of the "System of Gynecology by American Authors" (Philadelphia, 1887).

GARRISON, Cornelius Kingsland, capitalist, b. in Fort Montgomery, near West Point, N. Y., 1 March, 1809; d. in New York city, 1 May, 1885. He studied architecture and civil engineering while working on his father's schooner, and also acquired a taste for navigation. In 1830 he removed to Buffalo, where he was employed as a builder, and in 1834 went to Canada, and while there was principally engaged in building bridges and in marine architecture. In 1839 he settled in St. Louis and acquired a fortune from the boats that he built, owned, and commanded. In 1852 he went to Panama and established the banking-house of Garrison, Fritz, and Ralston, and at the same time became agent of the Nicaragua steamship company. In 1856 he was elected mayor of San Francisco, and while there originated the movement that led to the organization of the Pacific mail steamship company. At the end of his term as mayor he was presented by the citizens with a service of forty pieces of California gold. In 1859 he removed to New York and became a financier and speculator. During the civil war Mr. Garrison placed many of his ships at the disposal of the government. He was largely interested in the Pacific railroad of Missouri, which, becoming involved, was sold under foreclosure in 1876. Mr. Garrison was elected president of the reorganized road (now the Missouri Pacific), and out of this reorganization arose the Marié-Garrison suit for $5,000,000, which, after ten years, was decided adversely to Mr. Garrison. In June, 1884, he made an assignment, but his assets were largely in excess of his liabilities.

GARRISON, Joseph Fithian, clergyman, b. in Fairton, Cumberland co., N. J., 20 Jan., 1823. He was graduated at Princeton in 1842, and in medicine at the University of Pennsylvania in 1845. He entered the ministry of the Protestant Episcopal church in 1855, and became rector of St. Paul's, Camden, N. J., which he resigned on being appointed professor of liturgics and canon law in the Philadelphia divinity-school, which chair he still holds (1887). He has contributed largely to periodical literature, and has published separately, besides numerous discourses, "The Formation of the Protestant Episcopal Church in the United States" (1885), and the Bohlen lectures for 1887 on "The American Prayer-Book: its Principles and the Law of its Use" (1887). The degree of D. D. was conferred on him by Princeton.

GARRISON, William Lloyd, journalist, b. in Newburyport, Mass., 10 Dec., 1805; d. in New York city, 24 May, 1879. His father, Abijah Garrison, was a sea-captain, a man of generous nature, sanguine temperament, and good intellectual capacity, who ruined himself by intemperance. His mother, Fanny Lloyd, was a woman of exceptional beauty of person and high character, and remarkable for inflexible fidelity to her moral convictions. They emigrated from Nova Scotia to Newburyport a short time before the birth of Lloyd, and not long afterward the father left his family and was never again seen by them. At fourteen years of age Lloyd was apprenticed to the printing business in the office of the Newburyport "Herald," where he served until he was of age, becoming foreman at an early day, and displaying a strong natural taste and capacity for editorship. From the first he was remarkable for his firmness of moral principle, his quick appreciation of ethical distinctions, and an inflexible adherence to his convictions at whatever cost to himself. His aims and purposes were of the highest, and those who knew him best foresaw for him an honorable career. His apprenticeship ended, he became editor for a time of the Newburyport "Free Press," which he made too reformatory for the popular taste at that day. To this paper John G. Whittier, then unknown to fame, sent some of his earliest poems anonymously, but the editor, discovering his genius, penetrated his incognito, and they formed a friendship that was broken only by death. Mr. Garrison's next experiment in editorship was with the "National Philanthropist" in Boston, a journal devoted to the cause of temperance. We next hear of him in Bennington, Vt., whither he went in 1828 to conduct the "Journal of the Times," established to support John Quincy Adams for re-election as president. Before leaving Boston, he formed an acquaintance with Benjamin Lundy, the Quaker abolitionist, then of Baltimore, where he was publishing the "Genius of Universal Emancipation," a journal that had for its object the abolition of American slavery. Going to New England with the distinct purpose of enlisting the clergy in his cause, Lundy was bitterly disappointed by his want of success; but he mightily stirred the heart of young Garrison, who became his ally, and two years later his partner, in the conduct of the "Genius of Universal Emancipation." This journal, up to that time, had represented the form of abolition sentiment known as gradualism, which had distinguished the anti-slavery societies of the times of Franklin and Jay, and fully answered the moral demands of the period. These societies were at this time either dead or inactive, and, since the Missouri contest of 1819–'20,

Wm Lloyd Garrison.

the people of the north had generally ceased to strive for emancipation, or even to discuss the subject. With the exception of Lundy's earnest though feeble protest, supported mainly by Quakers, the general silence and indifference were unbroken. The whole nation had apparently come to the settled conclusion that slavery was intrenched by the constitution, and all discussion of the subject a menace to the Union. The emancipation of slaves in any considerable numbers, at any time or place, being universally regarded as dangerous to the public peace, the masters were held excusable for continuing to hold them in bondage. Mr. Garrison saw this state of things with dismay, and it became clear to him that the apathy which tended to fasten slavery permanently upon the country as an incurable evil could be broken only by heroic measures. The rights of the slaves and the duties of the masters, as measured by sound moral principles, must be unflinchingly affirmed and insisted upon. Slavery being wrong, every slave had a right to instant freedom, and therefore immediate emancipation was the duty of the masters and of the state. What was in itself right could never be dangerous to society, but must be safe for all concerned; and therefore there could be no other than selfish reasons for continuing slavery for a single day. In joining Lundy, Garrison at once took this high ground, creating thereby a strong excitement throughout the country. His denunciations of the domestic slave-trade, then rife in Baltimore, subjected him to the penalties of Maryland law, and he was thrust into jail. When released upon the payment of his fine by Arthur Tappan, of New York, he immediately resumed the work of agitation by means of popular lectures, and on 1 Jan., 1831, founded "The Liberator," a weekly journal, in Boston, which he continued for thirty-five years, until slavery was finally abolished. It was small at first, but after a few years was enlarged to the usual size of the newspapers of that day. The spirit of the paper was indicated by this announcement in the first number: "I am aware that many object to the severity of my language, but is there not cause for severity? I will be as harsh as truth, and as uncompromising as justice. On this subject I do not wish to think, or speak, or write with moderation. No! no! Tell a man whose house is on fire to give a moderate alarm; tell him moderately to rescue his wife from the hands of the ravisher; tell the mother to gradually extricate her babe from the fire into which it has fallen; but urge me not to use moderation in a cause like the present. I am in earnest—I will not equivocate—I will not excuse—I will not retreat a single inch—and I will be heard." It was a purely moral and pacific warfare that he avowed. No appeal was made to the passions of the slaves, but to the consciences of the masters, and especially of the citizens of the free states, involved by the constitution in the guilt of slavery. But he was charged with a design to promote slave insurrections, and held up to public scorn as a fanatic and incendiary. The state of Georgia offered $5,000 reward for his apprehension, and the mails from the south brought him hundreds of letters threatening him with death if he did not abandon his moral warfare. The whole land was speedily filled with excitement, the apathy of years was broken, and the new dispensation of immediatism justified itself by its results. In 1832 the first society under this dispensation was organized in Boston; within the next two years the American anti-slavery society was formed in Philadelphia, upon a platform of principles formulated by Mr. Garrison; and from this time the movement, in spite of powerful efforts to crush it, grew with great rapidity. Governors of states hinted that the societies were illegal, and judges affirmed that the agitators were liable to arrest as criminals under the common law. Mr. Garrison aggravated his offence, in the eyes of many, by his opposition to the scheme of African colonization, which, under the pretence of unfriendliness to slavery, had gained public confidence at the north, while in truth it fostered the idea that the slaves were unfit for freedom. His "Thoughts on African Colonization," in which he judged the society out of its own mouth, was a most effective piece of work, defying every attempt at an answer. From 1833 till 1840 anti-slavery societies on Mr. Garrison's model were multiplied in the free states, many lecturers were sent forth, and an extensive anti-slavery literature was created. The agitation assumed proportions that greatly encouraged its promoters and alarmed its opponents. Attempts were made to suppress it by the terror of mobs; Elijah P. Lovejoy, in 1837, at Alton, Ill., was slain while defending his press, and in 1835 Garrison was dragged through the streets of Boston with a rope around his body, his life being saved with great difficulty by lodging him in jail. Marius Robinson, an anti-slavery lecturer, in Mahoning county, Ohio, was tarred and feathered in a cruel way; Amos Dresser, a theological student, while selling cottage Bibles at Nashville, Tenn., was flogged in the public square because it happened that, without his knowledge, some of his Bibles were wrapped in cast-off anti-slavery papers; and in Charleston, S. C., the post-office was broken open by a mob, which made a bonfire of anti-slavery papers and tracts sent through the mails to citizens of that city. In 1840 the abolition body was rent in twain, mainly by two questions, viz.: 1. Whether they should form an anti-slavery political party. 2. Whether women should be allowed to speak and vote in their societies. On the first of these questions Mr. Garrison took the negative, on the ground that such a party would probably tend to delay rather than hasten the desired action in respect to slavery. On the second he took the affirmative, on the ground that the constitutions of the societies admitted "persons" to membership without discrimination as to sex. This division was never healed, and thenceforth Mr. Garrison was recognized chiefly as the leader of the party agreeing with him upon these two questions. Personally he was a non-resistant, and therefore a non-voter; but the great body of his friends had no such scruples, and held it to be a duty to exercise the elective franchise in opposition to slavery. In 1844 Mr. Garrison became convinced that the constitution of the United States was itself the main support of slavery, and as such was to be repudiated. Borrowing the words of Isaiah, he characterized it as "a covenant with death and an agreement with hell." His influence carried the anti-slavery societies over to this ground, which they firmly held to the end of the conflict. Few of the members had any scruples as to forceful government. They simply declared that they could not conscientiously take part in a government that bound them by oath, in certain contingencies, to support slavery. The political party anti-slavery men went their way, leaving the work of moral agitation to Garrison and his associates, who were still a powerful body, with large resources in character, argument, and influence. The two classes, though working by divergent methods, had yet a common purpose, and, though controversy between them at times waxed

warm, their agreements were broad and deep enough to insure mutual respect and a no inconsiderable degree of co-operation. The political anti-slavery leaders recognized the value of the moral agitation as a means for the regeneration of public sentiment, and for keeping their own party up to its work; and the agitators bore glad witness to the sincerity of men who, though they could not see their way clear to a repudiation of the constitution, were bent upon doing all that they could under it to baffle the designs of the slave-power. Thousands of the political abolitionists made regular and liberal contributions to sustain the work of moral agitation, and the agitators rejoiced in every display of courage on the part of their voting friends, and in whatever good they could accomplish. The civil war brought the sincere opponents of slavery, of whatever class, into more fraternal relations. Mr. Garrison was quick to see that the pro-slavery Union was destroyed by the first gun fired at Sumter, and could never be restored. Thenceforth he and his associates labored to induce the government to place the war openly and avowedly on an anti-slavery basis, and to bend all its efforts to the establishment of a new Union from which slavery should be forever excluded. In this they had the co-operation of the most enlightened and earnest leaders and members of the Republican party, and on 1 Jan., 1863, their united labors were crowned with success. President Lincoln's proclamation of freedom to the slaves was a complete vindication of the doctrine of immediate emancipation; while the conditions of reconstruction gave the country a new constitution and a new Union, so far as slavery was concerned. When the contest was over, the leaders of the Republican party united with Mr. Garrison's immediate associates in raising for him the sum of $30,000, as a token of their grateful appreciation of his long and faithful service; and after his death the city of Boston accepted and erected a bronze statue to his memory. During the struggle in which he took so prominent a part he made two visits to England, where he was received with many marks of distinction by the abolitionists of that country, as the acknowledged founder of the anti-slavery movement in the United States. The popular estimate of his character and career is doubtless expressed in the words of John A. Andrew, war-governor of Massachusetts: "The generation which immediately preceded ours regarded him only as a wild enthusiast, a fanatic, or a public enemy. The present generation sees in him the bold and honest reformer, the man of original, self-poised, heroic will, inspired by a vision of universal justice, made actual in the practice of nations; who, daring to attack without reserve the worst and most powerful oppression of his country and his time, has outlived the giant wrong he assailed, and has triumphed over the sophistries by which it was maintained."

GARTH, George, British soldier, d. in 1819. His father, John Garth, was member of parliament for Devizes. The son entered the 1st regiment of foot-guards in September, 1755; was made colonel in February, 1779; major-general in November, 1782; and general in 1801. He was afterward governor of Placentia, and was a general of brigade in the American war of the Revolution. In July, 1779, he was second in command of Tryon's expedition, which plundered and destroyed Fairfield and Norwalk, Conn., and served under Clinton in the expedition against Charleston in 1780.

GARTLAND, Francis Xavier, R. C. bishop, b. in Dublin, Ireland, in 1805; d. in Savannah, Ga., 20 Sept., 1854. He received both his classical and theological training at St. Mary's college, Emmettsburg, and was ordained priest by Bishop Connell in Philadelphia, in 1832. He was immediately afterward appointed assistant to Father (afterward Archbishop) Hughes at St. John's church, Philadelphia, and succeeded him as pastor after his nomination to be coadjutor-bishop of New York. In 1845 he was appointed vicar-general and aided the bishop in his administrative duties. He laid the corner-stone of several churches while with Bishop Kenrick. On the erection of the new see of Savannah, in 1849, Dr. Gartland was nominated its first bishop, but, owing to the Roman revolution and the flight of Pius IX., the pontifical briefs for his consecration did not reach Baltimore until 9 Aug., 1850. He was consecrated bishop at St. John's church, Philadelphia, on 10 Sept., by Archbishop Eccleson. Although the resources of the new diocese were very limited, he at once entered strenuously on the work before him. He visited every part of his see repeatedly and enlarged the cathedral of St. John the Baptist, which he rededicated, 26 June, 1853. He erected three new churches, created as many missions, increased the number of his clergy, and established numerous societies and fraternities. Among the institutions with which he endowed his diocese were the Orphan asylum for boys established in Savannah, and the Society of Our Lady Help of Christians. He also established day-schools and Christian doctrine-schools in various places. When Savannah was desolated by the yellow fever in 1854 he went from house to house administering the sacraments. At last he was attacked by the disease, and conveyed to the house of a friend, who cared for him until his death. Bishop Gartland travelled extensively in the northern states the year after his consecration, and visited his native country in the interests of his diocese. He also took part in the deliberations of the eighth council of Baltimore.

GARY, George, clergyman, b. in Middlefield, Otsego co., N. Y., 8 Dec., 1793; d. 25 March, 1855. He entered the New England conference of the Methodist Episcopal church in 1809, in 1818 was made presiding elder, in 1825 was conference missionary, and in 1834 a missionary to the Oneida Indians. In 1836 he was transferred to the Black River conference, and in 1844 was appointed missionary superintendent of Oregon. He remained there for four years, and on his return preached until 1854, when failing health forced him to retire from active ministerial labors. He was an eloquent preacher and did much to advance the religious and educational interests of the church.

GARZA, Lazaro de la (gar'-tha), Mexican R. C. bishop, b. in Pilon, Nueva Leon, 17 Dec., 1785; d. in Barcelona, Spain, 11 March, 1862. He studied law at the university, and was admitted to the bar in 1810, but in 1815 was ordained as a priest. He became successively vice-rector of the seminary, rector of Tepotzotlan, professor of canonical law at the seminary, and rector of the Church of the Holy Shrine in the capital. In 1819 he had taken the degree of doctor in canonical law, and in 1830 doctor of common law in the university of Caracas. In 1837 he became bishop of Sonora, and proceeded immediately to establish a seminary there. He also began to build a cathedral, and endowed many other churches with paintings, images, and vestments. He was confirmed archbishop of Mexico in 1830, and then devoted nearly his whole revenue to works of charity. On the publication of the decree of 25 June, 1856, secularizing the church property, Gar-

za attacked the government violently, and openly favored the reactionary party under Miramon. When the liberal party triumphed, Garza, together with other bishops, was banished by decree of 17 Jan., 1860, and fixed his residence in Havana. In 1861 he was called to Rome by Pope Pius IX., but died on his way thither.

GASCA, Pedro de la, Spanish bishop, b. in Plasencia, Spain, in June, 1485; d. in Siguenza, 13 Nov., 1567. He studied at the University of Alcala, and after leaving college became noted for his knowledge of men and affairs and for an adroit, subtle intellect. In 1542 he was employed by Charles V. in negotiations with the pope and with Henry VIII., requiring great diplomatic skill. When Gonzalo Pizarro, brother of the conqueror, attempted to have himself crowned king of Peru, the emperor, who after a ruinous war was unable to send an army against the rebel leader, commissioned Gasca to restore peace, naming him president of the royal audience of Lima with unlimited powers to punish and pardon. The latter embarked in May, 1546, without troops or money, and accompanied only by two Dominican priests and a few servants. He landed at Panama, where Pizarro's fleet was stationed, and represented himself as a messenger of peace, charged solely with the task of re-establishing justice and granting a general amnesty. At the same time he insinuated that a fleet of 40 sail, having 15,000 men on board, was to leave the harbor of Seville in June, which would quickly restore peace in Peru, if he did not obtain that result by moderation and justice. His adroitness and eloquence, combined with his age and the simplicity of his manners, gained him the affection of the officers, whom he detached from Pizarro, and he was soon master of the whole fleet. Gonzalo still refused to submit, and fled secretly to Cuzco, where he had left the flower of his troops, while Gasca, followed by nearly the whole fleet of Gonzalo, landed at Tumbez in 1547. Here he issued a proclamation announcing the mission with which he was charged by the emperor, and inviting all good citizens to unite their efforts with his, in order to restore tranquillity. By another proclamation he granted a general amnesty to all deserters, and promised rewards to those who would arm in defence of the royal cause. By these prudent arrangements he saw himself soon at the head of a respectable army, which he exercised himself, and with which he marched to Cuzco in December. Pizarro with a strong force encamped on the plain of Xaguijagana, to bar his passage. But Gasca, instead of risking a battle, began to tamper with the principal officers of Pizarro, and won them over by promises and threats. The two armies met in the valley of Sacsahuana, 9 April, 1548, when most of the officers and soldiers of the rebel leader deserted his banner and made their submission to the president, who remained master of the field without having struck a blow. After punishing Pizarro and the fomentors of the revolt with death, Gasca proved himself as good an administrator as he was an able politician. He removed the crowd of adventurers that filled Peru from the country, distributed rewards to the royalists, and pardoned the least guilty among the rebels. He regulated the administration of justice and the collection of the public revenues, while at the same time he issued several regulations forbidding oppression of the Indians. He then surrendered all his powers to the royal audience, and returned to Spain in 1549. On his arrival he was made bishop of Plasencia by Charles V., and in 1561 promoted by Philip II. to the bishopric of Siguenza.

GASPAR, Antonio Xiu (gas-par'), Maya Indian author (whose original name was Chí Xiú), b. in Yucatan about 1541; d. there in the beginning of the 17th century. He was son of the famous priest Kin-Chi, the grandson of Tutul Xiú, an Indian king, who was an ally of the Spaniards, and was educated by the missionaries accompanying an expedition against the hostile Cacomes, under the name of Antonio Gaspar. Young Gaspar Xiú soon learned to speak and write Spanish and Latin, and was very useful to the conquerors as interpreter. He was appointed public translator by royal order, and did much to cultivate knowledge among his native people. In his old age he suffered from poverty and neglect, and by a royal decree of 6 Sept., 1599, was granted a pension in consideration of the services he had rendered to the Spaniards. He wrote "Vocabulario de la lengua Maya," which has been lost, and probably no copy exists now. It is cited by Pimentel in his "Cuadro descriptivo y comparativo de las lenguas indígenas de Mexico," and by many others. He also published a "Relación Histórica sobre las Costumbres de los Indios" (1582).

GASPE, Philip Aubert de, Canadian author, b. in Quebec, 30 Oct., 1786; d. there, 29 Jan., 1871. He was educated in the seminary of Quebec, studied law, and, after practising his profession for some years, became sheriff. But he neglected his duties, and his generosity to friends involved him in difficulties. Those for whom he had sacrificed himself abandoned him in adversity, and he was imprisoned four years for debt. On his release he retired to his domain of Saint-Jean Port-Joli. His "Anciens Canadiens" (1862) was, perhaps, the most popular book ever published in Canada. An English translation, by Mrs. Pennie, was published in England. This and his "Memoires" (1866) deal with the traditions and folk-lore of Canada.

GASPÉ, Philip Ignatius, soldier, b. in Canada, 5 April, 1714; d. there, 19 June, 1787. He entered the army in 1727, and in 1735 served under De Noyelle in the campaign against the Foxes. He followed the Baron de Longueil in 1739 in his expedition against the Natchez and Chicachas on the banks of the Mississippi, and on his return stopped at Michilimackinac, where De Vercheres commanded. He remained there three years, making frequent raids on the English colony. He suggested to Col. Villiers the possibility of capturing Grand-Pré. In 1750 he built a fort on the river St. John, which he commanded for more than two years. He was present at the attack on Fort Necessity, where Washington was defeated, commanded the Canadian militia at the defence of Fort Carillon, in which 3,058 Frenchmen were engaged with about 15,000 English and provincials, and contributed largely to the success of the French in this battle. After the capture of Quebec by the English in 1760 he commanded the grenadiers under Levis. He received the cross of St. Louis in March, 1761, and the rest of his life was passed on his estate of St. Jean Port-Joli.

GASTINE, Civique, West Indian reformer, b. in Fort de France, Martinique, in 1793; d. in Port au Prince, Hayti, 12 June, 1822. He was of a wealthy family, and from early childhood was impressed by his mulatto nurse with sympathy for the colored race. In 1803 he was sent to New Orleans to receive his education, and in 1809 came to Philadelphia to study law. A pamphlet, which he published there regarding the emancipation of the negroes, gave rise to some attacks on him, and when in 1813 he spoke at a public meeting in favor of equality between blacks and whites, he was in dan-

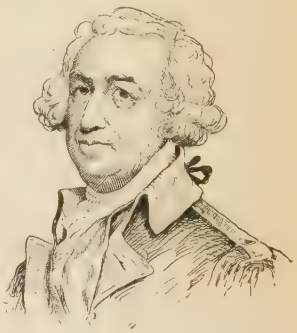
ger of being lynched, and fled to Paris. He escaped conscription there in 1814 as an American citizen, and in 1815 began the publication of the paper "L'ami du noir." He was condemned several times to fines and imprisonment for offensive articles, and, when he published his "Lettre au roi sur l'indépendance de la république de Haiti et l'abolition de l'esclavage dans les colonies françaises" and "De la nécessité de faire un traité de commerce avec Haiti" (Paris, 1821), the government took advantage of Gastine's violent personal attacks to confiscate the work and banish the author. He went to Hayti in 1821, and was enthusiastically received on his arrival at Port au Prince by the public and President Boyer, who appointed him secretary of foreign relations, and granted him a yearly pension of 5,000 francs. By public subscription a magnificent property at Aux Cayes was presented to Gastine, but he only enjoyed it a few months. He published, besides the two works already mentioned, "Histoire de la république de Haiti, l'esclavage et le colon" (Paris, 1819); "L'Esclavage aux États-Unis" (1819); and "Histoire de l'esclavage dans la Louisiane" (1820).

GASTON, William, jurist, b. in Newbern, N. C., 19 Sept., 1778; d. in Raleigh, 23 Jan., 1844. He was the son of Alexander Gaston, an eminent physician of Huguenot descent, who on 20 Aug., 1781, was murdered by the Tories in the presence of his wife and children. The son was educated at Georgetown, D. C., college, and at Princeton, where he was graduated in 1796. He studied law at Newbern, was admitted to the bar in 1798, and soon attained distinction in his profession. In 1799 he was elected to the state senate from Craven county, and in 1808 to the house of delegates, over which he was chosen to preside. He was a member of congress from 1813 till 1815. His speech in opposition to the loan bill, which proposed to place $25,000,000 at the president's disposal for the conquest of Canada during the war with Great Britain, was a model of eloquence and was widely read and greatly admired. He was judge of the supreme court of North Carolina from 1834 till his death, and some of the best statutes of that state, as well as its judicial organization, are his work. In 1835 he assisted the convention in amending the state constitution, and suggested and elaborated nearly all the reforms in it. He spoke and voted against the proposition to deprive free colored men of the franchise. He was offered, but declined, the United States senatorship in 1840.

Wm. Gaston

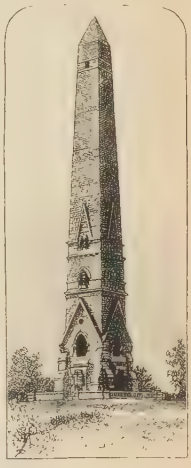
GASTON, William, statesman, b. in South Killingly, Conn., 3 Oct., 1820. He is of Huguenot ancestry, and is descended from John Gaston, who settled in New England about 1730. He was educated at Brooklyn and Plainfield academies, and at Brown, where he was graduated in 1840. He studied law and began practice in Roxbury, Mass., in 1846, was city solicitor from 1856 till 1860, and mayor in 1861–'2. He was a member of the Massachusetts legislature in 1853–'4 and '6, and of the state senate in 1868. He was mayor of Boston, Mass., in 1871–'2, and was elected governor of Massachusetts in 1875, being the only Democrat that has enjoyed that honor in many years. On retiring from the gubernatorial chair, he resumed his professional labors in Boston.

GATES, Horatio, soldier, b. in Malden, Essex co., England, in 1728; d. in New York city, 10 April, 1806. The story that he was a natural son of Sir Robert Walpole is without foundation. His parents were the butler and the housekeeper of the Duke of Leeds. Horace Walpole, himself a mere lad, who chanced at the time to be visiting that nobleman, good-naturedly acted as his god-father. He entered the army while a youth, and served in this country in command of the king's New York independent company. Early in 1755 he was stationed at Halifax, where, under the protection of the Hon. Edward Cornwallis, at that time governor of Nova Scotia, uncle of Lieut.-Gen. Lord Cornwallis, he rose rapidly to the rank of major. Accompanying Braddock on his unfortunate expedition, he was shot through the body at the slaughter of the Monongahela, and for a long time was disabled. In July, 1760, he was brigade-major under Monckton at Fort Pitt, and in 1762 was with that general, as an aide, at the capture of Martinique, rendering effective service and establishing a reputation for military ability. At the close of the war he bought an estate in Berkeley county, Va., where he remained, quietly cultivating his land, until the beginning of the Revolution caused him to offer his sword to congress; and in July, 1775, he received from that body the appointment of adjutant-general, with the rank of brigadier. In the following year he was appointed to the command of that portion of the northern army which had been successively commanded in Canada by Montgomery, Arnold, Wooster, Thomas, and Sullivan. This step put Gates over Sullivan, his senior in rank, much to the disgust of that officer; and it marked the beginning of a series of intrigues by which, with the aid chiefly of the New England delegates in congress, Gates was pushed into higher places, at first superseding Schuyler and afterward attempting to supersede Washington. Gates's present command was over "the northern army in Canada," with headquarters at Ticonderoga. When he reached that fortress he found there was no longer any northern army in Canada, because it had retreated into New York. He then set up a claim to the command of this portion of the northern army independently of Schuyler, who was commander-in-chief of the northern department, with headquarters at Albany. The matter being referred to congress, a discussion ensued, as the result of which Gates was instructed



Horatio Gates

to consider himself subordinate to Schuyler. The scheme for superseding the latter general only slumbered, however, and in the summer of 1777 it was carried out in the midst of the panic produced by the rapid advance of Burgoyne. On 2 Aug., Gates was appointed to command the northern department. He has been suspected of a lack of personal courage, a suspicion that is strengthened by his conduct during the battle of 7 Oct., 1777 (see BURGOYNE, JOHN); for while Burgoyne was in the thickest of the fight, receiving three bullets through his clothes, Gates, two miles away, was looking forward to a possible retreat. Scarcely had the action begun when, by his command, the baggage-trains were loaded, and teamsters placed at the horses' heads, in readiness to move at a moment's notice, Gates ordering them to move on or halt alternately, as the news from the battle-field was favorable or adverse. Indeed, the same incapacity that afterward was so apparent in Gates, during his unfortunate southern campaign, was manifested from the time of his assuming the command of the northern army until the surrender. The laurels won by him should really have been worn by Schuyler and Arnold. Not only had the army of Burgoyne been essentially disabled by the defeat at Bennington before the arrival of Gates, but the overthrow of St. Leger at Fort Stanwix had deranged the plans of the British general, while safety had been restored to the western frontier, and the panic thus caused had subsided. After the surrender, the bearing of Gates toward the commander-in-chief was far from respectful. He did not even write to the latter on that occasion; nor was it until the second day of November that he deigned to communicate to Washington a word upon the subject, and then only incidentally, as though it were a matter of secondary importance. Congress, in the first flush of gratitude, passed a vote of thanks to Gates and his army, and presented him with a gold medal having on one side a bust of the general, with the words "Horatio Gates, duci strenuo," and on the reverse a representation of Burgoyne delivering up his sword. In November, 1777, he was made president of the new board of war and ordnance, and during the following winter sought, with the aid of the disreputable clique known as the "Conway cabal," to supplant Washington in the chief command of the army. His falsehoods in a series of intriguing letters having been exposed by Washington, he fell into some discredit, and in the spring of 1778 it became evident that his ambitious schemes had miscarried. In the course of this affair he became involved in a quarrel with Wilkinson, his former adjutant, which led to a duel, the details of which may be found in the "Boston Evening Post and General Advertiser" for 17 Oct., 1778. He retired from active service, and lived for some time on his estate in Virginia, until he was appointed, 13 June, 1780, to the command of the army in North Carolina designed to check the progress of Lord Cornwallis. In the battle near Camden, S. C., 16 Aug., he was defeated, and his army nearly annihilated. He was soon afterward superseded by Gen. Greene, and suspended from duty. A court of inquiry was appointed to investigate his military conduct, and he was not acquitted or reinstated until 1782; so that the battle of Camden virtually ended his military career. At the close of the war he retired to his estate in Virginia, where he lived until 1790, when he removed to New York city. In 1800 he was elected to the state legislature, but for political reasons resigned soon after taking his seat. His death occurred, after a long illness, at his house, now the corner of 22d street and 2d avenue, then the Bloomingdale pike. Gates was a man of great plausibility and address, of a handsome person and fair education, and a great lion in society. Though having many faults, the chief of which was an overweening confidence in his own ability combined with arrogance and untruthfulness, he had also some noble traits. Before removing to New York from Virginia, he emancipated his slaves, providing for such of them as could not take care of themselves. In his domestic relations he was an affectionate husband and father, and, during the last years of his life, a sincere Christian. He married Mary, only child of James Valence, of Liverpool, who, at her father's death, before the Revolutionary war, emigrated to this country, bringing with her $450,000. In the struggle for independence Mrs. Gates freely expended nearly all of her fortune in a lavish hospitality upon her husband's companions in arms, especially those that were in indigent circumstances; and many of the Revolutionary heroes were participants in her bounty, particularly Thaddeus Kosciusko, who, when wounded, lay six months at her house, tenderly nursed by herself and her husband. Mrs. Gates, who survived her husband, left the residue of her fortune ($90,000) to several relatives, whose descendants are still living in New York and Philadelphia. The Saratoga monument, shown in the accompanying illustration, was erected to commemorate the surrender of Gen. Burgoyne to Gen. Gates, and is in the village of Schuylerville, N. Y. It is 155 feet in height, and stands within the lines of Burgoyne's intrenchments, on a bluff 350 feet above Hudson river and overlooking the surrender grounds. A staircase of bronze leads from the base to the top, whence can be seen the entire region between Lake George, the Green mountains, and the Catskills. On each of three sides of the monument is a niche containing heroic statues of Gens. Gates, Schuyler, and Morgan, while the front is left vacant, with the name of Arnold inscribed underneath. Within the monument, and lining its two stories, are *alto rilievo* decorations in bronze, representing historical and allegorical scenes connected with the campaign of Burgoyne. The corner-stone of this structure was laid on 17 Oct., 1877, when poems and addresses were delivered by Horatio Seymour, George William Curtis, James Grant Wilson, Alfred B. Street, and William L. Stone. See Stone's "Campaign of Lieut.-Gen. Burgoyne" (Albany, 1877), and Bancroft's "History of the United States" (6 vols., New York, 1884).



GATES, Seth Merrill, lawyer, b. in Winfield, Herkimer co., N. Y., 16 Oct., 1800; d. in Warsaw, N. Y., 24 Aug., 1877. He studied law, was admitted to the bar in 1827, and began practice in Le Roy. He was elected to the state legislature in 1832, but declined a re-election. During this session he was instrumental in procuring a charter for the first railroad in western New York, being a portion of the present New York Central. In 1838 he purchased the "Le Roy Gazette," which he edited for

several years. He was elected to congress in 1838, and re-elected in 1840. On the expiration of his congressional service, he removed to Warsaw, and continued his law-practice. On account of his hostility to slavery, a reward of $500 was offered by a southern planter for his "delivery in Savannah, dead or alive." In 1848 he was the Free-soil candidate for lieutenant-governor of New York, but was defeated. He drew up the protest of the Whig members of congress in 1843 against the annexation of Texas, erroneously attributed in several histories to Mr. Adams's pen; and the correspondence between Mr. Gates and ex-President John Quincy Adams, who signed the protest, is still in the possession of his son.—His son, **Merrill Edwards,** educator, b. in Warsaw, N. Y., 6 April, 1848, was graduated at the University of Rochester in 1870. He became principal of the Albany academy in 1870, president of Rutgers

college (shown in the engraving), New Brunswick, N. J., in 1882, and in 1884 a member of the U. S. board of Indian commissioners. He has lectured in the cities of New Jersey and New York on educational topics. The degree of Ph. D. was conferred upon him by the University of New York in 1880, and LL. D. by Princeton in 1882.

GATES, Sir **Thomas,** governor of Virginia, lived in the 17th century. The second charter of Virginia, which bears the date of 23 May, 1609, intrusted the colonization of that land to a numerous body of adventurers. Among those, who were to execute Raleigh's design, were Robert Cecil, earl of Salisbury, Sir Francis Bacon, Capt. John Smith, Sir Oliver Cromwell, uncle to the protector, and others, besides a number of public companies of London, which represented the nobility, army, bar, and industry of England. This new charter transferred to the company the power that had before been reserved for the king and contained a command that allegiance and obedience should be rendered to such governors as should be appointed by the council in England. The officers were Sir Thomas West, Lord De la Warr, captain-general of Virginia; Sir Thomas Gates, lieutenant-general; Sir George Somers, admiral; Capt. Newport, vice-admiral; Sir Thomas Dale, high-marshal; and Sir Ferdinand Wainman, general of horse. Colonization had taken such hold of the public mind that large sums of money were freely contributed, and so many persons desired to be transported that nine ships, with more than five hundred emigrants, were despatched in charge of Capt. Newport, Sir George Somers, and Sir Thomas Gates. They sailed from England in May, 1609, but only seven ships arrived in Virginia. The ship of the three commissioners, the "Sea Venture," was separated from the rest of the fleet by a hurricane, and stranded on the rocks of Bermuda, and a small ketch also perished. Sir Thomas Gates and his passengers remained nine months in Bermuda, where they constructed two vessels, partly from the wreck of the "Sea Venture" and partly from cedars, which they felled. On reaching Virginia, on 24 May, 1610, they found the colony in a state of misery and desolation; for, after the departure of Smith, the old and new colonists, no longer controlled by a recognized authority, had abandoned themselves to indolence and vice. Famine had reduced their numbers to sixty, and only four pinnaces remained in the river. The settlers desired to burn the town, but were prevented by Gates, who resolved to sail for Newfoundland with the remaining colonists, in order to seek a passage for England. As they descended the river, they met Lord De la Warr, bringing colonists and supplies, 9 June, 1610, and returned with him to Jamestown. The council were eager for some immediate profit, and, in order to give them a full account of the state of affairs, Lord De la Warr sent Sir Thomas Gates to England. Becoming discouraged by his report, many of the organization withdrew their aid, and the return of Lord De la Warr confirmed their suspicions. Sir Thomas Gates succeeded, however, in collecting new recruits, and in August, 1611, arrived in Virginia with six ships, three hundred men, one hundred cattle, and all manner of provisions. He assumed the office of governor, and endeavored to make religion the foundation of law and order. During his rule, new settlements were made in Henrico (1611), and the third patent for Virginia was signed (March, 1612), which granted to the share-holders in England the Bermudas and all islands within three hundred leagues of the Virginia shore. This acquisition was subsequently transferred to a separate company. Sir Thomas Gates returned to England in 1614, and endeavored to revive and strengthen the fallen hopes of the London company of share-holders. Sir Thomas Dale succeeded him as governor of Virginia. It is supposed that the wreck of the "Sea Venture" furnished Shakespeare the groundwork for his comedy of "The Tempest."

GATES, William, general, b. in Massachusetts in 1788; d. in New York, 7 Oct., 1868. He was a son of Lemuel Gates, an officer in the Revolution, who died in 1806. He was graduated at the U. S. military academy in 1806, receiving the appointment of 2d lieutenant in the regiment of artillerists, and served in garrison until 1812. When the war with Great Britain began, he was appointed acting adjutant of light artillery and aide to Gen. Porter, and in 1813 he was promoted to captain. He was engaged in the capture of York (now Toronto), Canada West, and in the bombardment and capture of Fort George. In May, 1814, he was transferred to the corps of artillery, and served in garrison and frontier duty for several years. He was appointed captain of the 2d artillery upon the reorganization of the army in June, 1821, and two years later was brevetted major. He served on garrison duty until 1832, when he was stationed at Fort Moultrie, Charleston harbor, during the nullification troubles. He took part in the Florida war, personally captured Osceola, and escorted the Cherokees to the Indian territory. He served in the war with Mexico as colonel of the 3d artillery, and from 1846 till 1848 acted as governor of Tampico, Mexico. Subsequently he served on garrison duty, and retired from active service in 1863. He was brevetted brigadier-general in 1865 for long and faithful service.—His son, **Collinson Reed,** b. in New York in 1816; d. in Fredericksburg,

Texas, 28 June, 1849, was graduated at the U. S. military academy in 1836, and appointed 2d lieutenant of the 4th infantry. He served in the Seminole war in 1836–'8, when he was made 1st lieutenant of the 8th infantry. In 1838 he served on the northern frontier during the Canada border disturbances. He was engaged again in Florida against the Seminole Indians in 1840. In 1843 he served in Texas, and in 1845 in the war with Mexico, was in the battles of Palo Alto, 8 May, 1846, and Resaca de la Palma, 9 May, 1846, where he was wounded and brevetted colonel. He was on recruiting service in 1846, and in the following year returned to his regiment, being engaged in various important battles of Mexico. In 1848 he was in garrison at Jefferson barracks, Mo., and in the following year served on frontier duty in Texas.

GATLING, Richard Jordan, inventor, b. in Hertford county, N. C., 12 Sept., 1818. While yet a boy he assisted his father in perfecting a machine for sowing cotton-seed, and another for thinning cotton-plants. His first invention was a screw for propelling water-craft, but, on applying for letters-patent, he found that he had been anticipated by Ericsson. He subsequently invented and patented a machine for sowing rice, and, on his removal to St. Louis in 1844, he adapted it to sowing wheat in drills. He attended medical lectures at Laporte, Ind., in 1847–'8, and also at the Ohio medical college in Cincinnati in 1848–'9, but never practised his profession. In 1850 he invented a machine for breaking hemp, and in 1857 a steam plough, which, however, was never brought into use. In 1861 he conceived the idea of his revolving battery gun. The first of these was made at Indianapolis in 1862. Twelve were subsequently manufactured and used by Gen. Butler on the James river, Va. In 1865 Dr. Gatling further improved his invention, and in 1866, after satisfactory trials at Washington and at Fortress Monroe, the arm was adopted into the U. S. service. It is also made in Austria and in England, and is used by several European governments. As now perfected, the gun is made of various calibres and weights, for different kinds of service, and consists of a number of simple breech-loading rifled barrels, grouped around and revolving about a common axis, with which they lie parallel. These component barrels are loaded and fired while revolving, the empty cartridge shells being ejected in continuous succession. Each barrel is fired only once in a revolution, so that a ten-barrel gun fires ten times in one revolution of the group of barrels. The mode of firing is simple. One man places one end of a feed-case full of cartridges into a hopper at the top of the gun, while another turns a crank by which the gun is revolved. As soon as the supply of cartridges in one feed-case is exhausted, another feed-case may be substituted without interrupting the revolution or the succession of discharges. The usual number of barrels composing the gun is ten. The invention is now protected by five patents, which cover successive improvements. The nature of these may be inferred from the statement that, whereas the original Gatling gun only fired from 250 to 300 shots per minute, those now made discharge 1,200 shots, as many as 500 having frequently been fired in two and one half seconds. Dr. Gatling now (1887) resides in Hartford, Conn., but has spent much of his time abroad, exhibiting his invention.

GATSCHET, Albert Samuel, ethnologist, b. in St. Beatenberg, Berne, Switzerland, 3 Oct., 1832. He studied at Neuchâtel in 1843–'5, in Berne in 1846–'52, and in the universities of Berne and Berlin in 1852–'8. His attention was early directed to philological researches, and in 1865 he began the publication of a series of brief monographs on the local etymology of his own country, entitled "Ortsetymologische Forschungen aus der Schweiz" (1865–'7). In 1867 he spent some time in London, pursuing antiquarian investigations in the British museum, and during the following year came to the United States. At first he settled in New York, and devoted himself to literary pursuits, publishing several articles on the languages of the American Indians. These led to his being appointed ethnologist of the U. S. geological survey, under Maj. John W. Powell, and he was occupied for a time in arranging the linguistic manuscripts of the Smithsonian institution. In 1879 the bureau of ethnology became a department of the institution, and he has since been actively connected with it. For the better accomplishment of his work, he has made extensive trips for ethnologic and linguistic exploration among the Indians of North America, including journeys to California and Oregon in 1877, to South Carolina and Louisiana in 1881–'2, and to Texas, Louisiana, and Mexico in 1884–'6, and is compiling an extensive report embodying his researches among the Klamath Lake and Modoc Indians of Oregon. Among the languages of other tribes discussed by him in separate publications are the Timucua, Tonkawa, Yuma, Chumeto, Creek, and Hitchiti. He has published very extensively both in magazines and government reports, also in the volumes issued by the American philosophical society. Upward of sixty titles are credited to him by James C. Pilling in his "Bibliography of North American Languages" (Washington, 1885).

GAUL, Gilbert William, artist, b. in Jersey City, N. J., 31 March, 1855. He studied art under John G. Brown, and has devoted himself to genre painting. He was made an associate of the National academy of design in 1879, was elected an academician in 1882, and also in that year became a member of the Society of American artists. Among his works are "Stories of Liberty to the Confined" (1879); "Charging the Battery" (1882); "Holding the Line at all Hazards," which received the first medal of the American art association (1886); and "With Fate Against Them" (1887).

GAULT, Matthew Hamilton, Canadian capitalist, b. in Strabane, Ireland, in July, 1822; d. in Montreal, 1 June, 1887. He was educated at home, and in 1843 went to Canada and engaged in the insurance business. Subsequently he was for several years resident manager of the British American assurance company for the province of Quebec, director of the Richelieu and Ontario navigation company, and interested in many other industrial and financial enterprises. He was the founder of the Irish-Protestant benevolent society of Montreal, and took an active interest for many years in the Montreal garrison artillery, from which he retired in 1866, retaining his rank as an officer. He was elected a member of the Dominion parliament, for Montreal west, in 1878, and was re-elected in 1882. He was a Conservative, and favored the protection of native industries.

GAVIT, John E., engraver, b. in New York, 29 Oct., 1817; d. in Stockbridge, Mass., 25 Aug., 1874. At an early age he went to Albany, where he engaged in steel-engraving and printing. As an engraver of bank-notes his attention was directed to the study of finance and banking in their relations to engraving, and by his inventive and mechanical talent he soon made improvements in his work. In 1855 he assisted in organizing the American bank-note company in New York, and in 1858 united his business with that enterprise.

He held the office of secretary from the time of its organization until 1866, when he was elected president, and remained in office till his death. Under his direction the company furnished bonds, banknotes, revenue-stamps for the governments and banks of Spain, Italy, Greece, Switzerland, South and Central America, as well as for the government of the United States. He took an active interest in astronomy, and aided in establishing the Dudley observatory in Albany. At the time of his death he was president of the Microscopical society of New York, and he had made numerous investigations in this branch of science.

GAY, Claude, French naturalist, b. in Draguignan, 18 March, 1800; d. in Paris, 6 April, 1863. In 1822 he went to Paris to assist at the course of lectures in the museum, in order to study zoölogy and prepare himself for voyages that he projected. After a preliminary excursion to Greece and Asia Minor, he went to Chili to study the flora of South America, arriving at Valparaiso in March, 1828. The results of this expedition were so important that the Chilian government commissioned him, in 1829, to take astronomical observations and prepare a scientific survey of the republic. But he was greatly hampered in his work by want of proper instruments, and in 1832 went to Paris, where, during a stay of six months, several instruments of his own invention were constructed for him. He returned to Chili in 1833, and began a ten-years' exploration of the republic, in which he visited every province and the islands of Juan Fernández and the archipelago of Chiloe. He made also the most detailed bibliographic investigations, taking copies of every important document, and soon had gathered an enormous collection of historical facts and an herbarium of over 4,000 species. The government bestowed the highest honors upon him, and in 1841 congress appropriated the means to publish his work. He also explored Peru and the course of the Ucayali river, and visited Buenos Ayres and Rio Janeiro, and in 1843 returned to France, where he prepared for publication his great work "Historia Física y Política de Chile" (Paris and Santiago, 1843–'51, 24 vols., with an atlas in 2 vols.). In May, 1856, Gay was elected a member of the Academy of sciences in the botanical section. He made a journey through Russia and Tartary in 1856–'8, and toward the end of the latter year was sent by the academy to study the mining system of the United States, returning in 1860. He published, besides his great work mentioned above, "Consideraciones sobre las Minas de Mercurio de Andacolla é Illapel con su posición Geológica" (Valparaiso, 1837; Paris, 1851); "Noticias sobre las islas de Juan Fernández" (Valparaiso, 1840); "Origine de la Pomme de terre" (Paris, 1851; a translation of an article in "La Araucana" of Santiago in 1834); "Triple variation de l'aiguille aimantée dans les parties Ouest de l'Amérique" (1854); "Carte générale du Chili" (1855); "Considérations sur les Mines du Perou, comparées aux mines du Chili" (1855); "Notes sur le Brésil, Buenos Ayres, et Rio de Janeiro" (1856); and "Rapport à l'académie des sciences sur les mines des États-Unis" (1861).

GAY, Ebenezer, clergyman, b. in Dedham, Mass., 26 Aug., 1696; d. in Hingham, Mass., in 1787. He was graduated at Harvard in 1714, taught school at Hadley and Ipswich, at the same time studying theology, and in 1718 became pastor of the church at Hingham, Mass., where he remained till his death, preaching in the same pulpit within three months of seventy years. He was a man of great learning, and celebrated for his wit. His theology was liberal, and he is regarded by some as the father of American Unitarianism. Ex-President John Adams said, on the first distinctive announcement of Unitarian principles in this country, that he had heard the doctrine from Dr. Gay long before. Savage speaks of him as "the honored patriarch of our New England pulpit in that age." He was a Tory during the Revolution, and suffered some persecution at the hands of his own parishioners. He married Jerusha Bradford, a granddaughter of Gov. Bradford, of Plymouth colony, and by her had a large family. Dr. Gay published many sermons, among them one delivered on his eighty-fifth birthday, from the text "Lo, I am this day fourscore and five years old," which became widely known under the title of "The Old Man's Calendar," and went through several editions both here and in England, being also translated into some of the continental languages of Europe. —His son, **Jotham,** b. in Hingham, Mass., in 1733; d. there in 1802, was a colonel in the Continental army, served through the old French war, and was part of the time governor of Fort Edward in Nova Scotia. At the beginning of the Revolution he left the army, being a Tory, and was a refugee in Nova Scotia during the war. He resided for the rest of his life in Hingham.—Ebenezer's grandson, **Samuel,** b. in Boston in 1755; d. in Fort Cumberland, New Brunswick, 21 Jan., 1847, was graduated at Harvard in 1775, and emigrated to Nova Scotia in 1776 with his father, Martin, who was formally banished from Massachusetts as a Tory in 1778. The son afterward settled in New Brunswick, was a member of the first house of assembly of that province, and chief justice of the court of common pleas.—Ebenezer's great-grandson, **Martin,** physician, son of Ebenezer Gay, of Hingham, b. in Boston, Mass., 16 Feb., 1803; d. there, 12 Jan., 1850, was graduated at Harvard in 1823. He had a high reputation as an analytical chemist, and his frequent testimony as a witness in courts of justice, in cases of death by poisoning, marks an era in the history of medical jurisprudence in this country. —Martin's brother, **Sydney Howard,** author, b. in Hingham, Mass., in 1814, entered Harvard at the age of fifteen, but in his junior year was obliged to give up study on account of his health. The degree of A. B. was afterward conferred upon him. After some years, spent partly in travel, partly in a counting-house in Boston, he began the study of law in his father's office in Hingham. But he soon abandoned it from conscientious scruples concerning the oath to support the constitution of the United States; for he came to the conclusion that, if one believed slavery to be absolutely and morally wrong, he had no right to swear allegiance to a constitution that recognized it as just and legal, and required the return of fugitives from bondage. Of the "Garrisonian abolitionists," with whom he thereafter cast his lot, he says: "This handful of people, to the outside world a set of pestilent fanatics, were among themselves the most charming circle of cultivated men and women that it has ever been my lot to know." In 1842 he became a lecturing

S. H. Gay

agent for the American anti-slavery society, and in 1844 editor of the "Anti-Slavery Standard," published in New York. This place he retained till 1857, when he became editorially connected with the "Tribune," of which, from 1862 till 1866, he was managing editor. Henry Wilson, afterward vice-president of the United States, said: "The man deserved well of his country who kept the 'Tribune' a war paper in spite of Greeley." Mr. Gay was managing editor of the Chicago "Tribune" from 1867 till the great fire of 1871. During the following winter he acted with the relief committee, and wrote their first public report, in the spring of 1872, of their great work of the past six months. Subsequently, for two years, he was on the editorial staff of the New York "Evening Post." In 1874, William Cullen Bryant, being invited to join a great publishing-house in the enterprise of preparing an illustrated history of the United States, consented on condition that Mr. Gay should be its author, as he himself could not think of undertaking such a work at his advanced age. Mr. Bryant wrote the preface to the first volume, while the history itself was written by Mr. Gay, with the help of several collaborators in special chapters, to whom he gives credit in his prefaces. This work (4 vols., 8vo, New York, 1876–'80), beginning with the prehistoric races of America and coming down to the close of the civil war, introduced a new treatment of American history, which has been followed by later writers and has become popular. Mr. Gay has since written a "Life of James Madison" (Boston, 1884). He was engaged on a life of Edmund Quincy for the series of the "American Men of Letters," when he was interrupted by a long and serious illness.—Another brother, **Winckworth Allan,** artist, b. in Hingham, Mass., 18 Aug., 1821, was a pupil of Prof. Robert W. Weir, and studied in Italy and France, a part of the time with Troyon. He resides in Hingham, and has attained reputation as a painter of mountain and sea-coast scenery. He has travelled in Egypt, China, and Japan. "A Scene in the White Mountains," painted for the Boston athenæum, and "A Scene in Japan," painted for the Somerset club, of Boston, are specimens of his earlier and later styles. Among his pictures exhibited at the National academy in New York city are "Mackerel Fleet, Beverly Coast, Mass." (1869), and "The Doge's Palace, Venice" (1875). His "Windmills of Delftshaven, Holland," was at the Centennial exhibition at Philadelphia in 1876, and was spoken of in the official report as "a very admirable picture."—Winckworth Allan's nephew, **Walter,** artist, b. in Hingham, Mass., 22 Jan., 1856, entered a business office in his youth, but was sent in 1872, for his health, to a cattle-ranch in Nebraska. He returned to Boston at the age of seventeen, and began immediately to paint flower subjects, one of which, "Fall Flowers," was exhibited at the Philadelphia centennial exhibition (1876). In this year he went to Paris and entered the studio of Bonnat. At the end of three years he made a visit to Spain, the influence of which was seen in his first important picture, "The Fencing Lesson," exhibited at the Paris salon (1879). His other works include "The Trained Pigeons" (1880); "Troubles of a Bachelor" (1881); "The Knife-Grinder" (1882); "Conspiracy under Louis XVI." (1883); "The Spinners" (1885); "The Weaver" (1886); and "Richelieu" (1887), all of which were shown at the Paris salon, and "The Spinners" received honorable mention.

GAY, Edward, artist, b. in Ireland in 1837. He began to study art in Albany, N. Y., with James Hart, and went to Germany in 1862, where he studied with Schirmer in Carlsruhe, and subsequently with Lessing in Düsseldorf. He returned to the United States in 1867, and opened a studio in New York. In 1870 he was elected a National academician, and has regularly contributed to the exhibitions of the Academy and to those of the Water-color society. Among his works are "Mountain Stream" (1860); "Swabian Home" (1869); "Late Afternoon, near Albany" (1870); "Ready for the Reapers" (1875); "A Quiet Hour" (1876); "The Slopes of the Mohawk" (1877); "East Chester, N. Y." (1878); "The Last Load, Harvest-Time" (1878); "Gathering the Leaves" (1880); "Old Estates" (1881); "Banks of the Thames" (1882); "On the Sogne Fjord, Norway" (1883); "Golden Grain" (1883); and "Norwegian Scene" (1884). His water-colors include "Foggy Morning by the Lake" (1876); "A Spring Morning" (1877); "Waving Grain" (1884); "Riverside" (1884); "Haymaking" (1884); "Rye-Fields in Early June" (1885); "Hill-Side" (1885); "Oyster-Beds in Pelham Bay" (1885); and "Salt Marshes" (1885).

GAY, Picard du, French explorer, lived in the 17th century. He accompanied Father Hennepin and Michael Ako on a voyage to explore the sources of the Mississippi river. They left Fort Crèvecœur on 29 Feb., 1680, in a small canoe, and sailed down the Illinois river. After waiting for the Mississippi to become clear of floating ice, they turned northward, and on 11 April, 1680, arrived in Wisconsin, where they were surprised by a body of Indians in thirty-three canoes, who captured the party and seized their goods. On the following day the calumet was smoked, the rude treatment changed for civility, and the explorers were allowed to depart. After sailing nineteen days they came in view of the cataract, which Hennepin named the "Falls of St. Anthony," in honor of his patron saint. Subsequently they were captured by the Sioux, but were permitted various liberties, and Hennepin and Ako went on an exploring trip of several weeks, leaving Picard du Gay in charge of the sword, pistols, and powder. They remained in this region for three months, when they met a party of five Frenchmen under the command of Sieur du Luth, who had arrived by way of the St. Lawrence. Hennepin, Gay, and Ako joined this party, and, after wandering among the savage tribes for a while, returned to Canada in September, 1680.

GAYARRÉ, Charles Étienne Arthur, historian, b. in New Orleans, La., 9 Jan., 1805. He was educated at the College of New Orleans. In 1825, the draft of a criminal code having been laid before the state legislature by Edward Livingston, Gayarré published a pamphlet opposing some of its provisions, particularly that relating to the abolition of capital punishment. He went to Philadelphia in 1826, studied law, and was admitted to the bar there in 1829, returning to New Orleans in 1830. In the same year he was elected to the legislature, and was chosen by that body to write an address complimenting the French chambers on the revolution of 1830. He was appointed deputy attorney-general of the state in 1831, and in 1833 presiding judge of the city court of New Orleans. In 1835 he was elected to the U. S. senate, but impaired health prevented his taking his seat, and he went to Europe, where he remained for nearly eight years. In 1844 he again entered the state legislature, and was re-elected in 1846. He was appointed secretary of state in the latter year and again in 1850, retaining the office for seven years. In 1853 Judge Gayarré was an unsuccessful independent candidate for congress. During the civil

war he espoused the cause of the seceding states, and in 1863 delivered an address urging the arming of the slaves and their emancipation, conditioned on the recognition of the Confederacy by France and England. Since the war he has been for some time reporter of the state supreme court. His historical works comprise the "Histoire de la Louisiane" (2 vols., New Orleans, 1847); "Romance of the History of Louisiana" (New York, 1848); "Louisiana, its Colonial History and Romance" (New York, 1851); "Louisiana, its History as a French Colony" (2 vols., 1851–'2); and "History of the Spanish Domination in Louisiana from 1769 to December, 1803" (1854). The complete "History of Louisiana," revised and brought down to 1861, afterward appeared (3 vols., 1866). He is the author of "Philip II. of Spain," a biography, with an introduction by George Bancroft (New York, 1866); "Fernando de Lemos, Truth and Fiction," a novel (1872); and "Aubert Dubayet," sequel to the foregoing (Boston, 1882). He has also published a drama, "The School for Politics" (1854), "Dr. Bluff," a comedy in two acts, and several literary and political addresses, among which are two lectures on "The Influence of the Mechanic Arts."

Charles Gayarre

GAYLE, John, statesman, b. in Sumter district, S. C., 11 Sept., 1792; d. in Mobile, Ala., in July, 1859. He was graduated at the University of South Carolina, studied law and was admitted to the bar. In 1813 he removed to Mobile, where he began to practise his profession. He was a member of the territorial legislature in 1817, solicitor of the 1st judicial district in 1819, judge of the state supreme court in 1823, a member of the state house of representatives, and its speaker in 1829. From 1831 till 1835 he served as governor of Alabama. He was a presidential elector in 1836 and in 1840. He was afterward elected to congress as a Whig, and served in 1847–'9. He became judge of the U. S. district court of Alabama in 1849. He had brilliant talents but irregular habits.

GAYLER, Charles, dramatist, b. in New York city, 1 April, 1820. He early began journalistic work, and in 1848 edited the Cincinnati "Evening Despatch." He also at this time wrote for the stage. In 1850 he returned to New York and became connected with the press, and is still (1887) a frequent contributor. He has produced upon the American and London stage more than one hundred plays, comedies, dramas, burlesques, etc., the majority of which have received favorable recognition. Among these are "The Gold-Hunters" (1849); "Taking the Chances" (1851); "The Love of a Prince"; "The Son of the Night"; "The Magic Marriage"; "A Mistress of Arts"; "The Connie Soogah"; "The Refugees"; "The American Cousin at Home"; "Our Female American Cousin"; "Olympiana"; "The Robbers of the Rhin-o"; "The Romance of a Very Poor Young Man"; "The Life Shadow"; "Aspasia"; "The Child-Stealer"; "Night and Morning"; "The Wizard's Tempest"; "Out of the Streets"; "Dust and Diamonds"; "With the Tide"; "Fritz"; "Inflation"; "Brom Bones"; "Sleepy Hollow"; "Jacquine"; "Lord Tatters"; "Kissing the King"; "Jalma"; "The Bohemian"; "Under the Ring"; and "Miss Mollie." He has also written several novels, among which are "Montagone," "The Romance of a Poor Young Girl," "Out of the Streets," "Pet," and "The Cousin Germain."

GAZZANIGA, Signora, vocalist, b. in Voghera, Sardinia, in 1825. She studied in the Milan musical conservatory, and made her earliest appearance in 1844 at the opera-house in Venice. After various engagements in the principal cities of Italy, she married in 1850 the titular Italian marquis di Malispina. During the year 1857 she came to the United States, and appeared in Philadelphia on 23 Feb. with an Italian opera-company. On 13 April she performed in New York city, where she at once became a great attraction, and retained her popularity for several years. But afterward, when younger artists had replaced her, she was left to the representation of parts of secondary importance. Gazzaniga successfully taught vocal music for several years in New York city and Philadelphia, and then, with a competence, retired to professional obscurity in her native land.

GEAR, John Henry, governor of Iowa, b. in Utica, N. Y., 7 April, 1825. He removed to Fort Snelling in 1836, and in 1843 became a citizen of Burlington, Iowa, where he has since been engaged as a merchant. He was an original member of the Republican party of Iowa, and in 1863 was elected mayor of Burlington. From 1874 till 1876 he served as speaker in the general assembly of Iowa, and for two sessions was the presiding officer of the state house of representatives. He held the office of governor from 1878 till 1882.

GEARY, John White, soldier, b. near Mount Pleasant, Westmoreland co., Pa., 30 Dec., 1819; d. in Harrisburg, Pa., 8 Feb., 1873. His father was of Scotch-Irish descent. The son entered Jefferson college, but, on account of his father's loss of property and sudden death, was compelled to leave and contribute toward the support of the family. After teaching he became a clerk in a commercial house in Pittsburg, and afterward studied mathematics, civil engineering, and law. He was admitted to the bar, but never practised his profession. After some employment as civil engineer in Kentucky, he was appointed assistant superintendent and engineer of the Alleghany Portage railroad. When war was declared with Mexico, in 1846, he became lieutenant-colonel of the 2d regiment of Pennsylvania volunteer infantry, and commanded his regiment at Chapultepec, where he was wounded, but resumed his command the same day at the attack on the Belen gate. For this service he was made first commander of the city of Mexico, and colonel of his regiment. He was appointed in 1849 to be first postmaster of San Francisco, with authority to establish the postal service throughout California. He was the first American alcalde of San Francisco, and a "judge of the first instance." These offices were of Mexican origin, the "alcalde" combining the authority of sheriff and probate judge with that of mayor, and the judge of the first instance presiding over a court with civil and criminal as well as admiralty jurisdiction. Col. Geary served until the new constitution abolished these offices. In 1850 he became the first mayor of San Francisco. He took a leading part in the formation of the new constitution of California, and was chairman of the territorial Democratic committee. In 1852 he retired to his farm in Westmoreland county, Pa., and remained in private life until 1856,

when he was appointed territorial governor of Kansas, which office he held one year. He then returned to Pennsylvania, and at the beginning of the civil war raised the 28th Pennsylvania volunteers. He commanded in several engagements, and won distinction at Bolivar Heights, where he was wounded. He occupied Leesburg, Va., in March, 1862, and routed Gen. Hill. On 25 April, 1862, he received the commission of brigadier-general of U. S. volunteers. He was severely wounded in the arm at Cedar Mountain, 9 Aug., 1862, and in consequence could not take part in the battle of Antietam. At the battles of Chancellorsville and Gettysburg he led the 2d division of the 12th corps. The corps to which Gen. Geary's regiment was attached joined the Army of the Cumberland, under Gen. Hooker's command, to aid in repairing the disaster at Chickamauga, and he took part in the battles of Wauhatchie and Lookout Mountain, in both of which he was distinguished. He commanded the 2d division of the 20th corps in Sherman's march to the sea, and was the first to enter Savannah after its evacuation, 22 Dec., 1864. In consideration of his services at Fort Jackson he was appointed military governor of Savannah, and in 1865 he was promoted to be major-general by brevet. He was elected governor of Pennsylvania in 1866, and held this office until two weeks before his death. During his administration the debt of the commonwealth was reduced, an effort to take several millions from the sinking fund of the state bonds was prevented, a disturbance at Williamsport quelled, and a bureau of labor statistics established by the legislature, 12 April, 1872. Gov. Geary possessed great powers of application and perception, force of will, and soundness of judgment, and was popular among his troops. In recognition of his service to the state and nation, the general assembly erected a monument at his grave in the cemetery of Harrisburg.—His eldest son, **Edward Ratchford,** b. in Westmoreland county, Pa., 14 Sept., 1845; killed in the battle of Wauhatchie, Lookout Mountain, 28 Oct., 1863, left the sophomore class in Jefferson college in 1861 to enlist as a private in the 28th Pennsylvania regiment. He became captain of Hampton battery, and subsequently a lieutenant in Knapp's battery, which post he held at the time of his death. He was engaged at Cedar Mountain, Antietam, Chancellorsville, and Gettysburg.

GEDDES, George, engineer, b. in Fairmount, Onondaga co., N. Y., 14 Feb., 1809; d. in New York state, 8 Oct., 1883. He studied engineering and surveying in Middletown, Conn., and law in Skaneateles, N. Y. In 1830 he returned to his home and assumed charge of the farm. He was a member of the senate of the state of New York in 1847, and re-elected in 1849. He made an exhaustive report in favor of a railroad law that would enable persons to construct and operate railroads without special legislation, and a bill of this kind was passed in the senate in 1851. He had charge of lowering the canal of Seneca river, from 1853 till 1856. In 1861 he was president of the New York state agricultural society, and in 1865–'71 superintendent of Onondaga salt springs. He was a contributor to newspapers and magazines.

GEDDES, James, engineer, b. near Carlisle, Pa., 22 July, 1763; d. in Geddes, Onondaga co., N. Y., 19 Aug., 1838. He obtained a limited education while working on a farm, and in 1794 removed to Onondaga county, where the town of Geddes was named in his honor. He organized a company for the manufacture of salt in that county in 1794. He was prominent in urging the project for a canal from Lake Erie to Hudson river, and in 1808 was appointed to make the preliminary surveys of the route. He was elected a magistrate in 1800, a member of the State legislature in 1804 and 1812, an associate county justice in 1809, and judge of the common pleas in 1812. From 1813 till 1815 he represented New York in congress. In 1816 he became engineer of the Erie canal, and two years later was appointed chief engineer of the Champlain canal. He was appointed to make surveys for a canal from Ohio river to Lake Erie in 1822. In 1827 he was employed to locate the Chesapeake and Ohio canal, and in 1828 was engineer for the canals of Pennsylvania.

GEDDES, James Lorraine, soldier, b. in Edinburgh, Scotland, 19 March, 1827; d. in Ames, Story co., Iowa, 21 Feb., 1887. In 1837 he was brought by his father, Capt. Alexander Geddes, to Canada. At the age of sixteen he returned to Scotland, but soon sailed for India, where, after studying for two years at the British military academy in Calcutta, he enlisted in the Royal horse artillery, serving seven years under Sir Hugh Gough, Sir Charles Napier, and Sir Colin Campbell. He passed through the Punjaub campaign, was present at the battle of Kyber Pass, and ascended the Himalayas with the last-named officer in the expedition against the hill tribes. For his services he was rewarded with a medal and clasp. At the end of ten years he returned to his home in Canada, and was commissioned colonel of a cavalry regiment; but he soon resigned from the army, emigrating to Iowa in 1857, and settled at Vinton, Benton co. At the beginning of the civil war he gave up his place as a teacher, and in August, 1861, enlisted as a private in the 8th Iowa regiment. He was rapidly promoted captain, lieutenant-colonel, and colonel, being ultimately brevetted brigadier-general in the volunteer service, 5 June, 1865. At Shiloh he was wounded and fell into the hands of the enemy, remaining a prisoner until early in 1863, when he was exchanged and again saw service under Gen. Grant at Vicksburg and under Gen. Sherman at Jackson, Miss. In October, 1863, he was placed in command of a brigade and ordered to Brownsville, Texas. Subsequently he was made provost-marshal of Memphis, and by his exertions the city was probably saved from capture by the Confederate Gen. Forrest. During the Mobile campaign he commanded a brigade, and to him is due the capture of Spanish Fort. The defences of that work were considered impregnable; but on one side ran a ravine, beyond which was a bluff. This vulnerable point was soon discovered by Gen. Geddes, who pushed his men up the ravine, over the bluff, and into the enemy's works, being actually in possession before the commandant of the fort had learned the fact, or it had become known to Gen. Geddes's superior officer. After the war he had charge of the blind-asylum at Vinton for several years, took part in the organization, and for fifteen years shared in the management of the Iowa college of agriculture at Ames, Story co., serving at different times as vice-president, professor of military tactics, treasurer, and land-agent. Gen. Geddes wrote several war-songs, which were set to music and became widely popular. Among them were "The Soldier's Battle-Prayer" and "The Stars and Stripes."

GEDDES, John, governor of South Carolina, b. in Charleston, S. C., about 1773; d. there, 5 March, 1828. He was the son of a merchant, and was educated at the College of Charleston. He studied law, and was admitted to the bar in 1797. He was elected to the house of representatives of

South Carolina, and in 1810 and 1812 was chosen speaker. In 1818 he was elected governor, which office he held until 1820. During his administration he entertained President Monroe at his house on Broad street, in Charleston. He was major of cavalry in 1808, and after his service as governor was made brigadier-general of militia.

GEDDINGS, Eli, physician, b. in the district of Newberry, S. C., in 1799; d. in Charleston, S. C., 9 Oct., 1878. His first education was received in Abbeville academy, and he was graduated in medicine by the examining board of the Medical society of South Carolina in 1820. He began practice in St. George's parish, Colleton district, but soon returned to Abbeville, where he formed a connection with Dr. E. S. Davis. During the winter of 1821–'2 he attended lectures in the University of Pennsylvania. He went to Calhoun settlement, Abbeville district, where he continued until 1824, when he removed to Charleston, and was one of the first to receive a degree from the Medical college in 1825. He voluntarily discharged the duties of demonstrator of anatomy, and after a year spent in the hospitals of Paris and London held this office until 1828, when he resigned it to open a private school of practical anatomy and surgery, in which he was successful. In 1831 he accepted the chair of anatomy and physiology in the University of Maryland, and removed to Baltimore, where he edited the "Baltimore Medical Journal" in 1833, which in 1835 was changed to the "North American Archives of Medical and Surgical Science," to which he contributed essays and editorials. He returned to Charleston in 1837 to take the chair of pathological anatomy and medical jurisprudence in the Medical college. He practised in all branches of medicine and surgery. In 1849 he held the chair of surgery, which he resigned in 1858 so that Prof. Dickson might be reinstated. He was a surgeon in the Confederate army during the civil war. When the fall of Charleston was imminent, his rare medical library was sent to Columbia, where it perished in the fire that destroyed a large part of the city. This library embraced valuable works collected in Europe, and illustrated all branches of medical literature and scientific subjects. His collection of surgical instruments and apparatus was stolen while he was absent from his home during the bombardment of the city. Several years before he had organized in connection with the college a medical and surgical polyclinic, which he revived after the war. In 1871 he resigned his chair, and was elected professor emeritus of the institutes and practices of medicine. In that year a new chair of clinical medicine was created, to which he was elected, and he gave clinical lectures for two years. His early papers, published in the "American Journal of Medical Science" (Philadelphia), include reviews and sketches in various languages.

GEDNEY, Jonathan Haight, inventor, b. in Rye, Westchester co., N. Y., 25 Feb., 1798; d. in Mamaroneck, N. Y., 7 Aug., 1886. He removed to New York, and in 1825 owned the Dry Dock sawmill, which took fire in 1829, making so bright a light that the reflection is said to have been seen as far as New Haven, Conn. By this disaster Mr. Gedney and his partner were ruined. The former subsequently turned his attention to mechanics, and invented the wooden cogs used in the cotton-gin, and a plough for digging potatoes with one or two horses. He afterward returned to Rye, and held several local offices there. In his seventy-fifth year Mr. Gedney walked from Rye Neck to Dean street, Brooklyn, N. Y., in nine hours. When eighty-four years old he mowed for an entire day.

GEE, Joshua, clergyman, b. in Boston, Mass., 29 June, 1698; d. there, 22 May, 1748. He was graduated at Harvard in 1717, and ordained pastor of the Old North church in Boston, in 1723, as the colleague of Cotton Mather, who died in 1728. Mr. Gee continued in charge of the church until his own death. He was a member of an assembly of clergymen that met in Boston, 7 July, 1743, to discuss the progress of religion in this country, and the same year published a letter addressed to the moderator, complaining of the character of the discussions, asserting the prevalence of antinomian errors among the clergy, alleging that not more than one third of the pastors of Massachusetts were in attendance, and upholding the great Whitfieldian revival. He is said to have been a man of strong mind, unusual powers of reasoning, and the possessor of much learning, but to have been intellectually indolent. He is the author of a "Sermon on the Death of Cotton Mather," and two discourses entitled, "The Strait Gate and the Narrow Way Infinitely Preferable to the Wide Gate and the Broad Way" (1729).

GEER, George Jarvis, clergyman, b. in Waterbury, Conn., 24 Feb., 1821; d. in New York, 16 March, 1885. He was graduated at Trinity college, Hartford, Conn., in 1842, and at the General theological seminary, New York, in 1845, and became rector of Christ church, Ballston Spa, N. Y. He became associate rector of the Church of the Holy Apostles, New York, in 1859, and rector of St. Timothy's, New York, in 1866, which charge he held until his death, and of which he had been minister in charge since 1859. He was the first president of the Free church guild of New York, and a member of the general convention of 1874. He received the degree of S. T. D. from Columbia, and that of D. D. from Union in 1862. By appointment of the bishops, he edited and published, with Bishop Bedell and Rev. Dr. Muhlenburg, the "Tune-Book of the Protestant Episcopal Church" (1858). He also published "The Conversion of St. Paul" (New York, 1871).

GEFFRARD, Fabre, president of Hayti, b. in Anse Veau, Hayti, 19 Sept., 1806; d. in Kingston, Jamaica, 11 Feb., 1879. His father, Gen. Nicolas Geffrard, one of the founders of the Haytian independence, died a few weeks after his birth; and the boy, who was adopted by Col. Fabre, commanding a regiment at Aux Cayes, left the college of Aux Cayes in 1821, and enlisted as a private soldier. He rose by successive promotions to a captaincy, and, when Gen. Herard Rivière rose in rebellion against President Boyer in 1843, he appointed Geffrard lieutenant-colonel, and sent him to occupy Jeremie, where he was promoted colonel by the popular committee. He defeated Boyer near Jacmel, and pursued him as far as Tiburon. After the triumph of the revolution in 1844, he was appointed brigadier-general and commander of Jacmel. In 1845 he subdued a rebellion under Gen. Achaau, and was promoted general of division; but, when President Riche came into power in 1846, fearing Geffrard's popularity, he had him arrested and tried by a court-martial, which, however, acquitted him. Under Soulouque's presidency, Geffrard commanded a division of the expeditionary army against the Dominicans in 1849, being wounded in the battle of Azua. When Soulouque proclaimed himself emperor, under the title of Faustin I., in 1850, he created Geffrard Duke of Tabaro. In 1856 Geffrard took part in the unfortunate second campaign against Santo Domingo, and as commander of the rear guard protected the retreat and saved the artillery. When Soulouque's government became

unpopular in 1858, he began to be suspicious of Geffrard's popularity, and deprived him of his command. Geffrard, fearing imprisonment, escaped to Gonaives. When this became known, the people of the two northern departments rose in arms, proclaiming the deposition of Soulouque, and the republic under Geffrard's presidency, 22 Dec., 1858. Geffrard soon collected a large force, and triumphantly entered Port au Prince, 15 Jan., 1859; but he protected the flight of the fallen emperor and his family. Under his presidency, Hayti entered upon a new era of progress. He retrenched the public expenses and reduced the taxes, especially on rural property. But on 3 Sept., 1859, the minister of the interior, Guerrier Prophète, headed a revolt. An attempt on Geffrard's life was frustrated, but one of his daughters was assassinated. He concluded treaties of commerce with France, England, and Spain. In 1861 his government became very unpopular, he being accused of subserviency to Spain, for not opposing the occupation of Santo Domingo by that power, and in 1862 there was a revolt under Gen. Legros at Gonaives, and in 1864 another under Salnave in the north. In June, 1866, Salnave made a new attempt at Gonaives, and was again defeated. Geffrard now promulgated liberal laws and abolished capital punishment for political offences. But the revolt continued to increase in the interior, and on 22 Feb., 1867, was seconded by a pronunciamento in favor of Salnave at Port au Prince; and, although Geffrard put the capital in a state of defence, he soon saw that resistance was useless, and, taking refuge with his family on board a French vessel, 13 March, he went to Jamaica, where he died.

GEIGER, Emily, Revolutionary heroine, b. about 1760. At the period when Gen. Greene retreated before Lord Rawdon from Ninety-Six, S. C., during the Revolutionary war, and had passed Broad river, he was anxious to send an order to Gen. Sumter, who was then encamped on the Wateree, to join him and attack Rawdon, who had divided his forces. But no one could be found willing to run the risk of traversing a section of country that was infested by revengeful Tories. At length a young girl, Emily Geiger by name, offered her services, greatly to the surprise of the American officer, who at once accepted them. He accordingly wrote a letter, which he gave to the girl, but at the same time informed her of its contents, that she might be able to deliver the message orally in case of accident. Emily set out on horseback, and met with no adventures until the second day, when she was intercepted by Lord Rawdon's scouts. Not being skilled in the art of telling falsehoods, she was suspected and placed in confinement, and an old Tory matron was sent for, that she might be searched. Emily utilized the interval by eating the letter, and, nothing suspicious being afterward found on her, she was allowed to proceed. By taking a circuitous route, she succeeded in reaching her destination and discharging her mission. In consequence, Sumter soon joined the main army at Orangeburg. Emily Geiger married a wealthy planter named Threrwits, who lived on the Congaree river, S. C.

GEIKIE, Cunningham, Scottish clergyman, b. in Edinburgh, 26 Oct., 1826. He was educated at the High school and at the University of Edinburgh. Following his father to Canada, he became pastor of a church near Toronto, and subsequently was called to one in Halifax. In 1862 he accepted a pastorate in Sunderland, England, and in 1876 took orders in the Church of England, and has held rectorships at Paris and at Barnstable, England. He is a prominent "Low church" leader, and is the author of the following among other works: "The Backwoods of Canada" (1864); "Great and Precious Promises" (1872); "Life and Words of Christ" (1877); "Old Testament Portraits" (1878); and "Hours with the Bible" (1881, *et seq.*). Nearly all his works have been republished in the United States. The "Life of Christ" has passed through twenty-five editions in Great Britain, and has been reproduced in four separate editions in the United States.

GEISINGER, David, naval officer, b. in Maryland in 1790; died in Philadelphia, 5 March, 1860. He was appointed midshipman in the U. S. navy, 15 Nov., 1809; lieutenant, 9 Dec., 1814; commander, 11 March, 1829; and captain, 24 May, 1838, being placed on the reserved list, 13 Sept., 1855. During the war of 1812 he saw much active service, and was on board the "Wasp" in her brilliant cruise off the English coast in 1814. He had the good fortune to be sent to Savannah, Ga., in command of the prize brig "Atalanta," and escaped the fate of the "Wasp," which was lost with all on board. Capt. Geisinger was for several years in command of the naval asylum in Philadelphia.

GEISSENHAINER, Frederick Wilbono, clergyman, b. in Mülheim, Germany, 26 June, 1771; d. in New York city, 27 May, 1838. In early life he gave evidence of great intellectual precocity, and, having studied at the universities of Giessen and Göttingen, he served for a while as "professor extraordinarius" in the latter institution. So unusual were his attainments that he was ordained when only twenty years old, although five years younger than the age at which candidates were usually allowed to enter the ministry. Emigrating to this country in 1793, he labored for fifteen years in the Groschenhoppen and associated Lutheran churches in Pennsylvania, and in 1808 removed to New York city as the successor of Dr. Kunze, at the old Swamp church. He was absent for a time on account of failing health, but returned to New York in 1822, and remained there until his death. He possessed a powerful intellect, which had been brought under the influence of the most thorough culture. Latin and Greek were as familiar to him as his native tongue. He was made D. D. by the University of Pennsylvania in 1826. His literary remains include lectures on church history and on the gospels, epistles, and portions of the Old Testament.

GELDEREN, Adolphus Van, educator, b. in Rotterdam, Holland, in 1835. He was educated in his native city, emigrated to South America, and in 1856 was appointed professor of languages in the University of Sucre, Bolivia. He afterward went to the Argentine Republic, in 1860 established in Buenos Ayres the first graded public school, and was appointed principal of the National college of Parana. In 1874, under Sarmiento's administration, a normal school was established in Buenos Ayres, and Van Gelderen was appointed principal. When in 1880 the city of Buenos Ayres was erected into a federal district, the normal college passed also under the National government, and Van Gelderen soon made it the foremost establishment of its class in the republic. Prof. Van Gelderen speaks and writes fluently Spanish, English, Dutch, German, French, Italian, and Portuguese, and is also proficient in Latin, Greek, and Hebrew. He has published valuable works on education, and his text-books prepared for the Argentine schools have won high praise. In 1885 he was named an officer of the French academy, and decorated with the special medal awarded to meritorious educators.

GELELEMEND, or **KILL-BUCK,** Delaware chief, b. in Pennsylvania in 1737; d. in Goshen, Ohio, in 1811. His name signifies "a leader." He was chief counsellor of the Turkey tribe of the Delaware nation, and, after the death of Capt. White Eyes, became principal chief. He was a strenuous advocate for peace among his people during the Revolution, which drew upon him the animosity of those of his countrymen who took up arms against the Americans. Gelelemend united with the Moravian mission at Salem, Ohio, in 1788, and in baptism was named William Henry, after Judge William Henry, of Lancaster, Pa. A lineal descendant is Moravian missionary to Alaska (1887).

GEMMILL, John Alexander, Canadian lawyer, b. in the County of Lankark, Ontario, 20 March, 1847. He was educated at the Grange school, Sunderland, England, and at the University of Glasgow, Scotland; was admitted to the bar of Ontario in 1871, and has since practised as a parliamentary solicitor in Ontario. He has edited and published "The Canadian Parliamentary Companion" (1883 and 1885).

GEMÜNDER, August, violin-maker, b. in Ingelfingen, Würtemberg, Germany, 22 March, 1814. His father being a violin-maker and repairer, August was brought up to the business, to which he succeeded on the death of the former. In 1839 he removed to Regensburg, and, after residing in several other cities in Germany, he emigrated to the United States in 1846. He remained in Springfield, Mass., until 1865, and then established himself in New York city, where he is still in business. Mr. Gemünder makes a specialty of copying the old Italian masters, especially the instruments made by Antonius Stradivarius, Joseph Guarnerius, and Paoli Maggini. In 1844 he was asked by a German violinist to make a violin that should not be an imitation, as to tone or any other quality, of the Italian masters. In executing the order, he succeeded in producing an instrument that he has since kept as a model. His violins have been used by some of the leading soloists. They possess a pure, even quality of tone, respond easily, and are thought to excel the Italian instruments, from which they are copied, in power. Mr. Gemünder has contributed to the trade journals a series of articles, in which he discussed "Old and New Violins," including a comparison of the tone of those instruments with the human voice; "The Cremona Secret," a disquisition on the wood used in the manufacture of violins; "The Lost Secret and Common Sense," with others on Italian varnish, violin construction, etc. He was at one time in partnership with his brother George.—His brother, **George,** violin-maker, b. in Ingelfingen, Würtemberg, Germany, 13 April, 1816, was a pupil of Baptiste Vuillaume, in Paris, and removed to the United States in 1847, establishing himself in Boston, Mass. In 1851 his violins obtained the prize-medal of the world's fair in London. In 1852 he removed to New York, where he afterward resided. Vuillaume, and other European makers of violins, were in the habit of giving a pseudo-antiquity to their wood by a chemical process, thus gaining a desirable quality of tone; but wood thus treated soon loses its resonance, and after a time the instruments become worthless. Gemünder, however, succeeded in making out of natural wood violins that met every requirement, and in respect of volume, power, equality, and quickness of tone are said to be equal to the work of the best old masters. In the model and finish of his instruments, and especially in the varnish, he was unusually successful, so faithfully reproducing the distinctive characteristics of the old Italian violins that those made by him are not infrequently mistaken for genuine Cremonas. One called the "Kaiser," finished in 1873 and sent to the Vienna exhibition, was there pronounced an Italian violin of the classic period, it being considered impossible to produce so fine a tone from a new instrument. Mr. Gemünder has also received medals from exhibitions held in Paris (1867), New York (1870), Vienna (1873), Philadelphia (1876—"hors concours"), Amsterdam (1883), Nice (1883–'4), London (1884), New Orleans (1884–'5—"hors concours"), and London (1885). He is the author of "Progress in Violin-making" (Astoria, N. Y., 1881), to which is prefixed an autobiographical sketch.

GENEST, Edmond Charles, diplomatist, b. in Versailles, France, 8 Jan., 1765; d. in Schodac, Rensselaer co., N. Y., 14 July, 1834. Although he had been brought up at the French court, and although his sisters, Madame Auguié and Madame Campan, were in the service of Marie-Antoinette, he early attracted attention by his republican opinions. He was sent, in 1789, as chargé d'affaires to St. Petersburg, where his situation soon became uncomfortable, and in 1791 he was informed by Count Ostermann, the minister of Catherine II., that he had better not appear again at court, in view of the excitement then existing in France. He remained in Russia until July of the year following, when he received his passports. On his return to France he was appointed minister to Holland, but before he could proceed thither he was accredited to the United States in December, 1792. He reached Charleston, S. C., in April, 1793, was cordially welcomed, and in the following month had a formal reception in Philadelphia, where he was presented by the citizens with an address congratulating France on obtaining the freedom she had helped the United States to secure. Encouraged by these demonstrations of popular feeling, Genest thought he could easily persuade the American people to espouse the cause of his country, notwithstanding Washington's recently issued proclamation of neutrality. He openly maintained that the United States were in duty bound to side with France against England, and bitterly denounced the American government for want of sympathy with the young republic. He even went so far as to issue commissions to privateers, and ordered that their prizes should be tried and condemned by French consuls in the United States. He also planned hostile expeditions against Florida and Louisiana, which were then colonies of Spain. In consequence of these imprudent measures, Washington demanded and obtained his recall. Genest, however, decided not to return to France, but was naturalized and settled in the state of New York, where he married first a daughter of Gov. George Clinton, and afterward a Miss Osgood. In his adopted country he took great interest in promoting improvements in agriculture and in the arts and sciences. At the age of twelve he translated the "Histoire d'Eric XIV., roi de Suède," from the Swedish of Celsius, for which he received a gold medal from Gustavus III. (Paris, 1777). He also translated from the same language Nicholas Idman's treatise on the Finns and their language (Strasburg, 1778).

GENIN, John Nicholas, merchant, b. in New York city, 19 Oct., 1819; d. there, 30 April, 1878. His grandfather, John Nicholas, came to this country from France in 1780, as clerk in the commissary department under Gen. Rochambeau, while his uncle, Thomas Hedges Genin, was one of the early settlers of Ohio, an active abolitionist, a friend of

Benjamin Lundy, and the author of "The Napolead," descriptive of Napoleon's campaign in Russia (privately printed, 1833). Young Genin was early apprenticed to the trade of hat-making, and in 1841 began business for himself. On 11 Sept., 1850, he bought, for $225, the first seat sold for Jenny Lind's first concert in the United States. This was so universally commented upon by the press that it was estimated that, at current rates, he received over $80,000 worth of gratuitous advertising. In the autumn of 1851 it was announced that Louis Kossuth was on his way to this country, and Mr. Genin proposed that 100 wealthy citizens should contribute $1,000 each for the use of the Hungarian patriot, and gave that amount himself. He was also an active promoter of the public reception, which included a military parade. Having on hand a lot of "dead stock," in the shape of black low-crowned soft hats, he fastened the left side of the brim to the crown, ornamented it with a black feather, and, boarding the vessel at Sandy Hook, presented all of the refugees, many of whom were ragged and shoeless, with "Kossuth" hats, which they wore on the march up Broadway. Low-crowned soft felt hats at once became popular, and the manufacturers subsequently recognized Mr. Genin's services in their behalf by presenting him with a silver service valued at $1,200. In 1852, Miss Amelia Bloomer complained to Mr. Genin that she could not find a hat suited to her costume. The latter set himself to invent one, and produced the first round hat, not a bonnet, that was worn by young women. During 1853, the lower part of Broadway being in a filthy condition, he proposed to the city authorities to erect a bridge opposite his store at his own expense. The offer was rejected, but the Leow bridge, which was subsequently built on nearly the same site, was a fac-simile of that designed by Mr. Genin. His most public-spirited enterprise was the cleaning, in the spring of 1854, of Broadway and other streets, which had been left in an almost impassable condition by the neglect of the city officials. He employed over 100 men and carts, the work being done at night, and continued to perform this self-imposed duty for one month, only discontinuing it on the promise of the street commissioner to sweep Broadway nightly. The labor cost $1,543.70, and $1,255.33 of this amount having been subscribed by the public, Mr. Genin again received a large amount of free advertising for the small expenditure of $288.37. Mr. Genin was the author of a book entitled "History of the Hat from the Earliest Ages to the Present Time" (1847). It was profusely illustrated, and subsequently enriched with drawings of over one thousand different styles of ancient head-dresses. From these he had more than 500 fac-similes made, and exhibited them in connection with his business.

GENNES, Julien, Count de, French navigator, b. in Vitré in 1652; d. in Plymouth, England, in 1704. He entered the French navy under the auspices of the Maréchal de Vivonne, and, being sent on several missions, acquitted himself with such credit that he was promoted captain and named chevalier of the Order of St. Louis in 1677. He was also granted large pensions and an extensive tract of land in Cayenne, which the king created a county under the name of Comté d'Oyac. Some filibusters, who had sailed to the Straits of Magellan, proposed to De Gennes, on their return to France, to found a colony there. De Gennes went to Paris and organized a company for this purpose, the king placing six vessels at its disposal. The expedition, under command of De Gennes, sailed from La Rochelle, 3 June, 1695, entered the Straits of Magellan, 11 Feb., 1696, and, having doubled Cape Forward, a bay not down on the charts was discovered and named French bay, and the river emptying into it De Gennes. Soon afterward De Gennes decided to return to France, leaving behind a small colony. Afterward he was made governor of the French part of the island of St. Christopher, and had only about 160 men with which to defend himself when the English began hostilities without going through the formality of declaring war. The latter having gathered a force of over 2,000 men, De Gennes, after negotiating, signed articles of capitulation, acting under the advice of twelve out of seventeen members of a council of war which he had called together. This advice was not that of the king's lieutenant, Valmeinier, and his ineffectual protest was made the basis of charges subsequently brought against the governor. After prolonged discussions and recriminations, the English finally took possession, 16 July, 1702. After vainly attempting to return for a time to Cayenne until the French court should have been informed of the truth regarding his capitulation, he was captured by a Dutch cruiser, taken to St. Thomas, and finally landed, in April, 1703, in Martinique, the very place he wished to avoid. Capt. de Machault, governor-general of the French West India islands, insisted on putting him on trial. De Gennes defended himself energetically, and would doubtless have been acquitted, had he not been imprudent enough to bring charges against three of his judges. In August, 1704, he was declared to be guilty of cowardice, degraded from the nobility, and deprived of the cross of St. Louis and of all the other honors that had been conferred upon him. From this judgment he appealed to the king, and was on his way to France in the "Thetis," when that vessel was captured by the English and taken into Plymouth, where De Gennes died without being able to establish his innocence. No sooner, however, had Louis XIV. learned of his death than he bestowed large pensions on his widow and children, and restored De Gennes's titles. De Gennes had a taste for mathematics and mechanics. Among his inventions were cannon and mortars, arrows designed to perforate and damage the sails of vessels in battle, and watches without springs or weights—all made of ivory. He also invented "a peacock that could walk and digest food," and many other curious devices that are said to have greatly pleased the king. He wrote "Relation d'un voyage fait en 1695 à '97 aux côtes d'Afrique, detroit de Magellan, etc.," etc. (Paris, 1699), and "Des Îles sous le vent, leurs ressources et leur avenir" (1701).

GENTH, Frederick Augustus, chemist, b. in Waechtersbach, Hesse-Cassel, 17 May, 1820. After attending the gymnasium in Hanau, he studied at the University of Heidelberg, under Liebig at Giessen, and finally under Bunsen at Marburg, where he received the degree of Ph. D. in 1846. For three years he acted as assistant to Prof. Bunsen, and soon afterward came to the United States, where he has since resided. In 1872 he was called to the chair of chemistry and mineralogy in the University of Pennsylvania, which place he still occupies. He has also held the office of chemist to the geological survey of Pennsylvania and also to the board of agriculture of that state. Prof. Genth is a member of many scientific societies in the United States, and was elected in 1872 to membership in the National academy of sciences. Prof. Benjamin Silliman, Jr., speaks of him as having "no superior in this country as an analytical chem-

ist," and he has greatly enriched the literature of chemistry with his very many and careful analyses of minerals. His name is associated with the ammonia cobalt bases which he discovered in 1846, and, in joint authorship with Dr. Wolcott Gibbs, he has contributed to the "Smithsonian Contributions to Knowledge" a monograph on "Researches on the Ammonia-Cobalt Bases" (Washington, 1856). Prof. Genth is the author of nearly 100 separate papers on subjects in chemistry and mineralogy, and has published "Tabellarische Übersicht der wichtigsten Reactionen welche Basen in Salzen zeigen" (Marburg, 1845), also the same in relation to "Acids" (1845); "Minerals of North Carolina," being appendix "C" of the "Report on the Geology of North Carolina" (Raleigh, 1875): also "First and Second Preliminary Reports on the Mineralogy of Pennsylvania" (Harrisburg, 1875–'6), and "Minerals and Mineral Localities of North Carolina" (Raleigh, 1881).

GENTRY, Meredith Poindexter, statesman, b. in Rockingham county, N. C., 15 Sept., 1809; d. near Nashville, Tenn., 2 Nov., 1866. In 1813 his father, a wealthy planter, removed to Williamson county, Tenn., where the facilities for education were limited. Meredith's school-days ended at the age of fourteen, when he had acquired little more than the rudiments. He, however, supplemented these while working on his father's plantation by reading the standard English authors. He also took great delight in perusing the congressional debates. He early conceived a fancy for military life, and joined a militia company, of which he was soon elected captain, and subsequently promoted colonel of the regiment. He became known as a popular orator, and in 1835 was chosen to a seat in the legislature, which he retained until 1839, when he was elected to congress, taking his seat, 2 Dec., 1839, and at once joining Messrs. Clay, Webster, and Calhoun in their efforts to stem the tide of what they held to be the dangerous encroachments of the executive. Mr. Gentry was an original Whig, and remained such until the party ceased to exist. His first speech, which attracted universal attention, was in favor of the reception of petitions praying for the abolition of slavery. Although himself a large slave-holder, and maintaining that the Federal government had no right to interfere with slavery in individual states, he urged that the petitions, although asking what could not be constitutionally granted, should nevertheless be received and considered. His second speech, on the bill to secure freedom of elections and restrict executive patronage, was one of the ablest of that congress, and became an effective campaign document in the presidential canvass of 1840. Mr. Gentry was re-elected to the 27th, known as the "Whig congress," but, on account of the death of his first wife, refused to be a candidate for election to the 28th. He was, however, returned to the 29th, and was also elected to the 30th, 31st, and 32d. Mr. Gentry's first speech, after his return to congress in December, 1845, was in reply to the charge of President Polk that the Whigs were giving aid and comfort to the enemy through their opposition to the Mexican war. Mr. Gentry, in behalf of himself and his political friends, indignantly repelled the aspersions of the president. As a result of the speech, a resolution was introduced by the Whigs declaring that, while patriotism required that the armies should be sustained, yet the war should be waged only for the purpose of obtaining an honorable peace, and not with any view to conquest. On leaving congress Mr. Gentry retired to his plantation in Tennessee, and after the election of Mr. Lincoln became a secessionist. He was elected to the Confederate congress in 1862, and again in 1863. He did not approve, however, of the policy of the authorities at Richmond. He advocated secession only as a temporary expedient. "There were very few men in the house of representatives," said Alexander H. Stephens, "who could compare with Mr. Gentry in political knowledge, and in the readiness with which he brought this knowledge to bear on any point in running debate. His eulogy on Clay, delivered without premeditation, was apt, powerful, and pathetic. Socially he was urbane and genial, and was possessed of high conversational powers, with a fund of humor and anecdote."

GEOFFRION, Felix P. C., Canadian statesman, b. in Varennes, Quebec, 4 Oct., 1832. He was registrar for Vercheres from 1854 to 1863, and has been president of the Montreal, Chambly, and Sorel railway. He represented Vercheres in the Canada assembly from 1863 till the union, when he was elected to the Dominion parliament. He moved for a select committee in 1874 to inquire into the causes of the difficulties in the Northwest territory, of which committee he became chairman, and prepared the report which was submitted to parliament. In July, 1874, he was appointed minister of inland revenue, and was re-elected by acclamation. He resigned his portfolio in consequence of illness in December, 1876, retaining, however, his seat in parliament. He was re-elected in 1878, and again in 1882.

GEORGE, Enoch, M. E. bishop, b. in Lancaster county, Va., in 1767; d. in Staunton, Va., in August, 1828. He was under the ministry of Rev. Devereux Jarratt, then of the Church of England, and was in early life the subject of deep religious impressions; but, having been separated from Mr. Jarratt's ministry, he became negligent of his religious duties, till, after several years, the place where he resided was visited by a Methodist evangelist, under whose exhortations young George became connected with the little Methodist society of his neighborhood. In 1790 he was admitted on trial into the Virginia conference of the Methodist Episcopal church, and served for two years as junior preacher in Caswell circuit. After this he went to South Carolina, and in 1796 was presiding elder of Charleston district, and the next year, on account of impaired health, he retired from active work of the ministry. In 1803 he entered the Baltimore conference, where he labored with great zeal and success, till at the general conference, held in Baltimore in May, 1816, he was elected and ordained a bishop, in which office he served with zeal and effectiveness for twelve years. Bishop George belonged to the primitive school of American Methodist preachers, some of whom without

extensive scholastic advantages became able and highly effective preachers of the gospel, and also attained proficiency in biblical and theological learning. He was especially distinguished for the fervor and pathos of his pulpit discourses. During the years of his episcopacy he travelled, chiefly by private conveyance, through all parts of the country, not excepting the frontier settlements of the west and southwest, usually preaching nearly every day, at prearranged appointments, at which were often witnessed remarkable manifestations of the influence that attended his preaching. He would never allow his portrait to be taken, and therefore his personal appearance is known only by tradition. He is described as of fair size and well proportioned, with dark hair worn long, and complexion sallowed by exposure.

GEORGE, Henry, political economist, b. in Philadelphia, 2 Sept., 1839. He went to sea at an early age, and, reaching California in 1858, remained there, becoming finally a journalist. In 1879 he published "Progress and Poverty," which was issued in the following year in New York and London, and soon acquired a world-wide reputation. This book is "an inquiry into the cause of industrial depressions and of increase of want with increase of wealth," in which the previously held doctrines as to the distribution of wealth and the tendency of wages to a minimum are examined and reconstructed. In the fact that rent tends to increase not only with increase of population but with all improvements that increase productive power, Mr. George finds the cause of the well-known tendency to the increase of land values, and to the decrease of the proportion of the produce of wealth that goes to labor and capital, while in the speculative holding of land thus engendered he traces the tendency to force wages to a minimum and the primary cause of paroxysms of industrial depression. The remedy for these he declares to be the appropriation of rent by the community, thus making land virtually common property, while giving to the user secure possession and leaving to the producer the full advantage of his exertion and investment. In 1880 Mr. George removed to New York. In 1881 he published "The Irish Land Question," and in the same year visited Ireland and England. In 1883–'4 he again visited England and Scotland, at the invitation of the English land reform union, making speeches on the land question, and in 1884–'5 he made another trip at the invitation of the Scottish land restoration league, producing on both tours a marked effect. In 1886 he was the candidate of the United labor party for mayor of New York, and received 68,110 votes against 90,552 for Abram S. Hewitt, the Democratic candidate, and 60,435 for Theodore Roosevelt, the Republican candidate. Soon after this, Mr. George founded the "Standard," a weekly newspaper, which he still edits (1887). He has also published "Social Problems" (1884), and "Protection or Free-Trade" (1886). The latter is a radical examination of the tariff question, in which connection is made between the controversy on that subject and the views as to land with which Mr. George has become identified.

Henry George

GEORGE, James Zachariah, senator, b. in Monroe county, Ga., 20 Oct., 1826. He lost his father in infancy, and his mother removed, when he was eight years of age, to Noxubee county, Miss., where he was educated in the common schools. He served as a private in the 1st Mississippi volunteers, commanded by Jefferson Davis, during the Mexican war, and was at the battle of Monterey. On his return he studied law, was admitted to the bar, and in 1854 elected reporter of the high court of errors and appeals. He was re-elected in 1860. He served as a member of the state convention that passed the ordinance of secession, which he voted for and signed. He was a captain in the 20th Mississippi volunteers in the Confederate army, and subsequently colonel of the 5th Mississippi cavalry. He was also appointed a brigadier-general of militia. He was chairman of the Democratic state executive committee, 1875–'6, was appointed a judge of the supreme court of the state in 1879, and afterward elected chief justice. The latter office he resigned in February, 1881, to take his seat in the U. S. senate. His term expired 3 March, 1887. Judge George prepared and published ten volumes of the decisions of the court of which he was the official reporter, and subsequently issued a digest of all the decisions from the admission of Mississippi into the Union to and including the year 1870.

GEORGE, Samuel Carr, missionary, b. in Alleghany county, Pa., 8 July, 1832. He was graduated at the Western university of Pennsylvania in 1858, and at the Western theological seminary in April, 1861. In the following October he was ordained as a foreign missionary, and sailed the same month for Siam. He remained there until the spring of 1873, when he returned to the United States. In May, 1875, he was installed pastor of the Rocky Spring and St. Thomas Presbyterian churches in Franklin county, Pa., where he still remains. In May, 1886, he was elected professor of the Sanskrit and cognate tongues in Wilson female college at Chambersburg, Pa. Mr. George founded in Wilson college a scholarship in memory of his wife, and has presented to the college his oriental library, comprising works written in Sanskrit, Zend, Pali Siamese, and Burmese. At the solicitation of a London publishing firm he has prepared a "Grammar of the Siamese Language," which is still (1887) in manuscript.

GERALDINI, Alejandro, R. C. bishop of Santo Domingo, b. in Amelia, Italy, in 1455; d. in Santo Domingo in 1525. He became a soldier in early life and went with his brother to Spain, where he served against the Portuguese in 1475–'6. He afterward entered the church, and was intrusted with the education of the princesses of the royal family. While at court he rendered an important service to Columbus, who had come to present to the sovereigns of Castile and Aragon his plan for discovering a new world. Geraldini says: "They were discussing this project in a council composed of men of the most eminent rank. Opinions were divided, because several Spanish prelates treated the view of Columbus as manifest heresy; they cited the authority of Nicolas de Lyra, who represents the terrestrial globe as not containing any lands on the sides, neither beneath nor beyond the Canaries; and that of St. Augustine, who affirms that there are no antipodes. I chanced to be standing then behind Cardinal de Mendoza, a man equally remarkable for his accomplishments and

his learning. I represented to him that Nicolas de Lyra had been a very able theologian, and St. Augustine, a doctor of the church illustrious for his doctrine and sanctity, but that both had shown themselves bad geographers, for the Portuguese had reached a point on the other hemisphere where they had lost sight of the polar star and had discovered another at the opposite pole, that they had found all the countries under the torrid zone well populated." This argument produced its effect, and Columbus was heard. Geraldini was employed in diplomatic services in nearly all the courts of Europe, and his zeal in the service of the state was rewarded first with the bishopric of Volterra and Monte Corvino, and finally with that of Santo Domingo, which he was the first to hold. He embarked in 1520 at Seville to take possession of his see. He founded schools and seminaries in the island, and did everything in his power for its spiritual and temporal welfare. Geraldini wrote a great many works on theology, collections of letters, exhortations addressed to Christian princes against the Turks, poetry, sacred and profane, a life of Catharine of Aragon in hexameter verse, treatises on politics and education, and finally an account of his voyage to the Antilles, which appeared under the title "Itinerarium ad regiones sub equinoctiali plaga constitutas Alexandri Geraldini Amerini, episcopi civitatis S. Dominici apud Indos occidentales" (Rome, 1631). This work gives a detailed narrative of the voyage of Geraldini along the coast of Africa to the mouth of the Senegal and thence to Santo Domingo. The editor adds a sketch of the life of the author and a list of his works, printed and in manuscript. The best part of the work is the description of Santo Domingo, the condition of which at the time it was written being vividly set forth. We learn from it that already the native race had been almost entirely exterminated. In one of the letters annexed to his relation Geraldini announces that he is sending, among other rarities, two turkeys. This letter was written in 1523, and is consequently prior to the work of Oviedo, who had been regarded as the first author who mentioned these fowls. Geraldini wrote a curious treatise entitled "De viris Geraldinis qui in obsequio apostolicæ Sedis per varia tempora insudarunt," which Alacci read in manuscript and speaks of in his "Apes urbanæ."

GÉRARD, Conrad Alexandre, diplomatist, b. in France; d. in Strasburg in April, 1790. He was one of the secretaries of Count de Vergennes, foreign minister under Louis XVI., and as such arranged and signed the treaty between France and the United States, 6 Feb., 1778. He was the first French minister accredited to the United States, reaching Philadelphia early in July of that year. He remained in this country until September, 1779, when he was succeeded by the Chevalier de la Luzerne. In the discussions with congress in 1779 with regard to the conclusion of a treaty of peace with Great Britain, and arranging the boundaries of the new republic, the Chevalier Gerard bore an important part, enjoying the full confidence of Count de Vergennes. In 1779 he received the degree of LL. D. from Yale.

GERARD, James Watson, lawyer, b. in New York city in 1794; d. there, 7 Feb., 1874. He was graduated at Columbia in 1811, and soon after leaving college became enrolled in a volunteer company called "The Iron Greys," which was raised for the defence of the harbor during the war with Great Britain. He then studied law with George Griffin, and practised in New York till 1869, becoming distinguished in his profession. Mr. Gerard early turned his attention to schemes of philanthropy. In 1823 he became a member of the "Society for the prevention of pauperism," and outlined and urged on the public mind a plan for the establishment of the institution now known as the "House of refuge for juvenile delinquents," the incorporation of which he, in connection with others, procured in March, 1824. This was the first institution of the kind in the United States. He was the first person in this country to advocate a uniformed police. By letters, addresses, and persistent action, he so impressed the importance of the change on the community that the uniformed system was adopted, and has since been generally employed in the various cities of the United States. During the last twenty years of his life he was actively engaged in the cause of public education, and held the office of trustee or school-inspector for most of that period. Mr. Gerard invariably declined to be a candidate for any other office.—His son, **James Watson,** lawyer, b. in New York city, about 1822, was graduated at Columbia in 1843. He was active in the profession of the law until 1880, and successively occupied the offices of trustee and inspector of public schools. He was subsequently a state senator in 1876–'7. He is the author of several minor satirical works, including "The Pelican Papers" (New York, 1879), and of two legal works, "Title of the Corporation and others to the Streets, Wharves, Lands, and Franchises in the City of New York" (1872), and "Titles to Real Estate in the State of New York" (1873). He has also published an historical work called "The Peace of Utrecht" (1885), and has written many historical papers and delivered addresses chiefly relating to the early colonial history of the state of New York.

GERHARD, William Paul, sanitary engineer, b. in Hamburg, Germany, 30 July, 1854. He was educated at the gymnasium in Kiel and at the polytechnic school in Carlsruhe, where he was graduated as a civil engineer in 1875. After a year of military service he became an assistant engineer in Hamburg. In September, 1877, he came to the United States and settled in St. Louis, Mo., where he held the offices of assistant engineer in the department of public works, then in the department of water-works, and finally in the sewer department. During 1880 he assisted James B. Eads in the preparation of the plates of the "History of the St. Louis Bridge," and in 1881 became chief assistant to George E. Waring in Newport. He removed to New York in 1883, where for two years he was chief engineer of the Durham house-drainage company, and since has practised sanitary engineering, devoting himself particularly to the sanitation of buildings and towns. He is a member of scientific organizations both in Germany and in the United States. During 1885–'6 he edited "Building," and, besides articles on his specialties contributed to technical journals, he has published reports on the sanitary plumbing and drainage of tenement-houses in the annual volumes of the Rhode Island and Connecticut state boards of health. His larger works include "Anlagen von Haus-Entwässerungen" (Berlin, 1880); "Diagram for Sewer Calculations" (London and New York, 1882); "House-Drainage and Sanitary Plumbing" (New York, 1883); "Hints on the Drainage and Sewerage of Dwellings" (1884); "Sanitary Questions" (1884); "Prinzipien der Haus-Kanalization" (Leipsic, 1885); "A Guide to Sanitary House-Inspection" (New York, 1885); "The Prevention of Fire" (1886); "Notes embodying the Recent Practice in Sanitary Drainage of

Buildings" (1887); "Domestic Sanitary Appliances" (Springfield, 1887); and "The Disposal of Household Wastes" (1887).

GERHARD, William Wood, physician, b. in Philadelphia, 23 July, 1809; d. there, 28 April, 1872. He was graduated at Dickinson in 1826, and received the degree of M. D. from the University of Pennsylvania in 1832. After graduation he entered the Pennsylvania hospital as resident physician, where he spent three years in practical study. He then visited Europe, spent several years in Paris under the private instruction of the celebrated auscultator, Dr. Louis, and began investigations into the character of Asiatic cholera, small-pox, tubercular meningitis, and pneumonia in the young. He also collected a portion of the materials for his original work on typhoid and typhus fevers, which he afterward completed by establishing the specific differences between these two diseases. After his return to Philadelphia he was appointed lecturer in the medical institute, one of the visiting physicians to the Blockley hospital, assistant clinical lecturer to the late Prof. Jackson, and subsequently one of the physicians to the Pennsylvania hospital, where he lectured to a large class of students, and for twenty-five successive years was the senior physician to that institution. He was the author of numerous valuable papers in the "American Journal of the Medical Sciences" and in the "Medical Examiner," of which paper he was editor, but his principal work was the "Diagnosis, Pathology, and Treatment of the Diseases of the Chest," which first appeared as a short treatise on the "Diagnosis of Thoracic Diseases" (1835). At the request of many of his pupils he added general symptoms and treatment, with additional lectures (1846; enlarged ed., 1860). It was again issued, being a 4th ed., in 1860, revised and enlarged (Philadelphia). He was also the author of "Spotted Fever, or Cerebro-Spinal Meningitis" (1863); "Fevers" (1867–'8); and a "Clinical Guide" (Philadelphia). He edited Graves's "System of Clinical Medicines," with notes and additions.—His brother, **Benjamin,** lawyer, b. in Philadelphia, Pa., in 1812; d. there, 18 June, 1864, was graduated at Dickinson college in 1828, studied law, and was admitted to the bar in 1832. He filled many responsible offices in his native city, and during the early part of the civil war was appointed provost-marshal of Philadelphia to superintend the draft, performing the duties without compensation. He was also a founder and an officer of the Union league. His death was hastened by his devotion to the national cause. As a lawyer he ranked high, and published several carefully edited text-books, among which are "Starkie on Evidence" and Joshua Williams's "Principles of the Law of Personal Property" (2d American edition, from the 2d London edition, edited by Benjamin Gerhard and Samuel Wetherill, Philadelphia, 1855).

GERHART, Emanuel Vogel, educator, b. in Freeburg, Snyder co., Pa., 13 June, 1817. He was graduated at Marshall college, Mercersburg, Pa., in 1838, studied theology, and was ordained a clergyman of the German Reformed church. He subsequently received the degree of doctor of divinity. He was president of Heidelberg college at Tiffin, Ohio, and professor in the theological seminary from 1851 till 1855, and of Franklin and Marshall college from 1855 till 1866. In 1868 he was chosen to be professor of systematic and practical theology in the seminary of the Reformed church at Lancaster, Pa., and president of the faculty. He has been a frequent contributor to religious literature, and for several years edited the "Mercersburg Review." His most important work is "Philosophy and Logic" (Philadelphia, 1857).

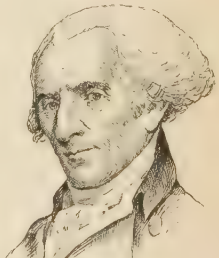
GERMAINE, Lord **George,** Viscount Sackville, English statesman, b. in England, 26 Jan., 1716; d. there, 26 Aug., 1785. He was the third son of the first Duke of Dorset. His father being lord-lieutenant of Ireland, he was educated at Trinity college, Dublin. He served in the British army in Germany, attaining the rank of lieutenant-general, but was cashiered for cowardice at the battle of Minden. He entered parliament in 1761, and on the accession of George III., with whom he was a favorite, was made colonial secretary, in which office he had charge of the conduct of the war with the colonies. He zealously supported all vigorous measures against the colonists, and sternly opposed every attempt to effect a termination of hostilities. He advocated the hiring of mercenaries, urged the Six Nations to unite against the rebels, rejoiced over the massacres by the Indians, praised British rapacity and cruelty in the colonies, and applauded the plot to buy Arnold and others. He was so consistently an opponent of all liberal measures that he became highly unpopular in his own country, and during the London riots of 1780 he was compelled to barricade his house. In 1783 he became Viscount Sackville. He was one of the supposed authors of the Junius letters. Bancroft, in his "History of the United States," represents Lord George as ambitious, opinionated, and full of envy, arrogant in speech and combining contemptuous haughtiness toward his inferiors with meanness of spirit. Without fidelity, fixed principles, or logical clearness of mind, and unfit to conduct armies or affairs, he joined cowardice to love of superiority and a dislike of those who thwarted him. "Apparelled on Sunday morning in gala," says the historian, "as if for the drawing-room, he constantly marched out all his household to his parish church, where he would mark time for the singing-gallery, chide a rustic chorister for a discord, stand up during the sermon to survey the congregation or overawe the idle, and gesticulate approbation to the preacher or cheer him by name."

GERMAN, Obadiah, senator, b. in Dutchess county, N. Y., in 1767; d. in Norwich, N. Y., 24 Sept., 1842. He received an academic education, and removed in 1792 to Norwich, N. Y. He was a member of the assembly in 1798, 1804–'5, and 1807–'9. He was then elected to the U. S. senate as a Democrat, serving from 22 May, 1809, till 2 March, 1815. He voted against declaring war with Great Britain, but, after hostilities had been begun, he did all in his power to support the war measures of the administration. He was again elected a member of the assembly in 1819, and chosen speaker. He was also first judge of Chenango county for several years, and was subsequently loan commissioner and brigadier-general of militia. Later in life he became a zealous Whig.

GERONIMO, a chief of the Chiricahuas, belonging to the Apache tribe of North American Indians. As Geronimo had for some time been at the head of a band of "hostiles," Lieut.-Gen. Sheridan ordered the pursuit, capture, and destruction of the chief and his followers. The expedition was commanded by Gen. George Crook, and a meeting with Geronimo was effected on 25 March, 1886. Gen. Crook demanded his unconditional surrender, with the members of his band; but the Indian declared that he would give himself up only on condition that the band should be sent east for a period not exceeding two years, with the privilege of taking their families with them, and that they should ultimately be returned to the reservation

on the original status. The terms were accepted, and the party set out for Fort Bowie. On 29 March the Indians escaped to the mountains. Gen. Sheridan became dissatisfied, and, as Gen. Crook asked to be relieved, Gen. Nelson A. Miles took his place. The instructions given to the latter called for the ceaseless pursuit of the hostile Indians, and suggested "the active and prominent use" of the "regular troops" of the command. Then began one of the most exhausting and prolonged Indian campaigns on record. The Chiricahuas were followed with such sleuth-like pertinacity that even the endurance of the red men found its limit. The hardy old chief was given no time to rest or recruit; his followers were forced to keep moving until they yielded. But, even when reduced to such straits, Geronimo succeeded in making terms with his captors. When the news was received in Washington, it was supposed that the surrender was unconditional, and the president consequently ordered that the band should be kept as prisoners until they could be tried for their crimes or otherwise disposed of. It was subsequently ascertained that the "hostiles" had stipulated that they should be sent out of Arizona, and Gen. Miles had ordered them taken to Fort Marion, at St. Augustine. This order was countermanded by the president, and Geronimo and his fourteen adult companions were sent to Fort Pickens, Fla., where they now are (1887).

GERRY, Elbridge, statesman, b. in Marblehead, Mass., 17 July, 1744; d. in Washington, D. C., 23 Nov., 1814. His father, Thomas Gerry, came from Newton, England, to this country in 1730, and established himself as a merchant in Marblehead. Elbridge was graduated at Harvard in 1765, and the subject for master's degree assigned to his class at the annual commencement afforded him an opportunity, under the guise of discussing the right of a people to evade ruinous innovations in trade and revenue laws, to give his views on the principles of the stamp-act and the other oppressive revenue measures that had been lately enacted by the British government. Gerry, on leaving college, entered commercial life, and in a short time had amassed a considerable fortune. His public career began in 1773, when he sat in the general court of Massachusetts bay, as the representative of Marblehead, and from this time until his death in 1814 he was, with short interruptions, in continuous public life. In 1773 the assembly appointed a committee of correspondence, consisting of Hancock, Orne, and Gerry, whose duty it should be to keep informed on all governmental acts relative to the British colonies, and communicate with the sister colonies thereupon. Gerry was an active member of this committee, and warmly supported Samuel Adams in his dealings with Gov. Hutchinson. In 1774, despite the prohibitory order of Gov. Gage, an assembly election took place, and the delegates convened at Salem, but adjourned first to Concord and then to Cambridge. The members organized as a provincial congress, and held sessions thereafter annually at Cambridge and Watertown. Gerry was a conspicuous member of this revolutionary body, and as a committee of safety and supplies attended to the collection of ammunition and provisions for the militia. He drafted a bill, which was adopted in 1775, providing for the fitting out of privateers and the establishment of an admiralty court for the adjudication of prizes. The putting into effect of this measure was the initiatory step toward a national navy. In January, 1776, Mr. Gerry was chosen a delegate to the Continental congress. Associated with him on the Massachusetts delegation were Hancock, the Adamses, and Paine. He acted on the standing committee on the treasury, on that for providing the means of furnishing supplies to the army, on the issue of bills of credit, on the best methods of conducting the business of legislation in congress, and others. The committee on supplies, consisting of Sherman, Gerry, and Lewis, attended Washington at his headquarters near New York, to inquire into the necessities of the troops and the best means of supplying their wants, and as a result of their mission some measures of reform in regard to furnishing clothing, in the system of appointments and promotions, in the enlistment of the militia, in the administration of the quartermaster-general's department, and in the plan of hospital establishments, were approved by congress. Mr. Gerry early advocated the scheme for declaring the independence of the colonies, and, when the proposition was before congress, promoted the passage of the measure with all his powers of argument, seconding at the final stages the motion for adoption, and affixing his signature on its enactment. Congress convened at Philadelphia, 4 March, 1777, and Gerry attended the entire session, during which he reported a resolution authorizing the seizure of private property on the presentation of certificates of value, as a substitute for the wretched system of supply, which had thrown on the country a flood of depreciating currency. The congress, having little appreciation of the embarrassments of the army, sent out a committee, composed of Morris, Gerry, and Jones, to examine Washington at his post on the Schuykill with regard to the prosecution of a winter campaign to make up for the losses of the summer and autumn of 1777. Their report expressed some dissatisfaction, conveying the idea that a more vigorous exertion of the military power might be made. The plottings of the "Conway cabal" had, without doubt, an effect upon the congressional committee, but it is improbable that they contemplated lending themselves to the schemes for Washington's overthrow. The Massachusetts members did not escape from the charge of complicity, but Gerry's correspondence shows that the imputation was unfounded in his case, although he cherished resentment at the opposition of the army to congressional promotions. Mr. Gerry is credited with having, during this session, devised the plan of operations for Gates's campaign against Burgoyne.



Elbridge Gerry

Negotiations for a treaty of peace were opened in the spring of 1779, and, at the instigation of Mr. Gerry, the protection of the fishery rights was made a stipulated article for a settlement. It was while he was chairman of the treasury committee in the congress of 1780, to which body he had been elected for the fifth time in November, 1779, that Mr. Gerry came into the conflict with Benedict Arnold, whose accounts he overhauled in a manner highly displeasing to that officer.

Mr. Gerry's sensitiveness as to the rights of a delegate from a sovereign state involved him in a difficulty with congress in February, 1780, which led him to vacate his seat in that body, holding that the rights of his state had been infringed in a refusal of congress to order the yeas and nays on a question of order raised by him. He laid his complaint before the legislature, which passed resolutions of protest. This incident suspended Mr. Gerry's congressional service for about three years. In 1783, on a joint ballot in the general court, he was recalled to the position of a representative in congress. Meanwhile his constituents had given him their suffrages for state senator and simultaneously for representative, there being at that time no provision against plurality of office. He undertook only the duty of representing his town in the lower house, declining senatorial service. The congress to which Gerry was now elected concluded the treaty of peace with Great Britain, and he was on the committee to arrange the matter. The states at that time regarded their delegates in the light of ministers from independent sovereignties, and the Massachusetts legislature required from Mr. Gerry a fortnightly report of his proceedings. The proposition to organize the Society of the Cincinnati met with the determined opposition of Gerry, who lost no opportunity in public and private of pointing out the dangerous character of such an unrepublican institution. A riot in Philadelphia in 1783 caused a removal of congress to Princeton in June of that year. This event brought up the plan of a federal city, and two committees, with Gerry as chairman of each, were appointed to examine sites. In April, 1785, Mr. Gerry's constituents repeated their performance of designating him for two elective offices, while he still held his place in congress. His term there expired in September, 1785, and he accepted a seat in the popular branch of the legislature of his state. The sentiment of Massachusetts as to a constitutional convention as expressed by the legislature in 1785 was in favor of establishing "the Federal government on a firm basis, and to perfect the Union," declaring that "the present powers of congress of the United States, as contained in the articles of confederation, are not fully adequate to the great purposes they were originally designed to effect." These resolutions were given to Gerry, Holten, and King, in the form of instructions, but they construed them as merely advisory, and opposed every move in the congress of 1785 toward giving enlarged powers to the National government. They wrote a letter to Gov. Bowdoin in justification of their action, saying that "any alteration of the confederation is premature; the grant of commercial power should be temporary; . . . the cry for more power in congress comes especially from those whose views are extended to an aristocracy." Gov. Bowdoin replied to the effect that if it was hazardous to intrust congress with powers necessary to its well-being, the Union could not long subsist. The letters of Gerry and King being concurred in by Samuel Adams, then president of the senate, stayed any demonstration of disapproval by the general court. Despite this antagonistic attitude, Mr. Gerry was elected delegate to the convention. He took part in all its deliberations, and succeeded in introducing into the constitution some of his propositions, and his energies were directed throughout to the prevention of the incorporation in the system of any features which he regarded as monarchical or tending to aristocracy. At the final moment, regardless of the pleadings of Washington and Franklin, Gerry, Randolph, and Mason withheld their assent to the constitution as adopted by the convention. Gerry returned to Massachusetts to seek an election to the State federal convention, but was defeated by Francis Dana. The convention extended to him an invitation to attend its sessions, for the purpose of answering questions of fact in regard to the constitution, but at the outset he created a commotion in the assembly by offering in writing a reply to a query, some members thinking that he sought to interject an argument under the guise of answering a question. The letter which caused the trouble, together with an account of the scene in the convention, taken from the "Massachusetts Sentinel," is printed in the edition of the debates and proceedings of the convention, published by the legislature in 1856. Mr. Gerry stated eight objections to the constitution, all of which he could waive, were it not that the National legislature had general power to make "necessary and proper" laws, to raise "armies and money" without limit, and to establish "a star chamber as to civil cases." Weary of sitting in a body to which he had not been chosen, he soon withdrew.

After the adoption of the constitution, Gerry was in accord with the Republican party, which elected him to the 1st National congress in 1789, and re-elected him in 1791. In 1797 President Adams nominated him as a colleague with Marshall and Pinckney to go on a mission to France to obtain amends for French depredations on our commerce. In France they suffered many indignities at the hands of Talleyrand, who sent mysterious agents with disgraceful propositions, involving bribery and humiliation. Marshall and Pinckney soon became disgusted, and sailed for home, but Gerry thought it his duty to hold on, in the hope of preventing a rupture with France. (See ADAMS, JOHN.) The affair aroused great indignation in the United States, and his recall was soon ordered.

In 1800 the Republican party nominated Mr. Gerry for governor, and in a close election he was defeated by Caleb Strong. In 1810 his efforts for the same office were rewarded with success, and he served for two terms. His administration was at a period of high party spirit, and he put into full effect the Jeffersonian principles of civil service. The incumbents of the civil offices were speedily removed from office, and their places filled by sympathizers with the Republican party, causing a great outcry in the opposition papers. The Federal press became so vituperative in its denunciations that Gov. Gerry resorted to the extraordinary step of making the matter the subject of a special message to the legislature, transmitting at the same time a report of the attorney- and solicitor-general regarding the libellous articles. The message caused great excitement and the opposition responded by charging the governor with usurping his powers. The disaffection created by these proceedings, and the unpopularity occasioned by the partisan redistricting of the state, which was called by the Federalists the "Gerrymander," effected an overturn at the next election, the Federalists gaining control of the house, and electing Caleb Strong

governor. The ex-governor's devotion and services to the Republican party were rewarded in 1812 with the office of vice-president, and he held this office at the time of his death, which occurred while he was on his way to the capitol. He married Ann, daughter of Charles Thomson, secretary of congress, who, with three sons and six daughters, survived him. Mr. Gerry's career, though characterized by devotion to party, and such episodes as the refusal to assent to a vote of thanks to Hancock on his retirement from the presidency of congress, the opposition to the Society of the Cincinnati, and the unhappy French mission, was honorable and useful; and his patriotic services in the Revolutionary struggle entitle him to a high place among the statesmen of the early days of the republic. A monument was erected to his memory in the congressional burial-ground at Washington by the government. (See accompanying illustration.) His messages to the legislature have been published as follows: "Speech of His Excellency the Governor of the Commonwealth of Massachusetts to both Houses of the Legislature, at the Session commencing on the Second Wednesday in January, 1812" (Boston, 1811); "Legislature of Massachusetts. Speech, June 7, 1811. At twelve o'clock, His Excellency the Governor, attended by His Honor the Lieutenant-Governor and the Honorable Council (completely attired in cloth of American manufacture), met the two Branches of the Legislature" (Boston, 1811); "Message from His Excellency the Governor, February 27, 1812, regarding Libellous Articles" (Boston, 1812). See his life by James T. Austin (2 vols., Boston, 1828–'9); and a sketch, by Henry D. Gilpin, in Sanderson's "Lives of the Signers of the Declaration of Independence."—His grandson, **Elbridge Thomas,** lawyer, b. in New York city, 25 Dec., 1837, was graduated at Columbia in 1857, studied law with William Curtis Noyes, and afterward became a partner in the firm of Noyes and Tracy. On the death of Mr. Noyes, in 1864, he formed a partnership with William F. Allen and Benjamin B. Abbott, which was subsequently dissolved. He has attained note at the bar, and owns one of the finest law libraries in the country, numbering 12,000 volumes. He became counsel of the Society for the prevention of cruelty to animals in 1870, took an active part in the formation of the Society for the prevention of cruelty to children in 1874, and in 1879 was elected its president. Mr. Gerry was a member of the State constitutional convention in 1867. He was chosen commodore of the New York yacht club in 1886, and re-elected in 1887.

GERRY, Samuel Lancaster, artist, b. in Boston, Mass., 10 May, 1813. He was mostly self-taught, and, with the exception of three years abroad, his professional life has been passed chiefly in Boston. He was an original member of the Boston art club, and its president in 1858. Among his works are "The Gorge of the Rhine," "The Old Man of the Mountain," "Pasture Gate," "Land of Beulah" (now owned by Wellesley college), "Over the River," "Bridal Tour of Priscilla and John Alden," "The Artist's Dream" (1878), and "American Tourists," sent to the exhibition at Philadelphia in 1876.

GERSTÄCKER, Friedrich, German traveller, b. in Hamburg, Germany, 16 May, 1816; d. in Vienna, 31 May, 1872. He was apprenticed to a grocer in Cassel, but in 1837 engaged as cabin-boy on a vessel bound from Bremen to New York. In this country he was forced by poverty to become successively fireman on a steamboat, deck-hand, farmer, silversmith, wood-cutter, merchant, and hostler. After wandering through most of the states of the Union, spending some time as a hunter and trapper in the Indian territory, and keeping a hotel at Point Coupée, La., in 1842, he returned to Germany in 1843, and engaged in literary pursuits, but subsequently made trips to South America, Egypt, and around the world. Gerstäcker was a voluminous writer. Those of his works that relate to this country include "Streif- und Jagdzüge durch die Vereinigten Staaten Nordamerikas" (2 vols., Dresden, 1841); "Die Regulatoren in Arkansas," a novel (3 vols., Leipsic, 1846); "Mississippibilder" (2 vols., Dresden, 1847); "Die Flusspiraten des Mississippi" (3 vols., Leipsic, 1848); "Amerikanische Wald- und Strombilder" (2 vols., 1849); "Reisen," giving an account of his first journey round the world (5 vols., Stuttgart, 1852–'4); "Nach Amerika" (6 vols., Leipsic, 1855); "Unter dem Aequator" (3 vols., 1860); "Neue Reisen durch die Vereinigten Staaten, Mexico, Ecuador, Westindien und Venezuela" (2 vols., Jena, 1868); "Die Blauen und die Gelben," a Venezuelan character-sketch (2 vols., 1870); and "In Mexico" (1871). Several of his books have been translated into English.

GERVAIS, John Lewis, b. in South Carolina. He represented that state in the Continental congress, serving in 1782–'3. On 10 Sept., 1782, he voted in congress in favor of a motion that the secretary for foreign affairs be directed to obtain returns of slaves and other property carried off or destroyed by the enemy during the war, such information to be used in negotiating a peace. In April, 1783, he was a member of a committee to which were referred letters from U. S. representatives abroad, and on 15 April of that year favored instructing the commander-in-chief to arrange with the commander of the British forces for receiving possession of the posts in the United States that were occupied by British troops.

GESCHEIDT, Louis Anthony, physician, b. in Dresden, Germany, 19 Feb., 1808; d. in Hastings, N. Y., 20 Aug., 1876. He was educated at the Karl-Schule in Dresden, and was designed for the church, but, displaying great talent for natural science, was sent to Dresden university, and afterward to the University of Leipsic. On his return to Dresden he became the assistant of Dr. A. Carus, the physiologist, and Dr. F. A. Von Ammen, the oculist, and during the cholera epidemic in Berlin was sent by the Dresden municipality to investigate the nature of the disease. He came to this country in 1835, and settled in New York, where he became prominent in his profession, and in 1870 retired with a fortune. He published a work on "Diseases of the Eye" (Dresden).

GESNER, Abraham, Canadian geologist, b. in Cornwallis, N. S., 2 May, 1797; d. in Halifax, N. S., 19 April, 1864. He was a son of Henry Gesner, a loyalist, who, during the Revolutionary war, fled to Nova Scotia, where he received a grant of land in compensation for that confiscated in New York. The young man studied medicine at St. Bartholomew's hospital, and surgery at Guy's hospital in London, and, after receiving his degree, returned

to Nova Scotia in 1824. At first he practised his profession, but soon turned his attention to scientific pursuits. In 1838 he was appointed by the legislatures of the lower provinces of British North America to explore and report on their geological resources. In this connection he made collections of minerals, of specimens illustrating the surveys, and of ethnological implements, and also gathered many other objects of natural history, which now constitute the Gesner museum in St. Johns, N. B. He became familiar with numerous Indian dialects, and was appointed Indian commissioner of Nova Scotia in 1850. Dr. Gesner had an excellent knowledge of chemistry, and was among those who early became connected with the development of artificial illuminants from hydrocarbons. In 1851 he experimented with Trinidad asphalt, and obtained from it an illuminating oil. Subsequently he distilled an oil, suitable for burning in lamps, from cannel coal and bituminous shale, thus originating in America the discovery of "kerosene," the name which he gave it, and which since has been extended to all mineral illuminating oils. The name, as he first formed it, was "keroselain," from the Greek *κηρός*, wax, and *ἔλαιον*, oil, and was suggested by the waxy nature of paraffin, which is derived from the distillation of bituminous substances, coming over with the oily part of the distillate. Afterward it was shortened to "kerosene." In 1853 Dr. Gesner came to New York, and took out several patents for the manufacture of kerosene from coal, but subsequently disposed of them to the New York kerosene company, whose extensive works were erected under his supervision. These soon ceased to be valuable in consequence of the discovery of petroleum in Pennsylvania, at which time there were fifty-six such factories in the United States. Shortly before his death he returned to Nova Scotia, expecting to fill the chair of natural history in Dalhousie college, but meanwhile occupied himself with literary work. He was a member of the Royal geological society of London and of other scientific associations in England, and also maintained a continual correspondence with eminent scientists abroad, among whom were Sir Roderick Murchison, Sir Charles Lyell, and the Earl of Dundonald. Besides scientific papers and reports, he published "Remarks on the Geology and Mineralogy of Nova Scotia" (Halifax, 1837); "Reports on the Geological Survey of the Province of New Brunswick" (St. Johns, 1844); "New Brunswick, with Notes for Emigrants" (London, 1847); "Industrial Resources of Nova Scotia" (Halifax, 1849); "A Practical Treatise on Coal Petroleum and other Distilled Oils" (New York, 1861). He left an uncompleted manuscript on "The Fisheries of the Provinces," which has not been published.

GETTY, George Washington, soldier, b. in Georgetown, D. C., 2 Oct., 1819. He was graduated at the U. S. military academy in 1840, assigned to the 4th artillery, and served at Detroit during the border disturbances of that year. After doing garrison duty at various posts, he was promoted to 1st lieutenant on 31 Oct., 1845. During the Mexican war he was brevetted captain, 20 Aug., 1847, for gallantry at Contreras and Churubusco, and was also engaged at Molino del Rey, Chapultepec, and the assault and capture of the city of Mexico. From this time till the civil war he was in various garrisons, but fought against the Seminoles in 1849–'50 and 1856–'7, and took part in quelling the Kansas disturbances of 1857–'8. He was made aide-de-camp, with the rank of lieutenant-colonel, on 28 Sept., 1861, commanded the artillery in the engagements near Budd's Ferry in November and December of that year, and in the peninsular campaign of 1862 commanded four batteries at Yorktown, Gaines's Mills, and Malvern Hill. He was at South Mountain and Antietam, was made brigadier-general of volunteers on 25 Sept., 1862, and took part in the Rappahannock campaign of 1862–'3, being engaged at Fredericksburg and in the defence of Suffolk, Va., from 11 April till 3 May, and receiving the brevet of lieutenant-colonel on 19 April for his services. He was brevetted colonel for gallantry at the battle of the Wilderness, where he was severely wounded, served in the defence of Washington in July, 1864, and in the Shenandoah campaign, being brevetted major-general of volunteers, 1 Aug., 1864, for his services at Winchester and Fisher's Hill, and brigadier-general in the regular army for gallantry at Petersburg. He was at Lee's surrender, and on 13 March, 1865, was brevetted major-general, U. S. army, for services during the war. He became colonel of the 37th infantry on 28 July, 1866, was transferred to the artillery in 1870, and afterward served in command of various districts and posts. He commanded the troops along the Baltimore and Ohio railroad during the riots of 1877, and, on 2 Oct., 1883, was retired from active service.

GEYER, Henry Sheffie, jurist, b. in Fredericktown, Md., 9 Dec., 1790; d. in St. Louis, Mo., 5 March, 1859. He began to practise law in his native city in 1811, and on 20 May, 1813, became 1st lieutenant in the 38th infantry. He was made regimental paymaster on 25 Dec., and served till June, 1815, when he was mustered out. He then removed to St. Louis, Mo., at that time a frontier village, and was a member of the territorial legislature in 1818, and captain of the first militia company in the territory. He was a delegate to the State constitutional convention of 1820, and was five times chosen to the legislature after the admission of Missouri to the Union, serving as speaker of the first three general assemblies of the state. In 1825 he was one of the revisers of the statutes, and contributed largely to the adoption of a code, which was at that time superior to that of any other western state. He declined the post of secretary of war, tendered him by President Fillmore in 1850, and was then elected U. S. senator over Thomas H. Benton, on the fortieth ballot, by a majority of five votes. He served from 1851 till 1857, and while in Washington was one of the counsel in the Dred Scott case. He was the oldest member of the St. Louis bar, both in years and in professional standing. He published "Statutes of Missouri" (St. Louis, 1817).

GHERARDI, Bancroft, naval officer, b. in Jackson, La., 10 Nov., 1832. He entered the navy from Massachusetts as midshipman, 29 June, 1846, served on the "Ohio," of the Pacific squadron, till 1850, entered the naval academy in 1852, and was made passed midshipman on 8 June of that year. He became master and lieutenant in 1855, and at the beginning of the civil war was on the "Lancaster," of the Pacific squadron. He was made lieutenant-commander, 16 July, 1862, took part in the engagement with Fort Macon in that year, and in 1863–'4 commanded successively the gun-boat "Chocorua" and the steamer "Port Royal," of the West Gulf blockading squadron. In the latter vessel he took part in the battle of Mobile Bay, and distinguished himself for coolness and courage. During the action, by the orders of Capt. Thornton A. Jenkins, to whose vessel, the "Richmond," the "Port Royal" was lashed, Gherardi cast off, and went in chase of the Confederate gun-boats "Morgan," "Gaines," and "Selma." Later in the

war he commanded the "Pequot." He was promoted to commander in 1866, to captain in 1874, and to commodore in 1884, and in 1885 served on the board of examiners for promotion. In 1886 he succeeded Admiral Ralph Chandler as commandant of the Brooklyn navy yard.

GHOLSON, Samuel Jameson, jurist, b. in Madison county, Ky., 19 May, 1808; d. in Aberdeen, Miss., 16 Oct., 1883. He went with his family in 1817 to Alabama, was educated in the common schools in that state, studied law at Russellville, Ala., and was admitted to the bar. He removed to Athens, Miss., in 1830, and in 1833–'6 was a member of the Mississippi legislature. He was chosen to congress as a Democrat in January, 1837, to fill a vacancy, and a few months afterward was elected for a full term; but his seat was contested by his opponent, and on 31 Jan., 1838, was declared vacant by the house. While in congress, he had several sharp passages with Henry A. Wise, of Virginia, and a duel between the two was at one time prevented only by the influence of John C. Calhoun and other friends of the disputants. Mr. Gholson was appointed U. S. judge for the district of Mississippi by President Van Buren in 1838, and held this office till 1861, when he resigned and took an active part in the secession convention. He then enlisted in the Confederate army as a private, was chosen captain, and after the fall of Fort Donelson, where he was wounded, raised another company and was at Iuka and Corinth, where he was wounded again. He was made major-general of state troops in the spring of 1863, and on 1 June, 1864, was promoted to brigadier-general in the Confederate army, commanding a cavalry brigade in Alabama, Mississippi, and Louisiana. He received two more serious wounds near Jackson in 1864, and on 27 Dec. of that year lost his right arm in the action at Egypt, Miss. After the war he was again a member of the legislature in 1866 and 1878, being speaker of the house in the latter year.—His cousin, **William Yates,** jurist, b. in Virginia in 1807; d. in Cincinnati, Ohio, 21 Sept., 1870, was the son of Thomas Gholson, member of congress from Virginia in 1808–'16. He was graduated at Princeton in 1825, studied law with Creed Taylor, removed to Mississippi, where he practised for several years, and then to Cincinnati, Ohio. He was judge of the Cincinnati superior court in 1854–'9, and of the Ohio supreme court in 1860–'5. He had few equals at the Ohio bar, and was an effective political speaker. He published an "Ohio Digest."—Another cousin, **Thomas Saunders,** son of Maj. William Gholson, b. in Gholsonville, Brunswick co., Va., 9 Dec., 1809; d. in Savannah, Ga., 13, Dec., 1868, was graduated at the University of Virginia in 1827. He became a judge of the state circuit court in 1859, was president of several railroads, and founded and aided to support a public library in Petersburg, Va. He was a member of the Confederate congress.—His elder brother, James Herbert, b. in Virginia in 1798; d. in Brunswick, Va., 2 July, 1848, was a member of congress in 1833–'5.

GIBAULT, Peter, clergyman, d. probably in New Madrid, Mo., near the end of the 18th century. He was vicar-general for the bishop of Quebec over Illinois and the adjacent countries. In 1770 he was sent to Post Vincennes at the request of the inhabitants, and remained there two months. He afterward resided in Kaskaskia, Cahokia, and St. Genevieve. For a long time he was the only priest in Illinois and Indiana, and the labors and journeys in which he is said to have engaged seem incredible. He embraced ardently the cause of American independence. When Col. Clark captured Kaskaskia, 4 July, 1778, and Cahokia afterward, Father Gibault was principally instrumental in rallying the French settlers on the Wabash and Mississippi to the American cause. When Clark determined on taking Vincennes, he sent Gibault forward to learn the views of the inhabitants. On his arrival he assembled them in the church, explained the object of his mission, and aroused such enthusiasm that they rose *en masse* and took the oath of allegiance to the commonwealth of Virginia. A commander, Capt. Helm, was elected, and Col. Clark found himself master of Vincennes without striking a blow. Father Gibault did much to render the Indian tribes friendly to the American government, and in this way facilitated the subsequent occupation of the northwest by the United States. Vincennes was retaken by the British, and when Col. Clark marched to dispossess them a small body of French Canadians was induced to join him by Gibault. Col. Clark appeared before the town, but hesitated to attack it; until, urged by Gibault, he retook it, 27 Feb., 1779. For his patriotism on this and previous occasions Gibault received the thanks of the commonwealth of Virginia. He then returned to his missionary duties, and in 1785 fixed his residence at Vincennes, finally leaving it, 11 Oct., 1789. In 1791 he petitioned the governor of the northwestern territory for the repayment of 7,800 livres by the United States government, which he had advanced for the public service, and also for five acres of the government land near Cahokia. Gov. St. Clair, in his report to Thomas Jefferson, secretary of state, dwelt on the services rendered by Father Gibault and the losses he had suffered; but it does not appear that his services were recognized in any way, or that he was repaid the money advanced. "Next to Clark and Vigo," says Judge Law, "the United States are indebted more to Father Gibault for the accession of the states comprised in what was the original Northwest territory than to any other man."

GIBBES, William Hasell, lawyer, b. in Charleston, S. C., 16 March, 1754; d. in 1831. His great-grandfather, Robert, was chief justice of South Carolina in 1708, and his father, William, was one of the secret committee of five of the council of safety in Charleston at the beginning of the Revolution. William Hasell studied law with John Rutledge, and afterward, in 1774, at the Inner Temple, London. He was one of the thirty native Americans residing in London who petitioned the king against the series of acts of parliament that were the immediate cause of the Revolution. At the beginning of the war he escaped to Bermuda, went thence to Charleston, where he became captain-lieutenant of the ancient battalion of artillery, and fought at Beaufort and in the siege of Savannah. He was admitted to the bar prior to 1783, and from that year till his resignation in December, 1825, was master in chancery. In 1811 he was tried before the state senate on articles of impeachment preferred by Thomas Lehre, senior, but was acquitted.—His son, **Robert Wilson,** scientist and historian, b. in Charleston, S. C., 8 July, 1809; d. in Columbia, S. C., 15 Oct., 1866, was graduated at South Carolina college in 1827, and at the Medical college of South Carolina, Charleston, in 1830, after attending lectures in Philadelphia in 1827–'8. In 1827–'35 he was assistant professor of chemistry, geology, and mineralogy in South Carolina college. He was twice mayor of Columbia, and in 1852–'60 was editor of the "Daily South-Carolinian" and the "Weekly Banner." He was surgeon-general of the state from 1861 till the close of the war, and during that time made an examination of the Vir-

ginia hospitals, for which he was praised by the Confederate congress. In 1865, when Columbia was burned, he lost his house, with valuable collections of paintings, fossils, and minerals. His chief scientific researches were devoted to the description of organic remains from his native state, and include a "Monograph on Fossil Squalidæ," in the journal of the Philadelphia academy of sciences, and a "Memoir on Monosaures and the Three Allied New Genera," in the "Smithsonian Contributions to Knowledge" (1849). He was also the author of an article on "Typhoid Pneumonia," in the "American Journal of the Medical Sciences" for 1842, which revolutionized the treatment of the disease by opposing the use of the lancet, and wrote memoirs of the artists James De Veaux (Columbia, 1846) and Charles Frazer, and "Cuba for Invalids" (1860). Many of his scientific articles were republished in France and Germany. His chief literary work, the material for which he was twenty-five years in collecting, is a "Documentary History of the American Revolution; consisting of Letters and Papers relating to the Contest for Liberty, chiefly in South Carolina," covering the years from 1764 to 1782 (3 vols., Columbia, S. C., and New York, 1853).—Robert Wilson's son, **Robert Wilson,** b. in Columbia, S. C., 10 June, 1831; d. there, 23 Oct., 1875, was graduated at South Carolina college in 1849, and at the Medical college of South Carolina in 1852, afterward spending two years abroad. He was professor of surgery in the University of South Carolina in 1872–'3, and was a frequent contributor to the literature of his profession.

GIBBON, John, soldier, b. near Holmesburg, Pa., 20 April, 1827. He was graduated at the U. S. military academy in 1847, assigned to the artillery, and served at the city of Mexico and Toluca till the close of the Mexican war. From this time till the civil war he was largely on frontier and garrison duty, but was assistant instructor of artillery at West Point in 1854–'7, and quartermaster there in 1856–'9. On 2 Nov., 1859, he became captain in the 4th artillery. He was chief of artillery of Gen. McDowell's division from 29 Oct., 1861, till 2 May, 1862, and at the latter date was made brigadier-general of volunteers. He commanded a brigade through the Northern Virginia, Maryland, Rappahannock, and Pennsylvania campaigns in 1862–'3, receiving the brevets of major in the regular army, 17 Sept., 1862, for Antietam; lieutenant-colonel, 13 Dec., 1862, for Fredericksburg, where he commanded a division, was wounded, and disabled for three months; and colonel, 4 July, 1863, for Gettysburg, where he was severely wounded while in command of the 2d army corps. He was disabled by this wound till 15 Nov., when he commanded the draft depot at Philadelphia till 21 March, 1864. He was then assigned to a division of the 2d corps, becoming a major-general of volunteers on 7 June, 1864, and being engaged at the Wilderness, Spottsylvania, and Cold Harbor. After 15 Jan., 1865, he commanded the 24th army corps, and was before Petersburg from 15 June, 1864, till 2 April, 1865, taking part in the assaults of the last two days, and carrying two redoubts. He was brevetted brigadier-general and major-general, U. S. army, to date from 13 March, 1865, was one of the commissioners to carry into effect the stipulations for Lee's surrender, and was mustered out of volunteer service on 15 Jan., 1866. Since the war he has commanded various posts as colonel of the 36th infantry in 1866–'9, and of the 7th infantry in 1869–'86. He was superintendent of the general recruiting service in New York city in 1873, had charge of the Yellowstone expedition against Sitting Bull in 1876, and on 9 Aug., 1877, commanded in the action with the Nez Perces Indians at Big Hole Pass, Montana, where he was wounded. He temporarily commanded the department of Dakota in 1878, and since 29 July, 1885, that of the Columbia, having charge in 1885–'6, by direction of the president, of the suppression of the riots against the Chinese in Washington territory. On 10 July, 1886, he was promoted to brigadier-general. Gen. Gibbon has published "The Artillerist's Manual" (New York, 1859), and has contributed articles to current literature, including one on "Our Indian Question" in the Journal of the military service institution, for which a prize medal was awarded him.

GIBBONS, Edward, b. in England; d. in Boston, Mass., 9 Dec., 1654. He reached this country as early as 1629, and became a merchant in Boston. He was representative to the general court in 1638–'47, and in 1644, when the militia was organized, was chosen to command the Suffolk regiment with the title of sergeant-major. He was major-general of militia in 1649–'51, assistant in 1650–'1, and captain of the ancient and honorable artillery company. Johnson, in his "Wonder-Working Providences," speaks of him as "a man of resolute spirit, bold as a lion, very generous and forward to promote all military matters; his forts are well contrived and batteries strong and in good repair." He advanced over £2,500 to Charles La Tour (*q. v.*), secured by mortgage of the latter's fort and lands in Acadia, and lost his money on the capture of the fort by Aulnay de Charnisé in 1647. In 1643 Gen. Gibbons was one of the commissioners that formed the confederation of that year between the colonies of Massachusetts, Plymouth, Connecticut, and New Haven.

GIBBONS, James, educator, b. in Westtown, Pa., 18 May, 1736; d. in Birmingham, Chester co., Pa., 17 Oct., 1823. His great-grandfather, John Gibbons, was among the earliest Quaker settlers of Pennsylvania. James was educated by his parents and became an accomplished scholar, linguist, and mathematician. He was treasurer of Chester county and a member of the general assembly of Pennsylvania for the three years immediately preceding the Declaration of Independence. As a member of the Society of Friends and a non-combatant, he retired from all public service at the outbreak of the Revolution. He conducted a successful private school at his country home, and afterward in Philadelphia. In 1795 he sold his farm of 600 acres to the Friends, and there they established their well-known "Westtown School." The remainder of his life was spent in retirement upon his farm in Chester county.—His son, **William,** physician, b. in Philadelphia, Pa., 10 Aug., 1781; d. in Wilmington, Del., 25 July, 1845, was educated by his father, was graduated in medicine at the University of Pennsylvania in 1805, and practised in Wilmington, Del. He was first president of the Delaware academy of natural sciences, of the Peace society, and of the Delaware temperance society, and was an active member of the Society for preventing the kidnapping of negroes. Dr. Gibbons established and conducted in 1824–'8, at his own expense, a religious periodical entitled the "Berean," devoted to the principles of the Society of Friends, and took a prominent part in the religious controversy that resulted in the separation of the society in 1827 into the divisions since known as "Friends" and "Orthodox Friends." He also wrote about 1821, under the signature of "Vindex," a series of letters replying to an attack on the Friends made by a Presbyterian clergyman, which is one of the clearest expositions of Quaker doctrines published in

modern times, and was the author of a pamphlet entitled "Exposition of Modern Scepticism," assailing the doctrines of the social reformers led by Fanny Wright.—William's son, **Henry,** physician, b. in Wilmington, Del., 20 Sept., 1808; d. there, 5 Nov., 1884, was graduated in medicine at the University of Pennsylvania in 1829, practised in Wilmington till 1841, and then in Philadelphia, where he was professor of the principles and practice of medicine in the Philadelphia college of medicine. He removed in 1850 to San Francisco, Cal., where he became, in 1861, professor of materia medica in the medical college of the Pacific (now Cooper medical college), being transferred to the chair of the principles and practice of medicine in 1868. He was president of the California state board of health from its establishment in 1873 till his death, and edited the "Pacific Medical and Surgical Journal" for twenty years. Dr. Gibbons was a founder of the California academy of sciences. He published a prize essay on "Tobacco" and several addresses and essays.—Another son, **James Sloan,** merchant, b. in Wilmington, Del., 1 July, 1810, was educated in private schools in his native city, and in early life removed to Philadelphia, where he became a merchant. He came to New York in 1835, and has since been connected with banks and finance in that city. He has contributed to various literary and financial periodicals, and has published "The Banks of New York, their Dealers, the Clearing-House, and the Panic of 1857," with a financial chart (New York, 1858), and "The Public Debt of the United States, its Organization, its Liquidation, and the Financial System" (1867).—James Sloan's wife, **Abigail Hopper,** philanthropist, b. in Philadelphia, 7 Dec., 1801, is a daughter of Isaac T. Hopper, the Quaker philanthropist. After teaching in Philadelphia and New York, she married Mr. Gibbons in 1833, and in 1836 removed to New York with him. In 1845 Mrs. Gibbons aided her father in forming the Women's prison association, and in founding homes for discharged prisoners, and frequently visited the various prisons in and about New York. She was the principal founder of the Isaac T. Hopper home, and for twelve years was president of a German industrial school for street children, the attendance at which increased in four months from 7 to nearly 200. Throughout the war Mrs. Gibbons gave efficient aid in hospital and camp, often at personal risk, and in 1863, during the draft riots, her house was one of the first to be sacked by the mob, owing to the well-known anti-slavery sentiments of herself and her husband. The attention of the rioters was first called to the house by some one who pointed it out as the residence of Horace Greeley. After the war she planned and organized a Labor and aid association for the widows and orphans of soldiers. She aided in establishing the New York infant asylum in 1871, and the New York diet kitchen in 1873, and has been one of the active managers of both these institutions.—**Charles,** another son of William, lawyer, b. in Wilmington, Del., 30 March, 1814; d. in Philadelphia, 14 Aug., 1885, studied law in Philadelphia with Charles Chauncey, and was admitted to the bar in 1838. He was for several years a member of the state senate and its president in 1847, chairman of the first Republican state committee, one of the founders of the Union league, and the author of its constitution. He represented the government on a commission in the argument of prize cases in the U. S. courts during the civil war.

GIBBONS, James, cardinal, b. in Baltimore, Md., 23 July, 1834. At an early age he was taken by his parents to their former home in Ireland, where his education began. When he was seventeen years old he returned to his native city, and after a brief experience as a clerk entered St. Charles's college, Maryland. In September, 1857, he was transferred to St. Mary's seminary, Baltimore, and on 30 June, 1861, he was ordained priest in St. Mary's chapel. His first mission was that of assistant priest at St. Patrick's church, Baltimore, but, in the course of a few months, he was made pastor of St. Bridget's church at Canton, an eastern suburb of the city. While he was performing the duties of parish priest in that obscure place, Archbishop Spalding transferred him to the cathedral, made him his private secretary, and appointed him to the important office of chancellor of the archdiocese. When the second plenary council of the American Roman Catholic church assembled at Baltimore in October, 1866, he was assigned to the office of assistant chancellor of that body, which represented the entire hierarchy of the United States. In 1868 he was made vicar apostolic of North Carolina, with the rank and title of bishop, being consecrated in the cathedral of Baltimore by his friend Archbishop Spalding on 16 Aug. North Carolina then contained a population of one million, of whom only one thousand were Roman Catholics. But Bishop Gibbons was equal to the duties of the office, and in a few years schools were opened, asylums built, churches erected, and the number of priests increased from five to fifteen. In 1872 he was translated to the vacant see of Richmond, Va., where his zeal and administrative ability were soon made manifest by the establishment of numerous institutions, such as the St. Sophia home for aged persons, in charge of the Little Sisters of the Poor, St. Peter's cathedral male academy and parochial school, the enlargement of St. Joseph's female orphan asylum, the founding of parish schools in Petersburg and Norfolk, and the erection of new churches in various parts of the diocese. When, in 1877, the health of Archbishop Bailey, of Baltimore, began to decline he asked Pope Pius IX. to give him a coadjutor, at the same time suggesting Bishop Gibbons for the office. His request was granted, and on 20 May, 1877, Dr. Gibbons was appointed coadjutor with the right of succession to the see of Baltimore. On 3 Oct. of the same year, on the death of Archbishop Bailey, he succeeded to the vacant see, and thus at the early age of forty-three attained to the highest ecclesiastical dignity of his church in the United States, for Baltimore, being the oldest, is therefore the primary American see. One of the most important works accomplished by him in his new see was the St. James home for boys, the foundation of which was placed in the hands of Rev. Edmund Didier, pastor of St. Vincent's church, Baltimore. In 1883 Archbishop Gibbons was summoned to Rome, with other American archbishops, to confer upon the affairs of the church in the United States. During this visit he was the recipient of several marked favors

J. Card. Gibbons

from Pope Leo XIII. He was appointed to preside over the third plenary council of Baltimore, which assembled in that city in November, 1884. The success of the council was due in a great measure to the zeal, energy, and executive ability of Archbishop Gibbons. When the acts and decrees of the council were transmitted to Rome, they were after mature deliberation approved by the ecclesiastical authorities. Leo XIII. at the same time expressed his appreciation of Archbishop Gibbons's services, and, shortly afterward, at a special consistory, nominated him for promotion to the high dignity of cardinal, and he was immediately confirmed. Upon this occasion the pope said: "The flourishing state of Catholicity in the United States, which develops daily more and more, and the condition and form according to which the ecclesiastical canons of that country are formulated, advise us, or rather demand, that some of their prelates be received into the sacred college." When the bearers of the official insignia called at the Vatican to take leave of the pope before departing on their mission, he charged them to present his affectionate paternal benediction to Archbishop Gibbons, adding, "We remember him with sentiments of the most cordial esteem, and believe we could not confer the hat upon a more worthy prelate." Archbishop Gibbons selected 30 June, 1886, the day of his "silver jubilee" as a priest, as the occasion on which he would be invested with the insignia of his rank as a prince of the church. The ceremony was surrounded by all the pomp and magnificence prescribed for such occasions in the Catholic ritual. Cardinal Gibbons has endeared himself to all, Protestants as well as Catholics, the poor as well as the rich, by his simple and unostentatious life. He visited Rome in 1887, and asked the pope to give him a coadjutor on the ground of impaired health. He has published "The Faith of Our Fathers," which has been translated into many modern languages (Baltimore, 1871).

GIBBONS, Joseph, philanthropist, b. near Lancaster, Pa., 14 Aug., 1818; d. there, 9 Dec., 1883. He was of a family of English Quakers who came from Wiltshire about the time of Penn's settlement of the colony. He was graduated at Jefferson medical college in 1845, and in the same year married Phebe, eldest daughter of Thomas Earle, who was the first candidate of the Liberty party for vice-president of the United States in 1840, the presidential candidate being James G. Birney. Dr. Gibbons's life was chiefly identified with the practical side of the anti-slavery movement. He was instrumental with his father in aiding over 1,000 runaway slaves to freedom by the system quaintly known as the "Underground railroad." Some account of this peculiar institution may be found in William Still's "Underground Railroad" (Philadelphia, 1872), and Dr. Smedley's "History of the Underground Railroad in Chester and the Neighboring Counties of Pennsylvania" (Lancaster, 1883). Dr. Gibbons was also an earnest temperance advocate, and did much to popularize the public-school system of Pennsylvania in its infancy. He was regarded as one of the founders of the Republican party in his native state, and enjoyed the friendship and esteem of Charles Sumner, Thaddeus Stevens, Joshua R. Giddings, David Wilmot, and Henry Wilson. He established the "Friends' Journal" in 1873, and, though partially deprived of speech by apoplexy soon afterward, conducted it until his death.

GIBBONS, William, member of the Continental congress. He was one of the Sons of liberty appointed to draft resolutions, in 1774, expressive of sympathy with the northern colonies, also a member of the Provincial congress that met in Savannah, Ga., on 4 July, 1775, and in December of the same year was appointed a member of the council of safety. Mr. Gibbons was made a member of the executive council in July, 1779, and was presiding officer of the convention held in May, 1787, for the final revision of the constitution of Georgia. He also sat in the Continental congress during 1784–'6.

GIBBS, George, mineralogist, b. in Newport, R. I., 7 Jan., 1776; d. on his estate of Sunswick, L. I., 6 Aug., 1833. He spent several years while a young man in travel abroad, and devoted much of his time and wealth to the collection of minerals. On his return to Rhode Island he brought with him the most extensive and valuable collection ever seen in the United States up to that time. It consisted of the collection of Gigot d'Orcy, containing 4,000 specimens, and that of Count Gregoire de Razamowsky, containing 6,000 specimens. These, with the results of his own gathering, formed a cabinet of more than 20,000 minerals. The collection was first exhibited in Newport, R. I., and among the many visitors was Prof. Benjamin Silliman the elder, who spent several weeks in studying and examining it. He formed a warm personal friendship with Mr. Gibbs, who offered to deposit his collection at Yale, provided that rooms should be fitted up for its reception. In 1825 he offered it for sale at $20,000, giving the preference to Yale. The funds were raised through the influence of Prof. Silliman, and the largest and finest collection of minerals then in the United States became the property of that university. It is still unequalled by any college collection in the country. Mr. Gibbs continued his interest in this science, making extensive journeys and developing new mineral localities. As an incentive to students he offered prizes at Yale for superiority in mineralogy, and for services rendered to the science by useful discoveries and observations. In 1822 he was elected vice-president of the New York lyceum of natural history. He published valuable papers both in the "American Mineralogical Journal" and the "American Journal of Science," and did much by his counsel and co-operation to support these publications. He married Laura, daughter of Oliver Wolcott, secretary of the treasury during the administrations of Washington and John Adams.—Their son, **George,** antiquarian, b. in Sunswick, now Astoria, L. I., 17 July, 1815; d. in New Haven, Conn., 9 April, 1873, received his early education at Round Hill school in Northampton, Mass., under George Bancroft and Joseph G. Cogswell. He spent two years in foreign travel, and then was graduated at Harvard law-school in 1838. Subsequently he practised in New York city with Prescott Hall, and devoted himself to the historical branch of conveyancing, making valuable collections of titles and abstracts. He also at this time occupied himself with the preparation of the "Memoirs of the Administrations of Washington and John Adams," edited from the papers of his grandfather, Oliver Wolcott (New York, 1846). His early fondness for outdoor life continued as long as he lived, and soon after the discovery of gold in California he marched with the mounted rifles overland from St. Louis to the Pacific coast, establishing himself in Columbia, Oregon. In 1854 he received the appointment of collector of Astoria, which he held for several years, and on the expiration of his term of office remained in the west, devoting his attention to the study of Indian dialects and to geology and natural history. Later he was attached to the U. S. government boundary commission, where his knowledge of natural history made his services of great value,

and he was also geologist under Gen. Isaac I. Stevens on the survey of the North Pacific railroad. In 1857 he was appointed to the northwest boundary survey, and at the close of its work prepared an elaborate report on the geology and natural history of the country. He returned to New York in 1860, and was active in his efforts toward preventing secession. In 1861 he volunteered and did military duty in Washington. During the draft riots in New York, two years later, he offered to defend the residence of Gen. John C. Frémont when a night attack was threatened. Subsequently he was secretary of the Hudson bay claims commission in Washington, and also was engaged in the arrangement of a mass of manuscript bearing on the ethnology and philology of the American Indians. His services were used by the Smithsonian institution to superintend its labors in this field, and to his energy and complete knowledge of the subject it greatly owes its success in this branch of science. He was an active member of the New York historical society, and was its secretary from 1842 till 1848. His papers on Indian dialects contributed to the various Smithsonian publications include numerous titles, and his separate publications are "The Judicial Chronicle" (Cambridge, 1834); "Instructions for Research relative to the Ethnology and Philology of America" (Washington, 1863); "A Dictionary of the Chinook Jargon or Trade Language of Oregon" (1863); "Comparative Vocabulary" (1863); and "Suggestions relative to Objects of Scientific Investigation in Russian America" (1867).—Another son, **Oliver Wolcott,** chemist, b. in New York city, 21 Feb., 1822, after passing through the grammar-school attached to Columbia, was graduated at that college in 1841. A few months were then spent in the laboratory of Dr. Robert Hare in Philadelphia, after which he returned to New York, and was graduated at the College of physicians and surgeons in 1845. Subsequently he went abroad, and studied chemistry at first under Rammelsberg and then under Heinrich Rose in the University of Berlin, spending a year and a half in these two laboratories. Later he passed five months in Giessen, studying organic chemistry under Liebig, and afterward attended the lectures on physics in the College of France by Regnault. In 1848 he returned to the United States and gave a short course of lectures at Delaware college, Newark, Del. From 1849 till 1863 he held the chair of physics and chemistry in the College of the city of New York, and then was elected to the Rumford professorship in Harvard university with the charge of the laboratory of the Lawrence scientific school, which chair he has since held. On the reorganization of the university subsequent to the election of Charles W. Eliot to the presidency the teaching of chemistry was transferred to the collegiate department, and the subjects of heat and light were assigned to Dr. Gibbs. During the years when he directed the chemical laboratory the school attained its greatest celebrity, and many of its most distinguished graduates acquired their knowledge of chemistry from his teaching. Like his colleague, Louis Agassiz, he attracted to him students who became his personal friends and who have ever maintained a filial regard for him. During the civil war he was actively associated in the labors of the U. S. sanitary commission, and was a member of its executive committee in New York city. The members of this organization were compelled to meet each other almost daily, and out of their work grew the Union league club of New York. Dr. Gibbs "was the first to suggest that the idea on which the sanitary commission was formed needed to take the form of a club which should be devoted to the social organization of sentiments of loyalty to the Union." The original meeting to consider the feasibility of the plan was held at his residence on 30 Jan., 1863. He was appointed a commissioner to the Vienna exhibition in 1873, and contributed to the government reports a valuable paper on his examination of the instruments of physical research. Dr. Gibbs is the only American honorary member of the German chemical society, and one of the two American honorary members of the London chemical society. He was one of the original members of the National academy of sciences, was for some time its vice-president, and has declined an election to the presidency. At present he is its foreign secretary. He is also a member of other American scientific societies, and was elected vice-president of the American association for the advancement of science in 1866. In 1873 he received the honorary degree of LL. D. from Columbia. He announced his intention in 1851 of preparing for the columns of the "American Journal of Science" abstracts of the more important physical and chemical papers contained in foreign scientific journals, accompanied by references and by such critical observations as the occasion might demand. This purpose was steadily carried out until 1873, and these abstracts cover over 500 closely printed pages. Much of his original investigation has appeared in the "Contributions to Chemistry from the Lawrence Scientific School," and he has published very elaborate memoirs on the platinum metals, on the ammonia cobalt bases, on new analytical methods, and on complex inorganic acids, discovering platino-tungstates, vanadio-tungstates and molybdates, as well as other exceedingly complicated compounds in inorganic chemistry. In physics he has published papers on the wave-lengths of light, on vapor densities, improved methods of gas analysis, and on the theory of the dynamo-electric machine. These have appeared principally in the "American Journal of Science" and the "American Chemical Journal." Dr. Gibbs has published no book, but as an indefatigable original investigator in the domain of chemistry and physics he has no superior in the United States.—Another son, **Alfred,** soldier, b. in Sunswick, L. I., 22 April, 1823; d. in Fort Leavenworth, Kan., 26 Dec., 1868. His family, disappointed in their wish to obtain a military appointment for their second son, persisted in the effort, and as the one grew beyond the age within which the candidate is eligible, the claim for appointment was transferred to the next, and as persistently urged. The second son was compelled to give up his ambition, but the third received the long-sought commission. He was graduated at the U. S. military academy in 1846, assigned to the mounted rifles, and received two brevets during the Mexican war—that of 1st lieutenant for gallantry at Cerro Gordo, where he was wounded, and that of captain for his services at Garita de Belen, city of Mexico. He was also at Vera Cruz, Contreras, Churubusco, and Chapultepec. He was

aide-de camp to Gen. Persifor F. Smith in Mexico, California, and Texas in 1848–'56, was promoted to 1st lieutenant, 31 May, 1853, and served on the frontier till the civil war, being severely wounded in a skirmish with Apache Indians at Cooke's Spring, N. M., 8 March, 1857, and taking part in the Navajo expedition of 1860. He was depot-commissary at Albuquerque, N. M., in 1860–'1, was promoted to captain, 13 May, 1861, and on 27 Aug., 1862, was taken prisoner by the Confederates at San Augustine Springs, N. M. He was paroled till exchanged, 27 Aug., 1862, and on 6 Sept. became colonel of the 130th New York regiment. He was engaged in the operations about Suffolk, Va., till June, 1863, and in July and August of that year in organizing his command as a cavalry regiment, which was afterward known as the 1st New York dragoons. In 1864–'5 he commanded a cavalry reserve brigade, and served under Gen. Sheridan on several of his cavalry raids. He was brevetted major, 11 June, 1864, for gallantry at Trevillian Station, Va., lieutenant-colonel for services at the battle of Winchester, and on 19 Oct., 1864, became brigadier-general of volunteers. He commanded a cavalry brigade in the final attack and pursuit of the Army of Northern Virginia in March and April, 1865, and on 13 March received all the brevets up to and including that of major-general, U. S. army, for his services during the war. He was mustered out of volunteer service, 1 Feb., 1866, became major in the 7th cavalry on 28 July, and served in various forts in Kansas till his death.

GIBBS, Josiah Willard, philologist, b. in Salem, Mass., 30 April, 1790; d. in New Haven, Conn., 25 March, 1861. He was graduated at Yale in 1809, and from 1811 till 1815 was connected with the college as tutor. Subsequently he spent some years at Andover, where he devoted himself to the study of Hebrew and biblical literature, producing at this time some of his most important works. In 1824 he was called to New Haven, and became professor of sacred literature in the theological school of Yale college, which chair he retained until his death. He also held the office of librarian from 1824 till 1843, and in 1853 received the degree of LL. D. from Princeton. Prof. Gibbs was a constant contributor of articles on points of biblical criticism, archæology and philological science to the "Christian Spectator," "Biblical Repository," "New Englander," and the "American Journal of Science." He was particularly fond of grammatical and philological studies, and attained a high reputation for thoroughness and accuracy in them. His work appears in several of the most important philological books published during the century, and among others in the revised edition of Webster's "Unabridged Dictionary" and Prof. William C. Fowler's "English Language in its Elements and its Forms" (New York, 1850). For some years he was one of the publishing committee of the American oriental society. Prof. Gibbs published a translation of Storr's "Historical Sense of the New Testament" (Boston, 1817); a translation of Gesenius's "Hebrew Lexicon of the Old Testament" (Andover, 1824; London, 1827); an abridged form of Gesenius's "Manual Hebrew and English Lexicon" (1828); "Philological Studies with English Illustrations" (New Haven, 1856); "A New Latin Analyst" (1859); and "Teutonic Etymology" (1860).—His son, **Josiah Willard,** scientist, b. in New Haven, Conn., 11 Feb., 1839, was graduated at Yale in 1858, and subsequently pursued mathematical and other studies at that university, for which in 1863 he received the degree of Ph. D. For the three following years he was a tutor in Yale, and then spent several years in study at the universities of Paris, Berlin, and Heidelberg. In 1871 he became professor of mathematical physics in Yale, a chair which he has since held, also lecturing at the Johns Hopkins university in 1880. His work has been principally in the development of graphical and analytical methods in thermodynamics, and for his researches in this direction he was honored by the American academy of arts and sciences with their Rumford medal. He was elected a member of the National academy of sciences in 1879, and in 1886 was vice-president of the American association for the advancement of science, for the section of mathematics and astronomy, delivering an address on "Multiple Algebra." His published papers include memoirs on "Graphical Methods in the Thermodynamics of Fluids" (1873); "A Method of Geometrical Representation of the Thermodynamic Properties of Substances by Means of Surfaces" (1873); "Equilibrium of Heterogeneous Substances," Part I. (1876); Part II. (1878); and several "Notes on the Electro-magnetic Theory of Light" (1882–'3). He has also applied the methods of thermodynamics to chemical dissociation, and has developed a system of vector notation simpler than that of quaternions and more approximating to the German notation, notably that of Grassmann.

GIBBS, Sir **Samuel,** British soldier, d. near New Orleans, La., 8 Jan., 1815. He became ensign in the 102d foot in October, 1783, lieutenant-colonel of the 10th West Indian regiment in 1802, brevet colonel in July, 1810, and major-general in June, 1813. He served at the capture of the Cape of Good Hope in 1796, was taken prisoner at Ostend in 1798, commanded the 11th regiment at the attack of St. Martin's in the expedition against the Danish and Swedish islands, and led a brigade in Travancore and the expedition to Java. He was second in command to Sir Edward Pakenham in December, 1814, and was killed in the battle of New Orleans in the following month.

GIBSON, James, merchant, b. in London about 1690; d. in the West Indies in 1752. In early youth he entered the British army and served in Barbadoes, where he married a native heiress of Jamaica, retired from the service, and settled as a merchant in Boston, Mass. In 1745 he joined the Louisburg expedition to Cape Breton with 4,000 New England colonists, under Sir William Pepperell, and as "gentleman volunteer" served at the siege, was present at the surrender of the French garrison, and superintended the removal of the prisoners to France. In 1748 parliament voted him £547,155 as a reimbursement of his expenses, but this money was never paid. He returned to Boston, engaged in the West India trade, and died while on a visit to the islands. In 1745 he published an account of the Louisburg expedition, which was republished by a descendant under the title of "A Boston Merchant of 1745" (Boston, 1847).

GIBSON, James, soldier, b. in South Milford, Sussex co., Del.; d. in Fort Erie, Canada, 18 Sept., 1814. He was graduated at the U. S. military academy in 1808, appointed captain in 1810, assistant inspector-general in 1813, colonel and inspector-general in July of the same year, and colonel of the 4th rifles, 21 Feb., 1814. He was engaged in the battle of Queenstown Heights, 13 Oct., 1812, and served with distinction in the campaign on the Niagara frontier in 1814. During the months of August and September of this year Gen. Drummond, of the British army, besieged Fort Erie, which was held by the Americans under Gen. Jacob Brown. On 17 Sept. Gen. Brown made a sudden sortie with 2,000 men against the besiegers, dis-

mounted their guns, and destroyed their works. In this attack Col. Gibson received a wound, from which he died the next day.

GIBSON, John, soldier, b. in Lancaster, Pa., 23 May, 1740; d. at Braddock's field, near Pittsburg, 10 April, 1822. He received a classical education, and in 1757 joined the expedition against the Indians in which Fort Duquesne was captured. He settled at Fort Pitt as a trader, was taken prisoner, and rescued from the stake by a squaw that adopted him. He married the sister of Logan, an Indian chief, and became familiar with the Indian manners, language, and customs. At the close of hostilities, Gibson again settled at Fort Pitt, and in 1774 acted a conspicuous part in Lord Dunmore's expedition against the Shawnee towns. In the treaty that followed the battle of Point Pleasant, he negotiated between Logan, the Shawnee chief, and Lord Dunmore, and through his mediation many captive Indians were set at liberty. At the beginning of the Revolution he was appointed to command a regiment, served with the army in New York and in the Jersey retreat, and commanded the western military department from 1781 until peace was established. In 1788 he was a member of the Pennsylvania convention, subsequently was associate judge of the court of common pleas of Alleghany county, and major-general of militia. President Jefferson appointed him in 1801 secretary of the territory of Indiana, and he held this office until Indiana became a state, when he was acting governor from 1811 till 1813.—His brother, **George,** soldier, b. in Lancaster, Pa., 10 Oct., 1747; d. in Fort Jefferson, Ohio, 14 Dec., 1791, received an academic education, entered a mercantile house in Philadelphia, and made several voyages as supercargo to the West Indies. When the Revolution began, he raised a company of one hundred men, and was appointed captain of a state regiment. His soldiers were distinguished for good conduct and bravery, and were known in the army as "Gibson's Lambs." In order to obtain a supply of gunpowder, he descended the Mississippi river with twenty-five picked men, and after a hazardous journey succeeded in accomplishing his mission. On his return he was appointed to the command of a Virginia regiment, joined Gen. Washington before the evacuation of New York, and was engaged in all the principal battles of the campaign of 1778. He retired to his farm in Cumberland county, Pa., after the war, and was county lieutenant until 1791, when he took command of a regiment in the St. Clair expedition against the Ohio Indians. At the battle of Miami, 4 Nov., 1791, he received a mortal wound.—His son, **George,** soldier, b. in Pennsylvania in 1783; d. in Washington, D. C., 29 Sept., 1861, entered the army from civil life, and was appointed captain of infantry, 3 May, 1808; was promoted major in 1811, and served throughout the war of 1812, as lieutenant-colonel of the 5th infantry. In 1816 he was appointed quartermaster-general, served with Gen. Andrew Jackson during the Florida campaign, was promoted commissary-general in 1818, and in 1826 brevetted brigadier-general for faithful service. He served throughout the Mexican war, and was brevetted major-general, 10 May, 1848, for meritorious conduct. Gen. Gibson was at the head of the commissary department more than fifty years. —His brother, **John Bannister,** jurist, b. in Carlisle, Pa., 8 Nov., 1780; d. in Philadelphia, Pa., 3 May, 1853, was graduated at Dickinson college in 1800, studied law, was admitted to the bar of Cumberland county, Pa., in 1803, and practised in the counties of Carlisle and Beaver, and in Hagerstown, Md. In 1810–'1 he represented Carlisle in the state legislature, and in 1813 was appointed judge of the 11th district of Pennsylvania. In 1816 he was promoted to the supreme court, and in 1827 became chief justice of Pennsylvania. By a change in the constitution in 1851, an amendment made the judiciary elective, and he was returned by a large majority to the supreme bench, where he remained until his death. Chief-Justice Gibson was eminent as a Shakespearian authority, and relieved the tedium of his professional studies by readings from his favorite dramas.

GIBSON, John Morison, Canadian lawyer, b. in the township of Toronto, York co., Ontario, 1 Jan., 1842. He was graduated at University college, Toronto, in 1863, studied law, and was admitted to the bar in 1867. He entered the law course at the University of Toronto, receiving the degree of LL. D., and the gold medal of the faculty in 1869, and was examiner in that faculty for the years 1871–'2. He was elected a member of the senate of Toronto university in 1873 and 1878. He is a lieutenant-colonel of volunteers, has been an active member of that force since 1860, and was with his regiment at Ridgeway in 1866. He was a member of the Canadian Wimbledon rifle-teams in 1874–'5 and 1879, winning prizes on these occasions. In 1879 he won the Prince of Wales's prize (a badge and £100). In 1881 he commanded the Canadian Wimbledon team that defeated the British team in the contest for the Rajah of Kolopore's cup, and was also a member of the Canadian team at Creedmoor in 1876 and 1880. He is a Liberal in politics, and was elected to the Provincial parliament in 1879 and again in 1883.

GIBSON, Randall Lee, senator b. at Spring Hill, Woodford co., Ky., 10 Sept., 1832. His grandfather, Randall Gibson, was a Revolutionary soldier, who, after the war of independence, removed with his kindred to the southwest, and finally made his home at Oakley, Warren co., Miss. He built the first church, and founded the first college (Jefferson) in the Mississippi valley. His father, Tobias Gibson, was a large sugar-planter in Terre Bonne parish, Louisiana. Randall was graduated with honors at Yale in 1853, and was also class orator. He was graduated in 1855 at the law department of the University of Louisiana (now Tulane university), of which he is at present (1887) the official head, being president of the board of administrators. He then studied at Berlin, travelled in Russia, and spent six months as an attaché of the American legation at Madrid. On his return he engaged in sugar-planting, until the civil war, when he joined the Confederate army as a private, but was made a captain in the 1st Louisiana artillery, and stationed at Fort Jackson, below New Orleans. Not long afterward he was elected colonel of the 13th Louisiana infantry. At Shiloh he commanded a brigade, which attacked the "hornet's nest" in front, and was four times repelled with great slaughter, but he held on, was in the front line at sunset, and was distinguished in the fighting next day. Gibson was with Bragg's army in the Kentucky campaign, and was recommended for promotion for skill and gallantry at Perryville, where one third of his brigade were killed or wounded, and at Murfreesboro and Chickamauga. He was in all the battles in Gen. Joseph E. Johnston's retreat from Dalton to Atlanta, and at Jonesboro lost half his command. In the defeat of Gen. Hood at Nashville he successfully covered the retreat. In Canby's campaign against Mobile, Gibson was de-

tached with 3,500 men to Spanish Fort, where he held the National forces at bay for two weeks, and then withdrew his entire command, under cover of darkness, threading a pathway only eighteen inches wide through a marsh. He was financially ruined by the war, but, resuming his profession in New Orleans, soon acquired a lucrative practice. In 1872 he was elected to congress as a Democrat, but was not admitted to a seat. He was again elected in 1874, 1876, 1878, and 1880. He was then sent to the U. S. senate, and took his seat 4 March, 1883. He may fairly be said to have been the father of the policy for the improvement of the Mississippi river, which he originated, and has consistently advocated and successfully guided. He has been the most pronounced opponent in the south of all forms of financial inflation and irredeemable issues. As a member of the ways and means committee he steadily advocated moderate measures of revenue reform, and resisted alike the extreme protectionists and the free-traders. In 1882 he was selected by Paul Tulane as president of the board of administrators who were to manage his gift for education in New Orleans, now estimated at $1,500,000. Under his auspices Tulane university was founded.

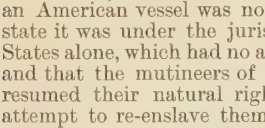
GIBSON, Tobias, pioneer, b. in Liberty, S. C., 10 Nov., 1771; d. in Natchez, Tenn., 10 April, 1804. Nothing can be learned of the history of his early years; in 1792 he entered the itinerant ministry of the Methodist church, travelled and preached throughout the most important districts of the Carolinas, and in 1800 went to Natchez as a missionary. After penetrating the forest alone, for six hundred miles, he reached the Cumberland river, took a canoe and paddled himself eight hundred miles from that stream to the Ohio, and thence down the Mississippi. He made four trips while a missionary, through the wilderness, to the Cumberland, and laid the foundations of Methodism in the southwest. He continued alone upon this station till 1803, when, in a dying condition, he presented himself before the western conference of the Methodist Episcopal church and asked for further aid in the prosecution of his work. The council responded favorably to this application, and sent other missionaries to his assistance. His early death was the result of privation and exposure.

GIBSON, William, surgeon, b. in Baltimore, Md., in 1788; d. in Savannah, Ga., 2 March, 1868. He was graduated at Princeton in 1806, took his medical degree at the University of Edinburgh in 1809, and was the pupil and associate of Sir Charles Bell, the eminent Scotch surgeon. After his return to the United States he began practice in Baltimore, and was one of the earliest professors of surgery in the University of Maryland. In 1812 he rendered essential service in the Baltimore riots, revisited Europe in 1814, and fought on the side of the allied forces at the battle of Waterloo, where he was slightly wounded. He was intimate with the surgeons Sir Astley Cooper, Velpeau, Abernethy, Hastings, and Halford, and was the friend and companion of Lord Byron. In 1819, having returned to the United States, he succeeded Dr. Physick in the chair of surgery in the University of Pennsylvania, where he remained more than thirty years. Dr. Gibson made frequent visits to Europe, and also travelled in remote regions of Asia and Africa. At the age of seventy, having acquired a fortune, he retired from practice and removed to Newport, R. I. He was the first to perform the Cæsarean operation twice successfully to both mother and child on the same patient. His works include "Principles and Practice of Surgery" (Philadelphia, 1824); "Rambles in Europe," containing sketches of eminent surgeons (1839); and "Lecture on Eminent Belgian Surgeons and Physicians" (New York, 1841).—His son, **Charles Bell,** surgeon, b. in Baltimore, Md., 16 Feb., 1816; d. in Richmond, Va., 23 April, 1865, studied medicine in Philadelphia under his father. He was elected professor of surgery at Washington medical college, Baltimore, in 1843, and in 1846 occupied the same chair in the Medical college of Richmond, Va. When that state seceded he was made surgeon-general, became the chief consulting surgeon and operator in Richmond, and died from heart disease induced by excessive labor and fatigue. He published among other papers a widely circulated pamphlet entitled "Statement of Facts in a Case of Dislocation of the Femur" (Richmond, 1855).

GIBSON, William Hamilton, artist and author, b. in Sandy Hook, Conn., 5 Oct., 1850. He studied at the Gunnery school at Washington, Conn., and subsequently in the Polytechnic institute, Brooklyn, and determined to devote himself to art as an illustrator. He began work in New York in 1870, after various discouragements, obtained a foothold as a specialist in botanical drawing, and became connected with the "American Agriculturist" and "Hearth and Home." He also drew hundreds of natural history subjects for the "American Cyclopædia." He afterward became dissatisfied with work of this character, and furnished illustrations for sundry magazine articles on natural history. For a year he was next engaged on the "Art Journal," and was also one of the corps of illustrators of "Picturesque America." His first notable appearance in the magazines was in connection with an article in "Harper's Magazine" on "Birds and Plumage," which he had proposed to the editor under the title of "The Plumage of Fashion." The initial design, a full-page peacock's feather, won high praise. This was followed by "A Winter Idyl," "Springtime," and other similar essays, which have been collected in his published volumes. Mr. Gibson has been a regular exhibitor at the water-color exhibition in New York since 1872, and became a member of the water-color society in 1885. His large "Autumn Study" was shown in the first American water-color exhibition in London in 1873, and in Edinburgh the same year. He is also a member of the Authors club and the Art union. The books that he has illustrated include "The Heart of the White Mountains" (1882); "Nature's Serial Story" (1885); and various collections of poems, among others the "Pictorial Edition of Longfellow" and "In Berkshire with the Wild Flowers," by Dora and Elaine Goodale. The works of which he is both author and illustrator are "Camp-Life in the Woods" and "Tricks of Trapping and Trapmaking" (New York, 1876); "Pastoral Days, or Memories of a New England Year" (1881); "Highways and Byways, or Saunterings in New England" (1883); and "Happy Hunting-Grounds, a Tribute to the Woods and Fields" (1886).

GIDDINGS, Joshua Reed, statesman, b. in Athens, Bradford co., Pa., 6 Oct., 1795; d. in Montreal, Canada, 27 May, 1864. His parents removed to Canandaigua, N. Y., and in 1806 to Ashtabula county, Ohio, where the boy worked on his father's farm, and by devoting his evenings to hard study made up somewhat for his limited educational advantages. In 1812 he enlisted in a regiment commanded by Col. Richard Hayes, being the youngest member, and was in an expedition sent to the peninsula north of Sandusky bay. There, 29 Sept., 1812, twenty-two men, of whom he was one, had a

skirmish with Indians, in which six of the soldiers were killed and six wounded. Mr. Giddings afterward erected a monument there to the memory of his fallen comrades. After the war he became a teacher, studied law, and was admitted to the bar in 1820. He was elected to the Ohio legislature in 1826, served one term, and declined a re-election. In 1838 he was elected, as a Whig, to congress, where he had hardly taken his seat before he became prominent as an advocate of the right of petition, and the abolition of slavery and the domestic slave-trade. He had been known as an active abolitionist before his election. His first attempt to discuss the subject on the floor of congress, 11 Feb., 1839, was thwarted by the gag rule; but two years later, 9 Feb., 1841, he delivered a notable speech on the war with the Indians in Florida, in which he maintained that the contest was waged solely in the interest of slavery, the object being to enslave the Maroons of that state, who were affiliated with the Seminoles, and break up the asylums for fugitives. This subject he set forth more elaborately years afterward in his "Exiles of Florida" (Columbus, Ohio, 1858; new ed., New York, 1863). In the autumn of 1841 the "Creole" sailed from Virginia for Louisiana with a cargo of slaves, who got possession of the vessel, ran into the British port of Nassau, N. P., and, in accordance with British law, were set free. In the excitement that followed, Daniel Webster, secretary of state, wrote to Edward Everett, U. S. minister at London, saying that the government would demand indemnification for the owners of the slaves. Thereupon Mr. Giddings, 21 March, 1842, offered in the house of representatives a series of resolutions in which it was declared that, as slavery was an abridgment of a natural right, it had no force beyond the territorial jurisdiction that created it; that when an American vessel was not in the waters of any state it was under the jurisdiction of the United States alone, which had no authority to hold slaves; and that the mutineers of the "Creole" had only resumed their natural right to liberty, and any attempt to re-enslave them would be unconstitutional and dishonorable. So much excitement was created by these resolutions that Mr. Giddings, on the advice of his friends, withdrew them, but said he would present them again at some future time. The house then, on motion of John Minor Botts, of Virginia, passed a resolution of censure (125 to 69), and by means of the previous question denied Mr. Giddings an opportunity to speak in his own defence. He at once resigned his seat and appealed to his constituents, who re-elected him by a large majority. In the discussion of the "Amistad" case (see CINQUE), Mr. Giddings took the same ground as in the similar case of the "Creole," and in a speech a few years later boldly maintained that to treat a human being as property was a crime. In 1843 he united with John Quincy Adams and seventeen other members of congress in issuing an address to the people of the country, declaring that the annexation of Texas "would be identical with dissolution"; and in the same year he published, under the pen-name of "Pacificus," a notable series of political essays. A year later he and Mr. Adams presented a report discussing a memorial from the Massachusetts legislature, in which they declared that the liberties of the American people were founded on the truths of Christianity. On the Oregon question, he held that the claim of the United States to the whole territory was just, and should be enforced, but predicted that the Polk administration would not keep the promise on which it had been elected—expressed in the motto "Fifty-four forty, or fight"—and his prediction was fulfilled. In 1847 he refused to vote for Robert C. Winthrop, the candidate of his party for speaker of the house, on the ground that his position on the slavery question was not satisfactory; and the next year, for the same reason, he declined to support the candidacy of Gen. Taylor for the presidency, and acted with the Free-soil party. In 1849, with eight other congressmen, he refused to support any candidate for the speakership who would not pledge himself so to appoint the standing committees that petitions on the subject of slavery could obtain a fair consideration; and the consequence was the defeat of Mr. Winthrop and the election of Howell Cobb, the Democratic candidate. Mr. Giddings opposed the compromise measures of 1850, which included the fugitive-slave law, and the repeal of the Missouri compromise, taking a prominent part in the debates. In 1850, being charged with wrongfully taking important papers from the post-office, he demanded an investigation, and was exonerated by a committee that was composed chiefly of his political opponents. It was shown that the charge was the work of a conspiracy. In 1856, and again in 1858, he suddenly became unconscious, and fell while addressing the house. His congressional career of twenty years' continuous service ended on 4 March, 1859, when he declined another nomination. In 1861 President Lincoln appointed him U. S. consul-general in Canada, which office he held until the time of his death. One who knew him personally writes: "He was about six feet one inch in height, broad-shouldered, of very stalwart build, and was considered the most muscular man on the floor of the house. Whenever he spoke he was listened to with great attention by the whole house, the members frequently gathering around him. He had several affrays on the floor, but invariably came out ahead. On one occasion he was challenged by a southern member, and promptly accepted, selecting as the weapons two raw-hides. The combatants were to have their left hands tied together by the thumbs, and at a signal castigate each other till one cried enough. A look at Mr. Giddings's stalwart frame influenced the southerner to back out." Mr. Giddings published a volume of his speeches (Boston, 1853), and wrote "The Rebellion: its Authors and Causes," a history of the anti-slavery struggle in congress, which was issued posthumously (New York, 1864).



GIDDINGS, Salmon, clergyman, b. in Hartland, Conn., 2 March, 1782; d. in St. Louis, Mo., 1 Feb., 1828. He was graduated at Williams in 1811, studied theology at Andover seminary, and was ordained to the ministry in 1814. In 1814–'5 he was tutor at Williams, and occasionally preached among the neighboring Congregational churches. Deciding to become a missionary, he set out on horseback, in December, 1815, for St. Louis, which

was then regarded as in the far west. He reached the city in April, 1816, assembled a small congregation, and became the pioneer missionary of the Presbyterian church to the country west of the Mississippi. In 1816 Mr. Giddings organized a Presbyterian church at Bellevue settlement, eighty miles southwest of St. Louis, and during the next ten years formed eleven other congregations—five in Missouri, and six in Illinois. In the spring of 1822 he explored Nebraska and Kansas territories, preparatory to establishing missions among the Indians. On this tour of many weeks, without white companions, and hundreds of miles from any white settlement, he visited several Indian nations, held councils with their chiefs, and was received with hospitality. In 1826 Mr. Giddings was installed pastor of the 1st Presbyterian church in St. Louis. He was an active member of the first Bible, Sunday-school, and tract societies of Missouri, and of the first colonization society in that state.

GIFFORD, Archer, lawyer, b. in Newark, N. J., in 1797; d. there, 12 May, 1859. He was graduated at Princeton in 1814, was admitted to the bar in 1818, and began to practise in his native town, where he continued to reside till his death. He was appointed by President Jackson collector of customs for the port of Newark in 1836, and held this office during the following twelve years, without suffering it to interfere materially with an extensive practice. He published a "Digest of the Statutory and Constitutional Constructions delivered in the Supreme Court and Court of Errors and Appeals of New Jersey" (1852), "Unity of the Liturgy," and contributed to periodical literature.

GIFFORD, Robert Swain, artist, b. in Naushon, Mass., 23 Dec., 1840. He studied under Albert Van Beest, the Dutch marine painter, opened a studio in Boston in 1864, and resided there till he settled permanently in New York, in 1866. He was elected an associate of the National academy in 1867, and an academician in 1878. He made an extensive sketching tour in Oregon and California in 1869, and furnished views in these states to "Picturesque America" (1872–'3). He went to Europe in 1870, spent 1874 in Algiers and the Great Desert, and in 1875 made a sketching tour in Brittany and southern France. He has been a member of the American society of painters in water-colors since its organization in 1866, is a member of the New York etching club, the British society of painter-etchers, the Artist's fund society, and the Society of American artists. He is best known through his pictures of oriental life. Among his oil-paintings are "Scene at Manchester, Cape Ann" (1867); "Mount Hood" (1870); "Halting for Water" and "Passenger Boats on the Nile" (1874); "The Rossetti Garden" (1875); "The Mosque of Mahommed Ali," which was awarded a medal at the Centennial (1876); "The Borders of the Desert," "New England Cedars" (1877); "Salt Boats at Dartmouth," exhibited at the Paris salon (1878). His "Deserted Whaler," in the water-color exhibition (1867), excited much favorable comment. Other water-colors by his hand are "Day on the Sea-Shore" (1869); "Block House at Eastport" (1874); "Venetian Companions" (1876); "The Oasis of Filiach, Algeria" (1877). His recent works include "Nonquitt Cliff" (1882); "New Zaandaam" (1883); "The Shores of Buzzard Bay," and "Near the Coast," for which he was awarded $2,500 in the First prize fund exhibition of the American art association (1885); and "Autumn in New England" (1886).—His wife, **Frances Eliot,** artist, b. in New Bedford, Mass., 1844, received her art education at the Cooper institute, New York city, and under Samuel Gerry, in Boston. She has made a specialty of painting birds with landscapes, and has contributed illustrations to the magazines.

GIFFORD, Sandford Robinson, painter, b. in Greenfield, Saratoga co., N. Y., 10 July, 1823; d. in New York, 29 Aug., 1880. He studied at Brown in 1842–'4, and, removing to New York in 1845, was a pupil in perspective, drawing, and anatomy in the studio of John Rubens Smith, also attending lectures on anatomy. At this time he began to paint portraits. In 1846 he made a pedestrian tour in the Catskill mountains, and among the Berkshire hills, where his attention was directed for the first time to landscapes. In 1851 he was elected an associate and three years later a member of the National academy. In 1855–'7 he studied in Europe. When the civil war began, he joined the 7th New York regiment, and some sketches of bivouac and battle are reminiscences of his six months' experience in the army. During the next ten years he visited Colorado, California, Utah, Oregon, British Columbia, and the Rocky mountains. He was a member of the Century and Union league clubs, and his associates were attached to him for qualities that he possessed distinct from his merits as an artist. At a meeting of the Century club, held the day after his death, John F. Weir delivered an address on his life and character; Worthington Whittredge, another entitled "Reminiscences of Gifford"; Jervis McEntee, one on "Gifford, the Friend, the Artist, the Man"; and poems were read by Edmund C. Stedman and Richard H. Stoddard. Mr. Gifford's paintings are remarkable for tenderness of tone and brilliancy of color. His pictures are the interpretation of the profounder sentiments of nature rather than of her superficial aspects. His most successful works are "Baltimore in 1862" (1862); "Morning in the Adirondacks" (1867); "Mount Mansfield" (1869); "San Giorgio, Venice" (1870); "Tivoli" (1871); "Fishing-Boats" (1873); "Pallanza," "Sunset on the Sweet Water, Wyoming," "Venetian Sails" (1874); "At Beni-Hassan" and "Near Palermo" (1876); "Leander's Tower," "Sunset on the Hudson," and "Fire Island Beach" (1877); and "Sunset, Bay of New York" (1878). At the Centennial of 1876 Mr. Gifford was commended for his landscape paintings. His "San Giorgio," "Venice," and "Mount Renier" were exhibited at the Paris salon (1878).

GIGER, George Musgrave, clergyman, b. in Philadelphia, Pa., 6 June, 1822; d. there, 11 Oct., 1865. He was graduated at Princeton in 1841, studied theology there, and in 1860 was ordained by the New Brunswick presbytery. He was then appointed tutor in Princeton college, elected adjunct professor of Greek in 1846, and professor of Latin in 1854. Failing health compelled his resignation of this chair in 1865. Prof. Giger expended much time and effort for the education of the negroes, to whom he preached regularly in Witherspoon church at Princeton. He bequeathed his books and thirty thousand dollars to that college.

GIGNOUX, François Régis, landscape painter, b. in Lyons, France, in 1816; d. in Paris, 6 Aug., 1882. He was educated at Fribourg, and studied art in the Academy of St. Pierre, at Lyons. Later he entered the School of fine arts at Paris, and was also a pupil of Paul Delaroche. In 1844 he removed to the United States and opened a studio in Brooklyn, N. Y. In 1851 he was elected a member of the Academy of design, and was the first president of the Brooklyn art academy. In 1870 he returned to France, where he resided until his death. The best known of his landscapes

are "Niagara Falls," "Virginia in Indian Summer," "The First Snow," "Four Seasons in America," "The Dismal Swamp," "Moonlight on the Saguenay," "Mount Washington," which was exhibited at the Paris salon of 1867, and "Spring," at the Philadelphia exposition of 1876.

GIHON, Albert Leary, surgeon, b. in Philadelphia, Pa., 6 June, 1833. He was graduated at the Philadelphia high-school in 1850, and was professor in the Philadelphia medical college in 1853–'4. He entered the U. S. navy in 1855 as assistant surgeon, became surgeon in 1861, medical inspector in 1872, and medical director, with the rank of captain, in 1879. He is now (1887) stationed at Mare Island, California. His published works are "Practical Suggestions in Naval Hygiene" (New York, 1871); "The Need of Sanitary Reform in Ship Life" (1877); "Sanitary Commonplaces Applied to the Navy" (1877); and the "Prevention of Venereal Disease by Legislation" (1882), and is a constant contributor to magazines and newspapers.

GÍL, Gerónimo Antonio (hil), Spanish-Mexican engraver, b. in Zamora, Spain, in 1732; d. in the city of Mexico, 16 April, 1798. He was one of the first scholars of the Academy of San Fernando, which enabled him to continue his studies in Madrid under Tomas Prieto. In 1756 he was awarded the first prize for the second class in painting, and in the same year he engraved the copper-plate copies of the medals that his teacher had used for the premiums of the academy, and that institute made him an honorary member. In 1757 he went to Rome to continue his studies, and on his return was awarded the engraving of the medals for the agricultural exposition of Malaga. In 1760 he was appointed chief engraver of the mint in Mexico, and established a drawing-school. From 1764 till his death he was director of the Academy of San Carlos. His most noteworthy works are the medals that he engraved for the proclamation of the reign of Charles IV., and a medal representing the equestrian statue of that monarch, executed by Manuel Tolsa for the Paseo de Bucareli in the city of Mexico. He also executed over 6,600 punches and 8,000 matrices for the type-foundry for the royal library, one of the best outfits in existence. In Rome and Madrid there are fine prints of copper-plates executed by Gil, the most original being a portrait of Charles III., with an allegorical figure, and a plate of Palafox, ex-bishop of Puebla.

GILBERT, Abijah, senator, b. in Gilbertsville, Otsego co., N. Y., 18 June, 1806; d. there, 23 Nov., 1881. His grandfather, Abijah, settled in Otsego (then Montgomery) county in 1787, and his father, Joseph, was engaged there in manufacturing and other business. The son entered Hamilton college, but did not complete his course, owing to illness. He engaged in mercantile pursuits in the country, and afterward in New York city, but retired in 1850. In politics he was a strong Whig, and afterward a Republican, and was an early advocate of the abolition of slavery. After the civil war he removed to St. Augustine, Fla., and took an active part in the reconstruction of the state. He was elected to the U. S. senate as a Republican, and served from 1869 till 1875, after which he retired to private life, continuing to reside in St. Augustine till just before his death.

GILBERT, Benjamin, author, b. in Byberry, Philadelphia, Pa., in 1711; d. on St. Lawrence river, 8 June, 1780. He carried on an extensive milling business in Northampton county, Pa. In April, 1780, he and his family were taken prisoners by the Indians. He was carried to Niagara, surrendered to Col. Johnson, and sent by him in an open boat to Montreal. He died while descending the St. Lawrence, and was buried on the banks of the river. A narrative of his captivity and suffering was published by Joseph Cruikshank (Philadelphia, 1784). His mind was of a religious bent, and he published several volumes on theological subjects, including "Truth Defended" (1748); "Discourses on Perfection" (1769); and "Further Discourses on Sin, Election, Reprobation, and Baptism" (1770). See also "History of Byberry and Moreland," by P. Middleton (Philadelphia, 1867).

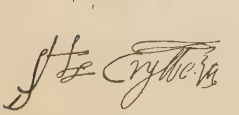
GILBERT, Charles Champion, soldier, b. in Zanesville, Ohio, 1 March, 1822. He was graduated at the U. S. military academy in 1846, and assigned to the 3d infantry. He served in the war with Mexico, was in the garrison at Vera Cruz in 1847–'8, in the city of Mexico in 1848, and then engaged in frontier duty until 1850. He became an assistant professor at West Point on 28 Feb., 1850, was promoted to a 1st lieutenancy on 10 June, and fulfilled his duties until 28 Sept., 1855, after which he was on duty at various forts in Texas until the beginning of the civil war. He distinguished himself in conflicts with Indians, and was advanced to a captaincy on 8 Dec., 1855. During the civil war he served in the southwest, and was wounded at the battle of Wilson's Creek on 10 Aug., 1861. On 21 Sept., 1861, he was inspector-general of the Department of the Cumberland and of the Army of the Ohio until 25 Aug., 1862. During this time he was engaged in the march to Pittsburg Landing in March and April, 1862, and in the battle of Shiloh on 7 April, when he was brevetted major. He was promoted to a brigadier-generalship of volunteers on 9 Sept., 1862, became acting major-general in command of the Army of Kentucky, engaged in the battle of Perryville on 8 Oct., 1862, and for his gallantry was brevetted colonel in the regular army. Taking command of the 10th division of the Army of the Ohio, he guarded the Louisville and Nashville railroad through the winter, when he became assistant to the provost-marshal at Louisville until 2 June, 1863. He was then commissioned major, and served at various forts until 21 Sept., 1866, when he was transferred to the 28th infantry. He became lieutenant-colonel of the 7th infantry, 8 July, 1868, colonel of the 17th infantry on 19 May, 1881, and was retired from active service on 1 March, 1886.

GILBERT, Edward, editor, b. in Albany, N. Y.; d. in California in 1862. He received a public-school education, and became a member of Col. Stevenson's New York regiment. He afterward removed to California, settled in San Francisco, and served as representative in congress from 11 Sept., 1850, till 3 March, 1851, when he returned to his adopted state and engaged in the practice of law. He soon after founded and became editor-in-chief of the daily "Alta California," thus being the pioneer of the daily press of San Francisco. Certain editorial criticisms on the action of the governor of the state provoked a retort from Gen. James W. Denver, then secretary of state of California, and a challenge followed. A duel with rifles resulted, and Gilbert fell.

GILBERT, Grove Sheldon, artist, b. in Clinton, N. Y., 5 Aug., 1805; d. in Rochester, N. Y., 23 March, 1885. He was educated at Middlebury academy, and for a time studied medicine. An early fondness for drawing had given him a desire to be an engraver, and at the age of twenty, seeing a portrait for the first time, he at once decided to become an artist. Subsequently obtaining some colors from a sign-painter, he made a portrait of

his sister on the lid of a chest, which proved to be a capital likeness. For several years he painted in Fort Niagara and Toronto, finally settling in Rochester in 1834, where he afterward remained. He then devoted himself exclusively to portrait painting, and was eminently successful. In 1848 he was elected to honorary membership in the National academy of design, and in 1849 became an honorary member of the Albany academy of arts. —His son, **Grove Karl,** geologist, b. in Rochester, N. Y., 6 May, 1843, was graduated at the University of Rochester in 1862, and subsequently devoted his attention to geology, being for a time associated with Prof. Henry A. Ward, the naturalist, in Rochester. In 1869 he became a volunteer assistant on the Ohio geological survey, and in 1871 received the appointment of geologist to the survey west of the 100th meridian under Lieut. George M. Wheeler. Three years later he was made assistant geologist under Maj. John W. Powell in the geographical and geological survey of the Rocky mountain region, and held this appointment until July, 1879, when he became geologist to the U. S. geological survey, having charge at first of the division of the Great Basin, and more recently of the Appalachian division. He is a member of scientific societies, and was one of the vice-presidents of the American association for the advancement of science in 1887, having charge of the section on geology and geography. Mr. Gilbert was president of the American society of naturalists in 1885–'6, and in 1883 was elected a member of the National academy of sciences. He has been a large contributor to technical journals and to the proceedings of societies. His papers treat principally of the sculpture of the land by rain and rivers, the genesis of the topography of lake-shores, and the quaternary history of the Great Basin. Many of these have appeared in the volumes of the official reports of the Ohio and the government surveys. He wrote the "Report on the Geology of the Henry Mountains" (Washington, 1877), and edited and partially wrote the "Report on the Geology and Resources of the Black Hills of Dakota" (1880).

GILBERT, Sir **Humphrey,** English navigator, b. in Dartmouth, England, in 1539; lost at sea, 10 Sept., 1584. He was a half-brother of Sir Walter Raleigh. After studying at Eton and Oxford, he chose the military profession, fought in the north of England and Scotland against the Roman Catholics, and was given command of an army sent to subjugate the Irish. For his successful conduct of the campaign he was knighted and made governor of Munster in 1570. Soon after his return to England he commanded a fleet that was sent to blockade Flushing. On his return he published a pamphlet entitled "A Discourse of Discovery for a New Passage to Cataia." He was one of the most ardent advocates of the theory of a northwest passage, and after aiding Frobisher and other mariners with his fortune and influence, determined to become an explorer himself. He obtained letters-patent from Queen Elizabeth, authorizing him to make discoveries during six years in all barbarous countries not in the possession of Christians, and to occupy and dispose of them in favor of English subjects under the crown. His first expedition was undertaken in 1581, but a tempest destroyed one of his vessels, and compelled the admiral to return to port with the others, which were badly damaged. He mortgaged his estate to raise money for a new expedition, which started on 11 June, 1583, for Newfoundland. It consisted of two decked vessels and three sloops, manned by 260 men. Walter Raleigh, who commanded the largest ship, became alarmed at the amount of sickness on board, and on the third day put back for England. Gilbert arrived at the coast of Newfoundland after several narrow escapes from storms and icebergs. He landed at St. John, and, despite the presence of thirty-six vessels of various nationalities, took possession of the country in the name of his sovereign. He expelled the Portuguese, who had settled on the island, and published statutes providing that the religion of the country should follow the English rite, that whoever rebelled against the sovereignty of the queen should be punishable with death as a traitor, and that any person who spoke disrespectfully of the queen should have his ears cut off and his land or vessels confiscated. His colony turned out disastrously. A large number of sailors deserted, others fell sick, and finally Gilbert set sail for Norumbega, afterward called New England. A tempest dispersed the flotilla, and the principal vessel foundered. Sir Humphrey's vessel went down in a storm off the Azores while on the course to England. Robert Clarke returned to Newfoundland alive, after great sufferings.



GILBERT, John Gibbs, actor, b. in Boston, Mass., 27 Feb., 1810. He was educated in the public schools of his native city, and at the age of fourteen placed in a dry-goods store, where he remained four years. After some experience in private theatricals he appeared, 28 Nov., 1828, at the old Tremont theatre, as Jaffier in "Venice Preserved." This was followed by Sir Edward Mortimore in "The Iron Chest," and Shylock in "The Merchant of Venice." But Mr. Gilbert soon became a stock actor, on the pay of three dollars per week, and, dissatisfied with his condition, sought an engagement with Caldwell, manager of the New Orleans theatre, and for about four years played "general utility" in the southwestern theatres. Subsequently he acted for five years in Boston, one year in New York city, and again five years in Boston. In 1847 Mr. Gilbert went to London and joined the company of the Princess's theatre, having been engaged to represent the parts of old men in standard comedies. His first appearance there was as Sir Robert Bramble in "The Poor Gentleman." After the close of the London season he visited Paris, for the purpose of study. In 1848 Mr. Gilbert returned to this country, and appeared under the management of Hamblin, at the New York Park theatre. His last performance at this place was in the part of Admiral Kingston in "Naval Engagements," the evening before it was destroyed by fire, after a few months of unsuccessful management. Thereafter he joined Hamblin's company at the Bowery theatre. From the latter place, in 1851, he went to Philadelphia for five years, and thence to Boston until 1857, when he returned to Philadelphia, remaining until 1862. In 1862 Mr. Gilbert joined the company of Wallack's theatre in New York city, with which he has since been

connected. He has been twice married. His second wife, née Sarah H. Gavett, is living. Mr. Gilbert's career of sixty years before the public has been unmarked either by vicissitudes or adventures. Away from the theatre his life has been quiet and retired. He is one of the few performers before the public whose career compasses more than two generations, from the days when he played in connection with Cooper, Junius B. Booth, and the Kembles. His range of characters has been wide, in comedy and tragedy, and at the present time (1887) he is among the few who are able to portray effectively the fine old English gentleman of other days. Among his most popular personations are Sir Peter Teazle, Sir Anthony Absolute, Lord Ogleby, Job Thornberry and Old Dornton. His ability to learn new parts is unimpaired, and after a few readings of old ones that were favorites with him many years ago, he is able to recite them with precision. With all his experience he has told the writer of this article that on first nights he is usually more or less nervous, and in former years was several times overcome by stage-fright. Although well nigh an octogenarian, he looks more like a man of sixty, and ascribes his freedom from many of the ailments of advanced age to constant bathing and cold-water treatment.

John Gilbert

GILBERT, Linda, philanthropist, b. in Rochester, N. Y., 13 May, 1847. She removed to Chicago, Ill., with her parents when she was about four years old, and was educated at St. Mary's convent in that city. She became interested at an early age in efforts to improve the condition of prisons and prisoners, and has endeavored "to remove the conditions that produce crime, by a wholesome system of industry and culture." She has succeeded in placing in various prisons libraries of from 1,500 to 2,000 volumes each, and aggregating 30,000 volumes. In 1876 the "Gilbert library and prisoners' aid society" was incorporated under the laws of the state of New York, and Miss Gilbert became president of its board of managers. The objects of the society are to improve prison discipline, to place libraries in every prison and jail in the country, to look after the prisoner's family if in need and worthy of aid, and to help convicts to lead upright lives after their discharge. Although lack of funds has prevented the society from doing any work since 1883, Miss Gilbert continues to labor as an individual. She has patented several devices, including a noiseless rail for railroads, and a wire clothes-pin, and has used these for the purpose of gaining money to carry on her philanthropic work. For the same purpose she has established "Linda Gilbert's Tax and Trade Record."

Linda Gilbert

GILBERT, Mahlon Norris, P. E. bishop, b. in Morris, N. Y., 23 March, 1848. His early education and training were obtained at Fairfield seminary, N. Y. He entered Hobart college in 1866, but, owing to pulmonary troubles, was compelled to leave before the end of the course. He spent two years in Florida for the benefit of his health, after which he took charge of the School of the Good Shepherd, at Ogden, Utah. He entered Seabury divinity-school, Faribault, Minn., in 1872, was graduated in 1875, and was ordained deacon by Bishop Whipple. Shortly afterward he went to Montana and took charge of a large mission field at Deer Lodge, in the western part of the territory. He was ordained priest by Bishop Tuttle in October, 1875, and continued his labors, partly at Deer Lodge and partly at Helena, for five or six years, meeting with abundant success. In January, 1881, he was called to the rectorship of Christ church, St. Paul, Minn., and also established missions at White Bear, Fort Snelling, Merriam Park, and Randolph street. He has received the degree of D. D. from Seabury divinity-school and also from Racine college. Dr. Gilbert has been actively engaged in diocesan work, was a deputy to the general convention of 1886, and was elected assistant bishop of Minnesota in the same year. He was consecrated on 17 Oct., 1886.

GILBERT, Nathaniel, lawyer. He was speaker in the house of assembly in Antigua, West Indies, and is distinguished as the founder of Methodism in those islands. While in England in 1758, he and two of his slaves heard Wesley preach, and all became converts. On his return to the West Indies, Gilbert held religious meetings in his own house, became a Methodist preacher, and founded a society, chiefly of blacks, which was the beginning of the Wesleyan missions in the archipelago.

GILBERT, Raleigh. He was a nephew of Sir Walter Raleigh, and commanded a vessel containing 120 colonists in the expedition to settle at the mouth of the Kennebec river in 1607. Arriving at Monhegan island on 11 Aug., a fort was built at Cape Small Point, now a part of Phippsburg, Me., and named St. George. Gilbert was appointed administrator. Becoming by the death of his brother the heir to the family estates in England, and the storehouse of the colony being burned, he returned to England the following year, the whole colony accompanying him.

GILBERT, Rufus Henry, inventor, b. in Guilford, N. Y., 26 Jan., 1832; d. in New York city, 10 July, 1885. He served an apprenticeship with a manufacturing firm in Corning, N. Y., studied medicine with Dr. Willard Parker, of New York city, and was graduated at the College of physicians and surgeons. At the beginning of the civil war he joined the Duryea zouaves as surgeon, and served through the war, performing at the battle of Big Bethel the first surgical operation that was made under fire during the struggle. He was afterward made medical director and superintendent of the U. S. army hospitals. His health becoming impaired, he gave up active practice and became assistant superintendent of the New Jersey central railroad. While thus occupied he was led to study the question of rapid transit in New York city. His attention was drawn to this subject on account of his experiences as a physician, and in view of the excessive mortality in overcrowded

tenement-houses. His first notion was a pneumatic tube, and this was afterward elaborated into the present elevated railroad system. He devised seven different plans, and in 1872 obtained a charter at Albany for an overhead tubular pneumatic railway, under the title of the "Gilbert elevated railroad company," for which he was unable to obtain a franchise. The original elevated railway (1867) extended from Battery place through Greenwich street and Ninth avenue to Thirtieth street. The horse-car companies fought against the project with every weapon, looking on the company as competitors and intruders upon their vested privileges. The contest ended in favor of Dr. Gilbert. The road was begun, but the work soon stopped, and eighteen months of litigation followed. It was not until October, 1877, that the company were enabled to proceed. The Sixth avenue road was built, and Dr. Gilbert was at first a large holder of the stock. He was superseded in the management in 1878, and the name of the company was changed to the Metropolitan elevated railroad company. His stock passed out of his hands, extensive litigation followed, charges of fraud were made against his associates, and his death was hastened by anxiety and disappointment.

GILBERT, Thomas, soldier, b. about 1714; d. in New Brunswick in 1796. His ancestor, John, came from Devonshire early in the 17th century, and was one of the first two representatives from Taunton, Mass., to the general court. Thomas was a captain at the memorable siege of Louisburg in 1745, and in the French war of 1755 held a lieutenant-colonelcy in the Massachusetts forces under Gen. Ruggles. He was engaged in the attempt against Crown Point, and after the fall of Col Williams in the battle with the French under Baron Dieskau, he succeeded to the command of the regiment. On retiring from the service at the close of the war he declined to receive half pay. At the beginning of the Revolutionary struggle he raised and commanded a body of 300 royalists at the request of Gen. Gage. In April, 1775, the congress of Massachusetts declared him an enemy to his country, and a few days later he fled to a vessel lying in the harbor of Newport, and sailed to Boston, then in possession of the British. He accompanied the royal troops to Halifax in 1776, and in 1778 was proscribed and banished. He continued to serve in the British army during the war, went to Nova Scotia in 1783, and subsequently settled in New Brunswick.

GILBERT, Walter Bond, musician, b. in Exeter, England, 21 April, 1829. He gave early evidence of musical talent, and when quite young was placed under Mr. Angel, organist of Exeter cathedral, as an articled pupil for five years, after which he studied the organ under Dr. Wesley, of Winchester, and orchestration under Sir Henry Bishop. He took the degree of bachelor in music at Oxford in 1854, became fellow of the College of organists in 1868, and in 1886 received the honorary degree of doctor in music from Trinity college, Toronto, Canada. In 1869 he was appointed organist of Trinity chapel, New York, which place he still (1887) holds. His compositions and publications are numerous, and include two oratorios, "St. John" and "The Restoration of Israel."

GILBERT, William Kent, physician, b. in Gettysburg, Pa., 28 Dec., 1830; d. in Philadelphia, Pa., 28 June, 1880. His father, David (1803–'68), was for some years professor of surgery in the medical department of the University of Pennsylvania. The son was graduated at Pennsylvania college, Gettysburg, in 1849, and at the Pennsylvania medical college in 1852. After some time spent in Europe he became resident physician to the Philadelphia hospital, holding that appointment for two years. He then settled in Philadelphia as a regular practitioner, and continued so until his death. For some time he was consulting physician to the hospital committee of the Philadelphia hospital, and from 1878 till 1881 he held the office of coroner of Philadelphia county. Dr. Gilbert was a member of the College of physicians, of several medical societies, of the Academy of natural sciences, and of the Pennsylvania historical society. He spent many years in making a collection of books, papers, autograph letters, and manuscripts relating to American medical history, biography, and literature, and at the time of his death left an unpublished work as the result of his researches. — His brother, **David McConaughy,** clergyman, b. in Gettysburg, Pa., 4 Feb., 1836, received his classical and theological education in Pennsylvania college and seminary, at Gettysburg, Pa., where he was graduated in 1857. He was ordained to the Lutheran ministry in 1860, and received the degree of D. D. from Roanoke college, Va., in 1880. He has been pastor of Lutheran congregations, at Staunton, Va., in 1859–'63, Savannah, Ga., in 1863–'71, again at Staunton, Va., in 1871–'3, and at Winchester, Va., since April of the latter year. He is a leader in ecclesiastical affairs in the southern church, and has held various places of honor and trust in the southern Lutheran synods. For the past five years he has been president of the Evangelical Lutheran synod of Virginia. In 1884–'5 he took an active part in the efforts to unite the Lutheran synods in the south on a purely confessional basis, and when, on 25 June, 1886, the united synod in the south was organized, he was chosen its first president. His published works include "The Lutheran Church in Virginia, 1776–1876" (New Market, Va., 1876); "The Praises of the Lord in the Story of our Fathers, a Sketch of the Lutheran Church at Winchester" (1877); "The Synod of Virginia, Its History and Work" (1879); "The Annihilation Theory Briefly Examined" (1879); and "Muhlenberg's Ministry in Virginia, a Chapter of Colonial Luthero-Episcopal Church History" (1884). Besides these, he has published various articles and sermons, doctrinal and practical.

GILCHRIST, John James, jurist, b. in Medford, Mass., 16 Feb., 1809; d. in Washington, D. C., 29 April, 1858. He was graduated at Harvard in 1828, and studied law with William Briggs in Charlestown, and at the Harvard law-school. After his admission to the bar he settled in Charlestown, N. H., where he practised in partnership with Gov. Henry Hubbard, whose daughter he married. He was a member of the New Hampshire legislature and also register of probate for Sullivan county. In 1840 he was appointed an associate justice of the supreme court of New Hampshire, and in 1848 became chief justice. He was appointed one of the justices of the United States court of claims in 1855, and continued in that office until his death. Judge Gilchrist published a "Digest of New Hampshire Reports" (Concord, 1846).

GILCHRIST, Robert Budd, jurist, b. in Charleston, S. C., 28 Sept., 1796; d. there, 1 May, 1856. He studied in Columbia college, New York, and, after entering the junior class in the South Carolina college, was graduated in 1814. He then studied law, and was admitted to the bar in 1818. In 1831 he became district attorney for South Carolina, and was the prosecuting official in the "Bond case," in which the constitutionality of the

tariff was investigated. In 1839 he became judge of the district court of South Carolina, which office he held until his death.

GILCHRIST, William Wallace, musician, b. in Jersey City, N. J., in 1846. He removed with his parents to Philadelphia, and at nine years of age began a course of musical study under Prof. H. A. Clarke, of the University of Pennsylvania. In 1872 he went to Cincinnati and became organist of the New Jerusalem church. In 1883 he returned to Philadelphia, where he has since resided. He has won three prizes for compositions from the Mendelssohn glee club of New York city, and in 1882 the Cincinnati May festival prize was awarded by Reinecke, Saint Saëns, and Theodore Thomas to his setting of the 46th Psalm.

GILDER, William Henry, clergyman, b. in Philadelphia, Pa., 17 Sept., 1812; d. at Brandy Station, Va., 13 April, 1864. His father, John Gilder, was a member of the Pennsylvania legislature, and laid the corner-stone of Girard college. The son was educated at Wesleyan university, and afterward received the degree of A. M. from Dickinson. At the age of twenty-one he became a preacher in the Methodist church, and was afterward ordained. In 1836 he made an equestrian tour of the southern states, going as far as New Orleans. In 1840 he began the publication of the "Philadelphia Repository," a literary monthly, but discontinued it at the end of a year. Subsequently he published for a few years in Philadelphia the "Literary Register," a quarterly review. Mr. Gilder in 1842 established Bellevue female seminary in Bordentown, N. J., which in 1848 he removed to Flushing, L. I., and in 1857 it was chartered as a college. In 1859 he removed to Redding, Conn., and thence to Fair Haven, to Yonkers, N. Y., and to Bordentown. He became chaplain of the 40th regiment of New York volunteers at the beginning of the civil war, and remained in active service until his death, which resulted from small-pox contracted during attendance upon a military small-pox hospital. He published a "New Rhetorical Reader" (New York).—His son, **William Henry,** explorer, b. in Philadelphia, 16 Aug., 1838, enlisted as a private in the 5th New York volunteers at the beginning of the civil war, and was afterward transferred to the 40th. But during a large part of the war he served on the staff of Gen. Thomas W. Egan, and on being mustered out at its close was brevetted major. In June, 1878, he accompanied Lieut. Schwatka, as second in command, on his expedition to King William's Land in search of the relics of Sir John Franklin. This expedition was marked by the longest sledge-journey on record—3,251 statute miles. In June, 1881, he accompanied the "Rodgers" expedition in search of the "Jeannette," and when the "Rodgers" was burned, 30 Nov., he made a midwinter journey from Bering strait across Siberia, to telegraph news of the disaster to the secretary of the navy. He then joined in the search on the Lena delta for the survivors of the "Jeannette." Maj. Gilder spent the summer and autumn of 1883 in Tonquin, where the French and Anamese war was in progress, and in 1884 was one of the first to visit the scene of the earthquakes in Spain. On these occasions, as well as in his arctic expeditions, he acted as correspondent of the New York "Herald." He has published "Schwatka's Search" (New York, 1881) and "Ice-Pack and Tundra" (1883). The latter has been translated into French, under the title "L'expédition du Rodgers à la recherche de la Jeannette."—Another son, **Richard Watson,** editor, b. in Bordentown, N. J., 8 Feb., 1844, was educated mainly in his father's school. As a member of Landis's Philadelphia battery, he enlisted for the "emergency" campaign in the summer of 1863, when the Confederate army invaded Pennsylvania, and took part in the defence of Carlisle. He joined the staff of the Newark, N. J., "Advertiser" in 1865, and in 1868, with Newton Crane, established the Newark "Morning Register." In 1869 he became editor of "Hours at Home," and when that magazine was merged into "Scribner's Monthly" (now the "Century") he was made associate editor of the new periodical. On the death of Dr. J. G. Holland in October, 1881, Mr. Gilder succeeded him as editor-in-chief. He received the degree of LL. D. from Dickinson college in 1883. He has published four volumes of poems, "The New Day" (New York, 1875); "The Poet and his Master" (1878); "Lyrics," which is largely made up of the two previous volumes (1885); and "The Celestial Passion" (1887). He is one of the founders of the Authors club in New York.

GILDERSLEEVE, Basil Lanneau, educator, b. in Charleston, S. C., 23 Oct., 1831. He was graduated at Princeton in 1849, and then studied at the universities of Berlin, Bonn, and Göttingen in Germany, taking the degree of Ph. D. at the latter institution in 1853. Soon after his return to the United States he was elected professor of Greek in the University of Virginia, where he remained from 1856 till 1876, also occupying the chair of Latin in that university from 1861 till 1866. On the establishment of the Johns Hopkins university, he was called to the professorship of Greek there, and has since held that appointment. He has received the degrees of LL. D. from William and Mary in 1869, and from Harvard in 1886, and of D. C. L. from the University of the south in 1884. Prof. Gildersleeve has taken high rank as a Greek scholar, and has edited the "American Journal of Philology," which was founded in Baltimore in 1880. He has published six Latin textbooks (New York, 1867–'83) and editions of "Persius" (1875); "Justin Martyr" (1877); and the "Olympian and Pythian Odes of Pindar" (1885).

GILDERSLEEVE, Benjamin, editor, b. near Norwalk, Conn., 5 Jan., 1791; d. in Tazewell county, Va., 20 June, 1875. He was graduated at Middlebury college in 1814, and after teaching in Mount Zion, Ga., until 1817, he entered Princeton theological seminary, where he remained a year. He became editor of "The Missionary" in 1819, and was ordained an evangelist of the Presbyterian church in August, 1820. His editorial labors continued, and he had charge of "The Christian Observer" from 1826 till 1845. He then removed to Richmond, Va., and became sole editor of "The Watchman and Observer" until 1856, when for the four ensuing years he was associated with the Rev. Moses D. Hoge, D. D., and Rev. Thomas V. Moore, D. D., in the editorship of "The Central Presbyterian." During his residence in Virginia he preached whenever it was possible, especially in the Virginia penitentiary, where his work was very successful. In advanced years his sight failed him, but he continued his ministry long afterward.

GILES, Chauncey, clergyman, b. in Charlemont, Mass., 11 May, 1813. He was educated at Williams, but failing health compelled him to leave during his junior year. Subsequently he was engaged in teaching, and continued so occupied until 1853, when he became a clergyman of the church of the New Jerusalem. For ten years he preached in Cincinnati, then for fifteen years in New York, after which he became pastor of the first New Jerusalem society in Philadelphia. In

1863 he was consecrated to the office of ordaining minister, corresponding to bishop in other churches, and in 1875 was elected president of the general convention of the church of the New Jerusalem in the United States. This office, the highest in the gift of his church, he has since held by annual re-election. During his residence in New York he edited the "Children's New Church Magazine" for four years, and the "New Church Messenger" for six years. He has published about two hundred discourses as tracts, many of which have been translated into French, German, and Italian. His other publications include "Man as a Spiritual Being," which has been translated into French, German, Norwegian, and Swedish (New York, 1868); "Stories for Children" (1868–'70); "The Incarnation" (1870); "Heavenly Blessedness" (London, 1872); "The Second Coming of the Lord" (Philadelphia, 1879); "Perfect Prayer" (1880); and "Valley of Diamonds" (London, 1881).

GILES, Henry, clergyman, b. in Crokford, County Wexford, Ireland, 1 Nov., 1809; d. near Boston, Mass., 10 July, 1882. He was educated in the Royal academy at Belfast, and was brought up in the Roman Catholic faith. Subsequently he united with the Unitarian church and became a minister of that denomination, preaching for two years in Greenock, Scotland, and then for three years in Liverpool, England. In 1839 he took an active part in the controversy between the Unitarians and Episcopalians, and delivered four of a course of thirteen lectures in Liverpool in that connection, the other Unitarian lecturers being James Martineau and John H. Thom. He came to the United States in 1840, and soon established for himself a reputation as a brilliant lecturer. He addressed many literary societies and library associations, and delivered a course of lectures before the Lowell institute on "The Genius and Writings of Shakespeare." He preached occasionally, but during the latter part of his life dwelt in retirement in the suburbs of Boston. Mr. Giles wrote much for periodicals, and was the author of essays that were marked by ingenuity of thought, fulness of diction, and fervor of style. These include "Lectures and Essays" (2 vols., Boston, 1845); "Christian Thought on Life" (1850); "Illustrations of Genius in some of its Applications to Society and Culture" (1854); "Human Life in Shakespeare" (1868); and "Lectures and Essays on Irish and other Subjects" (New York, 1869).

GILES, William Branch, statesman, b. in Amelia county, Va., 12 Aug., 1762; d. in Albemarle county, Va., 4 Dec., 1830. He was educated at Hampden Sidney college, and at Princeton, and then studied law with Chancellor George Wythe. After his admission to the bar he practised for several years in Petersburg, Va., when he was elected to congress, and served continuously from 6 Dec., 1791, till 3 March, 1803, except during the 6th congress (1799–1801). His opposition to the bill creating a bank of the United States led to his estrangement from the Federal party and to his affiliation with the Democrats. On 23 Jan., 1793, he made an attack on Alexander Hamilton, then secretary of the treasury, charging him with corruption and peculation. Hamilton vindicated himself in a report, and Giles replied by proposing resolutions censuring the secretary for undue assumption of power, and for want of respect to the house. In 1796 Giles strongly opposed the ratification of John Jay's treaty with Great Britain, and in 1798 the proposed war with France, for her outrages on American commerce. In the latter year he became a member of the Virginia legislature, and co-operated with James Madison in procuring the passage of the celebrated resolutions of 1798, serving also as a presidential elector in 1801. In 1804 he was appointed U. S. senator, to succeed Wilson Cary Nicholas, and with subsequent elections served until 3 March, 1815, when he resigned. He at once took the position of a Democratic leader in the senate, and held it until 1811, when he openly manifested his opposition to the administration of President Madison. Mr. Giles then retired from public life, and continued so until 1825, when he was again a candidate for the U. S. senate, but was defeated by John Randolph. In 1826 he was induced to become a member of the legislature of Virginia, principally from his strong opposition to the project of calling a convention to revise the constitution of the state. In the same year he was elected governor of Virginia, and held that office until 1829. The bill for calling a convention was revived, and passed at the session of 1827–'8, and Mr. Giles while governor was chosen a member. The convention sat in 1829–'30, and he took a distinguished part in its deliberations. As a parliamentary tactician he was unrivalled. "Mr. Giles was considered by John Randolph to be in the house of representatives what Charles Fox was admitted to be in the British house of commons —the most accomplished debater that his country had ever seen. But their acquired advantages were very different. Fox was a ripe scholar; Giles neither read or studied. Fox perfected himself in the house, speaking on every subject; Giles out of the house, talking to everybody." He published a speech on the embargo laws (1808); political letters to the people of Virginia (1813); a series of letters, signed "A Constituent," in the Richmond "Enquirer," against a plan for general education (1818); a singular letter of invective against President Monroe and Henry Clay for their "hobbies"; the South American cause, the Greek cause, internal improvements, and the tariff (1824); and a letter to Judge John Marshall disclaiming the expressions, not the general sentiments, in regard to Washington ascribed to him in the debate of 1796 in Marshall's "Life of Washington" (1825).

GILFERT, Charles, theatrical manager, b. in Germany in 1787; d. in New York city, 30 July, 1829. He began his career in the United States as a composer and teacher of music, and became a manager of concerts and oratorios. Eventually he led the orchestra of the Park theatre in New York city, and was the conductor of the Musical-fund society. In 1815 he relinquished his musical career, and became lessee of the theatre in Charleston, S. C. At the close of an unsuccessful season, he went to Albany, N. Y., with his wife, and for several years managed the theatre in that city. In 1826, when the noted New York or Bowery theatre was built, he was offered the management, and became its lessee. Here he produced in rapid succession spectacular novelties, ballets, and operatic ensembles superior to any that had been seen in this country. But he was of an over-sanguine temperament, regardless of obligation, and reckless in money matters. As a consequence, his affairs became disordered, he was continually harassed, and not seldom imprisoned for debt within the "jail liberties" of his theatre.—His wife, **Agnes,** actress, b. in England in 1793, d. in Philadelphia, Pa., 19 April, 1833, first played at the Haymarket theatre in London, in 1811, in the character of Belvidera, in "Venice Preserved." In 1812 she came to this city with her father, Joseph George Holman, appeared at the New York Park theatre in the "Provoked Husband," made the tour of the large

cities, and became so great a favorite as to command $200 per night for her performances. In 1815 she was married to Mr. Gilfert. Thereafter her public career was merged in that of her husband. Sharing his many vicissitudes, at the time of his death she retired from the theatre. Her friends then persuaded her to open a young ladies' seminary in New York city. Mrs. Gilfert continued teaching for about seven years, with indifferent success, and reluctantly returned to the stage, with the hope of recovering some of her former popularity. Her new opening was at the Chatham theatre. But time had wrought its changes with her personal appearance; she had lost her spirits and gayety, and fresher attractions had captivated the public. After a continued struggle with disappointment and poverty, she was last seen on the stage of the Park theatre in New York city, on 26 July, 1831, in Shakespeare's "King John." Broken in health and professional reputation, she retired to Philadelphia, where she soon died in obscurity and neglect. As Miss Holman, in the flush of youth, beauty, and success, she had been a welcome guest in the best society. In high comedy parts, in her early days, she was rarely equalled, and probably never excelled.

GILFILLAN, James, jurist, b. at Bannockburn, Scotland, 9 March, 1829. He was brought to the United States in infancy, and spent his youth at New Hartford and Utica, Oneida co., N. Y. He attended only the country district schools, but studied the classics and higher mathematics privately. After a law course at the state and national law-school at Balston Spa, N. Y., he was admitted to the bar at Albany in December, 1850, and went immediately to Buffalo, N. Y., and practised till the spring of 1857. He then went to St. Paul, Minn., where he has since resided. He entered the military service in August, 1862, as 2d lieutenant of the 7th Minnesota regiment, was commissioned captain in September, and served in 1862–'3 against the Sioux Indians. He then served in the south till the end of the civil war, and in October, 1864, was commissioned colonel of the 11th Minnesota. After the war he continued in the practice of law at St. Paul till July, 1869, when he was appointed chief justice of the state supreme court, to fill a vacancy, and served till January, 1870. He was again appointed to fill a vacancy in the same office in 1875, elected in the autumn of that year, and re-elected in 1882.

GILL, Theodore Nicholas, naturalist, b. in New York city, 21 March, 1837. He was educated in his native city in private schools, and under special tutors. His attention was early turned to natural history, and for some time he was associated with J. Carson Brevoort in the arrangement of the latter's entomological and ichthyological collections. In 1863 he went to Washington and became an assistant in the Smithsonian institution. His work there consisted in the study and classification of the material that had been collected under the auspices of the institution, and his attention was first given to mammals, and later to fishes, in which departments he is recognized as one of the foremost authorities. More recently he has devoted considerable thought to mollusks. He also held the office of librarian in the Smithsonian, and for some years was senior assistant librarian of congress. From 1884 till 1887 he was professor of zoology in the Columbian university, Washington, D. C., from which institution he has received the honorary degrees of A. M., M. D., and Ph. D. Dr. Gill is a member of scientific societies, and in 1873 was elected to the National academy of sciences. His publications include, besides some 400 separate papers on scientific subjects contributed to the publications of various learned societies of which he is a member, "Arrangements of the Families of Mollusks" (Washington, 1871); "Arrangement of the Families of Mammals" (1872); "Arrangement of the Families of Fishes" (1872); "Catalogue of the Fishes of the East Coast of North America" (1875); "Bibliography of the Fishes of the Pacific of the United States to the End of 1879" (1882); and since 1879 has prepared the "Reports on Zoölogy" for the annual volumes of the Smithsonian institution.

GILLEM, Alvan C., soldier, b. in Tennessee in 1830; d. near Nashville, Tenn., 2 Dec., 1875. He was graduated at the U. S. military academy in 1851, entered the artillery, and served against the Seminoles in Florida in 1851–'2. He became a captain on 14 May, 1861, served as brigade quartermaster, was brevetted major for gallantry at Mill Springs, and was in command of the siege artillery, and chief quartermaster of the Army of the Ohio in the Tennessee campaign, being engaged at Shiloh and in the siege of Corinth. On 13 May, 1862, he was appointed colonel of the 10th Tennessee volunteers, was provost-marshal of Nashville, commanded a brigade in the Tennessee operations during the first half of 1863, and afterward served as adjutant-general of Tennessee till the end of the war, being promoted brigadier-general of volunteers on 17 Aug., 1863. He commanded the troops guarding the Nashville and Northwestern railroad from June, 1863, till August, 1864, and then took command of the expedition to eastern Tennessee, being engaged in many combats, and gaining the brevet of colonel, U. S. army, for bravery at Marion, Va. He was vice-president of the convention of 9 Jan., 1865, to revise the constitution and reorganize the state government of Tennessee, was a member of the first legislature that was elected, and afterward commanded the cavalry in east Tennessee, and participated in the expedition to North Carolina and the capture of Salisbury, for which he was brevetted major-general in the regular army, having already received two brevets for services during the war. He was promoted colonel in the U. S. army on 28 July, 1866, commanded the district of Mississippi in 1867–'8, served on the Texas frontier and in California, and led the troops in the Modoc campaign, being engaged in the attack at the Lava Beds on 15 April, 1873.

GILLESPIE, Eliza Maria, mother superior (in religion, Mother Mary of St. Angela), b. near West Brownsville, Washington co., Pa., 21 Feb., 1824; d. in St. Mary's convent, Notre Dame, Ind., 4 March, 1887. When she was quite young her family removed to Lancaster, Ohio. She was soon afterward placed at school with the Dominican sisters, Somerset, Perry co., and was next sent to the convent of the Visitation, Georgetown, D. C., where she finished her studies. At the time of her graduation, Thomas Ewing, her godfather, was secretary of the treasury under President Harrison, and Miss Gillespie's beauty and accomplishments at once made her a leader of society in Washington. During the Irish famine, by the aid of tapestry work and of a magazine story, written in conjunction with her cousin, afterward the wife of Gen. William T. Sherman, she collected a large sum of money to send to the sufferers. Afterward, during the epidemic of 1849, she nursed the sick and dying who had been deserted from fear of the disease. In 1853 she entered the congregation of the Holy Cross, under the name of Mother Mary of St. Angela. After taking the habit, she sailed for Europe,

made her novitiate in France, and at the end of the year took the vows of religious profession at the hands of the founder of the order, Father Moreau. In January, 1855, she returned to the United States, and was made superior of the Academy of St. Mary's, Bertrand, Mich. In the following summer she transferred the academy to the present site of St. Mary's, Ind., and obtained a charter for it from the legislature. She laid the foundation of the present conservatory of music, and established the future of the institution on a firm foundation. She then founded other academies in different parts of the United States, until at her death she had established nearly thirty, including those of Salt Lake City, Utah, and Austin, Texas. When the civil war began, she left St. Mary's in charge of competent aids, organized a corps of sisters, and hurried to the front to care for the sick and wounded soldiers. She established hospitals, both temporary and permanent, and, when generals failed to secure needed aid for the sick and wounded soldiers, she made flying trips to Washington in their behalf. Her headquarters were at Cairo, and, in ill-provided buildings used for hospitals, she and her sisters were obliged to rise early and cook gruel often for fourteen hundred men before the roll-call summoned the convalescents to battle. The close of the war left her enfeebled, and she never afterward fully recovered her strength. After the war the order of the Holy Cross in the United States was separated from the order in Europe, and she was made mother superior. She filled this office for two terms, when failing health compelled her to resign. She then became mistress of novices at St. Mary's, and prepared to pass the remainder of her days in the society of her mother and many warm friends who lived near. Mother Angela wrote sketches for Roman Catholic periodicals, including some interesting reminiscences of her experiences during the war, for the "Ave Maria," published in Notre Dame, Ind.—Her brother, **Neal Henry,** clergyman, b. in Brownsville, Pa., in 1832; d. in St. Mary's, Jay co., Ind., 12 Nov., 1874. He was among the first students who entered the University of Notre Dame, and the first to receive there his degree. In 1851 he entered the novitiate of the congregation of the Holy Cross, and began his theological studies. After finishing his novitiate, he taught mathematics in the university, and in 1854 went to Rome to complete his theological course. He was ordained priest on 24 June, 1856, and on his return to Notre Dame was appointed vice-president and director of studies. In 1859 he was made president of the College of St. Mary of the Lake, Chicago. He was called to Paris in 1863 on business connected with his order, but returned to the United States in 1866. He was for several years editor of the "Ave Maria," and was also spiritual director of several religious and literary societies connected with the University of Notre Dame.

GILLESPIE, George, clergyman, b. in Glasgow, Scotland, in 1683; d. 2 Jan., 1760. He was educated at the university in his native city, licensed to preach by the presbytery of Glasgow early in 1712, and came to New England that year, bringing a letter of recommendation from Principal Sterling to Cotton Mather. Shortly afterward he preached for the church at Woodbridge, N. J., and in 1713 was ordained minister of the church at White Clay Creek, Del. His charges for several years, besides White Clay, embraced Red Clay, Lower Brandywine, and Elk River. He took part in the controversy that was for years waged in the synod, and resulted, in 1741, in the historic division of that body. He withdrew with the excluded members, but remained neutral until 1744, when he returned to the old synod. He published "Treatise against Deists and Free Thinkers" (Philadelphia, 1735); "Letters to the Presbytery of New York" (1740); "Sermon against Divisions in Christ's Churches" (1740); and "Remarks upon Mr. George Whitfield" (1744).

GILLESPIE, George de Normandie, P. E. bishop, b. in Goshen, N. Y., 14 June, 1819. He entered the general theological seminary of the Protestant Episcopal church in 1837, and was graduated in 1840. He was ordained deacon in St. Peter's church, New York, by Bishop B. T. Onderdonk, 28 June, 1840, and priest in St. Mark's church, Leroy, N. Y., by Bishop De Lancey, 30 June, 1843. His first parish was St. Mark's, Leroy, whence he removed to Ohio, and became rector of St. Paul's church, Cincinnati. He held this office for six years, when he accepted a call to Zion church, Palmyra, N. Y., and remained there for ten years. He next became rector of St. Andrew's church, Ann Arbor, Mich. He was elected bishop of western Michigan in 1874, and was consecrated in Grand Rapids, 24 Feb., 1875. He received the degree of D. D. from Hobart college in 1875. Bishop Gillespie has published, besides sermons and tracts, "Manual and Annals of the Diocese of Michigan" (1868).

GILLESPIE, William Mitchell, author, b. in New York in 1816; d. there, 1 Jan., 1868. He was graduated at Columbia in 1834, and afterward spent nearly ten years in Europe in study and travel. On his return to New York in 1845 he was appointed professor of civil engineering in Union college, where he remained till his death. He was popular as a professor, a brilliant and original thinker, and had few equals in his department of science. His published works are "Rome, as seen by a New Yorker, 1843–'4" (New York, 1845); "Roads and Railroads: A Manual for Road-making" (1845; 7th ed., 1854); "Philosophy of Mathematics," from the French of Comte (1851); "The Principles and Practice of Land-Surveying" (1855; 6th ed., 1858); and a "Treatise on Levelling, Topography, and Higher Surveying," edited by Cady Staley (1871).

GILLET, Ransom H., lawyer, b. in New Lebanon, N. Y., 27 Jan., 1800. He studied law with Silas Wright at Canton, and became a lawyer in Ogdensburg, where he was postmaster in 1830–'3. He was a member of the Baltimore convention that re-nominated Gen. Jackson for president in 1832. He was elected to the National house of representatives as a Democrat, and served in 1833–'7, was an Indian commissioner in 1837–'9, register of the U. S. treasury in 1845–'7, solicitor of the treasury in 1847–'9, assistant U. S. attorney-general in 1855–'8, and solicitor of the court of claims from 1858 till 1861. He is the author of a "History of the Democratic Party" (New York, 1868); "The Federal Government" (1871); and a "Life of Silas Wright."

GILLETT, Ezra Hall, author, b. in Colchester, Conn., 15 July, 1823; d. in Harlem, N. Y., 2 Sept., 1875. He was graduated at Yale in 1841, and at Union theological seminary in 1844, and in the latter year was ordained pastor of the Presbyterian church in Harlem, N. Y. In 1868 he was appointed professor of political economy, ethics, and history in the University of New York. He wrote much for the "American Theological Review," the "Presbyterian Quarterly," the "Historical Magazine," and other periodicals, and published "Life and Times of John Huss" (2 vols., Boston, 1863–'4); "History of the Presbyterian Church in the United States" (2 vols., Philadelphia, 1864; revised ed., 1875); "God in Human Thought" (2

vols., New York, 1874); and "The Moral System" (1875); besides minor works, including "Life Lessons," "Ancient Cities and Empires," and "England Two Hundred Years Ago."

GILLETTE, Francis, senator, b. in Windsor, now Bloomfield, Hartford co., Conn., 14 Dec., 1807; d. in Hartford, Conn., 30 Sept., 1879. He was graduated at Yale in 1829 with the valedictory, and then studied law with Gov. William W. Ellsworth. Failing health compelled him to relinquish this pursuit, and he settled in Bloomfield as a farmer. In 1832 and again in 1836 he was sent to the legislature, where he gained notice in 1838 by his anti-slavery speech advocating the striking out of the word "white" from the state constitution. In 1841 he was nominated against his own will for the office of governor by the Liberty party, and during the twelve following years frequently received a similar nomination from the Liberty and Free-soil parties. He was elected by a coalition between the Whigs, temperance men, and Free-soilers, in 1854, to fill the vacancy in the U. S. senate caused by the resignation of Truman Smith, and served from 25 May, 1854, till 3 March, 1855. Mr. Gillette was active in the formation of the Republican party, and was for several years a silent partner in the "Evening Press," the first distinctive organ of that party. He was active in the cause of education throughout his life, was a coadjutor of Dr. Henry Barnard from 1838 till 1842, one of the first trustees of the State normal school, and for many years its president. Mr. Gillette took interest in agricultural matters, was an advocate of total abstinence, and delivered lectures and addresses on both subjects. He moved to Hartford in 1852, and passed the latter part of his life in that city.—His son, **Edward Hooker,** congressman, b. in Bloomfield, Conn., 1 Oct., 1840, was educated at the Hartford high-school, and the New York state agricultural college at Ovid. In 1863 he removed to Iowa and settled in Des Moines, where he has since been occupied in farming, in manufacturing, and in editing the "Iowa Tribune." He has held the office of chairman of the National committee of the National greenback party for several years, and was a delegate to the conventions that nominated Peter Cooper, James B. Weaver, and Benjamin F. Butler for the presidency. In 1879 he was elected to congress as a National greenbacker from Iowa, and served from 4 March, 1879, till 3 March, 1881.—Another son, **William Hooker,** actor, b. in Hartford, Conn., 24 July, 1853, was graduated at the Hartford high-school in 1873, and studied at the University of the city of New York during 1875–'6. He obtained an appointment in one of the New York theatres, and his evenings were spent on the stage. During 1876–'7 he studied at the Boston university, and also attended the lectures of Prof. Lewis B. Monroe, still acting during the evenings. Subsequently he devoted himself entirely to the stage, and played in various rôles in the principal cities of the United States. His greatest success was in the character of the Private Secretary, in the play of that name. He has also acted leading parts in plays written by him. These include "The Professor," first produced at the Madison square theatre, New York, in June, 1881; with Mrs. Frances H. Burnett, "Esmeralda," introduced at the same theatre in October, 1881, and "Held by the Enemy," originally played at the Madison square in February, 1886, and in London in April, 1887.

GILLETTE, Abram Dunn, clergyman, b. in Cambridge, Washington co., N. Y., 8 Sept., 1807; d. in Lake George, N. Y., 24 Aug., 1882. He was chiefly self-educated, but was for a time a student in Granville academy, and attended occasional lectures in Union college. After teaching for a time, he entered the Baptist ministry in 1832, and held pastorates in Schenectady, Philadelphia, New York, and Washington, D. C. He was a manager of the American Baptist publication society in 1836–'48. In 1869 illness compelled him to retire from the ministry. In 1887 a memorial window was placed in Calvary Baptist church, New York, in his memory. He published a "History of the Eleventh Baptist Church, Philadelphia," "Memoir of the Rev. Daniel H. Gillette," and "Pastor's Last Gift," and edited "Social Hymns" and the minutes of the Philadelphia Baptist association from 1707 till 1807. He also contributed largely to journals. "Reminiscences of the Life and Labor of A. D. Gillette, D. D.," by four of his friends and associates, was published in New York, 1883.

GILLI, Philip Sauveur, clergyman, b. in the Papal States; d. there after 1764. He was a member of the Jesuit order, and went as missionary to South America about 1740. He travelled during seventeen years through the country watered by the Orinoco and lived for seven years in Santa Fé de Bogotá. He returned to Europe when his order was suppressed. He wrote in Italian "Essay on the History of America, or Natural, Civil, and Sacred History of the Spanish Kingdoms and Provinces of Terra Firma in South America" (Rome, 4 vols., 1780–'4). The work of Gilli is still considered valuable for the information it gives on the vast regions watered by the Orinoco. It was for a long time the only one to be consulted on the subject, and many writers have drawn from it without acknowledgment. Gilli refutes the inaccurate views that then prevailed regarding the source of the river, and tries to demonstrate its communication with the Amazon. Unfortunately, his ignorance of natural history and his credulity prevented him from reaping all the advantages due to his zeal. He gives vocabularies of most of the languages spoken by the natives, and attempts to compare them, but the value of his comparison is lessened by his lack of the critical faculty. A part of Gilli's work was translated into German by Sprengel (Hamburg, 1785). The whole of the 3d book of vol. iii., which comprises his observations on the languages of the tribes of the Orinoco, was translated into German with notes by Father Xavier Veigl, an ex-Jesuit, who had travelled in the same regions. This part of the work is contained in the collection of the travels of missionaries of the Society of Jesus in America, published by Von Murr (Nuremberg, 1785).

GILLIAMS, Jacob, physician, b. in Philadelphia, Pa., in 1784; d. there, 4 Feb., 1868. After his graduation in medicine he entered on a long and successful practice in Philadelphia, which he did not relinquish until within a few years of his death. He was proficient in the natural sciences, especially in ornithology, and was brought into contact with Audubon, Wilson, and Rushenberger. In connection with Charles Lucien Bonaparte and others he established in Philadelphia in 1816 the short-lived Maclurian lyceum, and afterward assisted in founding the Academy of natural sciences. The hall that it occupied was built at his expense.

GILLIS, John Pritchet, naval officer, b. in Wilmington, Del., 6 Sept., 1803; d. there, 25 Feb., 1873. He was appointed a midshipman from Illinois on 12 Dec., 1825, his mother having removed to that state after the death of his father. He was commissioned as lieutenant on 9 Feb., 1837. During the Mexican war he had charge of the boats of

the "Decatur," in the capture of the forts and town of Tuspan, and afterward commanded the flotilla on the Alvarado river, and acted as governor and collector of Alvarado and Tlacotalpam until prostrated by yellow fever. He was 1st lieutenant of the "Plymouth" in China in 1851, and ascended the Min river to confer with the viceroy of the province on behalf of the missionaries. In 1853–'4 he participated in the Japan expedition under Com. Perry. He was commissioned commander on 14 Sept., 1855, and assigned to the steam sloop "Pocahontas" at the beginning of hostilities in 1861, and, arriving at Fort Sumter an hour before the surrender, brought away the garrison. He afterward commanded the steamer "Monticello," and took part in the fight at Hatteras Inlet, crossing the bar, after landing troops, and engaging the forts at short range. He next commanded the "Seminole," and sustained a severe fire from the forts at Shipping Point on the Potomac river. At the battle of Port Royal the "Seminole" ran in, near the close of the action, between Hilton Head and Bay Point, and, with the support of two gunboats, raked Fort Walker and drove out the enemy. His vessel was subsequently employed in blockading service, then returned to Hampton Roads, and took an active part in the attack on Sewell's Point in May, 1862. He was commissioned captain on 16 July, 1862, was assigned to the "Ossipee," and commanded the division of the western Gulf blockading squadron off Mobile, and then the division off the coast of Texas, making many captures, until he returned to the north in 1864 on account of illness. He was made a commodore on the retired list on 28 Sept., 1866.

GILLISS, James Melville, astronomer, b. in Georgetown, D. C., 6 Sept., 1811; d. in Washington, D. C., 9 Feb., 1865. He entered the U. S. navy as a midshipman at the age of fifteen, and made his first cruise on the "Delaware." Subsequently he served on the "Concord" and on the "Java," and in 1831, after an examination, was advanced to passed midshipman. To obtain a scientific education he spent a year in the University of Virginia, and later pursued higher studies in Paris. In 1836 he became assistant in the depot of charts and instruments in Washington, and soon afterward was given charge of the small wooden building, which was then the only observatory in Washington. Soon after the sailing of the U. S. exploring expedition under Capt. Charles Wilkes, he received special instructions from the secretary of the navy concerning the determination of differences of longitude by means of moon-culminations, occultations, and eclipses, with magnetic and meteorological observations. His active astronomical career began with this work, and Dr. Benjamin A. Gould says in this connection: "It was Gilliss who first in all the land conducted a working observatory, he who first gave his whole time to practical astronomical work, he who first published a volume of observations, first prepared a catalogue of stars, and planned and carried into effect the construction of a working observatory as contrasted with one intended chiefly for purposes of instruction." He was made lieutenant in February, 1838, and until the return of the expedition was active in making observations of every culmination of the moon and every occultation visible in Washington that occurred between two hours before sunset and two hours after sunrise. His report on the "Astronomical Observations made at the Naval Observatory" (Washington, 1846) was the first to be published in the United States. In August, 1842, a bill was passed by congress, authorizing the establishment of an astronomical observatory, and the duty of preparing the plans for a building and arranging for the instruments was assigned to Lieut. Gilliss. After consulting American astronomers he visited Europe, where he studied the latest forms of apparatus, and on his return began the erection of the building, had the instruments mounted and essentially adjusted, and a library procured, all within eighteen months. The superintendence of the new building was given to Lieut. Matthew F. Maury, while Lieut. Gilliss was assigned to duty on the coast survey in reducing for its use the entire series of moon-culminations previously observed and published by him. Fifteen manuscript folio volumes in the archives of the survey contain this valuable work. From November, 1848, till October, 1852, he was engaged in making observations for the determination of the solar parallax. A station was established in December, 1849, on the hill of Santa Lucia, in Santiago, Chili, where he completed a series of observations of great value. He likewise accumulated a vast amount of information concerning earthquakes and other subjects, and the establishment of a national observatory in Chili is due to his influence. On his return he published "The U. S. Astronomical Expedition to the Southern Hemispheres in 1849–'52" (2 vols., Washington, 1855 *et seq.*). He visited Peru in August, 1858, for the purpose of observing the total eclipse of the sun of that year, and, notwithstanding his prostration with a fever, he directed the mounting of the instruments and obtained satisfactory results from his observations. His report was published by the Smithsonian institution as "An Account of the Total Eclipse of the Sun on September 7, 1858" (Washington, 1859). In 1860 he observed the total eclipse of the sun in Washington territory. After the departure of Comd'r Maury from Washington in April, 1861, Lieut. Gilliss was assigned to the charge of the observatory in Washington. Under him it became one of the few first-class observatories in the world. He found a vast amount of work left in arrears by his predecessor, no reduction of the observations of the previous six years having been made. Lieut. Gilliss applied himself to the work of completing them and of adding new and valuable observations with such assiduity that he gained a high reputation among the eminent astronomers of the world. He made many valuable improvements in the instruments used in astronomy, and was the author of various government reports. Lieut. Gilliss was one of the original members of the National academy of sciences.

J. M. Gilliss.

GILLMORE, Quincy Adams, soldier, b. in Black River, Lorain co., Ohio, 28 Feb., 1825. His father was one of the pioneer settlers of Ohio. The childhood of the son was spent on the farm; his studies began at the Norwalk, Ohio, academy, and for three winters preceding his twentieth birthday he taught a district-school, and attended two terms at the high-school at Elyria, Ohio. A poem

that he read at a public exhibition attracted the attention of a member of congress, who offered him the nomination as a cadet at the U. S. military academy. He was graduated in 1849, at the head of his class, assigned to the engineers, and after serving three years at Hampton Roads was appointed instructor in practical military engineering at West Point, and subsequently treasurer and quartermaster at the academy. He was promoted 1st lieutenant in the engineer corps in 1856, and was on duty in New York city when the civil war opened. In August, 1861, he was appointed captain in his own corps, and engineer-in-chief of the Port Royal expedition under Gen. Thomas W. Sherman. The reduction of Fort Pulaski, defending the water approach to Savannah, a strong fortification, isolated in the centre of a marsh island that was entirely surrounded by deep water, was very essential to the success of this expedition, but was regarded by the ablest engineers of both armies as impracticable. Capt. Gillmore, then acting brigadier-general, planned the establishment of eleven batteries of mortars and rifled guns on Tybee island, a mile distant, which occupied two months of incessant day and night labor. The bombardment, which opened at 8 A. M., 10 April, 1862, and which was conducted under his very minute, detailed instructions as to elevation, charge, direction, intervals between shots, etc., for each piece, resulted by 2 P. M. of the following day in the surrender of the fort, which had been so shattered as to be untenable. This exploit, for which he was brevetted lieutenant-colonel, U. S. army, 1 April, 1862, placed Capt. Gillmore in the front rank of American engineers and artillerists. He was assigned to important commands in Kentucky in August, 1862, defeated Gen. Peagram at Somerset in March, 1863, for which he was brevetted colonel, and in June, 1863, was given command of the Department of the South, comprising all territory occupied by Union troops on the coasts of South Carolina, Georgia, and Florida. In July he was placed in command of the 10th army corps, and in the autumn of the same year he won new laurels by his operations on Morris island, for which he was brevetted brigadier-general; the reduction of Fort Sumter, and the taking of Fort Wagner and Battery Gregg, which operations were characterized by great professional skill and boldness, and which constituted a new era in the science of engineering and gunnery. For these services he was made major-general of volunteers. In 1864 he commanded the 10th army corps at James river, was engaged in the landing at Bermuda Hundred and the action at Swift's creek, commanded the column that turned and captured the line in front of Drury's Bluff, and covered Gen. Butler's retreat into intrenchments at Bermuda Hundred. In July of the same year he commanded two divisions of the 19th army corps in the defence of Washington, and in 1865 was again in charge of the Department of the South. Resigning his commission as major-general of volunteers, in December, 1865, he returned to service in the engineer bureau at Washington, and was subsequently appointed engineer-in-chief of all the fortifications and harbor and river improvements on the Atlantic coast south of New York. He was promoted major in June, 1863, lieutenant-colonel in 1874, and colonel, 20 Feb., 1883. He was president of the Mississippi river commission, which was created by congress in 1879, of the boards of engineers for the improvement of Cape Fear river, N. C., and the Potomac river and flats; as well as of several boards for important harbor improvements in process of construction according to his plans. As one of the judges at the Centennial exhibition of 1876 he made special and voluminous reports on "Portland, Roman, and Other Cements and Artificial Stones," and on "Brickmaking Machinery, Brick-Kilns, Perforated and Enamelled Bricks and Pavements." Rutgers college has given him the degree of Ph. D. Gen. Gillmore's works upon professional subjects are esteemed among the highest authorities in their class. They include "Siege and Reduction of Fort Pulaski" (New York, 1862); "Limes, Hydraulic Cements, and Mortars" (1863); "Engineering and Artillery Operations against Charleston in 1863" (1865; supplement, 1868); "Béton, Coignet, and Other Artificial Stones" (1871); "The Strength of the Building Stone of the United States" (1874); and "Roads, Streets, and Pavements" (1876).

GILLON, Alexander, naval officer, b. in Rotterdam, Holland, in 1741; d. at Gillon's Retreat, on the Congaree river, S. C., 6 Oct., 1794. He was a member of a wealthy commercial family, and resided in London for some time. In 1766 he came to Charleston, S. C., and became a prosperous merchant. In May, 1777, in an armed ship, he captured three British cruisers, boarding them one after the other. He was appointed a commodore in the navy of South Carolina in 1778, and sent to France to procure vessels. He finally succeeded in hiring a frigate, named it the "South Carolina," and in it took many valuable prizes. With a large fleet, partly Spanish, he commanded the expedition which in May, 1782, captured the Bahama islands. He was a representative of congress, 1793–'4, was often in the state legislature, and was a member of the South Carolina constitutional convention. He was the founder and first president of the Charleston chamber of commerce.

GILMAN, Arthur, architect, b. in Newburyport, Mass., 5 Nov., 1821; d. in Syracuse, N. Y., 11 July, 1882. He was educated at Trinity college, Hartford. In 1844 he published a paper on "American Architecture" in the "North American Review," which was translated into several foreign languages. He was then invited to deliver twelve lectures before the Lowell institute, Boston, after which he went to Europe on a tour of professional observation. On his return to Boston, he advocated the filling in and improvement of the "Back bay" district, then lying waste. He urged this plan upon the city government and the public for years, before the legislature and elsewhere, and finally his views were carried out by the state. The width and extent of Commonwealth avenue, now one of the finest streets in the world, is due almost entirely to his persistent efforts. Mr. Gilman designed and built the Boston city hall, which is regarded as his best work. In 1865 he removed to New York. The Equitable insurance company's building, in New York city, was designed by him. St. John's church and parsonage, at Clifton, Staten

Island, and much of the capitol at Albany, are his work. Mr. Gilman was a member of the American institute of architects.

GILMAN, Arthur, author, b. in Alton, Ill., 22 June, 1837. His ancestor, Edward Gilman, of an ancient Welsh family, emigrated from Norfolk, England, to Boston, Mass., in 1638. Arthur Gilman was educated in St. Louis and in New York, and is an honorary M. A. of Williams college. In 1857 he began active business as a banker in New York, but, his health becoming impaired, he removed in 1862 to the neighborhood of Lenox, Mass., where he engaged in philanthropic and educational work. In 1870 Mr. Gilman removed to Cambridge, Mass., and connected himself with the Riverside press. In 1871 he became one of the editors of the American tract society in Boston, and in 1876, together with his wife, devised a plan which subsequently took form as "The Society for the collegiate instruction of women," familiarly known as "The Harvard annex," of which Mr. Gilman has been executive officer ever since. Mr. Gilman's studies have been in the line of English literature and of history. He has written much for the periodical press, and has published in book-form "The Gilman Family traced in the Line of Hon. John Gilman, of Exeter, N. H." (Albany, N. Y., 1869); "First Steps in English Literature" (Boston, 1870); "Kings, Queens, and Barbarians, or Talks about Seven Historic Ages" (1870); "First Steps in General History: A Suggestive Outline" (1874); "Shakespeare's Morals," with brief collateral readings and Scriptural references (New York, 1879); "History of the American People" (Boston, 1883); "Tales of the Pathfinders" (1884); "The Story of Rome" (New York and London, 1885); "Short Stories from the Dictionary" (Boston, 1886); and "Story of the Saracens" (New York and London, 1886). He has also edited and contributed to "Boston, Past and Present" (Boston, 1873); "Library of Religious Poetry" (New York and London, 1880); "The Kingdom of Home; Homely Poems for Home Lovers" (Boston, 1881); "Magna Charta Stories" (Boston and London, 1882); "The Story of the Nations Series," and an "Index to the Complete Edition of the Works of Samuel Taylor Coleridge" (New York, 1884). He also edited "The Poetical Works of Geoffrey Chaucer," to which are appended poems attributed to Chaucer (3 vols., Boston and London, 1879). In this work the editor printed for the first time, for the general reader, the famous Ellesmere text of the Canterbury tales. —His wife, **Stella Scott,** b. in Alabama, is the author of "Mothers in Council" (New York, 1884).

GILMAN, Chandler Robbins, physician, b. in Marietta, Ohio, 6 Sept., 1802; d. in Middletown, Conn., 26 Sept., 1865. His ancestors were among the earliest settlers of Ohio. During his childhood his father removed to Philadelphia, where the son took the degree of M. D. in the University of Pennsylvania in 1824, and soon afterward went to reside in New York, where the whole of his active professional life was passed. From 1841 till his death he was professor of obstetrics and diseases of women and children in the College of physicians and surgeons, and after the death of Dr. Beck, in 1851, was also professor of medical jurisprudence. Early in life he, with his relative, Charles Fenno Hoffman, had charge of the "American Monthly." Besides numerous contributions to medical magazines, he published the following in book-form: "Legends of a Log-Cabin" and "Life on the Lakes" (1835); a translation, with Dr. Theodore Tellkampf, of Bischoff's monograph "On the Periodical Discharge of the Ovum" (New York, 1847); "Sketch of the Life and Character of Dr. J. B. Beck" (1851); "The Relations of the Medical to the Legal Profession" (1856); an edition of Beck's "Medical Jurisprudence" (Philadelphia, 1860); "Tracts on Generation," and a "Medico-Legal Examination of the Case of Charles B. Huntington."

GILMAN, Daniel Coit, educator, b. in Norwich, Conn., 6 July, 1831. He was graduated at Yale in 1852, and continued his studies in New Haven, and later in Berlin, where he followed the lectures of Carl Ritter and Adolph Trendelenburg. He travelled extensively in Europe, and gave attention to the social, political, and educational condition of the countries that he visited, and also to their physical structure. On his return in 1855 he was invited to become librarian of Yale, and subsequently to be professor of physical and political geography there, and secretary of the governing board of the Sheffield scientific school. He was for a short time superintendent of the public schools of New Haven, and afterward secretary of the state board of education. From his post in Yale he was invited, in 1870, to become the first president of the University of California. This invitation was not accepted, but two years later, when another call was given, he went to California, and remained at the head of the state university till 1875. At that time he was elected first president of the Johns Hopkins university in Baltimore, and to the organization and administration of that foundation he has since been devoted. He was one of the original trustees of the John F. Slater fund for the education of freedmen, and the secretary of the board. He has printed a large number of addresses, reports and contributions to reviews, among which may be mentioned his inaugural discourses in California and in Maryland; an address as president of the American social science association; a discourse at the opening of the Sibley college in Cornell university, and another at the opening of Adelbert college in Cleveland, Ohio; an address in Baltimore on the benefits which society derives from universities; and an address before the Phi Beta Kappa society of Harvard on a kindred topic. His ideas on university and collegiate education have also been presented in articles contributed to the "North American Review," to the "Cyclopædia of Political Science," and to other publications. He prepared a memoir of James Monroe for the "American Statesman" series (Boston, 1883), and has edited the miscellaneous writings of Francis Lieber (1881) and of Joseph P. Thompson (1884). He received the degree of LL. D. from Harvard in 1876 and from Columbia in 1887, and he is a member of many scientific and historical societies.

Daniel C. Gilman

GILMAN, John Taylor, governor of New Hampshire, b. in Exeter, N. H., 19 Dec., 1753; d. there, 1 Sept., 1828. He belonged to a family which for a century and a half, according to a well-informed writer, influenced "the political, ecclesiastical, social, and financial history of New Hamp-

shire," and "did more to keep up the steady course of the colony, the province, and the state, certainly till 1815, than any two or three other families together." He was the son of Nicholas Gilman, a leading spirit in political affairs during the Revolution, and fourth in descent from John Gilman, one of the earliest settlers of Exeter, N. H., who, when the state was separated from Massachusetts in 1680, was appointed one of the royal councillors. On the morning after the news of the battles of Lexington and Concord had been received, John Taylor marched with 100 other minute-men from Exeter to Cambridge, Mass., where he served in the provincial army. Soon afterward he became assistant to his father, who had been made treasurer of the state. In October, 1780, he sat as a delegate from New Hampshire in the convention at Hartford called to take measures for the defence of the country. After serving in the Continental congress in 1782–'3, he succeeded his father as treasurer of the state. This office he held until appointed one of three commissioners whose duty it was to settle the accounts of the states with the old confederation. He resigned in 1791, and was again chosen state treasurer. In 1794 he was elected governor, re-elected annually until 1805, and again in 1813–'14 and 1815, but subsequently declined to be a candidate for re-election. He was a member of the legislature in 1810–'11. Although a zealous Federalist, so great was his popularity that he was frequently chosen governor when his party was in a minority.—His brother, **Nicholas,** senator, b. in Exeter, N. H., 3 Aug., 1755; d. there, 2 May, 1814, early acquired scholarly tastes and methodical habits, which were still more strongly emphasized under the careful instruction of his father. At the age of twenty-one Mr. Gilman entered the army, as adjutant in Col. Scammell's regiment, and served with distinction until the close of the war. For some time he was a member of Washington's military family, and upon him was devolved the duty of taking account of the prisoners surrendered by Lord Cornwallis at Yorktown. In 1780 Gen. Arnold urged Mr. Gilman to accept an appointment on his staff. Mr. Gilman's reply was characteristic. Fearing that Arnold would not be engaged in active movements, he said: "If I should come into your family and be confined in the dreary wilderness of the highlands, while our operations are going on against the city, which possibly may be the case, my situation would be as distressing as that of Fabius M. when he had recourse to the flaming cattle." He was a member of the Continental congress from 1786 till 1788, and after the adoption of the constitution a representative of New Hampshire from 1789 till 1797. In 1805 he became a member of the U. S. senate, which office he held till the close of his life. He was one of the presidential electors in 1793 and 1797, and he was also one of the state councillors. In September, 1787, Mr. Gilman was a member of the convention that met at Philadelphia to frame a constitution for the United States. On 18 Sept. the secretary of the convention took the report of the proceedings to congress, and on the same day Mr. Gilman sent a copy of the new constitution to his cousin, Joseph Gilman, who during the war had been chairman of the committee of safety, with the following significant comment: [The plan] "is the best that could meet the unanimous concurrence of the states in convention. It was done by bargain and compromise, yet—notwithstanding its imperfections—on the adoption of it depends, in my feeble judgment, whether we shall become a respectable nation or a people torn to pieces by intestine commotions and rendered contemptible for ages." Mr. Gilman was a man of deeds rather than words, and was personally very popular. He was of graceful figure and elegant carriage; his manners were courtly and his charities were bestowed with liberality and kindliness. These traits, united with his methodical habits and fidelity in the performance of duty, kept him long in public life.

GILMAN, Samuel, author, b. in Gloucester, Mass., 16 Feb., 1791; d. in Kingston, Mass., 9 Feb., 1858. He was graduated at Harvard in 1811, studied theology, and was mathematical tutor at Cambridge from 1817 till 1819, when he was ordained pastor of the Unitarian church in Charleston, S. C., which relation was only terminated by his death. He was an earnest advocate of temperance, and active in every good work that tended to promote the public welfare. Beyond the state where he resided he was chiefly known as an author. He received the degree of D. D. from his alma mater in 1837. He wrote valuable articles for the "North American Review" on the "Lectures of Dr. Thomas Brown," translated several of the satires of Boileau, and published other essays in the Boston "Christian Examiner" and the London "Monthly Repository," together with discourses, biographies, essays, and translations, exhibiting a wide range of knowledge. Many of these were reprinted in "Contributions to Literature, Descriptive, Critical, and Humorous, Biographical, Philosophical, and Poetical" (1856). He also wrote "Memoirs of a New England Village Choir" (1829), and "Pleasures and Pains of a Student's Life" (1852). Of his poetical writings, the "History of a Ray of Light" and a poem read before the Phi Beta Kappa society, of Harvard, are best known.—His wife, **Caroline Howard,** author, b. in Boston, Mass., 8 Oct., 1794, wrote, at the age of sixteen, a poem entitled "Jephtha's Rash Vow," which was followed by "Jairus's Daughter," printed in the "North American Review." She was married in 1819, went to Charleston, S. C., with her husband, and resided there until about 1870, when she removed to Cambridge, Mass. In 1830 she began the publication of "The Rose-Bud," a magazine for children, which ultimately developed (1833) into "The Rose." From this periodical, which was discontinued in 1839, owing to the failing health of its editor, her writings have chiefly been collected. They include "Recollections of a New England Housekeeper" (New York, 1835); "Recollections of a Southern Matron" (1836); "Poetry of Travelling in the United States" (1838); "Ladies' Annual Register" (Boston, 1838–'9); "Ruth Raymond" (New York, 1840); "Oracles from the Poets" (1845); "Sibyl, or New Oracles from the Poets" (1849); "Verses of a Lifetime" (Boston, 1849); "Oracles for Youth" (New York, 1852); "Mrs. Gilman's Gift-Book," comprising in one several volumes for the young previously published (1859); "Poems and Stories by a Mother and Daughter," written in conjunction with Mrs. Jervey (Boston, 1872); and "Letters of Eliza Wilkinson during the Invasion of Charleston," being personal memorials of the Revolutionary era. Mrs. Gilman is best known by the two volumes of "Recollections" first mentioned, which have passed through many editions. She is now (1887) residing with a daughter in Washington, D. C., and, at the age of ninety-two, declares that, of all her writings, the two hymns beginning "Is there a lone and dreary hour," and "We bless Thee for this sacred day," have lingered longest in her memory. Her most popular poem is the boat-song "Trancadillo."—Their daughter, **Caroline Howard,** author, b. in Charleston, S. C., 1 June,

1823; d. there, 29 Jan., 1877, became in 1840 Mrs. Nelson Glover, and in 1865 Mrs. Lewis Jervey, her first husband having died in 1846. She wrote, chiefly for the young, many tales, poems, and novels, which appeared in southern magazines and in the volume mentioned above. Among her published fictions are "Vernon Grove" (New York, 1859), and "Helen Courtenay's Promise" (1866).

GILMER, George Rockingham, lawyer, b. in Wilkes (now Oglethorpe) county, Ga., 11 April, 1790; d. in Lexington, Ga., 15 Nov., 1859. He studied law, and began practice at Lexington. In 1813 he became a lieutenant in the 43d U. S. infantry, which served against the Creeks, and was disbanded after the conclusion of peace with Great Britain in 1815. He served in the legislature in 1818–'20, was elected to congress as a Democrat, and served from 3 Dec., 1821, to 3 March, 1823, was again elected to the state house of representatives in 1824, and served in congress a second time from 3 Dec., 1827, to 3 March, 1829. In 1829–'31 he was governor of Georgia. He was elected again to congress in 1832, and served from 2 Dec., 1833, to 3 March, 1835, was a presidential elector on the Hugh L. White ticket in 1836, and in 1837–'9 served a second term as governor. In 1840 he was a presidential elector on the Harrison ticket. By his will he left valuable bequests to Georgia university, of which he was a trustee for thirty years. He published a historical work entitled "Georgians," containing information in relation to the early settlement of the state (1855).

GILMER, Jeremy Francis, soldier, b. in Guilford county, N. C., 23 Feb., 1818. He was graduated at the U. S. military academy in 1839, entered the engineer corps, and was engaged in building forts and making surveys, and in river and harbor improvements, till the beginning of the civil war, when he resigned his commission as captain of engineers, and entered the Confederate army. He was appointed major of engineers in September, 1861, and was chief engineer on Gen. Albert S. Johnston's staff. In the battle of Shiloh he was severely wounded. After his recovery he was appointed chief of the engineer bureau at Richmond. On 20 Aug., 1863, he was promoted major-general, and ordered to Charleston to direct the defences of that city, but in June, 1864, he returned to Richmond and resumed charge of the bureau of engineering. After the war he engaged in railroad and other enterprises in Georgia.

GILMER, John Alexander, jurist, b. in Guilford county, N. C., 4 Nov., 1805; d. in Greensborough, N. C., 14 May, 1868. He received a classical education, taught for three years, studied law, and was licensed to practise in 1833. He was elected to the state senate in 1846, and successively re-elected till 1856. He was the Whig candidate for governor in 1856, but was defeated by Braxton Bragg. The same year he was elected to congress, and in 1858 was re-elected, serving as chairman of the committee on elections. He was mentioned for the place of secretary of the treasury in Mr. Lincoln's cabinet, but, withdrawing from congress, embraced the cause of secession, and was elected a member of the Confederate congress.

GILMER, Thomas Walker, statesman, b. in Virginia; d. near Washington, D. C., 28 Feb., 1844. He studied law, practised in Charlottesville, Va., and served for many years in the state legislature, for two sessions as speaker. In 1840–'1 he was governor of Virginia. In 1841 he entered congress, and, although he had been elected as a Whig, sustained President Tyler's vetoes. He was re-elected as a Democrat in 1842 by a close vote. His competitor, William L. Goggin, contested the result without success. On 15 Feb., 1844, he was appointed by President Tyler secretary of the navy, and resigned his seat in congress on 18 Feb. to enter on the duties of the office, but ten days later was killed by the bursting of a gun on board the United States steamer "Princeton."

GILMOR, Harry, soldier, b. in Baltimore county, Md., 24 Jan., 1838; d. in Baltimore, 4 March, 1883. He was educated under a private tutor, and engaged in business in Baltimore and in the west until the beginning of the civil war, when he joined the Confederate army, under Col. Ashby Turner, at Charleston, Va. He soon became conspicuous for his daring, especially as a scout, and was appointed sergeant-major for gallantry after the action at Harper's Ferry in December, 1861. In February, 1862, he was severely wounded, and on his recovery he was put in command of a company. He was engaged in several battles. In September, 1862, he was captured and imprisoned as a spy for five months at Fort McHenry, but in February, 1863, was exchanged. He took part in the battle of Kelly's Ford in March, 1863, rejoined the 13th Virginia regiment in April, and in May raised a battalion of horse, and was commissioned major. In June he commanded the 1st Maryland Confederate regiment, captured, and held for a few days, Frederick, Md., and the towns of Chambersburg, Carlisle, and Gettysburg, and was appointed provost-marshal of the last-named place. In February, 1864, he raided on the Baltimore and Ohio railroad, and was court-martialed for destroying a train and permitting his command to rob the passengers; but he was honorably acquitted of this charge and restored to his command, which was reorganized as the 2d Maryland cavalry. In July, 1864, he led Gen. Jubal A. Early's advance into Maryland, was engaged throughout this campaign, and in the fight at Bunker Hill was severely wounded. He rejoined his command at Woodstock, and was captured while defending his guns. He spent three years in Europe, and in 1874 was elected police commissioner of Baltimore. He published "Four Years in the Saddle" (New York, 1866).

GILMORE, James Roberts, author, b. in Boston, Mass., 10 Sept., 1823. His father was a cousin of Gov. Joseph A. Gilmore, of New Hampshire. The son was prepared for college in Utica, N. Y., but entered a counting-room at the age of fourteen, and became a partner in the business before he was of age. He made annual business trips to the south, and at the age of twenty-five became the head of a new cotton and shipping firm in New York city, from which he retired before the beginning of the civil war with a competency. In the early years of the war he published several novels, containing realistic portrayals of southern life and feeling, under the pen-name "Edmund Kirke." He also wrote numerous war-songs and ballads. His writings about the south, by their graphic and unexaggerated pictures of slavery, helped to decide the northern mind in favor of emancipation and the continuance of the war. In 1862 he founded the "Continental Monthly" magazine, to advocate emancipation as a political necessity; but discontinued his connection with it soon after the issuing of President Lincoln's proclamation. In July, 1864, with Col. Jaquess, he was intrusted with an unofficial mission to the Confederate government, with a view to arranging a peace. They only succeeded in eliciting from Jefferson Davis a declaration that he would not consent to peace except on the basis of the independence of the Confederate

States, a result that had the effect of destroying the peace party of the north, and ensured the re-election of Abraham Lincoln. Having lost his fortune in consequence of the war, he engaged in business again in 1873. In 1883 he finally retired, and applied himself anew to the pursuit of literature. His earlier publications were "Among the Pines" (New York, 1862); "My Southern Friends" (1862); "Down in Tennessee" (1863); "Among the Guerillas" (1863); "Adrift in Dixie" (1863); "On the Border" (Boston, 1864); and "Patriot Boys" (1864). In 1880 he prepared, in connection with Dr. Lyman Abbott, an arrangement of the gospels forming a life of Jesus, entitled the "Gospel History" (New York); and the same year wrote in the space of thirty days a "Life of Garfield," of which, during the presidential campaign and immediately afterward, 80,000 copies were sold. He published subsequently "The Rear-Guard of the Revolution," an account of the early settlement of Tennessee and of the patriotic services of John Sevier (New York, 1886), and "John Sevier as a Commonwealth-Builder," a companion to the "Rear-Guard" (1887). He is now (1887) writing a series of southwestern histories. His wife, who has aided him in his literary labors, is a daughter of Judge John W. Edmonds.

GILMORE, Joseph Albree, governor of New Hampshire, b. in Weston, Vt., 10 June, 1811; d. in Concord, N. H., 17 April, 1867. He enjoyed scanty educational advantages, and while a boy made his way to Boston and entered a store. At the age of twenty-one he was in business for himself. The railroad to Concord, N. H., was completed on 1 Sept., 1842, and about the same time he removed to that place, and opened a wholesale grocery. On 3 Aug., 1848, he became construction-agent, and afterward superintendent, of the Concord and Claremont railroad, and 24 Nov., 1856, superintendent of the Concord railroad, which came to include the Manchester and Lawrence and Concord and Portsmouth railroads and their branches, making a system of about 175 miles, of which he continued in charge until 11 Aug., 1866. He was politically a Whig; in 1858 was elected as a Republican to the state senate, was re-elected in 1859, and made president of the senate that year. In March, 1863, he was the Republican candidate for governor; there was no choice by the people, but he was elected in June by the legislature, and re-elected by the people, in March, 1864. The two political contests were the severest ever known in New Hampshire, and he assumed the governorship at the darkest period of the civil war. By his predecessors, Govs. Goodwin and Berry, 16 regiments of infantry, 4 companies of cavalry, 1 light battery, and 3 companies of sharp-shooters, making over 17,000 volunteers, had been put into the field; but in 1863 patriotic fervor had somewhat abated, voluntary enlistments were few, and President Lincoln had ordered a draft. Gov. Gilmore, however, raised and equipped the 18th infantry, the 1st cavalry, and the 1st heavy artillery, which, together with the recruits forwarded to existing organizations, made the number of men furnished during his term of office about 14,000, and the entire number from New Hampshire more than 31,000, from a population of fewer than 330,000. Gov. Gilmore retired from office in June, 1865, in feeble health. His characteristics were restless activity, unbounded energy, impatience of restraint, liberality, and public spirit.—His son, **Joseph Henry,** b. in Boston, Mass., 29 April, 1834, was graduated at Brown in 1858 and studied theology at Newton. He was settled as pastor of the Baptist church in Fisherville (now Penacook), N. H., in 1861, and was also instructor in Hebrew at Newton, but resigned and acted as private secretary to his father during the closing years of the civil war also editing the Concord "Daily Monitor" in 1864–'5. In 1865 he became pastor of the 2d Baptist church in Rochester, N. Y., and in 1867 professor of rhetoric in the University of Rochester. He has been an editorial writer on religious and literary themes, and has published several text-books, including one on the "Art of Expression" (Boston, 1881). He is the author of the popular hymn "He leadeth me; Oh, blessed thought!"

GILMORE, Patrick Sarsfield, musician, b. near Dublin, Ireland, 28 Dec., 1829. He connected himself with military bands at the age of fifteen, and after having been in Canada with an English band he went to Salem, where he led a brass band, after which he settled in Boston, Mass., where he organized "Gilmore's Band," with which he made an extensive tour. In 1861 he accompanied the 24th Massachussetts regiment to the field, and in 1863 was placed in charge of all the bands in the department of Louisiana by Gen. Banks. He originated monster concerts in this country, and was the projector of the great "Peace Jubilees" held in Boston in 1869 and 1872, and published an account of the first (Boston, 1871). In 1878 he made a European tour with his band. He is now band-master of the 22d Regiment, N. G. S. N. Y. He has composed many marches and songs.

GILMOUR, Richard, R. C. bishop, b. in Glasgow, Scotland, 28 Sept., 1824. He came to Canada with his parents when he was four years old, and afterward settled in Pennsylvania. He joined the Roman Catholic church at the age of twenty, and, having resolved to enter the priesthood, became a student in Mount St. Mary's seminary. He was ordained priest by Archbishop Purcell in 1852. His first missionary labors were in southern Ohio, Portsmouth, Ironton, Gallipolis, and Wilkesville, where he remained five years and built churches and schools. He was appointed pastor of St. Patrick's church, Cincinnati, in 1857, and erected a school there which he afterward made the finest building of the kind in the state. He was next made professor in the seminary of Mount St. Mary's of the West, and was then sent as pastor to St. Joseph's church, Dayton, Ohio, where he erected a school. He was nominated for the see of Cleveland by the bishops of the province of Cincinnati, 15 Feb., 1872, and consecrated bishop on 14 April, by Archbishop Purcell, in the cathedral of Cincinnati. After his accession to the episcopacy he devoted himself especially to the interests of Roman Catholic education. He founded the "Catholic Universe," and, an attempt having been made to tax Roman Catholic churches and schools, he was completely successful in resisting it in the courts. During his administration of the diocese of Cleveland the number of Roman Catholics has largely increased. In 1884 it amounted to 174,000. The average number of children attending the 123 parochial schools is 23,000. There are 184 priests, 217 churches, 21 chapels, 71 stations,

R. Gilmour

and a theological seminary containing 44 students. Bishop Gilmour has compiled "School Recreations," a collection of hymns, a Bible history, and a series of readers.

GILPIN, Edward Woodward, jurist, b. in Wilmington, Del., 15 July, 1805; d. in Dover, Del., 29 April, 1876. In his youth he was in straitened circumstances, and learned the trade of a currier. He was afterward clerk in a store, but finally studied law, and was admitted to the bar in 1827. He was attorney-general of Delaware in 1840–'50, and from May, 1857, till his death was chief justice of the state. He was a Whig in early life, but became a Democrat in 1856. During the civil war he was an ardent Unionist.

GILPIN, Thomas, manufacturer, b. in Chester county, Pa., 18 March, 1728; d. in Winchester, Va., 30 April, 1778. His grandfather, Joseph, emigrated from England in 1696. Thomas engaged in farming and manufacturing, became interested in science, and was one of the original members of the American philosophical society in 1769. He aided in establishing Wilmington college, Del., and labored for the construction of a canal between the Chesapeake and the Delaware. In 1777, with other members of the Society of Friends he was arrested by the Pennsylvania government on suspicion of being a loyalist, and taken to Virginia, where he died.—His son, **Joshua,** b. in Philadelphia, 8 Nov., 1765; d. there in 1840, early showed a love for historical investigation. He lived in England in 1795–1801, and married an Englishwoman. He urged forward the canal that his father had proposed, and witnessed its completion after many discouragements. He published "Verses written at the Fountain of Vaucluse" (1799); "Memoir on a Canal from the Chesapeake to the Delaware" (1821); and "Farm of Virgil, and other Poems" (1839).—Another son, **Thomas,** b. in Philadelphia, 10 Sept., 1776; d. there, 3 March, 1853, became an extensive paper-manufacturer, and in 1817 constructed a machine for making paper continuously. His works were destroyed by fire in 1832. He published a collection of documents connected with the banishment to Virginia of his father and other Quakers (1850).—Joshua's son, **Henry Dilwood,** lawyer, b. in Lancaster, England, 14 April, 1801; d. in Philadelphia, Pa., 29 Jan., 1860, attended school in England in 1811–'16. He was graduated at the University of Pennsylvania in 1819, studied law with Joseph R. Ingersoll, and began practice in Philadelphia in 1822. He was U. S. attorney for his state in 1832, solicitor of the U. S. treasury in 1837, and attorney-general of the United States in 1840–'1. In 1826–'32 he edited the "Atlantic Souvenir" (7 vols., 12mo), the first American literary annual. Mr. Gilpin was president of the Pennsylvania academy of the fine arts, and a director of Girard college. He bequeathed the sum of $57,000 to the Chicago historical society, and his extensive and valuable library to the Historical society of Pennsylvania, together with a bequest for the erection of a building in which the library should be preserved. Besides contributing to periodicals, he published "Reports of Cases in the U. S. District Court for the Eastern District of Pennsylvania, 1828–'36" (Philadelphia, 1837); "Opinions of the Attorney-Generals of the United States, from the Beginning of the Government to 1841," from official documents (2 vols., Washington, 1841), and many addresses, and edited "The Papers of James Madison," purchased from Mrs. Madison by the government for $30,000 and published by authority of congress (3 vols., 1840). See "Memorial of Henry D. Gilpin" (printed privately, Philadelphia, 1860).

Henry D. Gilpin

GIOUX, Olivier, French author (known by his pen-name Gustave Aymard), b. in Sèvres in 1818. His father shipped him, at the age of twelve, as apprentice on a sailing-vessel, but he deserted at Vera Cruz, shipped on board a fishing-vessel, and visited the entire Gulf coast. He joined a slaver in 1836, and made several voyages from Africa to Brazil. In 1846 he offered his services to the Mexican government, and was appointed commander of an armed brigantine, in which he cruised on the coast of Louisiana, but near the mouth of the Mississippi was attacked by a U. S. frigate and after a stout resistance was captured and carried to Washington. He escaped and went west, where for several years he was a hunter and trapper. He was captured by the Apaches, scalped, and left for dead, but found by a squaw, through whose care he recovered. He set out for Panama in 1849, and penetrated into the interior of Colombia and Brazil, living with the Indians like one of them. In 1851 he went on a hunting expedition to Patagonia, fell into the hands of a tribe of the Pehuenches, and was kept a prisoner for fourteen months. On making his escape he went to Paris. He had described his wanderings and adventures in his novels, which include "Les trappeurs de l'Arkansas" (Paris, 1858); "Les chercheurs de pistes" (1858); "Le grand chef des Aucas" (1858); "Les rodeurs des frontières" (1861); "Les aventuriers" (1863); "Les nuits Mexicaines" (1863); "L'Araucan" (1864); "Les chasseurs d'abeilles" (1864); "Les fils de la Tortue" (1864); and "Une vendetta Mexicaine" (1866). He has also published "Histoire des guerres civiles et des révolutions dans le Mexique, depuis Iturbide jusqu' à la cession de la Californie aux États-Unis" (2 vols., Paris, 1869).

GIRARD, Charles, naturalist, b. in Mülhausen, France, 9 March, 1822. He was educated in Neuchâtel, Switzerland, where he was the pupil and assistant of Agassiz. He followed his teacher to the United States in 1847, remaining with him until 1850, when he removed to Washington, D. C., and attached himself to the Smithsonian institution. In 1852 he was naturalized as an American citizen. He was graduated at the medical school of Georgetown, D. C., in 1856, remained in the Smithsonian institution until 1859, and for some time was engaged with Prof. Baird in the investigation of reptiles. His publications are "Mammalia," in the "Iconographic Encyclopædia of Science, Literature, and Art" (New York, 1851); "Monograph of the Cottoids" (Washington, 1851); "Reptiles" (in collaboration with Prof. Spencer F. Baird) in Stansbury's "Exploration and Survey of the Great Salt Lake of Utah" (1853); "Bibliographia Americana historico naturalis" (1852); "Catalogue of North American Reptiles in the Museum of the Smithsonian Institution—Part I., Serpents," in collaboration with Prof. Baird (1853); "Researches upon Nemerteans and Planarians—I., Embryonic Development of Planocera elliptica" (Philadelphia, 1854); "Life in its Physical As-

pects" (Washington, 1855); "Reptiles, Fishes, and Crustacea," in Gilliss's "U. S. Naval Astronomical Expedition to Chili" (1856); "Herpetology of the United States Exploring Expedition under the Command of Captain Wilkes" (1858); "General Report upon Fishes," in "U. S. Explorations and Surveys for Railroad Routes from the Mississippi River to the Pacific Ocean" (1859); and "Report upon Fishes," in Emory's "Survey of the United States and Mexican Boundary" (1859).

GIRARD, Marc Amable, Canadian statesman, b. in Varennes, Quebec, 25 April, 1822. He was educated at St. Hyacinthe college, and admitted to the bar of Manitoba in 1871. After the suppression of Louis Riel's first rebellion by Gen. Wolseley, Mr. Girard became a member of the executive council under Lieut.-Gov. Archibald, and was treasurer of Manitoba from September, 1870, till March, 1872, when he resigned. He was premier of the province, with the office of secretary, from 8 July to 2 Dec., 1874, when he and his government retired. When the Norquay government was reconstructed in December, 1879, he took the office of provincial secretary, and subsequently became minister of agriculture and president of the council, which portfolio he held till his retirement in January, 1883. He was appointed a member of the executive council for the northwest territories in December, 1872, and was an unsuccessful candidate for the legislative council of Canada in 1858, and for the Canada assembly of 1862. He was elected for St. Boniface, in Manitoba assembly, in 1870, and was elected by acclamation for Baie St. Paul in 1879. He was called to the Dominion senate on the entrance of Manitoba, 13 Dec., 1871. He is a Conservative.

GIRARD, Stephen, philanthropist, b. near Bordeaux, France, 24 May, 1750; d. in Philadelphia, Pa., 26 Dec., 1831. He was the son of a sea-captain, and at an early age, with limited education, sailed as a cabin-boy to the West Indies, and thence to New York. Having gained his employer's confidence, he became mate, and then captain, of a small vessel, made several voyages to New Orleans, and was soon part owner of the ship. In 1769 he had established himself in trade in Philadelphia, and was alternately shipmaster and merchant till the Revolutionary war put a stop to his enterprises. He then opened a small grocery-store and cider-bottling establishment, and in 1777–'9 gained some money by selling liquor to the soldiers of the continental army. He returned to the West India trade in 1780, and in 1782 laid the foundation of his fortune by taking a lease of a range of stores, which he underlet at a large profit. Shortly afterward, during the servile insurrection in Hayti, several planters deposited their treasures on two of his vessels for safe keeping, and were subsequently massacred by the negroes with their entire families, leaving Mr. Girard in possession of about $50,000. He invested largely in the shares of the old Bank of the United States in 1810, and in 1812 purchased its building and began operations in his own name, retaining the officers of the old institution, and succeeding to much of its business. During the war with Great Britain, Mr. Girard was the financial mainstay of the government. He continued to make it large advances, down to the establishment, in 1816, of the second U. S. bank, of which he became a director, and whose policy he influenced greatly. In 1814, when the government could obtain only $20,000 instead of the $5,000,000 that it wished, he promptly furnished the entire amount, and in the same year, when the interest on the public debt could not be paid, he wrote to the secretary of the treasury, offering to wait for his money, or to receive it in treasury notes. At his death his property amounted to about $9,000,000, the bulk of which he bequeathed for charitable purposes. The character of Girard has been regarded as an enigma. The disfigurement of his face by the loss of an eye in early childhood, shortly before he was thrown on the world for his support, seems to have soured his disposition, and throughout his life he was crabbed and unapproachable to most people, though he had several warm friends. In small matters he was a miser, ready to take advantage of a legal technicality to avoid paying a just claim, rigidly frugal in his personal habits, and never giving aid to any that applied for it at his door. He gave those in his employ nothing but their just wages, and exacted from them the utmost promptitude and fidelity. His life was one of constant labor; the smallest details of his business received his personal attention, and even his leisure was spent in working on his farm near Philadelphia, where he drove daily in a shabby carriage drawn by one horse. He was inhospitable, and his appearance was forbidding. He spoke English indifferently, was partially deaf after 1812, and in 1830 lost the use of his remaining eye by an accident. His personal appearance was that of a rough old sailor. He was a disbeliever in Christianity, and named his ships after noted French free-thinkers. Yet in public matters no one could be more open-handed. His timely aid to the government has already been mentioned. He gave thousands to the city of Philadelphia for public improvements, subscribed freely to charities, and even to Christian churches. During the yellow-fever epidemic of 1793 he nursed many of the sufferers, was one of a committee that organized a hospital on Bush Hill, and when no one could be hired to take immediate charge of it, volunteered, with Peter Helm, for the work, and soon established cleanliness and order. He continued in active labor at the hospital for sixty days, and also contributed liberally to the families of the victims of the fever. His will, which would occupy nearly nine pages of this work, contains minute directions as to the disposal of his property. To the Pennsylvania hospital he bequeathed $30,000; to the Pennsylvania institution for the deaf and dumb, $20,000; to the Orphan asylum of Philadelphia, $10,000; to the Philadelphia public schools, $10,000; to the city of Philadelphia, for the distribution of fuel to the poor every winter, $10,000; to the Society for the relief of distressed masters of ships, $10,000; to the masonic loan, $20,000; to the city of New Orleans, a large amount of real estate; to the city of Philadelphia, for improvement of its streets, buildings, etc., $500,000; for the improvement of canal navigation in Pennsylvania, $300,000. His principal bequest was $2,000,000, besides the residue of a certain portion of his estate out of which some lega-

cies were to be paid, together with a plot of ground in Philadelphia, for the erection and support of a college for orphans. About one third of the will is taken up with prescribing the details of its construction and management, and Girard even goes so far as to dictate the thickness of the marble slabs on the roof, the exact dimensions of the building and its rooms, and the style of the gates leading to the grounds. His object seems to have been to make it certain that a fire-proof, substantial edifice should be built, in his own words, "avoiding needless ornament, and attending chiefly to the strength, convenience, and neatness of the whole." The principal building of the college, which was begun in July, 1833, and opened 1 Jan., 1848, is a magnificent specimen of Greek architecture, in the form of a temple, surrounded by thirty-four elaborate Corinthian columns, and costing, with the accompanying buildings, very nearly $2,000,000. It has been doubted whether Mr. Girard intended that any such structure should be erected. It is in many respects not well adapted to its uses, though the minute directions of the founder, who was not a practical architect, are, in some cases, responsible for these defects. As many poor white male orphans as the endowment can support are admitted between the ages of six and ten years, fed, clothed, and educated, and between the ages of fourteen and eighteen are bound out to mechanical, agricultural, or commercial occupations. The officers consist of a president, secretary, two professors, five male and five female teachers, a physician, a matron, a steward, and a superintendent of manual labor; and there are about 500 beneficiaries. By a provision of the will of the founder no ecclesiastic, missionary, or minister of any sect whatever, is to hold any connection with the college, or be admitted to the premises even as a visitor. The object of this, in Girard's words, is "to keep the tender minds of the orphans who are to derive advantage from this bequest free from the excitement which clashing doctrines and sectarian controversy are so apt to produce," leaving them free to choose on their entrance into active life "such religious tenets as their matured reason may enable them to prefer." See "Life of Stephen Girard," by Stephen Simpson (Philadelphia, 1832), and "Girard College and its Founder," by Henry W. Arey (1860).

GIRARDIN, Louis Hue, educator. He was appointed professor of modern languages in William and Mary in 1803, and conducted a select school for girls in Richmond, Va., for several years. He completed vol. iv. of Burk's "History of Virginia," and in 1805 issued the prospectus of a monthly magazine entitled "Amœnitates Graphicæ, an Instructive and Amusing Collection of Vines, Animals, Plants, Flowers, Minerals, Antiquities, Customs, and Other Interesting Objects. Selected and engraved from Drawings after Nature, with Descriptive and Explanatory Sketches in English and French. The Text by L. H. Girardin, Professor of Modern Languages, History, and Geography in William and Mary College. The Engravings by Frederick Bosler." The first number (the only one issued) contained six fine plates, colored by hand. In 1809 he published a long Latin poem, entitled "Maiomachia, sive Duello," in "The Visitor," a Richmond periodical.

GIRÓN, Francis Hernández, Spanish soldier, b. in Caceres, Spain, about 1500; d. in Lima, Peru, 7 Dec., 1554. He was a follower of Pizarro, and rendered great services to that leader in the conquest of Peru in 1532. He afterward became rich and powerful, but used his high reputation among the Spanish conquerors to excite them to revolt, as he was dissatisfied with his share of the spoils after the defeat of Gonzalo Pizarro, 9 April, 1548. Having been commissioned to reduce the province of Charcas to subjection in 1553, he levied troops at Cuzco, and then raised the standard of rebellion, drawing to his side all the Spaniards who had belonged to the factions of Almagro and Pizarro. After arresting the governor of Cuzco he took possession of the government, and in a battle near Chuquinga gained a complete victory, from which, however, he did not reap any advantage. He was attacked in turn by the royalists, and defeated at Pucara in 1554. Having been abandoned by his troops, he fled to the mountains, was pursued, captured, and executed at Lima. The rebellion he headed was the last that was instigated by the conquerors of Peru against the Spanish crown.

GIROUARD, Désiré, Canadian author, b. in St. Timothé, Beauharnois co., Quebec, 7 July, 1836. He was educated at Montreal college, and was graduated in law in McGill university, from which he received the degrees of B. C. L. and D. C. L. He was admitted to the Lower Canada bar in October, 1860, and from that time until 1872 devoted himself to his profession, in which he attained success as a commercial lawyer. In the latter year he was elected to the Canadian parliament for Jacques Cartier, but was defeated for Beauharnois in 1874. He was re-elected for Jacques Cartier in 1874, and again in 1882. During the session of 1882 he promoted and carried through the bill authorizing marriage with a deceased wife's sister. He is a Conservative, and a strong supporter of the policy of Sir John A. Macdonald, and of the late Sir George E. Cartiers. He founded, with W. H. Kerr and others, the "Revue critique," and is the author of "Treatise on Bills of Exchange," the "Insolvent Act," and "Laws of Marriage." He is well known by his contributions on constitutional law and international questions, both on this continent and in Europe.

GIROUARD, John Joseph, Canadian patriot, b. in Quebec, Canada, 11 Nov., 1795; d. in Canada, 18 Sept., 1855. He was left an orphan at an early age, and entirely destitute, but was educated by the Abbé Gatien. He followed his benefactor to St. Eustache, and after the latter's death began to study law at St. Genevieve in 1812. He was admitted to practice at the former place in 1816, and established himself at St. Benoit, where he married. He took an energetic part in the discussions between the Canadian governor and the chamber of assembly, and in 1830 was elected to represent the county of Deux-Montagnes. He devoted himself principally to municipal and educational questions, but voted with the patriots in favor of the ninety-two resolutions, the refusal of subsidies, and all the laws that aimed at enforcing the rights of the chamber. When the English government authorized Lord Gosford to take what money he needed from the public treasury, Girouard addressed meetings in several counties of the province of Quebec in opposition to this violation of the prerogatives of the legislature, but still deprecated a resort to physical force. When the insurrection began he took command of the insurgents who were encamped at St. Benoit, but, seeing that resistance was impossible after the fight at St. Eustache, 14 Nov., 1837, he advised his companions to disperse. He then set out for the United States, but afterward surrendered himself, and was taken to Montreal, where he remained in prison for six months. In 1838 Lord Durham, the new governor-general, offered to allow the leaders of the

insurrection to go into exile and to pardon the rest on condition that the former would sign a paper acknowledging their participation in the revolt. Girouard refused to sign the paper and made strenuous efforts to dissuade his companions. The result proved his wisdom, as the other leaders were exiled to the Bermudas, while he was released after the proclamation of amnesty without conditions. He then returned to St. Benoit, where he devoted himself successfully to his profession. He was offered a portfolio in the Baldwin-Lafontaine ministry of 1842, but declined this and other public offices. The rest of his life was spent in the duties of his profession and in succoring families that suffered in the troubles of 1837. He also founded the hospital of Youville in St. Benoit.

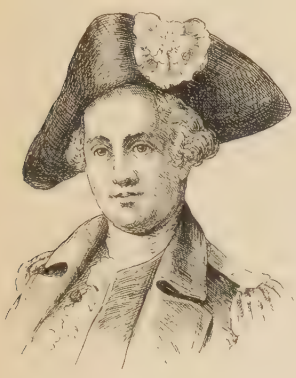
GIRTY, Simon, leader of Indians, b. in Pennsylvania about 1750; d. about 1815. His father had died, and his mother had married again, when in 1755 the whole family were taken captive by Indians, and the step-father was burned at the stake. Simon remained a prisoner till 1758, when he was released. In 1774 he was a soldier and spy under Lord Dunmore at Fort Pitt, and a friend and companion of Simon Kenton. Being an active loyalist, he left Pennsylvania at the beginning of the Revolution, became a leader of the savages, and was concerned in many atrocities. It is not known whether he was given a British commission. He had been held a prisoner by the Whigs at Pittsburg, but escaped, collected about 400 Indian warriors in the summer of 1777, and in September attacked Fort Henry (now Wheeling, W. Va.), which was garrisoned by about forty men. After defeating with great slaughter a reconnoitring party, and reducing the garrison to twelve men, he made a demand for its surrender, but was refused. The Indians now laid siege to the fort, but, as they had no artillery, the garrison held its own until it was relieved next day by forty mounted men. In 1778, with two other Tories, Girty went through the Indian country to Detroit, urging the savages to take up arms against the Americans. He was present at the torture and death of Col. William Crawford (*q. v.*) in 1782, and is charged with showing delight at his sufferings; but Girty averred that he did what he could to save Crawford's life. Subsequently, when his old associate, Simon Kenton, was captured by the Indians, Girty exerted himself to the utmost to save him from the torture, and succeeded in effecting his release. In August, 1782, Girty invaded Kentucky and with 600 savages made an attack on Bryant's station, near Lexington, which was garrisoned by about fifty men. After an unsuccessful ambuscade Girty laid siege to the fort till the approach of re-enforcements under Daniel Boone caused him to retreat. He was rapidly pursued, and the battle of the Blue Licks followed, in which many of the Kentucky leaders lost their lives. This was the last great Indian battle on Kentucky soil. In the same year Girty was active in the expulsion of the Moravian missionaries who had been laboring quietly among the Wyandottes. He lived for some time on Sandusky river, where he had established a trading-station, and planned and led many marauding excursions. He was present at Gen. Arthur St. Clair's defeat in 1791, and directed a savage to kill and scalp Gen. Richard Butler, who lay wounded on the field. Girty acted as interpreter to the commissioners that were appointed by the U. S. government to meet the Indians in 1793, and treated them with insolence, finally securing the failure of the negotiations. He also aided the British in the war of 1812, and is said by some authorities to have been killed in the battle of the Thames in 1813, while others say that he died a natural death two years afterward.

GISBORNE, Frederic Newton, Canadian inventor, b. in Broughton, Lancashire, England, 8 March, 1824. He made a tour around the world in 1842–'5, came to Canada in July of the latter year, and, after spending two years in farming, became one of the operators of the Montreal telegraph company, and opened its first station at Quebec. He was then connected with various telegraphic enterprises, and successfully completed the line across Newfoundland in October, 1856. In 1862 he was acting commissioner for Newfoundland at the London exhibition, represented it at the Paris exhibition of 1865, and was appointed London agent for mines and minerals by the government of Nova Scotia. In 1879 he was made superintendent of the Dominion government telegraph and signal service, which office he now holds (1887). He has invented electric, pneumatic, and mechanical ship-signals, anti-corrosive and anti-fouling compositions for the bottoms of iron ships, an electric recording target, and improvements in gas-illumination. His semaphore was awarded a gold medal at the late fishery exhibition in London. He was one of the original members of the Royal society of Canada.

GIST, Christopher, scout. He was summoned from his home on the Yadkin in North Carolina by the Ohio company, an association of English merchants and Virginia planters, to whom had been given a royal grant to examine the western country "as far as the falls of the Ohio," to mark the passes in the mountains, trace the course of rivers, and observe the strength and numbers of the Indian nations. On 31 Oct., 1750, he left the shores of the Potomac. He crossed the Alleghanies and journeyed in February, 1751, to the Miami river, holding conferences with the various Indian tribes, but principally with the chief of the Miamis. During the latter meeting four ambassadors from the French were announced, but, after a deliberation, an alliance was formed with Gist, as the representative of the English. On 1 March, Gist continued his tour, descending the Miami to the Ohio; thence ascending the valley of the Kentucky, he found a pass to the Bluestone, and returned by way of the Roanoke. In 1753 the Ohio company opened a road into the western valley, and Gist established a plantation near the Youghiogheny. In November of that year hostilities were threatened between the French and English; and George Washington, then just twenty-one, but thoroughly familiar with the wilderness, was selected as an envoy from Gov. Dinwiddie, of Virginia, to make a winter journey to the streams of Lake Erie. With Christopher Gist as his guide he set out. In nine days they had reached the junction of the Alleghany and Monongahela rivers, and on 23 Nov., 1753, swam their horses across the Alleghany, and wrapped themselves in their blankets for the night. Their journey ended at Waterford, near the shores of Lake Erie, where they were not courteously received. They hastened their return, and the day after Christmas were fired upon by an Indian in ambush. "I would have killed him," wrote Gist, "but Washington forbade." They took him prisoner instead. Dismissing their captive at dusk, they travelled all night and next day, resting at dark under a huge tree. The despatches were delivered, and a fort was established at the junction of the rivers which Washington and Gist had crossed, where Pittsburg now stands. It was afterward, 17 April, seized by the French, and named Fort Duquesne. Washington hastened

forward, Gist acting as his scout, and on 27 April the latter announced that the French were within five miles of the American camp. An engagement followed, and the French were beaten. Gist's subsequent history is unknown.

GIST, Mordecai, soldier, b. in Baltimore, Md., in 1743; d. in Charleston, S. C., in 1792. His ancestors were early English emigrants to Maryland. He was educated for commercial pursuits. At the beginning of the Revolution the young men of Baltimore associated under the title of the "Baltimore independent company," and elected Gist captain. It was the first company raised in Maryland for the defence of popular liberty. In 1776 Gist was appointed major of a battalion of Maryland regulars, and was with them in the battle near Brooklyn. In January, 1779, congress appointed him a brigadier-general in the continental army, and he took the command of the 2d Maryland brigade. He fought stubbornly at the battle of Camden, S. C., in 1780, and at one time after a bayonet charge his force secured fifty prisoners, but the British under Cornwallis rallied and the Marylanders gave way. Gist escaped, and a year later was present at the surrender of Cornwallis. He joined the southern army under Greene, and again when the army was remodelled in 1782 he was given the command of the light corps. On 26 Aug., 1782, he rallied the broken forces of the Americans under Laurens at the battle of the Combahee, and gained a decisive victory over the British. After the war he resided on his plantation near Charleston, S. C. Gen. Gist possessed a tall and graceful figure, symmetrical proportions, great strength, and expressive features. He had but two children, sons, one of whom he named "Independent" and the other "States."



GLADDEN, Adley H., soldier, b. in South Carolina; d. in April, 1862. He was a major in Col. Butler's Palmetto regiment of South Carolina volunteers in the Mexican war, became lieutenant-colonel, and commanded the regiment at the battle of Churubusco, at which both of his superior officers were killed. He was severely wounded at the Belen Gate. In 1861 he was appointed a brigadier-general in the Confederate army, and was assigned a brigade in Wither's division of Bragg's corps. He was wounded on the first day of the battle of Shiloh, and died soon afterward.

GLADDEN, Washington, clergyman, b. in Pittsgrove, Pa., 11 Feb., 1836. He was graduated at Williams in 1859. After a course of theology he became pastor of the State street Congregational church in Brooklyn in 1860, then in Morrisania and in North Adams, Mass., in 1867–'71, when he removed to New York and was on the editorial staff of the New York "Independent" until 1875. From 1875 till 1883 he was pastor of the North Congregational church in Springfield, Mass., and for some time edited "Sunday Afternoon." He then went to Columbus, Ohio, to be pastor of the first church in that city. He has been a frequent contributor to papers and periodicals, a successful public lecturer, and has published "Plain Thoughts on the Art of Living" (Boston, 1868); "From the Hub to the Hudson" (1869); "Workingmen and their Employers" (1876); "Being a Christian" (1876); "The Christian Boy" (New York, 1877); "The Lord's Prayer" (Boston, 1880); "The Christian League of Connecticut" (New York, 1883); "Things New and Old" (Columbus, 1884); "The Young Men and the Churches" (Boston, 1885); and "Applied Christianity" (Boston, 1887).

GLADWIN, Henry, British soldier, d. near Chesterfield, Derby, England, 22 June, 1791. He became a lieutenant in the 48th foot, 28 Aug., 1753, was wounded in the expedition of Braddock in 1755, promoted to a captaincy in the 80th on 25 Dec., 1757, and rose to the rank of major, 20 June, 1759. He was in command of the fort at Detroit when it was besieged by Pontiac in 1763–'4, and for his gallant defence was promoted to a lieutenant-colonelcy, 17 Sept., 1763, and to a colonelcy, 29 Aug., 1777. In the Revolutionary war he was a deputy adjutant-general, and served with distinction, becoming a major-general, 26 Sept., 1782.

GLASS, Francis, classical scholar, b. in Londonderry, Ireland, in 1790; d. in Dayton, Ohio, in 1825. He was educated in Philadelphia, and spent the earlier part of his life in that city and its vicinity, engaged in literary pursuits. In 1817 or 1818 he left Pennsylvania for the west, and settled in the Miami country, where he taught for several years in various places. In the summer of 1823, James M. Reynolds, then a member of the Ohio university, having occasion for the services of a tutor, sought out Mr. Glass, whom he found at the head of a country school in Warren county. In a little log school-house, furnished with desks and benches of rough plank over which the plane had never passed, this accomplished scholar was imparting the rudiments of an English education to a few children of the neighboring farmers, and giving a higher training to half a dozen youths who had joined his school for the benefit of his instruction in the Greek and Latin languages. Mr. Reynolds speaks in the highest terms of his learning and his love of the classics. "The mind," he says, "was with him measured by the amount of classical acquirements. He was not deficient in mathematics and other branches of useful science, but they were only matters of mere utility and not of affection." "He was delicately formed in mind and body, and shrunk from all coarseness as a sensitive plant from the rude touch. A cold or unfeeling word seemed to palsy every current of his soul and every power of his mind; but when addressed in gentle, confiding tones, he was easy, communicative, and full of light and life. At such hours he poured out a stream of classical knowledge as clear, sparkling, and copious as ever flowed from the fountain of inspiration in the early days of the Muses." Mr. Reynolds had been with Glass for about three months when the latter communicated to him his long-cherished plan of writing the life of Washington in Latin for the use of schools. There seemed little prospect, however, of his accomplishing it. In feeble health, in extreme poverty, and borne down by the daily drudgery of his school, he feared that he might die before he had begun the work. Arrangements were made by Mr. Reynolds for his relief, and he removed to Dayton, where, in the winter of 1824, he began his book

and finished it in a year. He did not live, however, to learn that his work had been approved by some of the ripest scholars of the country. He died shortly afterward, intrusting his manuscript to Mr. Reynolds, by whom it was published in 1835. It was highly commended by such competent judges as Professors Anthon, Maclean, and Alexander, and Presidents Wylie, Duer, and Fisk. It was used as a text-book for some time in the grammar-school of Columbia college, and might have won its way into general acceptation but for the fact that the stereotyped plates were destroyed in a fire, and the book was never reprinted. The fatality which pursued poor Glass through life seemed to follow him after death. "Washingtonii Vita" has now become a literary curiosity. On the title-page appeared a selection in Latin purporting to be from the fragments of Cicero, prophesying the future appearance and deeds of Washington. It is said that scholars investigated the fragments of Cicero without success; and their bewilderment was only relieved when Prof. Anthon acknowledged that he had written the passage himself.

GLASS, James W., artist, b. in 1825; d. in 1857. He became a pupil of Huntington in New York city in 1845, and went to London two years later, where he applied himself to art for several years, returning to the United States in 1856. His "Last Return from Duty," an equestrian portrait of the Duke of Wellington, brought him first into prominence in England. It was purchased by Lord Ellesmere, and a duplicate was ordered by the queen. The subject has been engraved by James Faed. He was particularly successful in his drawing of horses. His works include "The Battle of Naseby," "The Royal Standard," "Puritan and Cavalier," and "The Free Companion."

GLASSON, John J., naval officer, b. in New York city; d. there, 12 March, 1882. He was appointed midshipman, 1 Feb., 1823, and in that year served under Com. Porter in the suppression of piracy in the West Indies. In 1837 he received the commission of lieutenant, and commanded the schooner "Falcon," of the Home squadron, in the attack on Vera Cruz in 1848. He was also engaged in the rescue of 120 inhabitants of the town of Valladolid, Yucatan, which was burned and sacked by the Indians in an insurrection. While in these waters he aided the French bark "L'Asie de Dunkirk" in a perilous position off the harbor of Aguador. He commanded the store-ship "Lexington," in Perry's Japan expedition, in 1853–'4, was appointed commander in 1855, and stationed at New Bedford, Mass., from 1861 till 1863. He was retired in October, 1864, but was in the navy-yard at Norfolk, Va., in charge of stores for the supply of the Coast squadron in the Atlantic, and the flotilla force in the Chesapeake from 1864 till 1866. He was made commodore on the retired list, 4 April, 1867.

GLAZIER, Willard, author, b. in Fowler, St. Lawrence co., N. Y., 22 Aug., 1841. He spent his boyhood on a farm, and was educated principally at the state normal-school at Albany. He taught in Schodack, N. Y., in 1859–'60, and in 1861 enlisted in the 2d New York, or Harris cavalry regiment. He had reached the rank of lieutenant, when he was taken prisoner in a cavalry skirmish near Buckland Mills, Va., on 18 Oct., 1863, and sent to Libby prison. He was afterward transferred to Georgia, to Charleston, and then to Columbia, S. C., whence he made his escape, but was recaptured near Springfield, Ga. He escaped again from Sylvania, Ga., 19 Dec., 1864, and returned home, his term of service having expired, but on 25 Feb., 1865, entered the army again as 1st lieutenant in the 26th New York cavalry, and served till the end of the war. He has since devoted himself to literature, and frequently delivered lectures. In 1876 he went from Boston to San Francisco on horseback, and was captured by hostile Indians near Skull Rocks, Wyoming territory, but made his escape. In 1881 he made a canoe voyage of 3,000 miles, from the head-waters to the mouth of the Mississippi, and claimed to be the discoverer of a small lake south of Lake Itasca, which he maintains should be regarded as the true source of the Mississippi. It has since been found that this lake is laid down on the maps of the government surveys. Capt. Glazier's works include "Capture, Prison-Pen, and Escape," over 400,000 copies of which were sold (Albany, 1865); "Three Years in the Federal Cavalry" (New York, 1870); "Battles for the Union" (Hartford, 1874); "Heroes of Three Wars" (Philadelphia, 1878); "Peculiarities of American Cities" (1883); and "Down the Great River" (1887). See his life by John A. Owens, entitled "Sword and Pen" (Philadelphia, 1884).

GLEASON, Frederic Grant, musician, b. in Middletown, Conn., 17 Dec., 1848. After studying under Dudley Buck, he, in 1869, went to Leipsic, Germany, where he pursued his musical education under Moscheles and Richter. Later, in Berlin, Weitzmann, and, in London, Oscar Beringer were among his teachers. On his return to the United States he settled in Hartford, Conn., and in 1876 he went to Chicago, where he is now (1887) musical critic of the "Tribune." His chief compositions are two operas of the grand romantic type, "Otho Visconti" and "Montezuma." The vorspiel and many parts of "Otho Visconti" have been published (New York). The vorspiel has been played under Theodore Thomas, and the introduction to the second act and the vorspiel under Mr. Gleason. Under Theodore Thomas several selections from "Montezuma" have been rendered, and the introduction to the second act was given at the National music teachers' convention at the Academy of Music, New York, 2 July, 1885.

GLEIG, George Robert, author, b. in Stirling, Scotland, 20 April, 1796. He is the son of Bishop Gleig, a Scottish theologian and man of letters. The son was educated at Glasgow and Baliol college, Oxford, joined a regiment in Cork in 1812, and was transferred to the 85th light infantry, which was sent to Spain in 1813. He served under Wellington in the Peninsular war, was sent with his regiment to this country, and took part in the battles of Bladensburg—where he was wounded—Baltimore, and New Orleans. He returned to England in 1815, was retired from the army, took orders, and in 1819 was appointed to a curacy in Kent. In 1821 the Archbishop of Canterbury presented him to the perpetual curacy of Ash, to which was added the charge of Ivy church, Kent. He was appointed chaplain of Chelsea hospital in 1834, and during the last four years of his service was by Wellington made chaplain-general to the forces, which office he held until he retired at the age of eighty. His exertions to establish a system of education for the soldiers gained for him the post of inspector-general of military schools. In 1848 he was prebendary of St. Paul's cathedral. Mr. Gleig was for half a century a contributor to "Blackwood's Magazine," and occasionally published papers in the "London Quarterly" and the "Edinburgh Review," also contributing to "Fraser's Magazine," of which he was for two years the editor. He may be called the oldest of living writers, he having as lately as 1886 contributed to the "Fortnightly Review" an article on the second

Duke of Wellington. He is the author of many important books, among which are "Campaigns of Washington and New Orleans" (London, 1821); and "The Subaltern" (published in "Blackwood" in 1824–'5; New York, 1826). Many editions of these popular works have since appeared.

GLEIM, John Godfried, clergyman, b. in Germany; d. in Germantown, Pa., in 1757. In 1754 he came to this country with Casper Fahnestock, settled in Germantown, and preached there until his death. In conjunction with Weiser and Mathias he published "The Inspired."—His son, **George Christian,** soldier, b. in 1736; d. in Lancaster county, Pa., 21 July, 1817, took part in the war of the Revolution and was severely wounded near Philadelphia. He removed to Lancaster county in 1779, where he resided until his death.—George's son, **Christian,** journalist, b. in Lancaster county, Pa., 10 Jan., 1780; d. in Pittsburg, Pa., 21 Sept., 1861, went to Philadelphia, where he entered the printing-office of Ezra Bailey. He settled in Harrisburg in 1812, and was appointed to print the senate journal in English. Afterward he established and edited "The Pennsylvanian." He served as ensign of volunteers in the war of 1812–'15. From 1821 till 1824 he was sheriff of Dauphin county. He removed to Pittsburg in 1830, and resided there until his death.

GLENDY, John, clergyman, b. in Londonderry, Ireland, 24 June, 1755; d. in Philadelphia, Pa., 4 Oct., 1832. He was educated at the University of Glasgow, where, after studying theology, he was ordained. He accepted a call from the church in Londonderry, and remained there until he was exiled during the Irish insurrection of 1798, in which he protested against the aggressive measures of the government, and rendered himself obnoxious to the nobility. He arrived in Norfolk, Va., in 1799, and afterward supplied the congregations of Staunton and Bethel, Augusta co., Va., for nearly two years. He was invited by President Jefferson to be his guest in Washington, and during his visit delivered a discourse in the capitol. In 1803–'30 he was pastor of the 2d Presbyterian church in Baltimore, Md. In 1806 he served as chaplain of the U. S. house of representatives, and in 1815 and 1816 of the senate. In 1822 the University of Maryland gave him the degree of D. D. He published an "Oration in Commemoration of Washington," delivered in Staunton in 1800 (re-published, 1835).

GLENDY, William Marshall, naval officer, b. in Virginia in 1801; d. in Baltimore, Md., 16 July, 1873. He was appointed midshipman in 1818, commissioned lieutenant in 1827, and served successively with the Brazil and Pacific squadrons. In 1847 he was made commander, and served in the Mediterranean for eighteen months. Subsequently he commanded in the East Indies. In 1855 he was made captain, and in 1861–'2 served as senior officer on the coast of Africa. He was promoted to the rank of commodore in 1862, and in the following year was made prize commissioner in Washington, D. C. He served six months as lighthouse-inspector, and in 1865 retired from active service.

GLENN, James, governor of South Carolina from 1744 till 1755. Toward the end of his administration he concluded a treaty with the Cherokees in their own country. By this action a large extent of territory was ceded to the king, which contributed largely to the interest and safety of the colony. He published "A Description of South Carolina" (London, 1761).

GLENTWORTH, George, physician, b. in Philadelphia, Pa., 22 July, 1735; d. there, 4 Nov., 1792. He was graduated at the University of Edinburgh in 1758. During the last French war in America he was a surgeon in the British army. In 1777 he served as surgeon of a regiment, and afterward was appointed senior surgeon in the continental army, and became director-general of hospitals for the middle division.

GLIDDEN, George Dana Boardman, naval officer, b. in Ellsworth, Me., 15 April, 1844; d. in Cambridge, Mass., 25 Jan., 1885. He was graduated at the U. S. naval academy in 1863, and in the same year was made ensign. His first year of service was passed on the "Seminole," of the Western Gulf blockading squadron. He took part in the battle of Mobile Bay, 5 Aug., 1864, where he received the highest commendations from his commanding officer. From 1865 till 1867 he served on the "Wyoming," of the East India squadron. He was appointed master in 1866, lieutenant in 1867, lieutenant-commander in 1868, and commander in 1883. He was engaged with the Asiatic squadron from 1867 till 1869, when he was stationed at the Naval academy. In 1870 and 1871 he commanded the "Tennessee." He served with the "Wachusett," of the European fleet, from 1872 till 1874, and with the "Omaha," of the Pacific fleet, from 1875 till 1877. He was on duty at the Boston navy-yard in 1878. His last service was in Asiatic waters, where he commanded the "Palos," from which he was detached in 1884.

GLIDDON, George Robins, archæologist, b. in Devonshire, England, in 1809; d. in Panama, 16 Nov., 1857. At an early age he went to Alexandria, where his father was a merchant, and also U. S. consul. For nearly twenty-three years he resided in Egypt, and during a great part of that time served as U. S. vice-consul. He visited the United States, and lectured in Boston, New York, and Philadelphia on Egyptian antiquities. He was agent for the Honduras interoceanic railway at the time of his death. He wrote "A Memoir on the Cotton of Egypt" (London, 1841); "An Appeal to the Antiquaries of Europe on the Destruction of the Monuments of Egypt" (1841); "Discourses on Egyptian Archæology" (1841); "Ancient Egypt" (1850; new ed., 1853); "Types of Mankind," written in conjunction with Dr. Josiah C. Nott, which contained contributions from Agassiz and Dr. Samuel G. Morton (Philadelphia, 1854); and "Indigenous Races of the Earth," with Dr. Nott and others (1857).

GLISAN, Rodney, physician, b. in Linganore, Frederick co., Md., 29 Jan., 1827. He was graduated in the medical department of the University of Maryland in 1849. After practising for a year in Baltimore, he was appointed assistant surgeon in the U. S. army, and engaged as medical officer from 1850 till 1861. He served five years on the plains, and six years in Oregon during the Indian wars, from 1855 till 1861, when he resigned his commission. After practising a year in San Francisco, he settled in Portland, Oregon. He was president of the Multnomah county medical society in 1872 and 1876, and of the Oregon state medical society in 1875–'6, and has been for several years a member of the American medical association. He was a delegate to the 7th International medical congress, held in London in 1881, and a member of the 9th International medical congress, held in Washington, D. C., in 1887. He is now (1887) emeritus professor of obstetrics and diseases of women and children in the medical department of Willamette university. Among his notable cases were the first amputations of the shoulder and thigh, and the second operation for strangulated inguinal hernia ever performed on the Pacific

coast north of San Francisco. He has travelled throughout the United States, British and Central America, and spent two years in Europe. He has written numerous articles upon medical subjects, published in the "U. S. Army Statistics" (1856 and 1860), in the "American Journal of the Medical Sciences" (1865–'78 and 1880), and in Erichsen's "Collection of Medical Rhymes" (Chicago, 1884). He has also published a "Journal of Army Life" (San Francisco, 1874); a "Text-Book of Modern Midwifery" (Philadelphia, 1881); and "Two Years in Europe" (New York, 1887).

GLISSON, Oliver S., naval officer, b. in Ohio, 18 Jan., 1809. He was appointed midshipman from Indiana, 1 Nov., 1826, became lieutenant in 1837, and commanded the sloop "Reefer" during the Mexican war. He served in the navy-yard at Norfolk, Va., from 1848 till 1850, when he was on special duty. He was attached to the steam frigate "Powhatan," of the East India squadron, in 1852, and from 1853 till 1855 was on the Japan expedition, being in Japan when the first treaty was made by Com. Perry. He was appointed commander, and assigned to the steamer "Mount Vernon" in the North Atlantic blockading squadron in 1861, became captain in 1862, and while in the "Mount Vernon" saved the transport "Mississippi," which was bound to New Orleans with 1,500 men of Gen. Butler's expedition. It was supposed that she was intentionally run upon the Frying-pan shoal. He also burned a light-boat under the guns of Fort Caswell, while on the blockade of Wilmington, N. C. He commanded the steam sloops "Iroquois" and "Mohican" in 1862, and the steamer "Santiago de Cuba" in 1864–'5. He was present in the two attacks on Fort Fisher, December, 1864, and January, 1865, and being recommended for promotion by Admiral Porter for covering the landing of the troops and carrying the division into action. He became commodore in 1866, and commanded the station at League Island, Pa., from 1867 till 1870, when he was appointed rear-admiral and ordered to command the European fleet. He was retired 18 Jan., 1871.

GLOSSBRENNER, John Jacob, Moravian bishop, b. in Hagerstown, Md., 24 July, 1813; d. in Churchville, Augusta co., Va., 7 Jan., 1887. After receiving a common-school education, he was apprenticed to a silversmith. In 1830 he was converted and began to read theological books. He was licensed to preach by the Virginia annual conference in 1833, and labored as itinerant missionary, circuit preacher, and presiding elder till May, 1849, when he was first elected bishop of the United Brethren in Christ. He was re-elected for the quadrennial terms, and, when no longer able to render active service, was appointed bishop emeritus, May, 1885. He visited conferences on the Pacific coast in the time of pioneer settlement, and was active in promoting the interests of his church. Previous to his death he was senior bishop, without any assigned district of labor. Several of his occasional sermons have been published in the denominational journal, "The Telescope," Dayton, Ohio. The degree of D. D. was conferred upon him by Lebanon Valley college in 1884.

GLOVER, John, soldier, b. in Salem, Mass., 5 Nov., 1732; d. in Marblehead, Mass., 30 Jan., 1797. At the beginning of the Revolution he raised 1,000 men and joined the army at Cambridge, where he was of great service in organizing and disciplining troops. He commanded the 21st regiment, afterward the 14th, which was one of the first, as well as the best, in the continental army. Being composed almost entirely of fishermen, it was called the "amphibious regiment." On the retreat from Long Island it manned the boats and crossed the entire army in safety. These troops also manned the boats and led the advance over the Delaware on the night before the victory at Trenton. Col. Glover participated in the battle of Stillwater, and was with Washington at Valley Forge. He was appointed brigadier-general on 21 Feb., 1777, and in July of that year joined Gen. Schuyler. He served in the campaign against Burgoyne, and conducted the prisoners to Cambridge. In 1778 he joined Greene's division in New Jersey, signed the protest against D'Estaing, and was detached to Rhode Island under Sullivan. He was ordered to Massachusetts in 1780 to superintend the drafts from that state. He was a member of the court of inquiry concerning Major André, which assembled on 29 Sept., 1780. Glover was diminutive in person, active and energetic, and possessed considerable military ability. See a memoir of him by William P. Upham (Salem, Mass., 1863).

John Glover

GLOVER, Sir John Hawley, governor of Newfoundland, b. in 1829; d. in England, 30 Sept., 1885. He entered the navy at an early age, and was made a lieutenant in 1851. He served in the Baltic in 1854, was given command of the "Otter," a steam vessel, in 1855, and was promoted to the rank of commander in November, 1862. After a few years' cruising on the African coast, he became governor of Lagos, an island on the coast of Guinea, which office he administered until he resigned in 1872. In 1873 he was appointed a special commissioner to the friendly native chiefs in the British settlements on the Gold Coast, and performed his mission so successfully that, on his return to England, he received the thanks of parliament and the honor of knighthood. He was appointed governor of Newfoundland in 1876, and administered this office till June, 1881, when he was appointed governor of the Leeward islands. He was again governor of Newfoundland from 1883 until his death.

GLOVER, Joseph, physician, b. about 1780; d. in Charleston, S. C., about 1840. He was graduated in the medical department of the University of Pennsylvania in 1800, and in that year became a member of the medical society of South Carolina. He was active in establishing a free dispensary in 1801, and gave his services gratuitously to the poor, receiving a vote of thanks from the trustees in 1805. Among his suggestions which the medical society made to the city council was that of planting trees, the sanitary advantages of which he showed in his report in 1808. Dr. Glover was noted for fearlessness and skill as a surgeon. He successfully performed lithotomy, removed a portion of the spleen and the omentum, and was one of the first in this country to revive the operation of tapping the head for hydrocephalus. A descrip-

tion of the case was published in pamphlet-form (1818), and was widely quoted.

GLOVER, William, governor of North Carolina, b. about 1670. In 1705 Thomas Cary obtained a commission as deputy-governor of North Carolina. While collector of the rents he had neglected to settle his accounts, and the lords proprietors, disapproving of his election to this office, directed their deputies to appoint one of their number in his place. Their choice fell upon William Glover. For a time Cary yielded to this change, but afterward seized the records of the province, and proclaimed himself governor. This led to anarchy, as the colony was soon divided into factions, the church, royalists, and adherents of the proprietaries being in Glover's division, and the party swayed by democratic instincts belonging to that of Cary. From 1706 till 1710 each party had its own government, and elected its own council. Irritated by the persecutions of Cary, the partisans of Glover at last sought refuge in Virginia.

GLÜCK, James Fraser, lawyer, b. in Niagara Falls, N. Y., 28 April, 1852. He was graduated at Cornell in 1874, and then studied law, which he now (1887) practises in Buffalo, acting as attorney for the New York Central and Hudson River railroad company and other corporations. Mr. Glück has been prominent in politics, and holds the office of president of the Central Republican club of Erie county. His work in perfecting the organization of his party in Buffalo has attracted attention throughout the United States. He is curator of the Buffalo library, and has presented that library with one of the most valuable collections of autographs, manuscripts, and letters in the United States. It includes complete book manuscripts of 106 eminent American and English authors; letters, addresses, essays, and other autograph fragments (in many cases a large number of an author's manuscripts) of about 100 eminent American men and women of letters; of eighty-eight eminent English men and women; a small collection of manuscripts of French, German, and other continental authors; Latin missals of the 15th century, Persian scripts, and many American and English historical documents, seals, and other relics. Mr. Glück is also a trustee of Cornell, a trustee of the Buffalo academy of sciences, and vice-president of the State bar association. Among his public addresses are the following: "The Position of the Scholar in Politics," delivered before the Cornell alumni in 1877; "The Power and Influence of Music," at the laying of the corner-stone of the new Music hall in Buffalo; and "The Responsibilities and Rights of the Medical Profession," at the commencement of the University of Buffalo.

GLYNN, James, naval officer, b. about 1800; d. 13 May, 1871. He entered the U. S. navy, 4 March, 1815, was made lieutenant, 13 Jan., 1825, commander, 8 Sept., 1841, and served on the California coast during the Mexican war. In command of the sloop-of-war "Preble," 14 guns, he was sent to China. From the Dutch consul at Canton, Com. Geisinger learned of the imprisonment at Nagasaki of eighteen American sailors, wrecked in Yezo, 5 June, 1846. Despite imperfect charts and unknown seas, and the fact that Com. Biddle, with the U. S. ship of the line "Columbus" and the sloop "Vincennes," had been repelled but a few months before in the Bay of Yedo, Glynn faced the northeast monsoon, and arrived in Nagasaki harbor, 17 April. Dashing through the cordon of boats, he anchored under the batteries within a mile of the city, and, when boarded by interpreters, demanded the release within two days of the American seamen, and, in the face of military menace and preparations, pressed his claim. After parleys and excuses, the whole party of eighteen was delivered on the deck of the "Preble" on the 26th. The first result of this voyage was a detailed and formal proposition made by Glynn to the U. S. government to attempt the peaceful opening of Japan by diplomacy, backed by a show of force. The expedition, as finally organized, grew to the proportions of a fleet, the command of which was claimed by officers of highest rank—first by Aulick, and then by Perry. Other results of this episode were preparation of the Japanese mind for Perry, the training of the interpreter Moriyama Yenosuke, who did good service in 1854, and of the hydrographer, Lieut. Silas Bent, the only officer in Perry's fleet conversant with Japanese waters, who, in a paper read before the American geographical society in 1856, first clearly defined and described the Kuro Shiwo, "Dark Stream," or Gulf Stream of the Pacific ocean. Glynn was made a captain in 1855.

GMEINER, John, clergyman, b. in Baernau, Bavaria, 5 Dec., 1847. He came with his parents, in 1849, to Milwaukee, Wis., entered the theological seminary there in 1859, and was ordained priest, 10 June, 1870. He was pastor of various congregations up to 1876, at the same time editing the "Catholic Columbian," and contributing frequently to German and English Roman Catholic journals. He was appointed professor of ecclesiastical history and homiletics in the seminary of St. Francis of Sales, Milwaukee, in 1876, which chair he still holds (1887). He has published "Die katholische Kirche in den Vereinigten Staaten" (Milwaukee, 1875); "Sind wir dem Weltende nahe?" (Detroit, 1877); "Modern Scientific Views and Christian Doctrines compared" (Milwaukee, 1884); "The Spirits of Darkness and their Manifestations on Earth, or Ancient and Modern Spiritualism" (1886); and "The Church and the Various Nationalities of the United States" (1887).

GODDARD, Calvin, jurist, b. in Shrewsbury, Mass., 17 July, 1768; d. in Norwich, Conn., 2 May, 1842. He was graduated at Dartmouth in 1786, studied law with Oliver Ellsworth, was admitted to the bar in 1790, and settled in Plainfield, Conn. In 1791 he was sent to the state legislature, and, with re-elections, continued to serve until 1801, being speaker during the last three years. He was then elected to congress from Connecticut, and held his seat for two terms—from 7 Dec., 1801, till 3 March, 1805. He removed to Norwich in 1807, and was a member of the state executive council from 1808 till 1815. He was a presidential elector in 1812, and a delegate to the Hartford convention in 1814. From 1815 till 1818 he was judge of the superior court of Connecticut. Subsequently, for five years, he held the office of district attorney for the county of New London, and for seventeen years was mayor of Norwich.

GODDARD, Calvin Luther, inventor, b. in Covington, N. Y., 22 Jan., 1820. He was graduated at Yale in 1845, after which he taught the classics in New York for a year. From 1846 till 1854 he was engaged as a clerk, and then began business on his own account. His attention seems to have been called at once to the necessity of thoroughly cleansing wool in the earliest stages of its manufacture, in order to secure perfection in the finished product, and to this end he arranged a burring picker. Subsequently he patented solid packing burring machines, and feed-rolls as an attachment for the carding-machine, and has since devised several valuable improvements for this machine. The steel ring feed-rolls, with ad-

justable stands and spring boxes, were also patented by him. For his inventions he has been honored with many medals, including gold medals from the world's fair held in London in 1862 and that in Paris in 1867. Bishop, in his "American Manufactures," says of Mr. Goddard: "Probably no man in the United States has labored more zealously and effectively to place American woollen goods on an equality with those of Europe."

GODDARD, Josiah, clergyman, b. in Wendell, Mass., 27 Oct., 1813; d. in Ningpo, China, 4 Sept., 1854. He was graduated at Brown in 1835, and at the Newton theological institution in 1838, was appointed a missionary to the Chinese in Siam, and arrived in Singapore in June, 1839. His labors were begun in Bangkok, Siam, in 1840. In 1848 he removed to Ningpo, where he remained until his death, preaching and working with energy, although in failing health. He prepared several tracts, an English and Chinese vocabulary, and a translation of the New Testament into Chinese.

GODDARD, Paul Beck, physician, b. in Baltimore, 26 Jan., 1811; d. in Philadelphia, Pa., 3 July, 1866. He was graduated at Washington college in 1828, and at the medical department of the University of Pennsylvania in 1832, and settled in Philadelphia, where he followed his profession. Dr. Goddard acquired reputation through his work as an editor of medical books. These include a series of twelve plates "On the Arteries," and a similar series "On the Nerves" (Philadelphia); with Joseph E. Parker, "The Anatomy, Physiology, and Pathology of the Human Teeth, with the most Approved Methods of Treatment" (Philadelphia, 1844); Moreau's "Practical Treatise on Midwifery" (1844); the iconographic portion of Rayer's "Theoretical and Practical Treatise on the Diseases of the Skin" (1845); Ashwell's "Practical Treatise on the Diseases peculiar to Women" (1848); Philip Ricord's "Illustrations of Syphilitic Diseases" (1851); Wilson's "System of Human Anatomy, General and Special" (1851); and Wilson's "Dissector, or Practical and Surgical Anatomy" (1851).

GODDARD, William, printer, b. in New London, Conn., in 1740; d. in Providence, R. I., 23 Dec., 1817. He established the first printing-press at Providence on 20 Oct., 1762, where he also began printing the "Gazette." He soon afterward became one of the publishers of the New York "Gazette and Postboy," and in 1766 removed to Philadelphia, where, with Galloway and Wharton, he published the "Pennsylvania Chronicle." In 1773 he went to Baltimore and established the "Maryland Journal." He was active in organizing the post-office, and was appointed surveyor of roads and comptroller in 1775. He sold his press in 1792, and retired to a farm in Johnston, R. I., but afterward removed to Providence. He was a Whig in the Revolution. His friend, Gen. Charles Lee (who was the writer of the "Queries" in the "Journal," which caused Goddard trouble with the Whig club in 1779), bequeathed him a portion of his extensive landed estate in Virginia. He published a "History of the Pennsylvania Chronicle" (1770).

Wm Goddard

—His son, **William Giles,** educator, b. in Johnston, R. I., 2 Jan., 1794; d. in Providence, 16 Feb., 1846. He was graduated at Brown in 1812, was professor of moral philosophy and metaphysics there in 1825–'34, and of rhetoric and belles-lettres in 1834–'42. He was editor and proprietor of the "Rhode Island American," Providence, in 1814–'25. He had been a member of the Rhode Island legislature. His writings were edited by his son, F. W. Goddard (2 vols., 8vo, Providence, 1870).

GODDU, J. H., Canadian patriot, b. in St. Denis, Canada, in 1796; d. there in 1882. At the age of sixteen he served in the Canadian voltigeurs during the war of 1812, rose to the rank of major and distinguished himself at the battles of Lacolle and Chateaugay. He was afterward present at the naval engagement of Plattsburg, where he commanded a gun-boat. He then settled on a farm, which was granted him by the government as a reward for his services, in the township of Weedon, but subsequently removed to St. Césaire. In 1837 he took an active part in the Canadian agitation. He was present, 23 Oct., 1837, at the assembly of the six confederate counties, and was one of the first to take up arms; named commander of the insurgents of St. Césaire, and reported at the head of over a hundred men at St. Mathias. The defeat of the Canadians at St. Charles convinced him that the struggle was hopeless, and he led his men back to St. Césaire, and was subsequently arrested. He was conducted to Montreal and imprisoned till 2 July, 1838, when, with six others, he entered into an agreement with Lord Durham to plead guilty of high treason. He was exiled to the Bermudas during the pleasure of the queen of England; but the proclamation of the governor-general exiling British subjects without trial was annulled. Goddu came to the United States, and after some time was allowed to return to Canada.

GODEY, Louis Antoine, publisher, b. in New York city, 6 June, 1804; d. in Philadelphia, 29 Nov., 1878. He was educated in New York, where for many years he kept a book-store and circulating library. Removing to Philadelphia, he in 1830 founded "Godey's Lady's Book," the first periodical of the kind published, which was continued by him with great success until 1877, when it was sold to a stock company. On retiring from the editorship and proprietorship of the magazine, Mr. Godey remarked that not an immoral thought or profane word could be found in its pages during the entire period of his connection with it. He also published the "Daily Chronicle" newspaper, "Jarvis's Musical Library," and "Young People's Book." Mr. Godey left a fortune of over $1,000,000, acquired entirely from his publications.

GODFREY, Thomas, mathematician, b. in Bristol, Pa., in 1704; d. in Philadelphia in December, 1749. He followed the trade of a glazier in the metropolis, and, having a fondness for mathematical studies, mastered such books as he met with, subsequently acquiring Latin, that he might become familiar with the mathematical works in that language. Having obtained a copy of Newton's "Principia," he described an improvement he had made in Davis's quadrant to James Logan, who was so impressed that he at once addressed a letter to Edmund Halley in England, giving a full description of the construction and uses of Godfrey's instrument. Halley appears to have ignored this communication, and, after a year and a half had elapsed, Logan transmitted a copy of the invention to Peter Collinson, with a request that it

be communicated to the Royal society. Meanwhile, John Hadley, then vice-president of the society, had presented a paper in May, 1731, which had been inserted in the "Philosophical Transactions" of that year, describing a reflecting quadrant of the same character, which he claimed as his own. It was decided that both were entitled to the honor of the invention, although statements were made showing how the invention of Godfrey might have become known to Hadley. The society sent to Godfrey, as his reward, household furniture to the value of £200, instead of money, on account of his habits of intemperance. Benjamin Franklin resided in the same house with Godfrey, and says that, like most great mathematicians whom he had met, he was not a pleasant companion, since he expected universal precision in everything said, and was perpetually denying or distinguishing on trifles, to the disturbance of all conversation.—His son, **Thomas,** poet, b. in Philadelphia, Pa., 4 Dec., 1736; d. near Wilmington, N. C., 3 Aug., 1763, received a fair education in his mother-tongue, and was apprenticed to a watchmaker. In 1758 he obtained a lieutenant's commission in the provincial forces raised for an expedition against Fort Duquesne. On the disbanding of the troops, he went to North Carolina and accepted an appointment of purchasing agent, remaining so occupied for three years. His employer dying, he returned to Philadelphia, and then sailed to New Providence as a supercargo. He set out to return by way of North Carolina, but contracted a fever, from the effects of which he died. While in North Carolina he wrote the tragedy of "The Prince of Parthia," which was offered to a company performing in Philadelphia in 1759. This is regarded as the first dramatic work written in this country. His early contributions to the "American Magazine," published in Philadelphia, showed poetic talent, and he subsequently published "The Court of Fancy, a Poem" (Philadelphia, 1763), modelled somewhat upon Chaucer's "House of Fame." A volume of his poems, with an "Account of T. Godfrey," was published by his friend, Nathaniel Evans, in 1767.

GODIN, Louis (go-deen'), French astronomer, b. in Paris, 28 Feb., 1704; d. in Cadiz, Spain, 11 Sept., 1760. He was graduated at the College of Louis le Grand, and studied astronomy under Delisle. His astronomical tables (1724) gave him reputation, and the academy elected him a pensionary member. He was commissioned to write a continuation of the history of the academy, left uncompleted by Fontanelle, and was also authorized to submit to the minister, Cardinal Fleury, the best means of discovering the truth in regard to the figure of the earth, and proposed sending expeditions to the equator and the polar sea. The minister approved the plan and appropriated the necessary means, the academy designating La Condamine, Bouguer, and Godin to go to Peru in 1734. The expedition sailed from Rochelle, 16 May, 1735, touched at Cadiz to take two naval lieutenants, whom Philip V. had ordered to accompany it, and proceeded to Santo Domingo, where they remained six months to take observations. They arrived in Quito in February, 1736, immediately crossed the Andes to establish their stations in the interior, and remained two years. When they had finished their task in 1738, at the invitation of the viceroy of Peru, Godin accepted the chair of mathematics in Lima, where he also established a course of astronomical lectures. When in 1746 an earthquake destroyed the greater part of Lima, he took valuable seismological observations, assisted the sufferers, and made plans by the use of which the new buildings would be less exposed to danger from renewed shocks. In 1751 he returned to Europe, but found that he had been nearly forgotten, and superseded as pensioner of the academy; and, as his fortune had been lost in unfortunate speculations, he accepted the presidency of the college for midshipmen in Cadiz in 1752. During the earthquake of Lisbon, 1755, which was distinctly felt at Cadiz, he took observations and did much to allay the apprehensions of the public, for which he was ennobled by the king of Spain. In 1779 he was called to Paris and reinstated as pensionary member of the academy; but he died on his return to Cadiz. He was the author of "Appendix aux tables astronomiques de Lahire" (Paris, 1724); "Histoire de l'académie des sciences, 1680 à '99" (11 vols., 1728); "La connaissance des temps" (1730–'3); "El temblor de tierra de Lima, sus causas, efectos y consecuencias" (Lima, 1748); "Curso de matemáticas para el uso de mis discípulos" (1750); "Observations astronomiques au Perou" (2 vols., Paris, 1752); "Des tremblements de terre en général, de ceux de Lima et Lisbon en particulier" (1753); and "Les possessions Espagnoles dans l'Amérique du Sud; le Perou, son histoire, ses richesses, et moeurs de ses habitants" (1755).—His cousin, **Jean Godin des Odonais,** French naturalist, b. in St. Amand, Cher, France, in 1712; d. there in 1792, embarked in 1735 with the expedition for measuring a degree on the equator. To be distinguished from his relative Godin, he added to his surname that of his mother, Odonais. When the commission returned to France, Godin des Odonais became professor of astronomy and natural science at the College of Quito, 1739. At the same time he studied the Indian languages and the flora of Ecuador, and when, in 1743, a marriage with an heiress gave him the means, he resigned his chair and gave his whole time to natural science and the Indian language. He explored Ecuador and the northern provinces of Peru, and collected an herbarium containing more than 4,000 species of plants. He also made drawings of over 800 species of animals. Having lost the greater part of his wife's dowry in speculations, he resolved to try his fortune in Cayenne, where he arrived in May, 1750, and settled on the banks of the river Oyapok. For fifteen years he explored Cayenne and the Brazilian Guiana, north of the Amazon, and collected nearly 7,000 species of plants. From 1765 till 1773 he explored the Amazon. In the latter year he finally returned to France, and settled on his estate of St. Amand. He gave his botanical collections to the museum of natural history, where they are still preserved. In 1784 he was elected a member of the Academy of science, and he labored thenceforth to arrange the notes taken during the many years of his explorations, and published "Flore raisonnée du Perou, comprenant 4,000 espèces, dont plus de 1,500 nouvelles" (6 vols., Paris, 1776, with two volumes of illustrations containing over 750 plates); "Les plantes de la Guayane" (1777); "Faune du Perou" (4 vols., 1778, with two volumes of illustrations); "Plan de navigation libre de l'Amazone, dedié au Duc de Choiseul" (1779); "Flore de la Guayane, explication de l'herbier déposé au museum d'histoire naturelle" (5 vols., 1779, with three volumes of illustrations); "Flore de l'Amazone, explication, etc." (4 vols., 1780, with one volume of illustrations); "Grammaire de la langue Quichua ou des Incas" (1782); "Dictionnaire de la langue Quichua" (1782); "Vocabulaire des dialectes Indiens de la Guayane" (1783); and "Grammaire comparée des langues Indiennes de l'Amérique du

Sud" (2 vols., 1784).—His wife, **Isabel**, b. in Riobamba, Peru, in 1728; d. in St. Amand, France, was the daughter of Don Pedro Emanuel de Grandmaison, who was corregidor of Otabala at the time of her birth. At the age of fifteen she married Godin des Odonais. When her husband decided in 1750 to establish himself on the banks of the Oyapok, he asked for passports from the court of Portugal to enable him to return by the Napo and Amazon for his family, which he did not receive for some years afterward. Finally the Portuguese government placed a vessel at his disposal in 1758, but as he was about to embark he fell sick, and employed a man named Orcasaval to act in his behalf. Instead of discharging this mission, the latter remained in the Portuguese settlements to trade on his own account, and Madame Godin, guided by rumor, finally set out alone. On arriving at Canelos, where she was to embark, she found it deserted on account of the small-pox. The thirty Indians composing her escort had successively abandoned her on the route, and she had with her only her son, her two brothers, and four servants. They attempted to row to the mission of Andoas, about 450 miles, from which she could easily reach the Portuguese transport, but lost their guide, and were reduced to the most frightful sufferings in the desert. At the end of three days they all died except Madame Godin, who, after wandering for several weeks through a dense wood, was taken by an Indian to the mission at Andoas. All attempts to find Orcasaval were unsuccessful, and so she never profited by the transport which the Portuguese government furnished her. She had still to travel over 3,000 miles to reach her husband, and, after a long time and much further suffering, she arrived at Oyapok, where he had remained several years waiting for his wife. Afterward they embarked for France, and arrived in La Rochelle, 26 May, 1773. The rest of Madame Godin's life was passed on her husband's estate at St. Amand in Berry. Prince Charles Bonaparte, the naturalist, has given Madame Godin's name to a remarkable species of South American birds, the "Chamæpelia Godinæ," "consecrated," he says, "to the memory, which can never be too much honored, of Isabel Godin des Odonais, who, alone and abandoned, travelled across the American continent in its greatest width, sustained by her greatness of soul and her martyrdom to duty." See her life by Ferdinand Denis, based on family documents, in the "Magasin pittoresque" (1854), and "Les voyages dans les forêts de la Guayane," by Malouet.

GODKIN, Edwin Lawrence, journalist, b. in Moyne, County Wicklow, Ireland, 2 Oct., 1831. His father, James, wrote a "Religious History of Ireland" (1873). The son was educated at a grammar-school near Wakefield, England, and at Queen's college, Belfast, where he was graduated in 1851. He was a correspondent of the London "News" in Turkey and Russia during the Crimean war, 1854–'6. In the autumn of 1856 he came to the United States, and in the ensuing winter made a journey on horseback through the southern states, a record of which appeared in letters to the "News." He studied law under David Dudley Field in New York city, was admitted to the bar in 1859, practised for a few years, and then went to Europe, owing to impaired health. He returned to New York at the close of 1862, and was a correspondent of the "News" and an editorial writer for the New York "Times" until July, 1865, when he established and became editor of "The Nation," which in 1866 passed into the hands of Mr. Godkin and two other gentlemen as proprietors. In 1881 "The Nation" was made the weekly issue of the "Evening Post," and Mr. Godkin became one of the editors and proprietors of the joint publication. He is the author of a "History of Hungary, A. D. 300–1850" (London, 1856), and of the work on "Government" in the "American Science Series" (New York, 1871).

GODMAN, John D., physician, b. in Annapolis, Md., 20 Dec., 1794; d. in Germantown, Pa., 17 April, 1830. He was left an orphan at an early age without means, and after he had been a short time at school was apprenticed to a printer in Baltimore. In the autumn of 1814 he enlisted as a sailor in the flotilla stationed in Chesapeake bay, and was present at the defence of Fort McHenry. In 1815 he began the study of medicine under Dr. Luckey in Elizabethtown, whence he soon afterward removed to Baltimore, studied under Dr. Davidge, filling the place of his preceptor, who was professor of anatomy in the University of Maryland, while the latter was disabled by sickness. After he was graduated in February, 1818, he practised successively in New Holland, Pa., Anne Arundel county, Md., Baltimore, and Philadelphia. In October, 1821, he removed to Cincinnati, where he became professor of surgery in the Medical college of Ohio, and began the publication of the "Western Quarterly Reporter," a medical periodical projected by Dr. Drake, of which only six numbers were issued. In 1822 he removed to Philadelphia, lectured on anatomy to a private class, and devoted himself more exclusively than before to scientific pursuits. He became in 1824 one of the editors of the "Philadelphia Journal of Medical Sciences," and was appointed professor of anatomy and physiology in Rutgers medical college, New Jersey, in 1826. In 1827 he resigned on account of failing health and went to the West Indies, and on his return lived in Germantown until his death. As a lecturer on anatomy and as a naturalist he had but few equals among his contemporaries in the United States, and he was also well versed in the Latin, French, and German languages. Dr. Godman had adopted the materialistic views of the French naturalists; but, having witnessed, in 1827, the death of a medical student who died a Christian, he changed his views and was ever afterward devoutly religious. He wrote articles on natural history for the "Encyclopædia Americana" to the end of the letter C, and contributed to the "American Quarterly Review" and to other periodicals. He published "American Natural History," "Rambles of a Naturalist," "Account of Irregularities of Structure and Morbid Anatomy," "Contributions to Physiological and Pathological Anatomy," "Bell's Anatomy," with notes; a translation of Levasseur's "Account of Lafayette's Progress through the United States," "Anatomical Investigations" (1824). His biography by Dr. Sewall, has been published by the Tract society.

GODON, Sylvanus William, naval officer, b. in Philadelphia, 18 June, 1809; d. in Blois, France, 10 May, 1879. He was appointed midshipman in 1819, and, after serving at sea in various parts of the world, was promoted passed midshipman in 1827, and lieutenant in 1836. He accompanied Com. Isaac Hull to the Mediterranean on the flagship "Ohio" in the years 1839, 1840, and 1841, was actively employed during the Mexican war, and was present in the bomb-vessel "Vesuvius" at the reduction of Vera Cruz. He was made commander in 1855, and captain in 1861, at the beginning of the civil war. In command of the "Mohican" he took part in the attack on Port Royal by the fleet under Admiral Du Pont. He placed his ship

in position to secure an enfilading fire on the fort on Hilton Head, and materially assisted in silencing the batteries of the enemy. In 1863 he was promoted commodore, and commanded the 4th division of Admiral Porter's fleet at both bombardments of Fort Fisher, N. C., in December, 1864, and January, 1865. In the report of the latter action he was specially commended for the support rendered the commander-in-chief, and for the good discipline and accurate firing of his ship, the "Susquehanna." At the close of the war he was made rear-admiral, and commanded the South Atlantic or Brazil squadron in 1866–'7. His last active employment was as commandant of the Brooklyn navy-yard in 1868–'70. He was retired on account of age in 1871.

GODWIN, Parke, editor, b. in Paterson, N. J., 25 Feb., 1816. His father was an officer in the war of 1812, and his grandfather a soldier of the Revolution. He was graduated at Princeton in 1834, studied law, and was admitted to the bar of Kentucky, but did not practise. He married the eldest daughter of William Cullen Bryant, and from 1837 till 1853, excepting one year, was connected with the New York "Evening Post." In 1843 he issued the "Pathfinder," a weekly, which was suspended after three months. He contributed many articles to the "Democratic Review," in which he advocated reforms that were subsequently introduced into the constitution and code of New York. He was also editor of "Putnam's Monthly," to which he contributed many literary and political articles, which were published in book-form, under the title "Political Essays" (New York, 1856). In 1865 he again became connected with the "Evening Post." During the administration of President Polk he was deputy collector of New York. Subsequently he joined the Republican party and supported it by his speeches and writings. He is the author of "Popular View of the Doctrines of Charles Fourier" (New York, 1844); "Constructive Democracy"; "Vala, a Mythological Tale" (1851); "A Handbook of Universal Biography" (1851; new ed., entitled "Cyclopædia of Biography," 1871); "History of France" (1st vol., 1861); "Out of the Past," a volume of essays (1870); and edited a new edition of Bryant's prose and poetical writings, with a life (6 vols., New York, 1883–'4).

GOES, Pero de (go'-es), Portuguese pioneer, b. in Lisbon in 1503; d. in São Salvador de Bahia, in 1554. He was a brother of Damian de Goes, the historian. He served as captain in the fleet, and by his geographical knowledge was of great service in the expedition of Martin Alfonso de Sousa to Brazil in December, 1530. In recompense of his services, Goes was given, in 1532, the district north of Sousa's captaincy of São Vicente, extending 150 miles on the coast to the river of Itapimirim, with nearly sovereign rights. He introduced the sugar-cane from the Canary islands, and soon had flourishing plantations. But the surrounding Indians were very troublesome, and Goes sailed for Portugal, in 1541, in quest of monetary resources and re-enforcements. When he returned in the next year with an expedition, he found his establishments and cane-fields burnt down, and his colonists dispersed or killed by the savages. He tried to restore cultivation, organized an expedition into the interior, defeated the Indians in many engagements, in one of which he lost an eye (1543), and for three years enjoyed tranquillity. But toward the end of 1546 the Indians again laid his plantations waste, and in 1547 he sailed for Lisbon, to lay his grievances before the court. On 12 May, 1548, he said to King John III.: "If your majesty does not soon succor the hardy colonists and captains of Brazil, before they lose property and lives, your majesty will lose the colony." Impressed by these words, the king appointed Thomé de Sousa governor-general of Brazil, and sent him, in 1549, to protect the pioneers. In his voyage of 1547 Goes is believed to have brought the first tobacco-plants to Europe. On his return to Brazil, Goes was appointed "Capitão maior," and with an armed vessel cruised on the coast, making several captures of contraband vessels. He assisted Sousa greatly in the organization of the administration and in the development of the resources of the new colony, and sent many valuable notes to his brother for his history of Portugal and its colonies. Goes had a disagreement with Sousa's successor, Duarte de Costa, in 1553, and was preparing to sail for Europe when he died.

GOESBRIAND, Louis de, R. C. bishop, b. in St. Urbain, France, 4 Aug., 1816. He studied the classics at Quimper and Pont Croix, Finisterre, and theology in the seminary of Quimper, and that of St. Sulpice, Paris. After his ordination in 1840 he resolved to devote himself to the American mission, and sailed for the United States the same year. Between 1840 and 1847 he was occupied with missionary duties in the diocese of Cincinnati. He was next appointed vicar-general of the diocese of Cleveland and rector of the cathedral. When the see of Burlington was created in Vermont, he was nominated its first bishop. He entered upon his office in 1853, and at once set about building up the diocese. He obtained several priests from Europe, and introduced the Sisters of Providence, who established a school, and took charge of the orphans. He also established convents and schools of the Sisters of Mercy, Sisters of St. Joseph, and Sisters of the Congregation of Our Lady, opened schools in Winooski, Burlington, and Rutland, and built a fine Gothic cathedral. During his administration the churches in the diocese have increased from 8 to 71, while the number of Catholics has nearly doubled.

GOESSMANN, Charles Anthony, chemist, b. in Naumburg, Germany, 13 June, 1827. He was educated at the gymnasium in Fritzlar, and then studied under Friedrich Wöhler in the University of Göttingen, where he received the degree of Ph. D. in 1853. From 1852 till 1857 he was assistant in the chemical laboratory, and privat-docent in the university. He then came to the United States, and at first was engaged in the development of the salt industry in New York and Michigan. In 1862 he became professor of chemistry in the Rensselaer polytechnic institute in Troy, but resigned that chair after two years. He was elected in 1869 to the chair of chemistry in the Massachusetts agricultural college, and in addition to his professorship has been chemist to the Massachusetts state board of agriculture since 1873, director of the state agricultural experiment station since 1882, and analyst of the Massachusetts state board of health since 1883. His contributions to chemical literature have been numerous, and include, prior to his coming to the United States, papers on organic acids contributed to the "Annalen der Chemie und Pharmacie." Dr. Goessmann's later papers include articles on sugar, salt, various foods, and special fertilization of plants. These have appeared chiefly in the reports of the organizations with which he has been connected.

GOETSCHIUS, Johannes Henricus, clergyman, b. in Liguria, Switzerland, in 1718; d. in Hackensack, N. J., about 1800. He studied at the University of Zurich, and emigrated to the United

States, probably in 1728. He studied divinity, and in 1737 applied for ordination to the presbytery of Philadelphia, but was refused, and he was ordained by his instructor. At the end of ten years' work in the ministry the question of his ordination again arose; it was submitted to the New York and Long Island conferences, and Mr. Goetschius was reordained. During the contest churches were closed against him, and some of his parishioners had their children rebaptized. In 1749 he removed to Hackensack, N. J., disagreed with his colleague on ecclesiastical questions, and so hot was the discussion as to his ordination that one Sunday, apprehending a resistance to his preaching, he buckled on a sword and entered the pulpit, prepared to use the weapon if forcibly ejected. Mr. Goetschius was an instructor in divinity and a trustee in Queens (now Rutgers) college, and, although of violent passions, was learned and devout. His publications are "The Unknown God" and "Sermons" (Newton, N. J., 1742).—His brother, **John Mauritius,** b. in Liguria, Switzerland, in 1720; d. in New Jersey about 1800, removed to this country in 1744, and practised medicine, but was persuaded by his brother, Johannes, to study for the ministry. He preached to both Dutch and Germans in Schoharie, N. Y., and also practised medicine. He was one of the original trustees of King's (now Columbia) college.

GOFF, Nathan, politician, b. in Clarksburg, W. Va., 9 Oct., 1843. He was educated at the Northwestern Virginia academy, Georgetown college, and the University of New York. In 1861 he enlisted in the National army in the 3d regiment of Virginia volunteer infantry, served as lieutenant and then adjutant of this regiment, and in 1863 was promoted major of the 4th Virginia cavalry. In 1865 he was admitted to the bar and elected to the West Virginia legislature, in 1868 was appointed district attorney, which office he resigned in 1881 to accept the secretaryship of the navy, to fill out the unexpired term of Richard W. Thompson, who had vacated it. In March, 1881, he was reappointed district attorney of West Virginia, which office he again resigned in July, 1882. He was elected to congress as a Republican in 1884, and was re-elected in 1886.

GOFFE, William, regicide, b. in England about 1605; d. in Hartford, Conn., in 1679, or, as is held by some historians, at New Haven in 1680. The weight of testimony is in favor of Hartford. He was the fourth son of Stephen Goffe, rector of Stanmore, Sussex. The elder Goffe was "a very severe Puritan," and his son inherited his hatred of papist and churchman. Prior to his joining the army in 1647 he was engaged in some commercial pursuit. He rose rapidly in the parliamentary army, becoming a major-general in 1655, with command in Sussex, Hampshire, and Berkshire. He commanded the soldiers at the clearing out of Barebones's parliament, and assisted in the violent proceeding known as Pride's purge, in which obnoxious Presbyterians were summarily excluded from parliament. He was returned a member of parliament from Yarmouth in 1654, and from Southampton in 1656, and Cromwell appointed him to a seat in his house of lords or "other house." He varied his military duties by exhorting in religious gatherings. He was made master of arts at Oxford in 1649, in company with ten other parliamentary officers. He was held in great esteem by Cromwell and by the court in general—so much so that he was spoken of with favor as the successor to the protectorship. On the news of Charles's return, Goffe, with Whalley, his father-in-law, made preparations to go to America. They arrived in Boston, 27 July, 1660, and took up their residence in Cambridge. When the news arrived in Boston, on the last day of November, that the act of indemnity passed by parliament in August excepted them from its provisions, the government of the colony began to be uneasy, and a meeting of the council was held, 22 Feb., 1661, to consult as to their security. Four days later Goffe and Whalley departed for New Haven, reaching there 7 March, 1661. Here, or in the neighborhood, they remained till 1664, when they removed to Hadley. During their stay in New Haven they at times appeared in public, but often were compelled to conceal themselves when pursued by crown officers. At one time they lived in a cave in West Rock (Providence Hill). In 1675, according to tradition, Goffe appears as a savior of the town from the Indians. The truth of the story has been cast in doubt. Prof. Franklin B. Dexter, in a paper on the regicides, in the New England colonial historical society papers, finds evidence in its favor, while a late writer in the New England historical genealogical register reexamines the testimony and decides against it. The story has been woven into fiction by Walter Scott in "Peveril of the Peak," and by Fenimore Cooper in "Wept of Wish-ton-Wish." Whalley died, it is thought, at Hadley, between August, 1674, and August, 1676. Goffe went to Hartford in 1679, and probably died soon afterward. It is held by some that he died at New Haven, and three rough stones, found in a cemetery there, are thought to mark the graves of Whalley, Goffe, and Dixwell. Goffe, from the time of his departure from Westminster, kept a diary, which was in Gov. Hutchinson's possession, and was destroyed by fire in the attack on his house in 1765. A contemporaneous transcript, covering only from 4 May to 6 Sept., 1660, found among the Winthrop papers, was printed in the Massachusetts historical society proceedings in December, 1863. Goffe's letters from 1662 till 1679, with other papers, are printed in the collection of the Massachusetts historical society (4th series, vol. iv.) from the originals in the Mather papers belonging to the Prince library, deposited in the Boston public library.

GOICOECHEA, José Antonio de Liendo y (goi-co-cha'-ah), South American naturalist, b. in Cartagena, Colombia, in 1735; d. in Guatemala in 1814. He studied in his native city and Bogotá, entered the Franciscan order, and, after serving as teacher in several of the convent-colleges of his order in Europe, was called as professor of philosophy and theology to the university of Guatemala. He was an eminent preacher, and also brought into his adopted country many useful inventions. He was an indefatigable student of natural history, and established at the university courses of instruction in botany and agricultural chemistry. In 1795 he united with some friends to establish the "Economical Society of Guatemala," under the presidency of Jacobo de Villaurrutia, which has done much for the progress of Central America. Goicoechea wrote treatises on botany, agriculture, mendicancy and the means of suppressing it, all of which were read in the Economical society, a volume of sermons, and an eloquent representation in favor of the Indians to King Charles IV.

GOLDSBOROUGH, Charles, statesman, b. in Maryland in 1760; d. in Shoals, Md., 13 Dec., 1834. He served in congress as a Federalist from 2 Dec., 1805, to 3 March, 1817, and was governor of Maryland in 1818–'19.—His cousin, **Charles Washington,** clerk of the navy department, b. in Cambridge, Md., 18 April, 1779; d. in Washington, D. C., 14

Sept., 1843, was the first clerk of the bureau of provisions and clothing of the U. S. navy, and chief clerk of the naval department from 1798 to 1812, under Secs. Benjamin Stoddart, Robert Smith, and Paul Hamilton. From 1841 until separate naval bureaus were established he was secretary of the naval board. He is the author of "The U. S. Naval Chronicle" (Washington, 1824), and an unpublished "History of the American Navy," now in manuscript and in the possession of the senior editor of this work.—Charles Washington's son, **Louis Malesherbes,** naval officer, b. in Washington, D. C., 18 Feb., 1805; d. there, 20 Feb., 1877, entered the navy as midshipman at seven years of age. He was promoted lieutenant in January, 1825, and, after serving a short time in the Mediterranean squadron, went to Paris and passed two years in study. In 1827 he joined the "North Carolina" in the Mediterranean, and while cruising in the schooner "Porpoise," in the Grecian archipelago, he commanded a night expedition of four boats and thirty-five men for the recovery of the English brig "Comet," which had been captured by Greek pirates. After a fierce fight, in which ninety of the pirates were killed, the "Comet" was rescued, and on the arrival of the expedition at Malta he received the thanks of the English government. In 1833 he married the daughter of William Wirt, and went to Florida, taking with him a colony of Germans to cultivate lands belonging to his father-in-law. During the Seminole war he commanded a company of volunteer cavalry, and also an armed steamer. In September, 1841, he was promoted commander. During the Mexican war he was executive officer of the frigate "Ohio," which bombarded Vera Cruz in March, 1847. He was senior member of the joint army and naval commission to explore Oregon and California, and to report on various military matters in 1849. From 1853 till 1857 he was superintendent of the U. S. naval academy, and commanded the sloop "Levant" in the Mediterranean, and the frigate "Congress" in the Brazil squadron in 1858–'60. He was commissioned captain in 1855. At the beginning of the civil war in 1861 he was appointed flag-officer, and placed in command of the "Minnesota," of the North Atlantic blockading squadron. In September, 1861, he planned and executed a joint army and navy expedition to the sounds of North Carolina, and captured Roanoke island, 5 Feb., 1862. (See BURNSIDE, AMBROSE.) He received the thanks of congress for this service. He was made rear-admiral in July, 1862, and assigned in 1863 to the duty of preparing a code of regulations for the naval service, and of revising the book of naval allowances. In 1865 he commanded the European squadron, in 1868 was ordered to Mare island, California, and in 1873 was placed on the retired list, and made his home in Washington. At the time of his death he had been in the service longer than any other naval officer then living, and had seen more active duty.

—Another son, **John Rodgers,** naval officer, b. in Washington, D. C., 2 July, 1808; d. there, 22 June, 1877, became midshipman in 1824, lieutenant in 1837, commander in 1855, captain in 1862, and commodore in 1867. While midshipman on the sloop "Warren," of the Mediterranean squadron, in 1824–'30, he was engaged against the Greek pirates, and in a launch with nineteen men captured the schooner "Helene," of four guns, and manned by fifty-eight pirates. In 1844–'50 he was attached to the coast survey, and in 1851–'4 to the sloop "Saratoga." During the civil war he commanded the steamer "Union" in 1861, employed in blockading Charleston, Savannah, and Cape Hatteras. He captured and sunk the Confederate schooner "York," and bombarded the fort off Point Mathias on the Potomac. He commanded the "Florida," of the South Atlantic blockading squadron, in 1862, and the "Colorado," of the West Gulf blockading squadron, in 1863. In 1866–'8 he served in the East India squadron, on the sloop "Shenandoah." In 1870 he was retired.

GOLDSBOROUGH, Robert, patriot, b. in Cambridge, Md., in 1733; d. there, 31 Dec., 1788. He was graduated at Philadelphia college (now the University of Pennsylvania) in 1760, took an active part in the ante-Revolutionary movements, was attorney-general of Maryland in 1768, and a delegate to the Continental congress of 1774–'5, and that of May, 1776.

GOLDSBOROUGH, Robert Henry, senator, b. in New Easton, Md., in 1780; d. there, 5 Oct., 1836. He was elected U. S. senator as an anti-Jackson Democrat, and served from 24 May, 1813, till 3 March, 1819. He was again elected as a Whig, without opposition, to fill the vacancy caused by the resignation of Ezekiel F. Chambers, and served from 23 Jan., 1835, till his death.

GOLDTHWAITE, George, senator, b. in Boston, 10 Dec., 1809; d. in Montgomery, Ala., 18 March, 1879. He received a primary education at a grammar-school in Boston, and at thirteen years of age entered the U. S. military academy, where he remained two years. In 1826 he removed to Montgomery, Ala., studying law with his brother Henry, and being admitted to the bar in his eighteenth year. He practised his profession until his election as circuit judge in 1843, was appointed justice of the supreme court in January, 1852, and in 1856 became chief justice, but held the office only thirteen days, when he resigned from the bench and resumed the practice of his profession. At the beginning of the civil war he was appointed adjutant-general of the state of Alabama. He was elected judge of the circuit court in 1868, but lost the office through an act of congress which disqualified him. In 1870 he was elected U. S. senator, served on the committees of claims and Revolutionary claims, and in 1877 retired to private life. —His elder brother, **Henry,** jurist, b. in Boston, Mass., in 1798; d. in Mobile, Ala., in 1847, was liberally educated in Boston, studied law, and removed to Montgomery, Ala., where he became the partner of Gov. Benjamin Fitzgerald. He edited a newspaper, served in the state legislature several terms, and afterward removed to Mobile, where he was a successful lawyer. From 1839 until his death he was a judge of the supreme court of Alabama.

GÓMEZ, Antonio, Mexican musician, b. in the city of Mexico in 1805; d. in Tulancingo in 1876. At the age of eight he studied with Izquierdo and Ginesta, and when scarcely ten years old published several small compositions of his own, which were favorably received. He became leader of the orchestra of Garcia's Italian opera company in

1827. Gomez founded in Mexico a conservatory of music, but abandoned it for want of pecuniary assistance, and the musical library of the cathedral, of which he was appointed director, was arranged by him. In 1854 Gomez became organist of the new cathedral at Tulancingo, but in his latter years sickness prevented him from continuing his labors. Among his compositions are: "La Independencia," for piano, flute, and violoncello; "Miserere," for eight voices and grand orchestra; a Te Deum; psalms; vespers; matins; and several masses; all for full orchestra.

GÓMEZ, Antonio Carlos (go'-meth), Brazilian musician, b. in Campinas, São Paulo, in 1839. His father was leader of a military band in Campinas, and cultivated his son's love of music from his earliest years. At the age of eleven he left school, and began the study of music. He excelled as a performer on the piano, and in São Paulo gave a series of concerts with his brother José Pedro, a violinist, in 1856. At that time he composed several romances and one popular song, "Tão longe de mim distante," which was soon known all over the empire. He then went to Rio Janeiro, where he was admitted to the conservatory of music, and soon made remarkable progress. In 1861, when the national opera was established, Gomez presented his first opera, "Noites e del castello," which met with great success. The imperial government gave him a pension for four years, that he might perfect his studies in Europe. In 1870 he returned to Brazil. His most noteworthy opera, "Guarany," was represented for the first time in Rio Janeiro in 1872, and has also been given in several theatres of Italy and some of the capitals of Europe. His other operas include "Horca" (1874), "Salvator Rosa" (1875), and "Cromwell" (1876).

GÓMEZ, Esteban, Spanish navigator, b. in Cadiz, Spain, in 1478 (or, according to Barbosa Machado, in Oporto in 1474); d. at sea in 1530 (or, according to Barbosa, in Toledo in 1534). He had served in the Portuguese East India fleet, acquired a reputation as a skilled pilot, and was pilot of the "San Antonio," commanded by Juan de Cartagena, on Magellan's expedition in 1519. Irritated by his failure to obtain the appointment of chief pilot of the expedition, he fomented an insurrection, in January, 1520, which was promptly suppressed by Magellan, but Gomez escaped execution with the other rebels, because his services as pilot were needed. He afterward incited the crew of the "San Antonio" to mutiny, and on his arrival in Portugal, 24 March, 1521, was imprisoned, but soon set at liberty. In 1524, when the difficulties between Spain and Portugal respecting the limits of their colonial discoveries arose, Gomez was one of the council of pilots appointed to decide this question, and proposed to the emperor to avoid these difficulties by seeking a western passage to the East Indies by the north of the new continent. His proposal was accepted, and, in command of a caravel, he left San Lucar in November, 1524. He reached the coast of Florida in January, 1525, and continued his voyage north, exploring every inlet in quest of the desired passage, including one in about 37° north latitude, probably Chesapeake bay. On arriving at latitude 42° N. without discovering any western passage, he resolved to return, but explored the country from the 42d to the 40th parallel, and filled his vessel with captured natives, which he sold as slaves on his return to San Lucar in August, 1521. On presenting himself at court, he was unfavorably received by the emperor, who, according to Gomara, reproached him with the capture of the Indians, as he would thereby discredit future explorers. He now tried to interest some merchants in a new expedition of discovery, and sailed in 1530 with two vessels for another exploration, but was never heard of again. Barbosa Machado, in his "Biblioteca Lusitana," says that Gomez died in Toledo in 1534 in high favor at court. Gomez left a manuscript diary of his voyage, published in 1529 by the cosmographer Diego Ribera, with a map, in which the position of the present states of Connecticut, Rhode Island, and Massachusetts is marked "Land of Esteban Gomez, discovered by him in 1525, by order of His Majesty; abundance of trees, game, salmon, turbot, and soles, but no gold is found."

GÓMEZ, Valentín, Argentine statesman, b. in Buenos Ayres in 1774; d. there in 1833. He was graduated at the University of Cordoba as doctor in theology in 1795, and at the University of Chuquisaca in civil and canonical law in 1796. He was appointed professor of philosophy in the University of Cordoba in 1799, took holy orders in 1802, and soon afterward was appointed prebendary canon of the cathedral of that city. When the war of independence began in 1810, he espoused the cause of liberty, protecting the patriots from the persecutions of the royalists, and collecting subscriptions for the revolutionary cause. At the battle of Piedras he fought so valiantly that he was mentioned honorably in the general order of the day. After the triumph of independence, he settled in Buenos Ayres, and was for several years rector of the university of that city. He was elected deputy to congress, and became secretary and president of that body. He was appointed minister to London in 1821, and in 1823 to Brazil.

GÓMEZ-FARÍAS, Valentín (go'-meth-fah-re'-as), Mexican statesman, b. in Guadalajara, 14 Feb., 1781; d. in the city of Mexico in July, 1858. He studied medicine in his native city, and in 1810 was appointed professor of the university. Later he practised in Aguas Calientes, and joining the cause of independence he equipped a battalion at his own expense. After the fall of Iturbide, he was elected a member of the first constituent congress, and attracted the hatred of the church party by his liberal principles. After the fall of Gen. Bustamante and the short administration of Gomez Pedraza, he was elected vice-president with Santa-Anna, and, as the latter was absent, assumed the executive on 1 April, 1833. He immediately abolished the legal expropriation for unpaid church-tithes, prohibited the admission of new monks to the existing cloisters, and attacked the privileges which military chiefs had arrogated. In consequence there were several revolts, but these were soon quelled. The clergy now tried to bribe Gomez by the offer of a fortune; but he refused indignantly, and on 4 Jan., 1835, a so-called constitutional congress assembled, which refused to acknowledge the authority of the president. Gomez, tired of the struggle, left the country, but in 1838 returned to Mexico, where he was received by a public ovation. The jealousy of the president, Bustamante, caused him to be sent to prison, but he was rescued by a popular rising. In 1840 he led an unsuccessful attempt at revolution, and was banished a second time. He returned to Mexico in 1845, and in 1846 was again elected vice-president, with Santa-Anna as president. As the latter had to take command of the army in the war with the United States, Gomez took charge of the executive; but in February, 1847, there was a revolt against him, which continued till 21 March, when it was quelled by Santa-Anna. The vice-presidency was abolished by a decree of the

congress, and Gomez was elected a deputy to that body. In 1850 he was a defeated candidate for the presidency. When Santa-Anna declared himself dictator in 1853, Gomez-Farias took part against him, and was one of the committee that elected Alvarez president in October, 1855. He was appointed postmaster-general, and in 1857 took part in the formation of the liberal constitution.

GÓMEZ-PEDRAZA, Manuel, Mexican statesman, b. in Soto la Marina (according to others, in Queretaro) in 1789; d. in the city of Mexico, 14 May, 1851. He was educated in Queretaro, entered the militia, and at the beginning of the revolution of 1810 remained faithful to the royalists. When Iturbide proclaimed the empire in 1822, Gomez sided with him, and became commander of the city of Mexico. He surrendered the city to the republican authorities, and in 1825 was appointed by President Victoria secretary of war. He became president in 1828, defeating the ultra liberal party under Guerrero, and the latter, complaining of fraud in the elections, appealed to arms. Gomez fled to Europe on 4 Dec., and returned in 1830, but Gen. Bustamente ordered him to leave the country immediately, and he went to the United States, fixing his residence in Pennsylvania. He was afterward recalled, and was president again in 1832–'3. In 1841 he was minister of state under the second administration of Santa-Anna, and in 1842, 1844, and 1845 was deputy to congress, where he acquired fame as an orator. In 1850 he was again a candidate for the presidency, but was defeated, and died as a director of the government bank of loans.

GONANNHATENHA, Frances, Indian convert, b. in Onondaga, N. Y.; d. there in 1692. She had been converted by Father Fremin and became a model of piety and charity in the Caughnawaga village to which her husband belonged. Hearing one day that a hostile party was going in the direction of the place where her husband was hunting, she started in her canoe with two others to give him warning. She fell into the hands of the enemy, who, after torturing her, brought her to Onondaga and placed her in the custody of her sister, who surrendered her. On the scaffold she made a profession of her faith and of her happiness in dying for it. A relative used every entreaty to persuade her to renounce Christianity, and, maddened by his failure, tore her crucifix from her neck, and with his knife slashed a cross on her naked breast. "I thank you, brother," she said; "it was possible to lose the cross you have taken from me, but you have given me one I only can lose with my life." She then addressed those present with great force, exhorting them to embrace the faith. She was then tortured for three successive nights and barbarously put to death. The narrative of her martyrdom is taken from the accounts of Frenchmen who were prisoners among the Onondagas at the time.

GONZÁLEZ, Francisco Javier (gon-thal'-eth), South American soldier, b. in Colombia in 1760; d. in Bogotá in 1832. He entered the Republican army in 1810, and continued in active service until 1832, becoming lieutenant in 1810, captain in 1812, lieutenant-colonel, 11 Jan., 1813, and colonel on 4 Oct. He paid all the expenses of his regiment in the campaign of 1813–'14, and, after the defeat of the Republicans in the latter year, returned to Bogotá, where he was taken prisoner by the Spaniards in 1816, and condemned to death. He regained his liberty by forfeiting his estates and paying $35,000 to his captors. Gen. Morillo, taking advantage of his extreme poverty, offered him every inducement to enter the Spanish army and organize the militia, but Gonzalez refused. When the news of the defeat of the Spaniards in Boyaca reached Bogotá, 8 Aug., 1819, the authorities fled, leaving the capital in the power of a mob. Gonzalez assembled the Republicans, restored order, and guarded the public treasure, amounting to $4,000,000, until the arrival of Bolivar, who appointed him governor and commander-in-chief of the province of Cundinamarca. He devoted himself to the task of organizing and drilling troops during the eleven years that he was commander of the province. In the civil war which followed the war of independence, Gonzalez served the legitimate government.

GONZÁLEZ, José María de Jesus, clergyman, b. in Guadalajara, Mexico, 21 Aug., 1803; d. in Santa Barbara, California, 3 Nov., 1875. He was a member of the order of St. Francis, and was sent to the San Jose mission, Cal., in 1832. In 1839 he was appointed vice-commissary and president of the mission. In 1846 he was made vicar-capitular of the two Californias, and in 1847 was nominated bishop. He was vicar-general from 1852 till 1858, and also guardian of the apostolical college of Zacatecas in 1855. He was appointed president of the college of Santa Barbara in 1858, and continued in that office till his death.

GONZÁLEZ, Manuel, Mexican soldier, b. near Matamoros Tamaulipas, Mexico, in 1820. He began to figure in the civil wars of Mexico about 1853, fighting with the reactionary party under the guerilla chief Marcelino Cobos. (See Cobos.) Up to 1861 he participated in all the engagements between the reactionary and the Liberal partisans, and with other guerillas was the terror of the valley of Mexico. He has been many times wounded in battle, and his right arm was twice shattered, once requiring an amputation. When the allied armies of France, England, and Spain invaded Mexico in December, 1861, he offered his sword to the Liberal leader, Juarez. He was ordered to join Gen. Vidaurri near the northern frontier; but in 1863 the latter complained to the secretary of war that Gonzalez was of a rebellious disposition, and requested that he might be recalled. After accompanying the president in his flight from the capital as far as San Luis Potosi, he made a countermarch to the mountains of Hidalgo, where he maintained himself till the year 1865. Toward the end of the year, he made a rapid march through the midst of the French and imperial forces, joined Gen. Escobedo, and accompanied him in his advance toward the south. He was promoted colonel in 1866, brigadier-general in 1867, and in June entered the capital with Escobedo, Corona, and Berriozabal. In 1869 he was appointed governor of the government palace by Juarez, and he occupied this position till 1871, when he was arrested on a charge of complicity in the disappearance from the palace of the gold and silver plate which had belonged to the emperor Maximilian. He took advantage of the revolution of 1871 to escape, and joined the forces of Porfirio Diaz. He afterward refused to submit to the government of

Lerdo de Tejada, and in January, 1876, joined the third rebellion of Porfirio Diaz, and organized in the eastern frontier states bodies of light cavalry that harassed and checked the government forces. On 16 Nov., 1876, during the decisive battle of Lomas de Tecoac, between Alatorre and Diaz, Gonzalez arrived at the head of 3,000 cavalry, and with a vigorous attack disorganized and entirely routed Alatorre. This action decided the overthrow of Lerdo's government, and in 1878 Diaz appointed Gonzalez secretary of war, in which office he did much for the Mexican army. In 1879 he was made commander-in-chief of the northwestern district, where he soon quelled all seditious movements, and, returning to Mexico, received from congress the rank of general of division, and the title of "Pacificator of the Occident." In June, 1880, he resigned the portfolio of war, as his candidacy for president had been proclaimed by Diaz. He was declared elected on 25 Sept., and on 30 Nov. assumed the executive, and appointed Diaz secretary of public works. His administration was distinguished by financial mismanagement. He decreed extraordinary import duties on foreign manufactures, doubled the stamp-duty, and debased the currency by the issue of a great quantity of nickel coins, which were largely disposed of to speculators at a discount. The opposition to these culminated in a riot in 1884, which led to their withdrawal and redemption by the government. The proposition to allow the government the use of about £18,000,000 for expenses to be incurred in settling the English debt led to another riot in November, 1884 (see DIAZ). In the same year the Monte de Piedad bank was forced to suspend by the efforts of a rival institution, and through reports that government would make a demand on the bank for a forced loan, which proved unfounded. Gonzalez also published a decree suppressing the liberty of the press. On 30 Nov., 1884, he resigned the government to his successor, Gen. Diaz, with a bankrupt exchequer. He has since been governor of the state of Guanajuato. On 30 Oct., 1885, there was presented in congress a resolution of impeachment against the ex-president for misappropriation of public funds, which in November was referred to the section for the grand jury of the congress for action. This accusation has not been pressed.

GONZÁLEZ BALCARCE, Antonio, South American soldier, b. in Buenos Ayres, Argentine Republic, in 1774; d. there, 5 Aug., 1819. He entered the army at an early age, was taken prisoner by the English in Montevideo, 5 Nov., 1807, and remained in England until the declaration of peace. He then went to Spain and fought against the armies of Napoleon. He returned to South America in 1809, and took part in the Argentine revolution of 25 May, 1810. Gonzalez was appointed major-general of the expedition to assist the revolutionists of Peru, and gained the victories of Suypacha and Cotagaita. He was then made commander-in-chief of the army, and soon afterward entered the city of La Plata, and was appointed its prefect. He filled the office of president of the republic in 1816, crossed to Chili to join the army of San Martin in the following year, and commanded the infantry in the battle of Maypu, 5 April, 1818. As commander of the army of the south he drove the Spaniards from Concepcion. He then returned to Buenos Ayres, and died suddenly while engaged in preparing a plan of defence for the city against the Spaniards.

GONZÁLEZ DE SANTA CRUZ, Roque, South American missionary, b. in Asuncion, Paraguay, in 1576; d. in Uruguay in 1628. He was born of Spanish parents, entered the Society of Jesus in 1609, and was sent as a missionary to the Guaycurus. He effected numerous conversions, among them that of the cacique and his wife, and in 1611 determined to found a "reduction" or Indian colony on the river Jejuy, an affluent of the Parana, at 24° south latitude. He had already formed several Indians into a community when he was summoned in 1613 to take charge of the reduction of St. Ignatius, near the Parana. He subsequently converted a large body of Indians at Itapua, and, after visiting Asuncion for supplies, founded at the former place an Indian village containing nearly 800 families. In August, 1616, he founded a third colony on the St. Anne river. On 8 Dec., 1623, he laid the foundation of a colony which he called Conception, and which soon had a population of nearly 4,000. In 1626 he founded the colony of St. Nicholas, containing 400 families, and that of St. Francis Xavier, with 1,200, as well as several others. He was murdered by order of a cacique, who feared the missionary was undermining his authority.

GONZÁLEZ DEL VALLE, Manuel, Cuban lawyer, b. in Havana in October, 1802; d. there in January, 1884. He studied at the university of his native city, received the diploma of doctor of philosophy, and was admitted to the bar. He taught law and philosophy in the University of Havana, and filled many high offices in that city. He published a "Diccionario de las Musas" (New York, 1827); "Programa de Materias filosóficas" (Havana, 1839); "Artículos sobre Psicología" (1840); and "Estudios de la Moral" (1843).—His brother, **José Z.,** author, b. in Havana, Cuba, in 1820; d. in Madrid, Spain, in October, 1851, studied law in his native city. He went to Madrid to finish his education, and was admitted to the bar in 1840. He was for many years professor of natural philosophy in the University of Havana, but, on account of his health, went to Spain in 1850, and was appointed honorary secretary to the queen. He published several novels, including "Luisa," "Carmen y Adela," and "Amar y Morir" (1839); "Tropicales," a volume of poems (Havana, 1842); "Viajes por Europa" (1843); "Guirnalde Fúnebre" (1844); "Rasgo Histórico de la Filosofía" (1848); and "Lecciones de Meteorología" (1849).—Another brother, **Ambrosio,** physician, b. in Havana in 1822, was graduated in medicine in his native city in September, 1846, and appointed to fill the chair of anatomy at the university. He is a member of several Spanish scientific societies, and has done much to improve the sanitary conditions of Havana. He published "Manual del Flebotomiano" and "Manual de Obstetricia" (1849); "Muerte Aparente" (1863); "Higiene Pública" (1870); and "Tablas Obituarias" (1870–'8).

GONZÁLEZ-VIGIL, Francisco de Paula, Peruvian author, b. in Tacna, 15 Sept., 1792; d. in Lima in 1876. He entered the seminary of Arequipa, and was ordained priest in 1818, but afterward became vice-rector of the College of the independence, of Arequipa. In 1825 he was elected deputy to congress, and came to Lima. He opposed the dictatorship of Bolivar, and voted against the constitution which that general tried to impose on Peru. In 1832 he was again elected deputy, and in 1834 was editor of the "Genio del Rimac," the organ of the Liberal-reform party, but subsequently retired to his native city, whence he was called in 1836 to take charge of the National library. In 1837 he was again elected to congress and in 1838 re-elected, when he proposed the indictment of the government of Gamarra, but

afterward devoted himself to literature until he again took charge of the National library. For some time he was one of the editors of "El Constitucional." His great work is "Defensa de la Autoridad de los Gobiernos contra las pretensiones de la Curia Romana" (6 vols., Lima, 1848), the second part of which appeared under the title "Defensa de la Autoridad de los Obispos" (4 vols., 1856). He also published "Los Jesuitas" (4 vols.); "Cartas á Pio IX. con Documentos," "Roma, ó el Principado Político del Romano Pontífice," "Diálogos sobre la Existencia de Dios," "Defensa de Bossuet y de Fénelon," "Catecismo Patriótico," and numerous political and social pamphlets, including "Paz perpétua en América."

GOOCH, Frank Austin, chemist, b. in Watertown, Mass., 2 May, 1852. He was graduated at Harvard in 1872, and was an assistant under Prof. Josiah P. Cooke in the chemical laboratory until 1875. Subsequently he was associated in the analytical work performed in Newport, R. I., under the authority of the U. S. geological survey, receiving in 1877 the degree of Ph. D. from Harvard for his original researches. In 1879 he was appointed special agent to the tenth U. S. census, and was detailed as an expert to make analyses of coals and iron ores. His report on these subjects appears in one of the volumes of the census. From 1881 till 1884 Dr. Gooch was chief chemist of the northern transcontinental survey, and from 1884 till 1886 assistant chemist to the U. S. geological survey in Washington. In 1886 he was appointed professor of chemistry in Yale, and has undertaken the reorganization of that department, which, owing to the development of the Sheffield scientific school, had for some time been neglected. The Kent chemical laboratory at Yale, the construction of which was to have been begun in 1887, was planned by him. Dr. Gooch is a member of scientific societies, and his contributions to chemical literature, though few in number, have been of great value. They consist principally of descriptions of improved methods of analysis, and of new forms of apparatus, including the "Gooch filter," which is now extensively used.

GOOCH, Sir **William,** bart., governor of Virginia, b. in Yarmouth, England, 21 Oct., 1681; d. in London, 17 Dec., 1751. He served with distinction under Marlborough in the low countries, and rendered important services in the rebellion of 1715. In 1727 he succeeded Sir Hugh Drysdale as governor of Virginia, in which office he continued until 1747. In 1740 Gov. Gooch joined Admiral Vernon in his expedition against Cartagena, New Grenada (See Eslaba, Sebastian), was severely wounded, and contracted the fever from which many of the English squadron died. He returned to Virginia, and in 1746 was appointed brigadier-general in the army raised to invade Canada, but declined to serve. The same year he was created a baronet and appointed major-general. In 1749, after twenty years' service as governor of Virginia, he returned to England "amid the blessings and tears of his people, among whom he had lived as a wise and beneficent father." In April, 1745, Gov. Gooch made an address opposing all religious organizations except the established church, and proposing punishments for other bodies that should convene in public for religious purposes.

GOODALE, Elaine, poet, b. in Mount Washington, Berkshire co., Mass., 9 Oct., 1863. Her life has been closely associated with that of her sister, **Dora Read,** b. in Mount Washington, 29 Oct., 1866. The sisters were brought up on their father's farm. Elaine learned to read very early, and began to make verses almost as soon as she began to write. Her sister also composed verses at the age of six. In a short time both were enthusiastic students, and were educated chiefly by their mother. After a time the children established a monthly paper for the entertainment of the family, Elaine being the editor and copying into it their various compositions. A selection of these appeared in "St. Nicholas" for December, 1877. Elaine became a teacher in the Hampton, Va., institute, and editor of the Indian department of the "Southern Workman" in 1883. In 1885 she made a six weeks' tour of observation on the Great Sioux reservation, and recorded her impressions in a series of papers printed in New York and Boston journals. On 1 Nov., 1886, she was appointed government day-school teacher at White river camp, Lower Brule agency, Dakota. She has published "Journal of a Farmer's Daughter" (New York, 1881), and the joint publications of the two sisters consist of the following collections of their poetry: "Apple Blossoms: Verses of Two Children," selected from the work of the preceding six years (New York, 1878); "In Berkshire with the Wild Flowers" (1879); and "Verses from Sky Farm," an enlarged edition of the preceding (1880).

GOODALE, George Lincoln, botanist, b. in Saco, Me., 3 Aug., 1839. He was graduated at Amherst in 1860, and received his medical degree at Harvard and Bowdoin in 1863. For three years he practised in Portland and was instructor of anatomy in the Portland school for medical instruction, becoming also in 1864 state assayer of Maine. In 1867 he was called to the chair of natural science and applied chemistry in Bowdoin, and in 1868 was made professor of materia medica in the medical school of Maine, and also a member of the board of agriculture. He resigned these offices in 1872, and became instructor in botany and university lecturer on vegetable physiology in Harvard. In 1873 he was made assistant professor of vegetable physiology, in 1878 professor of botany, and in 1879 director of the botanic garden. Dr. Goodale was elected a member of the council of Harvard college library in 1875, and in 1881 a member of the faculty of the Museum of comparative anatomy. He is a member of the American academy of arts and sciences and of other scientific societies. Besides various memoirs on botanical subjects, Dr. Goodale has published "Wild Flowers of North America" (Boston, 1882); "Vegetable Physiology" (New York, 1885); and "Vegetable Histology" (1885). The last two with other matter have been combined under the title of "Physiological Botany," to form the 2d volume of Gray's "Botanical Text-Book" (1885).

GOODALE, Nathan, loyalist, b. in Salem, Mass., in 1741; d. in Newton, Mass., in 1806. He was graduated at Harvard in 1759, and was one of the loyalists that signed the address approving Gov. Hutchinson's course in 1774, but recanted. He also signed a similar address to Gen. Gage. Early in 1775 he retired to Nantucket, and after the organization of the Federal government he was clerk of the U. S. courts in Massachusetts.

GOODALL, Albert Gallatin, bank-note engraver, b. in Montgomery, Ala., 31 Oct., 1826; d. in New York city, 19 Feb., 1887. His mother, having been left a widow in straitened circumstances, removed with her family to the Creek reservation in Alabama, and engaged in farming, but was driven out with the other settlers in 1836 by the Indians. She then emigrated to Galveston, Tex., and died the year following. When fifteen years of age, young Goodall entered the Texan navy as

a midshipman, remaining three years, and seeing active service during the war between Mexico and Texas. In November, 1844, he went to Havana, Cuba, and about a year afterward began to learn copper-plate engraving. He removed to Philadelphia in 1848, became acquainted with Jacob Perkins's method of engraving on steel, and, coming to New York, connected himself with the firm from which was afterward organized the American bank-note company, of which he was during the last twelve years of his life the president. In 1858 he went to Europe on a business mission, visiting Greece, Turkey, Russia, Norway, and Sweden, then and during subsequent visits obtaining all the foreign orders executed by the company. The Greek bank-notes were the first foreign notes engraved on steel, those ordered by the czar coming next in order. Besides his European contracts Mr. Goodall secured several large orders from the South American states. He was presented in 1860 by Alexander II. of Russia with a costly seal ring set in diamonds, and in 1879 was made "knight commander" of the "Order of the Rose" by the emperor of Brazil. In 1860 he went to St. Petersburg in charge of five American engravers, to execute an order obtained by him the year previous, and to instruct Russian engravers in American methods. Besides being skilful with the burin, Mr. Goodall was a proficient linguist, and the masonic fraternity, of which he was an active member, was indebted to him for the translation of the proceedings of various foreign lodges.

GOODE, George Brown, ichthyologist, b. in New Albany, Ind., 13 Feb., 1851. He was graduated at Wesleyan in 1870, and in 1871 took charge of the college museum. In 1873 received an appointment on the staff of the Smithsonian institution. From 1874 till 1887 he held the office of chief of the division of fisheries, and on the organization of the National museum became its assistant director. The natural history division of the U. S. government at the Philadelphia exhibition in 1876 was under his supervision. He was U. S. commissioner to the international fishery exhibitions held in Berlin in 1880, and in London in 1883, and was also a member of the government executive board for the New Orleans, Cincinnati, and Louisville expositions in 1884. In 1877 he was employed by the department of state as statistical expert in connection with the Halifax fisheries commission, and in 1879–'80 was in charge of the fisheries division of the tenth census. He has travelled through Europe for the purpose of studying the methods of administration of public museums, and has made extensive natural history explorations in the Bermudas and Florida. His published papers are numerous, and include about 100 titles on topics in ichthyology, museum administration, and fishery economy. Dr. Goode has published in book-form "Catalogue of the Fishes of the Bermudas" (Washington, 1876); "Annual Resources of the United States" (1876); with Tarleton H. Bean, "A Catalogue of the Fishes of Essex County" (Salem, 1879); "Game Fishes of the United States" (New York, 1879); "American Fisheries: A History of the Menhaden" (1880); "Materials for a History of the American Mackerel Fishery" (Washington, 1882); "Materials for a History of the Sword Fishes" (1882); "The Natural History of the Bermuda Islands" (1882, edited); "A Review of the Fishing Industries of the United States" (London, 1883); "The Fisheries and Fishery Industries of the United States" (Washington, 1884); "The Status of the United States Fish Commission in 1884" (1884); "The Beginnings of Natural History in America" (1886); and "Britons, Saxons, and Virginians" (1887).

GOODE, John, solicitor-general, b. in Bedford county, Va., 27 May, 1829. He was graduated at Emory and Henry college in 1848, studied law at Lexington, Va., and was admitted to the bar in 1851. In the latter year he was elected a member of the Virginia house of delegates, and in 1861 sat in the State convention that passed the ordinance of secession. He was twice sent to the Confederate congress, serving from 22 Feb., 1862, until the end of the war, and during the recesses of that body acted as volunteer aide on the staff of Gen. Jubal A. Early. After the war Mr. Goode removed to Norfolk, Va., but is now (1887) engaged in the practice of the law in Washington, D. C. Shortly after his removal to Norfolk he was again elected to the Virginia legislature, and was then chosen to congress as a Democrat, serving from 6 Dec., 1875, till 3 March, 1881. Mr. Goode was a member of the National Democratic conventions of 1868 and 1872, and was a presidential elector in 1852, 1856, and 1884. In May, 1885, he was appointed solicitor-general of the United States, and retained the office until August, 1886. During his term of service he visited British Columbia, to represent the United States in an extradition case.

GOODE, William Osborne, legislator, b. in Mecklenburgh county, Va., 16 Sept., 1798; d. in Boydton, Va., 3 July, 1859. He was graduated at William and Mary, studied law, and was admitted to the bar in 1821, beginning the practice of his profession at Boydton. He was for many years a member of the legislature, taking an active part in the debates on slavery in 1832, and was sent as a delegate to the State reform convention in 1827–'32. He was afterward elected to congress as a Democrat, serving from 31 May, 1841, till 3 March, 1843. He was again, for several successive years, chosen to the state legislature, and was three times elected speaker of the Virginia house of delegates. He was a member of the State constitutional convention of 1850, and was again elected to congress, serving from 5 Dec., 1853, to 3 March, 1859. He was re-elected, but died before taking his seat. Regarding slavery, he was in favor of gradual emancipation.

GOODELL, William, missionary, b. in Templeton, Mass., 14 Feb., 1792; d. in Philadelphia, Pa., 18 Feb., 1867. He was graduated at Dartmouth in 1817, spent the three years following in the Andover theological seminary, and in 1822 sailed for the island of Malta, as a missionary. After a year spent there in the study of languages, he proceeded to Beirut, where he remained five years, enduring many hardships and dangers, the town being plundered, his house sacked by Bedouin Arabs, and his life threatened, after the repulse of the Greeks in March, 1826. Mr. Goodell went, in 1831, to Constantinople, where he labored especially among the Armenians. During his twenty-nine years of missionary life Dr. Goodell was compelled to change his residence thirty-three times. The crowning work of

W. Goodell

his life, to which he devoted the greater part of his time during the fifteen years preceding its publication, was the translation of the Scriptures from the original Greek and Hebrew into Armeno-Turkish. The Old Testament was completed in 1841, and the New Testament about two years afterward. He spent several years' additional labor upon the work, and finished its revision in 1863. Enfeebled by age and long residence in the east, he returned to the United States in 1865. He had received the degree of D. D. from Hamilton college in 1854. During the remaining years of his life he contributed to the New York "Observer" a series of papers entitled "Reminiscences of the Missionary's Early Life," which he did not live to complete.—His wife, **Abigail P.,** b. in Holden, Mass., in 1799; d. in Philadelphia, 11 July, 1871, gave her husband efficient aid in his work.—Their son, **William,** physician, b. in Malta, 17 Oct., 1829, was graduated at Williams in 1851, and at Jefferson medical college in 1854. He first practised his profession for six years in Constantinople, when he returned to the United States, establishing himself at West Chester, Pa. In 1865 he removed to Philadelphia, where after lecturing for three years in the medical department of the University of Pennsylvania, he was, in 1874, appointed clinical professor of the diseases of women and children. Dr. Goodell has been a prolific writer on subjects connected with his specialty, and is the author of "Lessons in Gynæcology" (Philadelphia, 1886).—Another son, **Henry Hill,** educator, b. in Constantinople, 20 May, 1839, was graduated at Amherst in 1862. He entered the army and served until 1863, when he was aide-de-camp on the staff of Col. Bissell, of the 19th army corps. He taught the modern languages at Williston seminary, Easthampton, Mass., in 1864–'7, and afterward in the Massachusetts agricultural college at Amherst, of which institution he was chosen president, 1 July, 1866. He is the author of a "Biographical Record of the Class of Sixty-two" (Amherst) and of a "Compilation of Historic Fiction" (Amherst, 1876).

GOODENOW, John M., lawyer, b. in Massachusetts in 1782; d. in Steubenville, Ohio, in 1838. He received a public-school education, studied law, was admitted to the bar, and practised in Steubenville, to which place he was an early emigrant. He was a prominent mason, served in the legislature, and held other offices. He was elected to congress as a Jackson Democrat, serving from 7 Dec., 1829, till 9 April, 1830, when he resigned to become judge of the supreme court of Ohio. He had a large practice at the bar, and published "American Jurisprudence in Contrast with the Doctrine of English Common Law" (1819). The object of this work, of which only 100 copies were printed, was to prove that the courts in the state were not possessed of common law jurisdiction.

GOODFELLOW, Edward, editor, b. in Philadelphia, Pa., 23 Feb., 1828. He was graduated at the University of Pennsylvania in 1848, and entered the government service as aid and sub-assistant in the U. S. coast survey. In 1860 he became assistant in the U. S. coast and geodetic survey, and was executive assistant from 1861 till 1862, and again from 1875 till 1882. He then became editor of the publications of the survey, and in that capacity has edited the annual reports for the years from 1882 till 1886.—His brother, **Henry,** soldier, b. in Philadelphia, Pa., 27 Aug., 1833; d. in Fort Leavenworth, Kansas, 29 Dec., 1885, accompanied the Arctic expedition of Dr. Elisha K. Kane from May, 1853, until October, 1855, and received the medals presented by the British government to those who served on expeditions in search of Sir John Franklin. Subsequently he studied law, and was admitted to the Philadelphia bar in 1859, and to practise before the U. S. circuit court in 1861. He entered the National army as captain in the 61st Pennsylvania volunteers, and served continuously with the Army of the Potomac until the battles of the Wilderness and Spottsylvania, receiving the brevets of lieutenant-colonel and colonel for gallant conduct in the battles of Gettysburg and the Wilderness. In February, 1867, he became major and judge-advocate in the U. S. army, and at the time of his death was judge-advocate of the Department of the Missouri.

GOODHUE, Benjamin, senator, b. in Salem, Mass., 1 Oct., 1748; d. there, 28 July, 1814. He was graduated at Harvard in 1766, and early engaged in commercial pursuits. He was a member of the state senate from 1784 till 1789, when he was elected to the 1st congress from Massachusetts, and served from 1789 till 1795. His knowledge of business affairs proved of service to him as a legislator, and, with the assistance of Mr. Fitzsimmons, of Philadelphia, he drew up a code of revenue laws, the majority of which are still in force. In 1796, on the resignation of George Cabot, he was elected to the U. S. senate, serving until 1800, when he resigned and retired from public life. During his term as senator he gained an enviable reputation as chairman of the committee on commerce.—His son, **Jonathan,** merchant, b. in Salem, Mass., 21 June, 1783; d. in New York city in 1848, received a liberal education, and at the age of fifteen entered the counting-room of John Norris, of Salem, who was extensively engaged in trade with Europe and the West Indies. After two voyages as supercargo, Mr. Goodhue established himself in business in New York city in 1807. The long embargo, and the subsequent war with England, were unfavorable to his business, and on receipt of the news of the conclusion of peace he despatched an express to Boston, with instructions to proclaim the tidings in every town on the route. After this period Mr. Goodhue became a prosperous merchant.

GOODMAN, John, physician, b. in Frankfort, Ky., 22 July, 1837. He was graduated at Georgetown college in 1856, and at the University of Louisiana in 1859. He subsequently began practice at Louisville, making a specialty of obstetrics and the diseases of women. In 1860 he was demonstrator of anatomy in the Kentucky school of medicine, in 1868 was appointed professor of obstetrics in the Louisville medical college, and in 1875 was chosen to fill the same chair in the first-named institution. He has contributed to medical literature "A New Method of conducting the After-Treatment in the Operation for Vesico-vaginal Fistula," "Treatment of Chronic Cystitis in the Female," "Menstruation and the Law on Monthly Periodicity," etc.

GOODMAN, Walter, artist, b. in London, England, 11 May, 1838. He studied his profession under J. M. Leigh and at the Royal academy, where he was admitted a student in 1857. In 1860 he went to the Continent, where he remained three years. In 1864 he accompanied Señor Joaquin Cuadras, a Spanish artist, to the West Indies, where he resided for five years, most of the time in Cuba. He not only painted during his stay on that island, but wrote for the New York and local press. To the latter he contributed a series of humorous sketches entitled "Un Viaje al Estranjero." He was arrested and imprisoned in Moro Castle on suspicion of being connected with the Cuban revolution of 1869, and compelled to leave the island. After a year in the United States, he returned to England, where he devoted himself to portrait-painting. He was the

first European artist to obtain a commission from a native of China. Mr. Goodman has painted portraits of Sir Thomas and Lady Brassey, Wilkie Collins, the Duke of Edinburgh, and others. He also contributes to periodical literature both drawings and articles. A series of sketches of life in Cuba, first published in "All the Year Round," have been since collected in book-form under the title of "The Pearl of the Antilles; or, an Artist in Cuba."

GOODRICH, Aaron, jurist, b. in Sempronius, Cayuga co., N. Y., 6 July, 1807. His father moved to western New York in 1815, and the son spent part of his minority on a farm. He studied law in Buffalo, N. Y., and Dover, Tenn., was admitted to the bar, and began practice in Stewart county, Tenn. He was a member of the legislature in 1847 and 1848, and a presidential elector in 1848, having taken an active part in the canvass of that year, as a Whig. He was appointed by President Taylor in 1849 chief justice of the recently organized territory of Minnesota, and served three years. Subsequently he practised law in St. Paul, and after the admission of Minnesota into the Union, in 1858, he was appointed by the legislature one of a commission to revise the laws and prepare a system of pleading and practice. Two years later he was made chairman of a similar commission. Judge Goodrich continued to take an active part in politics, and was a delegate to the National Republican convention at Chicago, 1860, where he warmly supported his friend, William H. Seward. In March, 1861, at Mr. Seward's suggestion, he was appointed by President Lincoln secretary of legation at Brussels, which office he held eight years, serving repeatedly as chargé d'affaires at his post, and as bearer of despatches to and from his government. He is the author of "A History of the Character and Achievements of the so-called Christopher Columbus" (New York, 1874).

GOODRICH, Charles Augustus, clergyman, b. in Ridgefield, Conn., in 1790; d. in Hartford, Conn., 4 Jan., 1862. He was graduated at Yale in 1812, studied theology with Dr. Yates, of East Hartford, and in 1816 was ordained and installed as pastor of the 1st Congregational church in Worcester, Mass., where he remained four years. In 1820 he settled in Berlin, Conn., and in 1848 removed to Hartford, where he held a pastorate. He was a member of the state senate, and held other offices of trust. He was associated with his brother Samuel (Peter Parley) in writing books for the young, and also published the following volumes independently: "View of Religions" (1829); "Lives of the Signers" (Hartford, 1829; 2d ed., New York, 1836); "History of the United States of America" (Boston, 1852–'5; revised edition, 1867); "Family Tourist" (1848); "Family Sabbath-Day Miscellany" (Philadelphia, 1855); "Geography of the Chief Places mentioned in the Bible" (New York, 1855); "Greek Grammar" (Hartford, 1855); "Child's History of the United States" (Philadelphia, 1855); "Bible History of Prayer" (1855); "Great Events of American History"; "Outlines of Geography"; and "Universal Traveller."—Charles Augustus's brother, **Samuel Griswold** (PETER PARLEY), author, b. in Ridgefield, Conn., 19 Aug., 1793; d. in New York city, 9 May, 1860, in 1823–'4 travelled abroad, and on returning to the United States became a book-publisher in Hartford, Conn., and began to issue juvenile tales there. Removing thence to Boston, from 1828 till 1842 he edited an original annual, "The Token." The contributions and illustrations to this were exclusively the products of American authors and artists, and it contained poems, tales, and essays, from the pen of the editor. The encouragement that he gave to young writers became proverbial. Among these was Nathaniel Hawthorne, the best of whose "Twice-Told Tales" appeared originally in "The Token." In 1838–'9 Mr. Goodrich was in the Massachusetts senate, and did much to improve and reform legislation. He established, and from 1841 till 1854 edited, "Merry's Museum and Parley's Magazine." He was consul of the United States in Paris from 1851 till 1855, during Fillmore's administration. While there he arranged for the publication of a series of books in France, under his supervision. Mr. Goodrich published altogether about 200 volumes, mainly juvenile and educational, which achieved a wide popularity. About 170 of the number were issued under the name of "Peter Parley." Their popularity in this country led to their republication in Europe, and subsequently his pen-name was fraudulently attached to over seventy volumes in this country and abroad. Mr. Goodrich retired from active authorship in 1859. While most of his publications were of the character of compilations, he issued some meritorious original books. His publications include "The Poetical Works of John Trumbull" (1820); "Tales of Peter Parley about America" (New York, 1827); similar books on Europe, Asia, Africa, and other countries (1828–'34); "Outlines of Chronology, Ancient and Modern" (Boston, 1832); "The Outcast and other Poems" (New York, 1836); "Fireside Education" (1838); "Pictorial Geography of the World" (Boston, 1841); "Sketches from a Student's Window" (1841); "Pictorial Natural History" (2 vols., 1842; 2d ed., 1859); "Poems" (New York, 1851); "Faggots for the Fireside" (1854); "Winter Wreath of Summer Flowers" (1854); "History of All Nations" (1855); "Personal Recollections of Poets, Philosophers, and Statesmen" (1856); "Thousand and One Stories of Fact, Fancy, and Humor, Rhyme, Reason, and Romance" (1858); "The Captive of Nootka" (Philadelphia, 1859); and "Illustrated Natural History of the Animal Kingdom" (2 vols., 1859). A full list of his works up to 1857, and also a list of works attributed to him, is contained in his "Recollections of a Lifetime, in a Series of Familiar Letters" (New York, 2 vols., 1857).—Samuel Griswold's son, **Frank Boott,** author, b. in Boston, Mass., 14 Dec., 1826, was graduated at Harvard in 1845. He was first brought into notice by his Paris letters to the "New York Times," signed "Dick Tinto," which were collected into a volume entitled "Tri-colored Sketches of Paris" (New York, 1854). His other published works are as follows: "Court of Napoleon, or Society under the First Empire" (New York, 1857); "History of Maritime Adventure, Exploration, and Discovery" (Philadelphia, 1858); "Women of Beauty and Heroism" (New York, 1859); "Flirtation and what comes of It," a comedy in five acts (1861); "The Tribute-Book, a Record of the Munificence, Self-

Sacrifice, and Patriotism of the American People during the War for the Union" (New York, 1865); "World-Famous Women, from Semiramis to Eugénie" (1870); "Remarkable Voyages: or Man upon the Sea" (Philadelphia, 1873). He also began the translation of Balzac's novels into English, but, after the publication of two volumes (New York, 1860), the enterprise was abandoned. It was resumed in 1886 by a Boston house.

GOODRICH, Charles Rush, naturalist, b. in Troy, N. Y., 16 March, 1829; d. in Flushing, N. Y., 22 Aug., 1855. He was graduated at Yale in 1849, and studied medicine, but never practised, becoming a chemist and naturalist. He edited, with Prof. Benjamin Silliman, Jr., "The World of Science, Art, and Industry," illustrated with 500 drawings from the New York exhibition of 1853 (New York, 1854), and was one of the editors of "Practical Science and Mechanism" (1854).

GOODRICH, Elizur, clergyman and scholar, b. in Wethersfield, now Rocky Hill, Conn., 26 Oct., 1734; d. in Norfolk, Conn., 22 Nov., 1797. He was graduated at Yale in 1752, and was tutor there in 1755–'6. He was then ordained as a Congregational minister, and settled in Durham, Conn., retaining his pastorate till 1797. In 1766, to supplement his income, he began to prepare students for college. His thorough scholarship made him a successful teacher, and during the following twenty years he instructed more than 300 young men. He was frequently sent by the general association of Connecticut as a delegate to conventions and synods in New York and Philadelphia from 1766 till 1777. He was an able astronomer, and spent much time in mathematical studies, calculating the eclipses of each successive year. He drew up the fullest and most accurate account ever published of the aurora borealis of 1780. He accumulated a library which was regarded as the largest and most complete ever brought into the colonies on private account. Dr. Goodrich was at one time a candidate for governor of Connecticut, and in 1777 his name was proposed for the presidency of Yale, but the opposing candidate, Dr. Stiles, was elected by a small majority. He was a fellow of the college from 1776 till 1797, and served on its prudential committee during the whole of Dr. Stiles's presidency, and a part of that of Dr. Dwight. He received the degree of D. D. from Princeton college in 1783. His published works consist of sermons and addresses (1761–'90). — Elizur's son, **Chauncey,** statesman, b. in Durham, Conn., 20 Oct., 1759; d. in Hartford, Conn., 18 Aug., 1815, was graduated at Yale in 1776, was tutor there in 1779–'81, and also studied law. He was admitted to the bar in 1781, began to practise in Hartford, and soon attained eminence. He was a member of the state house of representatives in 1793, and was then elected a representative in congress, serving from 1795 till 1801. He was a member of the state executive council in 1802–'7, and in the latter year was elected to the U. S. senate in place of Uriah Tracy, deceased, serving till 1813, when he resigned, to accept the office of lieutenant-governor of Connecticut. He was also mayor of Hartford and a delegate to the Hartford convention of 1814.—Chauncey's wife, **Mary Ann,** daughter of Oliver Wolcott, a signer of the Declaration of Independence, was one of the most distinguished beauties of her time. Her portrait, on this page, is taken from an original picture in the possession of Frederick H. Wolcott.—Another son, **Elizur,** jurist, b. in Durham, Conn., 24 March, 1761; d. in New Haven, Conn., 1 Nov., 1849, was graduated at Yale in 1779, was a tutor there in 1781–'3, studied law, was admitted to the bar, and began practice in New Haven in 1783. He was a presidential elector in 1797, and was chosen a representative to congress, as a Federalist, serving from 1799 to 1801. He was appointed collector of customs in New Haven in the latter year, but was removed by Jefferson immediately on his accession to the presidency. The discussion of this act drew from Jefferson the letter in which he avowed his approval of removal for political opinions. Mr. Goodrich was judge of probate for seventeen years, judge of the county court for twelve years, professor of law in Yale in 1801–'10, and mayor of New Haven from 1803 till 1822. Yale college conferred the degree of LL. D. on him in 1830.—The second Elizur's son, **Chauncey Allen,** lexicographer, b. in New Haven, Conn., 23 Oct., 1790; d. there, 25 Feb., 1860, was graduated at Yale in 1810, served as tutor there in 1812–'14, and afterward studied theology. He settled in Middletown, Conn., in 1816 as pastor of the Congregational church there, but feeble health obliged him to leave in 1817. In 1820 he was chosen president of Williams college, but declined the office. He was professor of rhetoric and oratory in Yale from 1817 till 1839, when he was transferred to the chair of pastoral theology in that institution, and held it till his death. Dr. Goodrich exerted a wide influence, and co-operated with many learned societies. As a teacher he inspired his pupils to the highest effort. He was a liberal benefactor of the Yale divinity-school. The degree of D. D. was conferred on him by Brown university in 1835. Dr. Goodrich made numerous contributions to periodical literature, and in 1829 established the "Christian Quarterly Spectator," with which he was connected nearly ten years, being its sole editor after 1836. While a tutor in Yale, Dr. Goodrich published a Greek grammar (1814), and in 1830, at the request of President Dwight, he prepared a text-book, "Greek and Latin Lessons" (1832), which was extensively used in New England. Soon after the publication of the "American Dictionary," by his father-in-law, Noah Webster (1828), Dr. Goodrich was intrusted by its author with power to superintend an abridgment of the work, which he did, conforming the orthography more nearly to the common standard. This edition, in the preparation of which he was assisted by Benjamin Silliman, Denison Olmsted, and others, was issued in 1847, and the "Universal" edition of the same work appeared in 1856. In 1859 the supplement was issued, to which comprehensive additions were made. At the time of his death Dr. Goodrich was engaged on a radical revision of the dictionary, but he died before the work received its final form, and it was published under the supervision of Noah Porter (1864). He was also engaged in preparing a new edition of the Bible, with English text, as one of the American Bible society's "committee on ver-

sions." Dr. Goodrich was also the author of "Select British Eloquence" (1852). A commemorative discourse by President Theodore D. Woolsey has been published in pamphlet-form (New Haven, 1860).—Chauncey Allen's son, **Chauncey,** clergyman, b. in Middletown, Conn., 20 July, 1817; d. in New Haven, Conn., 27 March, 1868, was graduated at Yale in 1837, after which he studied in the theological department. In 1843 he was made pastor of the Congregational church in Malden, Mass., and in 1849 of the church in Watertown, Conn., which charge he resigned in 1856 because of feeble health. Thereafter he resided in New Haven, occupied with literary labors, chief among which was the continuation of his father's work in the revision of Webster's dictionary. He was secretary of the New Haven colony historical society, for which body he prepared and read valuable papers.—Another son, **William Henry,** clergyman, b. in New Haven, Conn., 19 Jan., 1825; d. in Lausanne, Switzerland, 17 July, 1874, was graduated at Yale in 1843, studied in the divinity-school from 1844 till 1847, and held pastorates in Bristol, Conn., Binghamton, N. Y., and Cleveland, Ohio. He died while on a foreign tour taken for his health. He received the degree of D. D. from Western Reserve college in 1864. Dr. Goodrich was a brilliant pulpit orator, published sermons and addresses, and was a frequent contributor to the religious press.

GOODSON, John, physician, b. in England; d. in Philadelphia, Pa., 28 Dec., 1727. He was the first English physician that came to Pennsylvania under Penn's charter, and was among the first that bought lands in the province of the "Free society of traders." Immediately after his purchase he was appointed "chirurgeon" to the society, and was sent to the province, arriving there shortly before Penn. Previous to his coming to this country he had practised his profession in London. In 1685 he was appointed a judge of the courts of common pleas and quarter sessions and the orphans' court, which office he held many years. From 1686 till 1701 he was one of the proprietaries commissioners of property, and in November, 1694, was appointed by Penn to be deputy-governor, or assistant to Gov. Markham, which office he filled until October, 1696, when he resigned. He was an elder of the Society of Friends.

GOODWIN, Daniel, jurist, b. in Geneva, N. Y., 24 Nov., 1799. He was graduated at Union college in 1820, studied law, and was one of the early emigrants to Michigan territory. He was U. S. district attorney for Michigan in 1834–'41, judge of the supreme court in 1843–'50, president of the State constitutional convention of 1850, and a member of that of 1867. In 1850–'81 he was circuit judge for the upper peninsula of Michigan. Judge Goodwin served repeatedly in the legislature, and in 1851 appeared for the people in the trial known as the "railroad conspiracy case."—His son, **Daniel,** b. in New York city, 26 Nov., 1832, was graduated at Hamilton college in 1852, studied law in Auburn, N. Y., and Detroit, Mich., and in 1855 was U. S. master in chancery for Michigan. He was judge-advocate of militia in 1856, and assistant U. S. attorney in Chicago in 1862–'4. He has been U. S. commissioner for Illinois since 1861, and a trustee of the Illinois eye and ear infirmary since 1866. He has published "James Pitts and his Sons in the American Revolution" (Chicago, 1882); "The Dearborns" (1884); "The Lord's Table" (1885); and "Provincial Pictures" (1886).

GOODWIN, Daniel Raynes, clergyman, b. in North Berwick, Me., 12 April, 1811. He was graduated at Bowdoin at the head of his class in 1832, and entered Andover theological seminary, but left in 1835 to become a tutor in Bowdoin, where he soon afterward became professor of modern languages, first spending two years in Europe in preparation. He remained at Bowdoin until 1853, and while there took orders in the Protestant Episcopal church, being ordained deacon, 13 July, 1847, and priest, 10 Sept., 1848. He became president of Trinity college, Hartford, in 1853, and professor of Christian ethics, but removed to Philadelphia in 1860 to become provost of the University of Pennsylvania, where he taught intellectual and moral philosophy. In addition to this, when, in 1862, the diocesan divinity-school was organized, he took the professorship of apologetics, which he exchanged in 1865 for that of systematic divinity. He resigned his office in the university in 1868, in order to devote himself to the divinity-school. He was made its dean, and held the office till 1884, when he again became professor. The university then conferred upon him the degree of LL. D., and he had previously received that of D. D. from Bowdoin in 1853. He has been sent as a delegate to every general convention of his church in the United States for twenty-five years, is one of the foremost low-church presbyters in Pennsylvania, and for many years not only has been president of the standing committee of his diocese, but has largely directed its legislation. Among his publications are "Southern Slavery in its Present Aspects," containing a reply to Bishop Hopkins on slavery (1864); "The New Realistic Divinity neither the Religion of the Bible and Prayer-Book nor of the Holy Catholic Church" (1879); a "Memorial Discourse on Henry W. Longfellow," before the alumni of Bowdoin college (1882); "Notes on the Revision of the New Testament Version" (1883); and "Christian Eschatology" (1885).

GOODWIN, Ichabod, governor of New Hampshire, b. in North Berwick, N. H., 10 Oct., 1796; d. in Portsmouth, N. H., in 1882. His education was received at the South Berwick academy. Shortly after leaving that institution he entered the counting-house of Samuel Lord, a merchant and ship-owner of Portsmouth. He became supercargo and afterward master of one of his employer's ships, and followed the sea till 1832, when he established himself in Portsmouth as a merchant. He was six times a representative in the legislature between 1838 and 1856, and was a delegate at large from New Hampshire to the National conventions at which Clay, Taylor, and Scott were nominated by the Whigs for the presidency, serving as vice-president of the first two bodies. He served twice in constitutional conventions, and was several times an unsuccessful Whig candidate for congress, being the last nominee of that party for governor of the state. In 1859 he was the successful Republican candidate for the same office, and was re-elected for the succeeding term, which expired in June, 1861. When President Lincoln made his call for troops in 1861 the legislature was not in session, and the municipal banking institutions undertook the task of raising and equipping troops. Gov. Goodwin accepted $680,000, and with this sum raised and equipped ten regiments. Gov. Goodwin was active in the Unitarian church, and was widely known for his charities. He was connected with many railroad and other corporations, and with charitable institutions.

GOODWIN, John Noble, statesman, b. in South Berwick, Me., 18 Oct., 1824. He was graduated at Dartmouth in 1844, studied law, was admitted to the bar in 1848, and began practice in South Berwick. He was elected to the senate of

Maine in 1854, and afterward as a representative to congress, serving from 1861 till 1863, when he was appointed chief justice of Arizona territory. He became the governor of Arizona territory in August, 1863, and held the office two years, after which he represented the territory as a delegate in congress, serving from 1865 till 1867.

GOODWIN, Nathaniel, genealogist, b. in Hartford, Conn., 5 March, 1782; d. there, 29 May, 1855. He was apprenticed to a printer in Albany, and afterward became a teacher and land-surveyor. At Hartford he was many years treasurer and judge of probate, and was often employed in the settlement of estates. He published an account of the "Descendants of Thomas Olcott" and "The Foote Family." After his death appeared his "Genealogical Notes of Some of the First Settlers of Connecticut and Massachusetts," with a memoir (1856).

GOODWIN, William Frederick, author, b. in Limington, Me., 27 Sept., 1823; d. in Concord, N. H., 12 March, 1872. He was graduated at Bowdoin in 1848, and taught in a high-school in Concord, N. H., and in New Bedford, Mass., from 1851 till 1853. He was then graduated at the Harvard law-school in 1854, and began practice in Concord in 1855. He was appointed 1st lieutenant of the 16th regular infantry in May, 1861, and after acting as mustering officer in New Hampshire, joined his regiment in March, 1863, and was engaged at the actions of Hoover's Gap and Chickamauga, where he was wounded. He was brevetted captain for gallant conduct in that battle, and was retired in 1865, from incapacity resulting from his wound, after receiving his promotion to a captaincy in 1864. After his retirement he was disbursing officer in Rhode Island in 1865, and was afterward on duty in Ohio and in the Department of the Potomac. Capt. Goodwin gave much time to antiquarian and historical researches, and was a frequent contributor to the "Historical Magazine." He was the author of a "History of the Constitution of New Hampshire of 1776, 1784, 1792"; "Records of Narragansett Township, No. 1" (printed privately, 1871); and at his death had in preparation "Narragansett, No. 2," now portions of adjoining towns, which, together with the last-named work, was to constitute a "History of Buxton, Me., 1733–1811." He was also engaged on a "Biography of Gen. Alexander Scammel," and left various manuscripts, which have not been published.

GOODWIN, William Watson, scholar, b. in Concord, Mass., 9 May, 1831. He was graduated at Harvard in 1851, studied at Bonn, Berlin, and Göttingen, and was tutor at Harvard from 1856 till 1860, after which he became Eliot professor of Greek literature, and still (1887) holds that chair. He was first director of the American school of classical studies at Athens, Greece, in 1882–'3, and was president of the American philological association from 1872 till 1885. Prof. Goodwin is also a member of the Imperial archæological institute of Germany, of the American academy of arts and sciences, and of the Massachusetts historical society, and is a knight of the Greek order of the Saviour. He received the degree of Ph. D. from the University of Göttingen in 1855, and that of LL. D. from Amherst, and from the University of Cambridge, England, in 1883. He has been an extensive contributor to literary and philological journals, and to the transactions of various learned societies in the United States and England. He has published and edited various reports, including "Report on the American School of Classical Studies in Athens" (Boston, 1883), and "Papers of the American School of Classical Studies at Athens, Vol. 1st, edited by William W. Goodwin and Thomas W. Ludlow" (1885). His works include "Syntax of the Moods and Tenses of the Greek Verb" (Cambridge, 1869; revised ed., 1865; London, 1873); "Elementary Greek Grammar" (Boston, 1870; enlarged ed., Boston and London, 1879); a "Greek Reader," with Joseph H. Allen (Boston, 1871; 2d ed., edited by William W. Goodwin, with alterations, 1877); and an edition of Xenophon's "Anabasis," Books I.–IV., with John W. White (Boston and London, 1877).

GOODYEAR, Charles, inventor, b. in New Haven, Conn., 29 Dec., 1800; d. in New York city, 1 July, 1860. He was the son of Amasa Goodyear, who was the first to make hay-forks of spring-steel instead of wrought-iron. The son's education was acquired in the New Haven public schools, and on coming of age he became a member of the firm of A. Goodyear & Sons in Philadelphia. The business proved profitable until 1830, when the failure of southern houses compelled the firm to suspend.

Chas Goodyear

Meanwhile the development of the India-rubber industry had begun, large quantities of the crude gum were imported into the United States, companies for its manufacture into shoes were organized, and indeed there was an India-rubber mania in the years 1830–'6 similar to the subsequent gold-fever and petroleum craze. The products of these companies, however, were unsatisfactory. It was very simple to make shoes in winter, but the heat of the summer soon softened and destroyed them. In 1834 Goodyear first turned his attention to this substance, and from then until his death the idea of producing from it a solid elastic material occupied his entire mind. His experiments were conducted in Philadelphia, New York, and in different towns of Massachusetts, with his family always in want, and himself frequently in prison for debt;, but on the receipt of a few dollars he would purchase new materials and renew his investigations. The first gleam of hope that came to him was in 1835, when he found that by boiling a compound of the gum and magnesia in quicklime and water an article was obtained that seemed to be all that he could desire. He obtained a patent for the process, and sold his product readily; but it was soon found that a drop of weak acid, such as apple-juice or vinegar and water, destroyed the effects of the lime and made the cloth sticky. A year later he found that the action of nitric acid on rubber produced a "curing" superior to anything hitherto made. The secret now seemed to be discovered. A partner with ample capital was found, the abandoned rubber-works on Staten Island leased, and a store on Broadway secured, but the panic of 1837 swept away the fortune of his partner, and left Goodyear penniless again. For some time he vainly endeavored to induce some one to furnish him with money, so that he might place his invention on the market. He was regarded as an object of ridicule, and was called an India-rubber maniac. At this period he was

described as "a man with an India-rubber coat on, India-rubber shoes, an India-rubber cap, and in his pocket an India-rubber purse and not a cent in it." Failing of success in New York, he settled in Roxbury, Mass., where E. M. Chaffee placed at his disposal the plant of the Roxbury rubber company, and for a time he prospered, selling rights under his patents; but the nitric-acid process cured only the surface of the material, and the goods were valueless except in the form of thinnest cloth. His bright prospects vanished, his property was sold, and once more he was penniless. He was strongly urged to discontinue his experiments, but a persistent faith in the ultimate success of his efforts led him to persevere. Meanwhile he found that Nathaniel Hayward (*q. v.*), in his employ, was in the habit of sprinkling sulphur on the surface of the rubber and drying it in the sun. The effect produced was similar to that obtained by nitric acid, and, believing himself to be on the verge of an important discovery, he continued his experiments. Early in 1839 he found that the application of considerable heat to the sulphured article would cause it to become pliant in cold weather, to have its elasticity increased at all times, and its offensive odor much diminished. After years of patient work, during which he strove to determine the exact conditions under which the most favorable results would ensue, though at times he was so reduced that he sold his children's school-books to purchase new material, he finally, after being aided by his brother-in-law, William DeForrest, obtained, in 1844, his patent for vulcanized rubber. He continued till his death to improve the process of vulcanization and to extend the uses to which the improved material could be put. As he was unable to comply with certain of the requirements of the law of France, his patent was declared void in that country, and he was equally unfortunate in England. There his method was superseded by that of Thomas Hancock, who "re-discovered" the process after receiving information from Goodyear, with whom he was carrying on negotiations for the introduction of rubber into England. He acquired about sixty patents, and the original vulcanizing patent was extended in 1858, but an application in 1867 was refused, owing to the persistent opposition of those who, during his lifetime, grew rich by infringing on his rights. The benefits conferred on humanity by Goodyear's patents have been nowhere more conspicuous than in connection with the military service during the civil war. The great council medal of the world's fair held in London in 1851 was conferred on him, and he also received the grand medal of the world's fair held in Paris in 1855 together with the cross of the legion of honor, which was presented to him by Napoleon III. Although he died in debt, he lived to see his material applied to nearly 500 uses, and to give employment to upward of 60,000 persons. Dr. Leander Bishop says: "In the art of modifying the curious native properties of caoutchouc and gutta-percha, and of moulding their plastic elements into a thousand forms of beauty and utility, whether hard or soft, smooth or corrugated, rigid or elastic, American ingenuity and patient experiment have never been excelled." See Bradford K. Peirce's "Trials of an Inventor" (New York, 1866), and Parton's "Famous Americans of Recent Times" (Boston, 1867).

GOOKIN, Charles, deputy governor of Pennsylvania. He bore the title of colonel, and was deputy governor of Pennsylvania under William Penn from February, 1709, till May, 1717. He was selected because of his thoughtful demeanor and supposed wisdom, but it was afterward learned that he was deranged. Until the session of 1714, harmony prevailed between the assembly and the governor. The remainder of his term of office was stormy. On 15 Feb., 1714, the day for the convening of the assembly, the weather was severe, and a quorum failed to assemble. This embittered him, and when, on the following day, an organization was effected, he roundly abused the committee sent to him, and drove them from his door. He once removed all the chief justices of New Castle county for doing their duty in an action against his brother-in-law, leaving the county without a magistrate for six weeks. At another time, when the judges of the supreme court at New Castle refused to permit a certain commission of his to be published in court, he sent for one of the judges and kicked him. The breach made by his eccentricities widened until 1717, when, on petition of the council, he was removed. One of William Penn's letters says: "His grandfather, Sir Vincent Gookin, had been an early great planter in Ireland in Kings James I. and Charles I. days."

GOOKIN, Daniel, soldier, b. in Kent, England, about 1612; d. in Cambridge, Mass., 19 March, 1687. He came with his father to Virginia in 1621. During the Indian massacre of 1622, Gookin, with thirty-five men, held his plantation, at what is now Newport News, against the savages. In May, 1644, in consequence of his doctrinal sympathies with the Puritans, he removed to Cambridge, Mass., where he was soon afterward appointed a captain of militia and a member of the house of deputies. In 1651 he was speaker of the house, and in 1652 elected a magistrate. In 1656 he was appointed by legislative enactment superintendent of all the Indians who acknowledged the government of Massachusetts, an office which he retained until his death, although he became unpopular because of the protection which, as a magistrate, he extended to the Indians. He zealously co-operated with John Eliot in his efforts for their spiritual instruction. King Philip's war led to the passage of several measures against the Natick and other Indians, who had submitted to the English. Gookin was the only magistrate who joined Eliot in opposing these measures, and consequently subjected himself to reproaches from his fellow-magistrates, and insult in the public streets. He visited England in 1656, and was authorized by Cromwell to invite the people of New England to colonize Jamaica, then recently conquered from Spain. He went to England again in the following year, returning in 1660 in the same ship with the fugitive regicides, Goffe and Whalley, whom he aided in protecting. He was one of the licensers of the Cambridge printing-press in 1662. In 1681 he was made major-general of the colony. He took an active part on the side of the people against the measures which terminated in the withdrawal of the colonial charter in 1686. He died so poor that John Eliot solicited from Robert Boyle a gift of £10 for his widow. His "Historical Collections of the Indians of Massachusetts," written in 1674, was published by the Massachusetts historical society in 1792. He was also author of a "History of New England," never published, the fate of which is unknown.—His grandson, **Nathaniel,** clergyman, b. in 1688; d. in 1734, was graduated at Harvard in 1703, and ordained in 1710. He published three sermons on the occasion of the earthquake in October, 1727; to which were added an account of the earthquake, and of some remarkable thunder-storms.

GORDON, Adoniram Judson, clergyman, b. in New Hampton, N. H., 19 April, 1836. He was graduated at Brown in 1860, and at Newton theological seminary in 1863. He was ordained 29 June, 1863, and in the same year became pastor of the Baptist church at Jamaica Plains, Mass. In 1869 he accepted a call to the Clarendon street Baptist church, Boston, of which he is still pastor (1887). He is a trustee of Brown university, from which he received in 1877 the degree of D. D. His publications include "Grace and Glory" (Boston, 1880); "In Christ" (1872); "Ministry of Healing" (1882); and "Twofold Life" (1884). He was also one of the compilers of the hymn-book known as the "Service of Song."

GORDON, Andrew Robertson, Canadian explorer, b. in Aberdeen, Scotland, 13 Feb., 1851. He was educated in his native city, entered the British navy in 1864, was specially promoted for a meritorious examination in 1871, and retired from the service with the rank of lieutenant in October, 1873. He then removed to Canada and became attached to the meteorological observatory in Toronto, and was appointed deputy superintendent of the meteorological service of Canada in 1880. In pursuance of a project to connect Manitoba and the northwest to Hudson bay by means of a railway, an expedition, commanded by Lieut. Gordon, was fitted out in 1884 to determine the length of that part of the year during which the bay was navigable, and to make surveys. Explorations during three seasons, from 1884 till 1886, proved that the bay would admit of safe navigation during four months of the year. By this route the distance to Europe would be lessened by many hundred miles. He published official charts and sailing directions of his explorations.

GORDON, Clarence, author, b. in New York city, 28 April, 1835. His ancestor, John, came from Scotland to New Haven, Conn., about 1760, and his father was a cotton-merchant. Clarence was graduated at the Lawrence scientific school of Harvard in 1855. He resided chiefly in Savannah, Ga., till 1860, lived in or near Boston in 1862–'8, and then removed to Newburg, N. Y., where he still (1887) resides. He was special agent of the U. S. census bureau in 1879–'83, in charge of the investigation of meat-production in the grazing states, and has since engaged in the real-estate business. He has contributed largely to journals and magazines, and besides his census report (Washington, 1884) has written stories for boys, under the pen-name of "Vieux Moustache." These include "Christmas at Under-Tor" (New York, 1864); "Our Fresh and Salt Tutors" (1866); "Two Lives in One" (1870); and "Boarding-School Days" (1873).

GORDON, George Henry, soldier, b. in Charlestown, Mass., 19 July, 1825. He was graduated at the U. S. military academy in 1846, and assigned to the mounted rifles. In the Mexican war he was engaged in the siege of Vera Cruz in March, 1847, in the battle of Cerro Gordo, 17–18 April, where he was wounded and brevetted 1st lieutenant, took part in the battles of Contreras and Chapultepec, and in the assault and capture of the city of Mexico. In a hand-to-hand encounter with two guerillas near the San Juan Bridge on 21 Dec., 1847, he was severely wounded. On 8 Jan., 1848, he was promoted 2d lieutenant and assigned to recruiting service. Ill health necessitated leave of absence in 1848–'9, when he was assigned to duty in the cavalry school for practice at Carlisle, Pa. From 1850 till 1854 he was on frontier duty, and was promoted to a 1st lieutenancy, 30 Aug., 1853. He resigned, 31 Oct., 1854, studied law, and entered upon practice in Boston in 1857. At the beginning of the civil war he raised the 2d Massachusetts regiment, became its colonel on 24 May, 1861, and was made military governor of Harper's Ferry. In 1862 he commanded a brigade under Gen. Banks, and for his conduct in the retreat from Strasburg to Williamsport was made brigadier-general of volunteers on 9 June, 1862. He was engaged in a large number of battles and skirmishes, took part in the North Virginia and Maryland campaigns, was in the second battle of Bull Run, and at Antietam fought with his brigade in Gen. A. D. Williams's division of Mansfield's corps, and guarded the upper Potomac at Harper's Ferry in September to December, 1862. He was with the Army of the Potomac in pursuit of the Confederate army from the Potomac to Warrenton in July, 1863, engaged in operations about Charleston harbor, S. C., from August, 1863, till April, 1864, was in command of Florida in May, guarded and kept open the communications by White river with Little Rock, Ark., in July, and took part in the operations against Mobile in August. From November, 1864, till 16 June, 1865, he was on duty in the department of Virginia in command of the eastern district, and was brevetted major-general of volunteers on 9 April, 1865. He was mustered out of service on 24 Aug., 1865, and returned to the practice of law in Boston.

GORDON, George Phineas, inventor, b. in Salem, N. H., 21 April, 1810; d. 27 Jan., 1878. His education was received in the schools of Salem, N. H., and Boston, Mass. Turning his attention to printing at an early age he devoted himself to the improvement of job and treadle presses. He was granted more than fifty patents, and gave his name to the press known in the United States and Europe as the "Gordon."

GORDON, George William, West Indian insurgent, d. in Jamaica, W. I., 23 Oct., 1865. He was a member of the colonial legislature in the island of Jamaica in 1865, and had been an active leader in mass-meetings held by the colored people to give expression to various grievances. In the beginning of October, 1865, in the district of Morant bay, in the eastern portion of the island, an attempt was made to expel the negroes from certain uncultivated lands of which they had taken possession. This called forth great indignation, and when on 7 Oct. a negro was tried on account of this affair before the court at Morant bay, a mob collected, threatening to liberate him. The court ordered the arrest of the leaders of the mob, but the latter overpowered the police. On 9 Oct. the court issued writs for the arrest of twenty-eight of those charged with having participated in the riot, and on 11 Oct., when the prisoners were to be brought before the court, a new riot broke out. The volunteers who had been called out were overpowered, and many of them, together with several magistrates, massacred, and the court-house burned. According to an official statement of the governor, sixteen whites were killed and eighteen wounded. In several adjoining districts the negroes rose and plundered the plantations, but, as far as known, only two persons were killed. The troops who had been sent into the interior returned, and reported that they had met no armed resistance, that they had not lost a single man, but had shot and hanged, without the least form of trial, hundreds of persons suspected of being implicated in the rebellion. The governor claimed to have received proofs of the guilt of Mr. Gordon as one of the chief instigators of the revolt, although the latter was a resident of Kingston, where there was

no disturbance, and had not been absent from home during the riots. He was, however, arrested, taken to Morant bay and tried by a court-martial, who adjudged him guilty. The evidence brought forward against him stated that he had been seen on one Sunday at a certain chapel at which Paul Bogle, another so-called rebel leader, worshipped; that somebody had said that Mr. Gordon had desired the people of a certain district in the parish to hold a meeting; that certain placards in blank had been found in Mr. Gordon's portmanteau; that a placard headed "The State of the Island" (in which there was not a single word of disloyalty or sedition) had been penned by Mr. Gordon; that he had used some strong language in a meeting of the people he had some weeks before addressed in the parish of Vere; and that he had written a letter to one Chisholm, advising him, with reference to the sufferings of the people, to "pray to God for help and deliverance." Mr. Gordon protested solemnly against having had knowledge of or part in the plot. Nevertheless Gov. Eyre sanctioned the finding of the court-martial, and Gordon was hanged on 23 Oct. At the close of that month the number of those shot and hanged by the soldiery without trial, or by order of the court-martial, was reported as reaching 2,000.

GORDON, Sir **James Alexander,** British naval officer, b. about 1782; d. in Greenwich hospital, England, 8 Jan., 1869. He entered the navy in 1793, and rose rapidly in his profession. He was at the battle of the Nile, served in the West Indies, the Mediterranean, and the Adriatic; commanded the frigate "Active" at the battle of Lissa, for which he received a gold medal and a pension of £300, and, at the capture of the French frigate "La Pomone," had a leg carried away by a 36-pounder. In August, 1814, with a squadron under his command, he entered the Potomac, reduced Fort Washington and other batteries, and subsequently forced the city of Alexandria to capitulate. He also took part in the operations against New Orleans in 1814–'15. In 1827 he was appointed governor of the royal naval hospital at Plymouth. In 1840 he became lieutenant-governor of Greenwich hospital, and in 1853 was advanced to the post of governor of that establishment. Altogether he served in the navy nearly seventy-six years, and was the last survivor of Lord Nelson's band of captains. He was created a K. C. B. in 1815; in 1854, G. C. B.; and became admiral of the fleet in 1868.

GORDON, James D., missionary, b. in Prince Edward island; d. in Erromanga, New Hebrides, 25 Feb., 1872. He entered the ministry of the Presbyterian church, and in 1864 went to Erromanga, one of the New Hebrides group of islands, as a missionary. At the end of six years he withdrew from outside support, and entirely alone trusted himself unreservedly among the natives until his death. During his residence on the island he translated portions of the Bible into the language of Erromanga, besides preparing primers and hymns for their use. He also acquired a knowledge of the language of the island of Espiritu Santo, and spent a winter there teaching the people. He perished at the hands of hostile natives.

GORDON, John Brown, governor of Georgia, b. in Uspon county, Ga., 6 Feb., 1832. He was educated at the University of Georgia, studied law and was admitted to the bar, but had practised only a short time when he entered the Confederate army as a captain of infantry. He rose successively to the rank of lieutenant-general. He commanded one wing of Lee's army at Appomattox Court-House, and was wounded in battle eight times during the war. He was the Democratic candidate for governor of Georgia in 1868, but, though his election was claimed by his party, his opponent, Rufus B. Bullock, secured the office. He was a member of the National Democratic conventions of 1868 and 1872, presidential elector for the same years, and in January, 1873, was elected to the U. S. senate. He was re-elected in 1879, but resigned his seat in 1880. He took an active part in the proceedings of the senate, and gave a moderate support to the administration of President Hayes. In 1886 he was elected governor of Georgia.

J. B. Gordon

GORDON, Patrick, soldier, b. in 1644; d. in Philadelphia, Pa., 5 Aug., 1736. He was bred to arms in the British service, and served from his youth to the close of Queen Anne's reign with a high reputation. He was afterward appointed governor of Pennsylvania, arrived there with his family in the summer of 1726, and met the assembly in August. In his first address he said that he had been a soldier, knew nothing of the crooked ways of professed politicians, and must rely upon a blunt, straightforward course in his communications with them and in the administration of the government. At a council held in Philadelphia on 26 May, 1728, for the purpose of renewing treaties with the Indian tribes there represented, it was said by the Indians in reference to the governor's address, "The governor's words were all right and good; we have never had any such speech since William Penn was here." Gov. Gordon was equally popular with his own people. He published "Two Indian Treaties at Conestogoe, 1728" (Philadelphia, 1728).

P. Gordon

GORDON, Thomas, statesman, b. in Pitlochie, Scotland; d. in Amboy, N. J., in 1722. He came to New Jersey in 1684, and settled in Scotch Plains. He was elected attorney-general of the eastern district in 1698, chief secretary and register in 1702, licensed as an attorney in 1704, elected to the legislature, and became speaker of the assembly. In 1709 he became chief justice, and was afterward receiver-general and treasurer of the province.

GORDON, Thomas F., historian, b. in Philadelphia, Pa., in 1787; d. in Beverly, N. J., 17 Jan., 1860. He was a member of the Philadelphia bar, but devoted much of his time to historical and archæological researches. He published "Digest

of the Laws of the United States" (Philadelphia, 1827); "History of Pennsylvania from its Discovery to 1776" (1823); "History of New Jersey from its Discovery to 1789" (Trenton, 1831; 2d ed., 1834); "History of America" (Philadelphia, 1831); "Cabinet of American History"; "History of Ancient Mexico" (1832); "Gazetteer of New Jersey" (Trenton, 1834); "Gazetteer of New York" (1836 and 1847); and "Gazetteer of Pennsylvania" (Philadelphia, 1839).

GORDON, William, clergyman, b. in Hitchin, England, in 1730; d. in Ipswich, England, 19 Oct., 1807. He was settled over a large independent society at Ipswich, and afterward at Old Gravel Lane, Wapping; and came to Massachusetts in 1770. After preaching a year to the Third church in Roxbury, he became its pastor, 6 July, 1772. During the Revolution he took an active part in public measures, and while chaplain to the Provincial congress of Massachusetts preached a fast-day sermon, strongly expressing his political sentiments. He was dismissed from his post, as the legislature regarded his prayers as intended rather to dictate their measures than to implore the divine direction on them. He returned to England in 1786, and published his "History of the Rise, Progress, and Establishment of the Independence of the United States," a minute and generally faithful narrative (4 vols., London, 1788). The value of this work was somewhat impaired by the expurgation of such passages as might incur prosecution. He subsequently settled at St. Neot's, Huntingdonshire. Besides his history, he published "A Plan of a Society for making Provision for Widows by Life Annuities" (1772); "First Anniversary Sermon after the Declaration of Independence, 4 July, 1777"; and an "Abridgment of Edwards's Work on 'The Affections.'"

GORDON, William Robert, clergyman, b. in New York city, 19 March, 1811. He was graduated at the University of the city of New York in 1834, studied theology in the New Brunswick seminary, and was graduated and licensed to preach in 1837. He held Dutch Reformed pastorates in North Hempstead in 1838–'43, in Flushing in 1843–'9, in Houston street, New York city, in 1849–'58, and in Schraalenburgh, N. J., till 1880, when he resigned on account of failing health, but continues to preach occasionally and edits the "Sower and Mission Monthly." The degree of S. T. D. was conferred on him by Columbia in 1859. He has been a constant contributor to various theological journals, and published, besides sermons and essays, "Supreme Godhead of Christ" (New York, 1844); "Particular Providence, proved by the History of Joseph" (1855); "Threefold Test of Modern Spiritualism" (1856); "Christocracy" (1867); "The Church and her Sacraments" (1870); "Life of Henry Ostrander, D. D." (1875); and "Revealed Truth Impregnable" (1878).

GORE, Christopher, senator, b. in Boston, Mass., 21 Sept., 1758; d. in Waltham, Mass., 1 March, 1827. His father, John (1719–'96), was prosecuted and banished as a loyalist in 1778, but was restored to citizenship in 1787 by act of legislature. The son was graduated at Harvard in 1776, studied law with Judge Lowell, and soon acquired a lucrative practice in Boston. In 1789 he was appointed by Washington the first district attorney for Massachusetts, which office he held until 1796. In that year he was appointed, with William Pinckney, commissioner to England under John Jay's treaty to settle the American spoliation claims, and succeeded in obtaining the restitution of a large amount of property. He remained in London for eight years, during the last of which he was chargé d'affaires. He returned to Boston in 1804, and was appointed governor of Massachusetts in 1809, but served only one year. He was a member of both branches of the legislature, and in 1813 was elected U. S. senator in place of James Lloyd, which office he held till 1816. After serving as a presidential elector in 1817 he retired to private life. He was for a time Daniel Webster's tutor in law. He left valuable bequests to the American academy of sciences and to the Massachusetts historical society, of which associations he was a member, and bequeathed nearly $100,000 to Harvard, of which he had been a fellow. The Harvard library building, Gore hall, which was completed in 1841, is named in his honor. Harvard gave him the degree of LL. D.

GORGAS, Josiah, soldier, b. in Dauphin county, Pa., 1 July, 1818; d. in Tuscaloosa, Ala., 15 May, 1883. He was graduated at the U. S. military academy in 1841 and assigned to the ordnance corps. He served with credit in the Mexican war, rising to the rank of captain in 1855. After acting in various arsenals as assistant he resigned at the beginning of the civil war, and was placed at the head of the Confederate ordnance department with the rank of brigadier-general. After the close of the war he devoted himself to business. He was elected vice-chancellor of the University of the South at Sewanee, Tenn., in 1872, and was made president of the University of Alabama in 1878, where he remained until he was compelled to resign owing to failing health.

GORGES, Sir **Ferdinando,** proprietor of Maine, b. in Ashton Phillips, Somerset, England, about 1565; d. in England in 1647. He was engaged in the conspiracy of Essex, and testified against the latter at his trial for treason in 1601. During the war with Spain he served in the royal navy with distinction, and in 1604 was appointed governor of Plymouth. Being a friend of Sir Walter Raleigh, he became interested in the latter's plans for colonization in the New World; and when Weymouth returned from New England in 1605, bringing five Indians, Gorges took three of them, Manida, Sketwarroes, and Tafquantum, into his home, and after instructing them in the English language gained much information relative to their country, and determined to become a proprietor of land beyond the Atlantic. His efforts resulted in the formation of the Plymouth, which with the London company was incorporated in 1606. Between these was divided the territory extending fifty miles inland from the 34th to the 45th parallel of north latitude. Plymouth company had the northern portion, which was styled North Virginia. The patentees were authorized to maintain the government for twenty-one years, with permission to impose taxes, to coin money, and to exercise all the power of a well-organized society. After several unsuccessful expeditions, two ships were despatched from Plymouth in 1607, bearing a party who erected a fortified storehouse, near the mouth of the Kennebec, in Maine, which they called Fort George. Owing to the severity of the climate and many hardships, this colony was abandoned in the following spring. In 1614 Gorges engaged Capt. John Smith, who had visited New England in the service of the Plymouth company. He set sail in March, 1615, with two ships. His own becoming dismasted, he returned to port, and the other made the voyage alone, but soon returned. After other unsuccessful attempts, Gorges sent out a party under Richard Vines, in 1616, which encamped on the Saco during the winter. In 1619

Dermer made a second voyage. The London company had now incurred the resentment of King James, and Gorges and his party formed a new corporation on 3 Nov., 1620, under the name of the "Council established at Plymouth, in the county of Devon, for the planting, ruling, ordering, and governing of New England in America," which was the foundation of all the grants made in New England. This corporation consisted of forty patentees, most of whom were persons of distinction, including thirteen peers. Gorges was styled the "father of colonization in America." He took grants with John Mason of the district called Laconia, and attempted settlements. In 1635 the council resigned its charter to the king; but Gorges obtained a new charter in 1639, which constituted him lord-proprietary of the province of Maine, with extraordinary governmental powers, which were to be transmissible with the property to his heirs and assigns. He prepared to visit New England, but the company became embarrassed for funds, and was obliged to sell the ship and pinnace which had been built. Sir Ferdinando had also become interested in the Puritan colony of New Plymouth. Through the influence of his father and of Lord Edward Gorges, ROBERT, the youngest son of Sir Ferdinando, was commissioned lieutenant-governor of New England. He had just returned from the Venetian wars, and was a share-holder in the grand patent. He also had a personal grant of a tract of land on the northeast side of Massachusetts bay, which had been made to him in consideration of his father's services to the company. He came to Plymouth in 1623, bringing with him an Episcopal clergyman, William Morell. He attempted to form a settlement at Wessagusset, which ended in a dispute with Weston, who had begun the colony there, and returned to look after it. Robert Gorges, having power to "restrain interlopers," began proceedings against him. He returned to England in less than a year, and his people dispersed—some to England, some to Virginia. In 1631 a grant of land was made to several persons, including Ferdinando Gorges, a grandson of Sir Ferdinando. This territory was situated on the Acomenticus river, and several settlements were made there. These were subjected to no external government until the arrival of Capt. WILLIAM as deputy governor of the province, which was called "New Somersetshire." The first meeting of the commissioners was held on 25 March, 1636, in Saco, then containing 150 inhabitants, and was the first provincial government for this section of New England. The charter of Maine covered the same territory as that of New Somersetshire, and Sir Ferdinando issued a commission for its government, and sent his nephew, THOMAS, to be deputy governor. The first general court of this government, which exercised the powers of an "executive, legislative, and judicial body in the name of Sir Ferdinando Gorges, late proprietor of Maine," was held in Saco, 25 June, 1640. After the Gorges government was established, in 1641, the borough of Acomenticus and the town of Gorgeana were incorporated. Thomas Gorges arrived in 1641, and settled in this town. He sailed for England in 1643, leaving Richard Vines at the head of the government. In that year the four New England colonies formed a confederacy, excluding the settlements of Gorges, for they "ran a different course both in their ministry and civil administration." On the death of Sir Ferdinando, the estate was left to his son, JOHN, who totally neglected the province. After writing repeatedly to the heirs and receiving no replies, the Gorges colonies formed themselves into a body politic for the purpose of self-government, and submitted to the jurisdiction of Massachusetts.—Sir Ferdinando's grandson, **Ferdinando,** b. in Loftas, Essex, England, in 1629; d. in England, 25 Jan., 1718, petitioned the king against the usurpation of Massachusetts, and commissioners were sent out to adjust the affairs of the government. In 1677 he sold his rights to Massachusetts for £1,250. He published "America Painted to the Life" (London, 1659).

GORHAM, John, physician, b. in Boston, Mass., 24 Feb., 1783; d. there, 29 March, 1829. He was graduated at Harvard in 1801, and afterward studied in Edinburgh. In 1809 he was appointed adjunct professor of chemistry and materia medica in Harvard, and in 1815 was made professor of chemistry and mineralogy. He published an "Inaugural Address" (1817); "Elements of Chemical Science" (1819); and a "Contribution on Sugar" to Thomas's "Annual Philosophy" (1817).

GORHAM, Nathaniel, statesman, b. in Charlestown, Mass., 27 May, 1738; d. there, 11 June, 1796. After receiving a common-school education, he engaged in mercantile pursuits in his native town. He took an active part in public affairs at the beginning of the Revolution, was a member of the colonial legislature from 1771 till 1775, a delegate to the Provincial congress from 1774 till 1775, and a member of the board of war from 1778 until its dissolution in 1781. In 1779 he served in the State constitutional convention. He was a delegate to the Continental congress from 1782 till 1783, and also from 1785 till 1787, serving as president of that body in June, 1786. For several years he was judge of the court of common pleas. He took high rank in the convention that framed the National constitution, and, when it was sitting as committee of the whole, he was called by Washington to preside, and filled the chair for three months. He afterward exerted a powerful influence in securing the ratification of the constitution in the State convention. In connection with Oliver Phelps he purchased from the state of Massachusetts in 1786 an immense tract of land on Genesee river, for the sum of $1,000,000. This had been previously ceded to Massachusetts from the state of New York. They soon extinguished the Indian title to a part of this territory, surveyed it into tracts, laid out townships, and sold large parts to speculators and settlers. In 1790 they had sold nearly all their property, and, being unable to fulfil their contract in full to Massachusetts, Phelps and Gorham compromised and surrendered that portion of the land which remained under the Indian title.—His eldest son, **Nathaniel,** d. in Canandaigua, N. Y., 22 Oct., 1826, was a pioneer settler of this tract, having been placed there in charge of his father's interests.—Another son, **Benjamin,** lawyer, b. in Charlestown, Mass., 13 Feb., 1775; d. in Boston, Mass., 27 Sept., 1855, was graduated at Harvard in 1795. He studied law under Theophilus Parsons, and rose to eminence at the Boston bar. He was elected a representative to congress as a Federalist to fill the vacancy caused by the resignation of Jonathan Mason, and served from 1820 till 1821. He was again in congress from 1827 till 1831, and from 1833 till 1835. He was also a member of the state house of representatives. He gave his professional services without compensation to defend the newspaper press in libel suits.

GORMAN, Arthur Pue, senator, b. in Howard county, Md., 11 March, 1839. He received a public-school education, and in 1852 became a page in the U. S. senate, where he remained till 1866, and on 1 Sept. he was appointed collector of internal revenue for the fifth district of Maryland, which

office he held till March, 1869. In June of that year he was made a director in the Chesapeake and Ohio canal company, of which he became president in 1872. In November, 1869, he was elected to the Maryland legislature as a Democrat, re-elected in 1871 and chosen speaker of the house. He was elected to the state senate in 1875, and served four years. In 1880 he was chosen to the U. S. senate as a Democrat to succeed William Pinkney White, and served from 1881 till 1887.

GORMAN, John Berry, physician, b. in Newberry district, S. C., 22 Feb., 1793; d. in Talbot county, Ga., 12 Nov., 1864. He studied medicine in the University of Pennsylvania, and after a practice of twenty years in Milledgeville and Talbotton, Ga., gained a large fortune. He owned a valuable library, was fond of painting, and left a picture entitled the "Nightmare." He published "The Philosophy of Animated Existence" (Philadelphia, 1845), and contributed to periodicals.

GORMAN, Willis Arnold, soldier, b. near Flemingsburg, Ky., 12 Jan., 1814; d. in St. Paul, Minn., 20 May, 1876. He was graduated at the law-school of the University of Indiana, was admitted to the bar, and began to practise in Bloomington, Ind., in 1835. In 1837 and 1838 he was a clerk in the state senate, and was afterward several times elected to that body as a Democrat. He was appointed major of Gen. Lane's regiment of Indiana volunteers in 1846, served in the Mexican war, and led an independent rifle battalion at the battle of Buena Vista, where he was severely wounded. In 1847 he was made colonel of the 4th Indiana regiment, which he commanded in several battles. In 1848 he was civil and military governor of Puebla. From 1849 till 1853 he was a representative to congress from Indiana, having been chosen as a Democrat. In 1852 he addressed large meetings in favor of Gen. Pierce's election to the presidency. He was appointed governor of the territory of Minnesota in 1853, and ex-officio superintendent of Indians, which offices he held till 1857. In that year he was a delegate to the State constitutional convention. He represented St. Paul in the Minnesota legislature in 1858, and in 1860 was a candidate for presidential elector on the Douglas ticket. He practised law in St. Paul till 1861, when he was made colonel of the 1st Minnesota regiment, and served in the battle of Bull Run. He was appointed brigadier-general of volunteers on 7 Sept., 1861, led a bayonet charge at Fair Oaks, and commanded a brigade at South Mountain and Antietam. He was at the head of the 2d division, 2d corps, till the reorganization of the army following Gen. McClellan's removal. In 1864 he was mustered out of the service and resumed his law practice in St. Paul. He was elected city attorney in 1869, and held this office till his death.

GOROSTIZA, Manuel Eduardo de (go-roste'-tha), Mexican dramatist, b. in Vera Cruz, 13 Oct., 1789; d. in Tacubaya, 23 Oct., 1851. He was educated in Madrid, and at the age of twelve years wrote a comedy. He entered the Spanish guard as a cadet in 1803, and left the service in 1814 with the rank of lieutenant-colonel, to devote himself to literary work, and wrote much in defence of liberal ideas. In 1823 he was banished to England, but returned to Mexico in 1833, in the same year was elected deputy to the National congress, in 1838 secretary of the treasury, and in 1839 secretary of foreign relations. In 1844 he went as envoy extraordinary to the United States, and displayed diplomatic skill in the difficulties regarding the threatened annexation of Texas. He fought in the defence of Churubusco in 1847. Gorostiza took much interest in education, and was also director of the National theatre. In 1851 his bust was placed in the hall of the National theatre of Mexico. His best-known comedies are "Tal para Cual," "Las Costumbres de Antaño," and "Don Dieguito," which were published and represented in Madrid in 1821; and of his later works, "Contigo Pan y Cebolla," which was adapted in French by Scribe under the name of "Une chaumière et son cœur."

GORRIE, Peter Douglas, clergyman, b. in Glasgow, Scotland, 21 April, 1813; d. in Potsdam, N. Y., 12 Sept., 1884. He emigrated to the United States in 1820, and entered the ministry of the Methodist Episcopal church. He was a member of the New York conference from 1836 till his death. He was a member of the New England historical society. He published "The Churches and Sects in the United States" (New York, 1850); "Episcopal Methodism as it Was and Is" (1852); "Lives of Eminent Methodist Ministers in Europe and America" (1852); an "Essay on Episcopal Succession"; and "Black River Conference Memorial." (1852, 2d vol., 1881).

GORRINGE, Henry Honeychurch, naval officer, b. in Barbadoes, W. I., 11 Aug., 1841; d. in New York, 7 July, 1885. He was the son of an English clergyman of the established church, came to the United States at an early age, and entered the merchant-marine service. At the beginning of the civil war he enlisted in the National service as a common sailor, 13 July, 1862. Three months later he was attached to the Mississippi squadron, and by 1865 had risen through successive promotions for gallantry to the rank of acting-volunteer lieutenant. He was promoted to lieutenant-commander on 18 Dec., 1868, and from 1869 till 1871 commanded the sloop "Portsmouth" in the South Atlantic squadron. He was engaged in the hydrographic office in Washington, D. C., from 1872 till 1876, when he was sent with the "Gettysburg" on special service in the Mediterranean, where he remained till 1878, contributing letters to the New York "Nation." He was brought into notice in 1880 by his work of transporting and erecting an Egyptian obelisk that had been offered to the United States by the khedive Ismail in 1879 at the opening of the Suez canal. On arriving in Alexandria on 16 Oct., 1879, Commander Gorringe began his operations with the assistance of 100 Arabs, and on 6 Nov. had removed

1,730 cubic yards of earth from around the pedestal of the obelisk. By means of simple and original machinery devised by Gorringe, the monolith was removed from its pedestal and placed in a horizontal position on 6 Dec., 1879. The iron steamer "Dessoug," owned by the Egyptian government, was then purchased from Mahomet Tewfik for £5,100, and the obelisk was introduced into the hold through an aperture made for the purpose. The mechanism by which the obelisk was confined in the vessel was entirely of Commander Gorringe's construction, and consisted of innumerable beams of steel and wood. The obelisk arrived in New York on 20 July, 1880. By the aid of iron tracks and cannon-balls the mono-

lith was conveyed from the North river to Central Park, where, on 22 Jan., 1881, it was erected on the same pedestal on which it had rested in Egypt. The height of the shaft is 69 feet. It was erected by Thothmes III. at Heliopolis about 1600 B. C., and removed to Alexandria in 22 B. C. The total expense of its removal to New York and erection in Central Park was $103,732, and was paid by William H. Vanderbilt. Subsequently Commander Gorringe criticised naval matters in public with great freedom, and, on being called to account by the department, offered his resignation, which was accepted. He then engaged actively in forming the American ship-building company, in which he had a controlling interest. He secured several contracts for the construction of vessels, and leased the Reading railroad ship-yard at Port Richmond, Philadelphia, but owing to a want of capital the enterprise proved a failure. Several months before his death in jumping on a train while it was in motion, he received an injury from which he never recovered. The monument erected by friends over his grave at Sparkill, on the Hudson, N. Y., is an exact copy, on a reduced scale, of the obelisk that he transported from Egypt. (See illustration.) He published a "History of Egyptian Obelisks" (New York, 1885).

GORRITI, José Ygnacio (gor-re'-te), Argentine soldier, b. in Jujuí in 1770; d. in Sucre, Bolivia, 9 Nov., 1835. He studied in the University of Cordoba, and then went to Chuquisaca to be graduated as doctor in law, but at the death of his father in 1791 returned home to take charge of his property. There the revolution of May, 1810, found him, and he at once sided with the cause of independence, serving during the war of upper Peru. During the campaign of Salta and Tucuman in 1819 and 1820, he spent a great part of his fortune in the maintenance of the Argentine army. In 1820 he was sent as a delegate for the province of Salta to the first constituent congress; and in the same year, when the governor of Salta, Gen. Güemes, was called to the field, Gorriti became governor in his place. When the Spanish general Marquiegui invaded the province, Gorriti with a small force defeated and captured his vanguard, and forced the main body to retire to upper Peru. In 1821 there was a revolution against Güemes, and Gorriti was requested to take charge of the government, but he refused and retired to private life. When the province continued in anarchy, he came forward again, and took part in the defence against the last exertions of the royalist armies. He also strenuously opposed Quiroga, but, when the latter defeated Gen. Alvarado in 1831, Gorriti emigrated to Bolivia and died there.

GORTON, Samuel, founder of a sect, b. in Gorton, England, about 1600; d. in Rhode Island in 1677. He was imperfectly educated, and was in the employ of a clothier of London, but in 1636 went to Boston, Mass., hoping to enjoy greater religious freedom there than at home. He remained in Boston until religious disputes caused him to remove to Plymouth, where he fared still worse, being fined, imprisoned, and finally expelled from the colony in the winter of 1637–'8 for preaching heresy. He then went to Aquidneck (now Newport), R. I., with a few followers, but was publicly whipped for calling the magistrates "just asses," and for other contemptuous acts, and about 1641 was forced to take refuge with Roger Williams at Providence. He then settled at Pawtuxet, and purchased land, but became obnoxious by involving himself in the disputes of the colonists, and in September, 1642, having refused to go to Boston, on being summoned by the authorities, he removed to Shawmut, on the west side of Narragansett bay, where he bought land of the sachem, Miantonomo. In June, 1643, two inferior sachems contested his claims to the property, and applied to the general court at Boston for redress. Forty soldiers were in consequence marched to Shawomet, and Gorton and ten of his followers were taken prisoners to Boston in October, where they were tried as "damnable heretics," and sentenced to imprisonment and hard labor in irons. They were released in March, 1644, and ordered to leave the colony. Gorton then went to England to obtain redress, and, having procured from the Earl of Warwick a letter of safe conduct to the Massachusetts magistrates, and an order that his people should be allowed peaceable possession of their lands at Shawmut, he returned to his colony in 1648, and renamed it Warwick in honor of the earl. Gorton's remaining years seem to have been untroubled, though Massachusetts did not relinquish her claim to the Shawomet settlement until some years later. After his return he discharged many important civil officers, and preached on Sundays to the colonists and Indians. He regarded the clergy and all outward forms with contempt, and held that by union with Christ believers partook of the perfection of God, and that heaven and hell have no actual existence. His sect survived him about one hundred years. He published "Simplicitie's Defence against Seven-Headed Policy," a vindication of his course in New England (London, 1646; reprinted in the collections of the Rhode Island historical society); "An Incorruptible Key composed of the CX Psalm" (1647); "Saltmarsh returned from the Dead" (1655); "An Antidote against the Common Plague of the World" (1657); and "Certain Copies of Letters." He also left in manuscript a "Commentary on a Part of the Gospel of St. Matthew." Gov. Edward Winslow replied to "Simplicitie's Defence," and also published a "Narrative of Disturbances made in New England by Samuel Gorton and his Accomplices" (1649).

GOSFORD, Archibald Acheson, Earl of, governor-general of Canada, b. in England about 1775; d. 27 March, 1849. He was the second earl of the name, and was created a peer of the United Kingdom, as Lord Worlingham, 13 June, 1835. He was appointed governor-general of Canada in 1835, and arrived at Quebec in August of that year. A spirit of intense dissatisfaction, fomented in Upper Canada by William Lyon Mackenzie and in Lower Canada by Papineau, prevailed in both those provinces at the time of Earl Gosford's appointment. He was one of a royal commission, of which the other members were Sir Charles E. Gray and Sir George Gipps, which had been appointed to investigate the grievances complained of in Canada. Both as chief of the commission and as governor, Lord Gosford pushed to the utmost limit the policy of concession and conciliation which he had been instructed by the home government to pursue. But all efforts to allay disaffection were in vain, and the treasonable character of the declaration made at the meeting of the six counties, held at St. Charles, 23 Oct., 1837, led the governor-general to apprise the British government that a sterner policy must be adopted if Canada's connection with the empire was to be maintained. At the same time he begged to be relieved of his office, and this request was granted by the home government, which approved all that Gosford had done in Canada, though his mission was a failure. He left Canada on 26 Feb., 1838.

GOSNOLD, Bartholomew, English navigator, d. in Virginia, 22 Aug., 1607. After accompanying Raleigh as an associate in his unsuccessful attempt to found a colony in Virginia, Gosnold commanded an expedition that was fitted out at the expense of the Earl of Southampton for planting a colony in New England. On 26 March, 1602, he sailed from Falmouth with one vessel and twenty colonists, and, instead of taking the usual southerly course, undertook the direct voyage across the Atlantic to America. From the Azores, to which he was carried by opposing winds, he took a westerly course, and after seven weeks came in sight of Cape Elizabeth in Maine. Thence he followed the coast to the southwest, and on 14 May anchored to the east of York harbor. Here he was visited by natives, and then proceeding south in search of a more suitable place for a settlement, discovered, on 15 May, a promontory which he named Cape Cod. He and four of his men went ashore, and this was the first spot in that region ever trod by Englishmen. Sailing around the cape, and stopping at an island now known as No Man's Land, Gosnold landed at the mouth of Buzzard's bay, and planted his colony on an island, which he named Elizabeth, in honor of the queen, but which is now known by its Indian name of Cuttyhunk. The hostility of the Indians, scarcity of provisions, and disputes about a division of profits had a discouraging effect on the colonists, who returned to England, where they arrived, 23 July, with a cargo of sassafras-root, cedar, furs, and other commodities. Gosnold then organized a company for colonization in Virginia, led by Wingfield, Hunt, and Capt. John Smith. A charter was granted by James I., 10 April, 1606, the first under which an English colony was planted in America. On 19 Dec. of that year he sailed with three small vessels and one hundred and five adventurers, only twelve of whom were laborers, and after a tedious voyage reached the mouth of the James river, which they named after the king. Sailing up the river, they landed about fifty miles from its mouth, and founded Jamestown, notwithstanding the remonstrances of Gosnold, who opposed the selection of this site owing to its unhealthy location. Before autumn fifty of their number, among them the projector of the colony, died.

GOSSE, Philip Henry, British zoölogist, b. in Worcester, England, 6 April, 1810. He removed in infancy to Poole, Dorset, where he displayed his taste for natural history. In 1827 he went to Newfoundland in a mercantile capacity, and while there occupied his leisure in collecting insects and in making colored drawings of them. After residing there for eight years he removed to Lower Canada, and pursued his natural-history researches there for three years. Subsequently he travelled in the United States, resided in Alabama for nearly a year, and made a large collection of drawings of insects, especially of the lepidoptera of that region. He returned to England in 1839, and in 1844 visited Jamaica, where he spent eighteen months in studying the geology of that island, and in making collections. On his return to England he made a special study of the British rotifera, and has conducted his more recent investigations with the aid of the microscope. In 1853 he took an active part in the formation of public and private collections of marine animals. In 1856 Mr. Gosse was elected a fellow of the Royal society. His works, which are numerous, include the following on American natural history: "The Canadian Naturalist" (London, 1840); "Birds of Jamaica" (1847); "Natural History of Birds, Mammals, Reptiles, and Fishes" (1848–'51, 4 vols., 8vo); "Ocean Described" (1849); and "A Naturalist's Sojourn in Jamaica" (1851); "Letters from Alabama" (London, 1859).

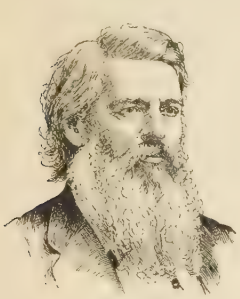
GOTTSCHALK, Louis Moreau, musician, b. in New Orleans, La., 8 May, 1829; d. in Tijuca, Brazil, 18 Dec., 1869. His father was of German-Jewish descent and his mother of Creole birth. At an early age he showed marked musical ability. To complete his musical education, his father sent him to Paris, where he studied the piano with Hallé and Camille Stamatz, and harmony with Maleden. He also formed a friendship with Hector Berlioz, who gave him valuable advice. His first appearance was made in Paris in 1845. He continued his studies in musical composition till 1848, when he gave a series of public concerts in Paris with much success. He then travelled in Switzerland and Spain, and made a European reputation before returning to the United States in 1853. His first appearance in this country was made in Boston, and he afterward played in New York, in other cities of the United States, and in Mexico and South America. After spending some time in Buenos Ayres and Montevideo, he went to Rio Janeiro, where he gave many concerts and projected a musical festival, beginning 24 Nov., 1869. On the second evening's performance he became ill while playing one of his compositions, "La Mort," and was removed at once to Tijuca, where he died. Gottschalk played principally his own compositions, which are dreamy and sensuous, but without intellectual vigor and force. He executed them with feeling and delicacy of expression, which appealed to the popular taste. His arrangements of the works of others are of no special merit, nor was he a skilled interpreter of the works of the masters. His pieces are chiefly illustrative of tropical and southern life, and include "Le Bananier," "La Savane," "Ricordati," "La Marche de Nuit," "O ma Charmante," "Réponds-moi," "Manchega," "Grande Valse de Concert," "Grande Étude de Concert," "Mazeppa," "La Moissoneuse," "La Danse des Ombres," "Ossian Ballads," "La Bamboula" (a wild African dance), and Cuban dances. He was decorated with the cross of the legion of honor and the order of Isabella the Catholic. He contributed to the "Atlantic Monthly," "Notes of a Pianist," which were edited by his sister (Philadelphia, 1881).

GOTWALD, Luther Alexander, clergyman, b. in York Springs, Adams co., Pa., 31 Jan., 1833. He was graduated at Pennsylvania college, Gettysburg, in 1857, and at the theological seminary there in 1859. In the same year he was ordained to the ministry of the Lutheran church, and has held pastorates at Shippensburg and Lebanon, Pa., Dayton, Ohio, Chambersburg and York, Pa., and Springfield, Ohio. He has been a successful preacher, and has held various offices in the general synod, as trustee of its college and seminary, and as a member of the boards of church extension and home missions. Pennsylvania college gave him the degree of D. D. in 1873. Dr. Gotwald is a frequent contributor to the periodicals of his church.

and has published various pamphlets and "Church Orders; or the Necessity of a Right Call to the Office of the Ministry" (Gettysburg, Pa., 1879).

GOUGE, William M., author, b. in Philadelphia, 10 Nov., 1796; d. in Trenton, N. J., 14 July, 1863. He edited the "Philadelphia Gazette" and other journals, and for thirty years contributed articles on banking to various periodicals. He was for thirty years connected with the treasury department at Washington. He published "History of the American Banking System" (1835); "Expediency of Dispensing with Bank Paper" (1837); and a "Fiscal History of Texas" (1852).

GOUGH, John Bartholomew, temperance lecturer, b. in Sandgate, Kent, England, 22 Aug., 1817; d. in Frankford, Pa., 18 Feb., 1886. His father had served in the Peninsular war as a private soldier. The son received his education chiefly from his mother, and, when twelve years of age, after the death of his father, was sent to the United States. He arrived in New York in August, 1829, and went to Oneida county, where he lived on a farm for two years. He then obtained a situation in a publishing-house in New York city, where he learned the trade of a bookbinder. Here his mother and sister joined him, but in 1833, during a time of depression, he lost his situation, and the family was reduced to destitution. In a few months after her arrival in New York his mother died, and Gough drifted into the worst of dissipation. For some years he obtained a precarious subsistence about drinking-shops and low resorts by singing and by his remarkable powers of comic delineation. He had always a passion for the stage, and made one or two efforts to become an actor, but owing to his habits gained little favor. He married in 1839, and became a bookbinder on his own account.



The effort to do his work without giving up his nightly dissipations so affected him that he was on the verge of delirium tremens. He lost his wife and child, and was reduced to the utmost misery. In 1842 he was in Worcester, Mass., where he was regarded as a hopeless drunkard. Delirium had taken possession of him, and, as he used to relate to his audiences in after years, the tools of his trade seemed to turn to serpents and crawl about him. Thousands of people have heard him tell how, in October, 1842, a little kindness shown him by a Quaker induced him to attend a temperance meeting, to sign the pledge, and to keep it, in spite of a raging appetite for drink. A few months later some of his former companions induced him to violate his pledge, and he confessed the fact at a public meeting at Worcester. From the time of his taking the pledge there came upon him an irresistible desire to devote his life to the cause of temperance, and he clung with singular tenacity to his purpose. He set forth, carpet-bag in hand, to tramp through the New England states, glad to obtain even seventy-five cents for a temperance lecture, and soon became famous for his eloquence. An intense earnestness derived from experience, and his power of imitation and expression, enabled him to work on the sensibilities of his audiences as few men have been able to do. He was accustomed to mingle the pathetic and humorous in such a way as to attract thousands to hear him who had no purpose but to be interested and amused. In the first year of his travels he spoke 386 times, and thenceforward for seventeen years he dealt only with temperance. During that period he addressed over 5,000 audiences. He visited England in 1853, by invitation of the London temperance league, was entertained by George Cruikshank, the veteran artist and total abstainer, and his first address, delivered at Exeter Hall, produced a great sensation. He intended to stay but six months, but was kept busy for two years. In 1854 he had undertaken to speak at Oxford, and the students had determined to prevent him. He was greeted with hisses, cat-calls, and yells. But Gough had a disciplined temper and the courage of his convictions, and an appeal to the Briton's proverbial love of fair play ended in his obtaining a hearing. On a subsequent visit, in 1878, he was received with distinguished attention by the Oxonians. He returned to the United States in 1855, and took up his old work with unabated success. In 1857 he made another journey to England, and lectured for three years. In his temperance efforts Mr. Gough always kept aloof from politics or any organized effort to accomplish results through legislation, relying entirely on moral influences and on the total abstinence pledge. After confining his addresses to the subject of temperance for seventeen years, he began to take up other subjects, literary and social, though from first to last his chief successes were obtained on the temperance platform. After his popularity had led him to vary his subject and to lecture before lyceums, he made a moderate fortune by his eloquence. His subjects were such as to give full scope to his powers of imitation, and to furnish opportunity to stir the feelings. "Eloquence and Orators" and "Peculiar People" were topics of this kind, in which diverting imitations played a prominent part, but he rarely failed to introduce some reference to the evils of intemperance. His oratory was not acquired, but natural. He had no elocutionary training, his reading was singularly restricted, and all his resources were from within, yet never failed to hold the attention of his audiences. For several years Mr. Gough had made his home at West Boylston, Mass., where he spent much time among his books and friends. He was engaged in the delivery of a lecture at the 1st Presbyterian church, Frankford, Pa., when he was stricken by cerebral apoplexy, two days afterward lapsing into unconsciousness that lasted until his death. Amherst conferred upon him the honorary degree of A. M. A sketch of his life was published by Rev. W. Reid in 1854. His publications (some of which have been translated into French, Dutch, Scandinavian, and Tamil) are "Autobiography" (London, 1846; 2d ed., 1853); "Orations" (1854); "Temperance Address" (New York, 1870); "Temperance Lectures" (1879); and "Sunlight and Shadow, or Gleanings from my Life-Work" (1880).

GOULD, Benjamin, soldier, b. in Topsfield, Mass., 15 May, 1751; d. in Newburyport, Mass., 30 May, 1841. At the beginning of the Revolutionary war he marched at the head of thirty minute-men from Topsfield, and participated in the fight at Lexington on 19 April, 1775. He received a bullet wound, the scar of which was conspicuous on his cheek throughout his long life, and formed the subject of a poem by his daughter, Hannah F. Gould. He was commissioned captain, and was

the last man to leave Charlestown neck at the retreat of the Continental forces from Bunker Hill in June, 1775. Subsequently he was engaged in the battles of White Plains, Bennington, and Stillwater, and had command of the main guard at West Point when Arnold fled and André was captured. After the war he settled in Newburyport, where the remainder of his life was spent.—His son, **Benjamin Apthorp,** educator, b. in Lancaster, Mass., 15 June, 1787; d. in Boston, 24 Oct., 1859, was graduated at Harvard in 1814, and became principal of the Boston Latin-school, remaining there until 1828. During his administration this institution became one of the most famous preparatory schools in the United States. His health failing in 1828, he was obliged to relinquish teaching, and spent two years in European travel. On his return he became a ship-owner in the China and East Indian importing business. Mr. Gould also filled important public offices in the state. He was one of the first American teachers to annotate classical authors, and published "The Prize Book" (6 numbers, Boston, 1820–'6); "Adams's Latin Grammar" (Northampton, 1825); and editions of Ovid (Boston, 1827), Horace (1828), and Virgil (1829).—Benjamin's daughter, **Hannah Flagg,** poet, b. in Lancaster, Mass., 3 Sept., 1789; d. in Newburyport, Mass., 5 Sept., 1865, removed with her father to Newburyport in 1800, and after the death of her mother became his constant companion, a fact that accounts for the patriotism of her earlier verses. In her youth she was famed for vivacity and wit. Her poems were characterized by true thought, refined and tender emotion, and healthful, moral tone, which made them favorites, and led to their frequent appearance in print, both at home and abroad. She led a quiet life in the homestead where she resided for half a century—a life that would have been as secluded as it was unostentatious but for her genial hospitality and the many visitors and distinguished authors who sought her acquaintance. Miss Gould began her literary career by writing for periodicals. She published "Poems" (Boston, 1832); "Poems" (3 vols., 1836); "The Golden Vase, a Gift for the Young" (1843); "Gathered Leaves and Miscellaneous Papers" (1846); "New Poems" (1850); "The Diosma: a Perennial" (1851); "The Youth's Coronal" (New York, 1851); "Mother's Dream, and other Poems" (Boston, 1853); and "Hymns and Poems for Children" (1854).—Benjamin Apthorp's son, **Benjamin Apthorp,** astronomer, b. in Boston, Mass., 27 Sept., 1824, studied at the Boston Latin-school, where he received the Franklin gold medal, and at Harvard, where he was graduated in 1844. For over a year he was master of the Roxbury Latin-school, and then went abroad for higher studies. He devoted his attention principally to astronomy, which he followed under Carl F. Gauss in Göttingen, and in 1848 he received the degree of Ph. D. there. Later he spent some time under François Arago in Paris, and also in forming the acquaintance of noted scientists, including Frederic W. A. Argelander, Alexander von Humboldt, and others. He returned to the United States in 1848, and early in 1849 started in Cambridge an "Astronomical Journal" devoted to original investigation, which he continued largely at his own expense until 1861. In 1851 he was given charge of the longitude operations of the coast survey, and was one of the first to apply the telegraph to the determination of differences in longitude. Shortly after the laying of the Atlantic cable in 1866 he established in Valencia, Ireland, the station from which the difference in longitude between Europe and America was ascertained, and he connected the two continents by precise observations. These were the first determinations of trans-Atlantic longitude by telegraph, and were the means of establishing a connected series of longitude measurements from the Ural mountains to New Orleans. He was director of the Dudley observatory in Albany from 1856 till 1859, and superintended its construction. It was in this building that the normal clock, protected from atmospheric variation and furnished with barometric compensation, was first used to give time telegraphically to dials throughout the observatory. Dr. Gould introduced numerous improvements in construction, which are now extentensively used throughout the world in other observatories, and it was his clock that gave the time signals to New York. In 1868 he was appointed to organize and direct the National observatory of the Argentine Republic in Cordoba. He obtained from Europe a complete outfit of instruments, and, after erecting the building, began work with four assistants in 1870. His work included the mapping of a large part of the southern heavens, and his "Uranometry of the Southern Heavens" is accepted as final authority for the southern hemisphere, as that of Argelander is for the northern. Dr. Gould also organized a national meteorological office, with a net of stations extending from the tropics to Tierra del Fuego, and from the Andes to the Atlantic. He remained in the Argentine Republic until 1885, when he returned to Cambridge, and has since re-established his "Astronomical Journal." In 1862 he was requested by the U. S. sanitary commission to take charge of its statistics, and organized in connection with these an elaborate system of anthropological measurements, which were subsequently computed and tabulated. This was published under the title of "Investigations in the Military and Anthropological Statistics of American Soldiers" (New York, 1869). Dr. Gould is a member of numerous scientific societies, among which are the Royal astronomical society of London and the French, Russian, Prussian, and Austrian academies of sciences in Europe, and he was one of the original members of the National academy of sciences in the United States. In 1885 he received the degree of LL. D. from Harvard, and in 1887 from Columbia. His publications include, besides numerous shorter articles contributed to periodical literature, "Investigation of the Orbit of the Comet V" (Washington, 1847); "Report on the Discovery of the Planet Neptune" (1850); "Discussions of Observations made by the U. S. Astronomical Expedition to Chili, to determine the Solar Parallax" (1856); "The Trans-Atlantic Longitude as determined by the Coast Survey" (1869); "Ancestry of Zaccheus Gould" (1872); and also valuable charts of the heavens, and reports of the work accomplished under his superintendence.

GOULD, Emily Bliss, philanthropist, b. about 1825; d. in Perugia, Italy, 31 Aug., 1875. She was the wife of Dr. Gould, physician to the American legation. Mrs. Gould founded the American schools in Rome, and assisted in establishing those of Florence. Her labors were begun after the inundation of the Tiber, 31 Dec., 1870, which was the cause of much distress and poverty. On 20 March, 1871, Mrs. Gould opened a home and school for the poorer class of Italian children in a room lent by a Vaudois clergyman. She had no teacher, and only three little girls for scholars. Owing to generous contributions, at the time of her death there were twenty in the home and thirty in the kindergarten. Her main purpose was to secure to these children means of obtaining a living for

themselves. Among the trades, that of printing was proposed as adapted to this end, as the increasing number of books and newspapers in Italy would demand good printers. In the winter of 1871 it was suggested that a volume should be prepared by the authors living in Rome at that time, printed at the home, and sold for its benefit. Among the contributors were Matthew Arnold, Mary Cowden Clarke, William W. Story, William and Mary Howitt, Howard M. Ticknor, and George P. Marsh. The book was not completed until after her death, when it was printed at the home under the title of a "Wreath to the Memory of Mrs. Emily Bliss Gould."

GOULD, James, jurist, b. in Branford, Conn., 5 Dec., 1770; d. in Litchfield, Conn., 11 May, 1838. Richard, his great-grandfather, came from Devonshire to Branford about 1700. James was graduated at Yale in 1791, and was a tutor there in 1793–'5. In the latter year he entered the law-school at Litchfield, Conn., and after his admission to the bar became in 1798 associated with its founder, Judge Reeve (see REEVE, TAPPING), as professor in that institution. He was raised in 1816 to the office of judge of the supreme court of Connecticut, from which he was displaced in 1818 by the adoption of the new constitution. In 1820 Judge Gould took the superintendence of the school, and after the death of Judge Reeve, in 1823, continued to conduct it till 1833. He published "Principles of Pleading in Civil Actions" (New York, 1832; new ed. by Franklin F. Heard, Albany, 1887).—His son, **Edward Sherman,** author, b. in Litchfield, Conn., 11 May, 1808; d. in New York city, 21 Feb., 1885, was an early contributor of tales to the "Knickerbocker Magazine," to the "New World," the "Mirror," the "Literary World," and other journals. His signature of "Cassio" in Charles King's "America" was at one time well known. In 1836 he lectured before the New York mercantile library association on "American Criticism in American Literature," in which he opposed the prevalent spirit of ultra-laudation as injurious to the interests of the country. He published translations of Dumas's "Travels in Egypt and Arabia Petræa" (1839); Dupré's "Progress of Democracy" (1841); Balzac's "Eugénie Grandet" (1841), and "Père Goriot" (1842); and Dumas's "Impressions of Travel in Switzerland," Victor Hugo's "Handsome Pecopin," and A. Royer's "Charles de Bourbon" (1842–'3). In addition to contributing to many literary and theological journals, he wrote "The Sleep Rider; or, the Old Boy in the Omnibus, by the Man in the Claret-colored Coat," and a parody on a report made to the legislature regarding a riot which the police had failed to suppress (1842). He signed himself "The Man in Claret," and the work made a sensation in literary circles. Besides the foregoing, he published "Abridgment of Alison's History of Europe" (New York, 1843); "The Very Age," a comedy (1850); "John Doe and Richard Roe; or, Episodes of Life in New York" (1862); "Good English, or Popular Errors in Language" (1867); "Classical Elocution" (1867); and "Supplement to Duyckinck's History of the New World" (1871).—Another son, **John W.,** author, b. in Litchfield, Conn., 5 Nov., 1814; d. at sea, 1 Oct., 1838, took two or three long voyages, and was a successful writer of tales and sketches connected with the sea, some of which, entitled "Forecastle Yarns," were published in 1843 in the "New World Press," and afterward issued in book-form. A second edition, containing these, accompanied by a biographical sketch, and his journal of the voyage on which he died, was issued by his brothers for private circulation, under the title "John W. Gould's Private Journal of a Voyage from New York to Rio Janeiro" (New York, 1854).

GOULD, Jay, financier, b. in Roxbury, Delaware co., N. Y., 27 May, 1836. His early years were spent on his father's farm, and at the age of fourteen he entered Hobart academy, New York, and kept the books of the village blacksmith. He acquired a taste for mathematics and surveying, and on leaving school found employment in making the surveys for a map of Ulster county. The accuracy of this work attracted the attention of the late John Delafield, who applied to the legislature for aid in the completion of a topographical survey of the entire state by Mr. Gould. Mr. Delafield died before any material progress was made, and Mr. Gould undertook to make the surveys unaided. During the summer of 1853 he completed a survey of Albany county, and surveyed and mapped the village of Cohoes, and in the following year made the survey and map of Delaware county, and organized and despatched parties to survey Lake and Geauga counties, Ohio, and Oakland county, Mich. From these surveys he accumulated $5,000. He published a "History of Delaware County" (1856), and while projecting other surveys was prostrated with typhoid fever. On his recovery he became acquainted with Zadock Pratt, who sent him into the western part of the state to select a site for a tannery. He chose a fine hemlock growth, erected a saw-mill and blacksmith-shop, and with Mr. Pratt was soon doing a large lumbering business. Subsequently he bought out Mr. Pratt's interest, and conducted the business alone till just before the panic of 1857, when he sold out his entire plant. In 1857 he became the largest stockholder and a director in the Stroudsburg, Pa., bank. Shortly after the crisis he bought the bonds of the Rutland and Washington railroad at ten cents on the dollar, abandoning every other interest and putting all his money into railroad securities. For a long time he was president, treasurer, and general superintendent of this company. He brought about a consolidation of the Rensselaer and Saratoga road, and with the proceeds removed to New York city in 1859, established himself as a broker, and invested heavily in Erie railway stock. He entered the directory of that company and became president, holding the office till the reorganization of the directory in 1872. He next made large purchases of the stocks of the Union Pacific, the Wabash, the Texas Pacific, the St. Louis and northern, the Missouri Pacific, and the Missouri, Kansas, and Texas railroad companies, taking the latter out of the hands of its receiver. He also invested deeply in the stock of the Atlantic and Pacific telegraph company, and on its consolidation with the Western union he organized the American union (1879), which was merged into the Western union in 1881. In December, 1880, official records showed that Mr. Gould was in control of 10,000 miles of railroad, or more than one ninth of the entire mileage of the country. Early in 1881 he became interested in the elevated railroad system of New York city. A doubt having been cast upon his financial standing, he summoned several gentlemen to his private office on 13 March, 1882, and spread before them for examination certificates of stocks having a face value of $53,000,000, all in his own name, and offered to produce $20,000,000 more, if desired. In March, 1887, Mr. Gould purchased a controlling interest in the St. Louis and San Francisco railroad company, which has an aggregate mileage of nearly 900 miles, and is a joint owner with the Atchison,

Topeka, and Santa Fé railroad company, of the Atlantic and Pacific, and the western portion of the Southern Pacific railroad companies. These, with the projected links, will give him control of an additional 3,000 miles of rail.

GOULD, John Stanton, philanthropist, b. in 1810; d. in Hudson, N. Y., 8 Aug., 1874. He was a member of the Society of Friends, had received a thorough education, especially in physical science, and was well known as an industrious student and a popular essayist and lecturer on scientific subjects. He had an admirably conducted farm in Columbia county, N. Y., and took an active part in agricultural improvement. He was for several years president of the State agricultural society, and did much to advance its interests. He was also an earnest temperance advocate, and though in earlier years a Whig, and a member of the assembly from that party in 1846, and subsequently acting generally with the Republicans, he held his temperance principles above party allegiance, and was recognized as a Prohibitionist. He was much interested in the subject of prison reform, and was for many years one of the directors and executive officers of the New York prison association.

GOULD, Nathaniel Duren, musician, b. in Chelmsford (now Bedford), Mass., 26 March, 1781; d. in Boston, Mass., 28 May, 1864. His name was originally Nathaniel Gould Duren, but was changed in 1806, in honor of an uncle, who adopted him in 1792 and left him his estate in 1808. His father, Reuben Duren, was distinguished as a builder, and received a premium for the model of a bridge over the Merrimac at Pawtucket Falls. His son exhibited talent for penmanship, and engrossed many public documents and engraved title-pages for books. At the age of eleven he removed to the home of his uncle in New Ipswich, N. H., where in 1804 he was instrumental in forming the first military band in that part of the state. Afterward he studied vocal music under Dr. Reuben Emerson, and at the age of sixteen taught in the public schools. In 1798 he established his first singing-school in Stoddard, N. H., and for twenty years conducted singing-schools in New Hampshire and Massachusetts. About 1807 the Middlesex musical society was formed, of which he was conductor for several years. This society published the "Middlesex Collection." He removed to Boston in 1819, and taught vocal music and chirography there and afterward in New York for ten years. He then returned to Boston, and passed the rest of his life as a professional penman. He aided in compiling several hymn- and tune-books and anthems for church choirs, and composed several tunes, among which is "Woodlawn." His principal work is a "History of Church Music" (Boston, 1853). Previous to this he had published in Boston "Companion to the Psalmist"; "National Church Harmony"; "Sabbath-School Harmony"; "Social Harmony"; "Sacred Minstrel"; "Beauties of Writing"; "Writing-Master's Assistant"; and "Progressive Penmanship."—His son, **Augustus Addison,** naturalist, b. in New Ipswich, N. H., 23 April, 1805; d. in Boston, Mass., 15 Sept., 1866. He was graduated at Harvard in 1825, and at the medical department in 1830. He followed his profession in Boston with great success, and in 1856 was appointed visiting physician to the Massachusetts general hospital. Meanwhile he became a devoted student of natural history, and for two years taught botany and zoölogy in Harvard. He made a specialty of conchology, and stood pre-eminent in that branch of science, both at home and abroad. When Sir Charles Lyell visited the United States, in order to pursue his geological investigations, he immediately sought the aid of Dr. Gould as a coworker. In 1846 the shells collected by the Wilkes exploring expedition were submitted to him for examination, and again in 1860 those collected by Capt. Ringgold and Capt. Rogers were reported on by him. Dr. Gould was also a student of vital statistics, and contributed papers of great value to nearly every volume of the registrar-general of Massachusetts. He was a fellow of the American academy of arts and sciences and of the American philosophical society, and one of the original members of the National academy of sciences. In 1855 he delivered the annual address, entitled "Search out the Secrets of Nature," before the Massachusetts medical society, and was its president from 1864 till his death. He was also one of the founders of the Boston society of natural history. He was a large contributor to periodicals, and his publications in book-form include a translation of Lamarck's "Genera of Shells" (Boston, 1833); "A System of Natural History" (1833); "Report on the Invertebrata of Massachusetts" (Cambridge, 1841); "Mollusca and Shells" (Washington, 1846); "Principles of Zoölogy," with Louis Agassiz (Boston, 1848); Dr. Amos Binney's "The Terrestrial Air-breathing Mollusks of the United States and Adjacent Territories of North America," edited and completed (1851–'5); "A History of New Ipswich, New Hampshire," with Frederic Kidder (1852); "The Mollusca of the North Pacific Expedition" (Washington, 1860); and "Otia Conchologia," consisting of descriptions of new species of shells, with notes on changes in their nomenclature (Boston, 1862).—Another son, **Charles Duren,** publisher, b. in Ipswich, N. H., 2 Feb., 1807; d. in Boston, Mass., 17 Jan., 1875, became a member of the publishing firm of Gould, Kendall and Lincoln in 1835. The title of the firm was changed in 1850 to Gould and Lincoln, and Mr. Gould remained a partner in it until his death.

GOULD, Thomas R., sculptor, b. in Boston, Mass., in 1818; d. in Florence, Italy, 26 Nov., 1881. In his early life he was engaged with his brother in the dry-goods business, and was an active member of the Mercantile library association. He did not devote himself to art until in later life. His only master was Seth Cheney, in whose studio he modelled his first figure in 1851. He followed his profession in Boston until 1868, and among the works that he produced were two colossal heads, "Christ" and "Satan," both of which were exhibited at the Boston athenæum in 1863, but afterward removed to Mr. Gould's studio in Florence. James J. Jarves, in his "Art Thoughts," mentions the "Christ," in its character of an opposing conception to "Satan," as "one of the finest idealisms in modern sculpture." Previous to the civil war, Mr. Gould had acquired a moderate fortune, which he lost in the exigencies of the succeeding crisis. In 1868 he went to Italy, and settled with his family in Florence, where he devoted himself to study and work. One of his most celebrated statues is "The West Wind," in marble, which has been several times reproduced, and was brought into special prominence in 1874, through a charge that it was a reproduction of Canova's "Hebe," with the exception of the drapery, which was modelled by Signor Mazzoli. Animated newspaper correspondence followed this charge, and it was proved groundless. Mr. Gould declared that his designs were entirely his own, and that not a statue, bust, or medallion was allowed to leave his studio until finished in all points on which depended their character and expression. A copy of the "West Wind" was at the

Centennial exhibition, Philadelphia, in 1876. He returned to Boston in the spring of 1878. Among Mr. Gould's works are a number of portrait busts, including one of Emerson, now in Harvard university library; one of John A. Andrew, belonging to Mrs. Andrew; one of Seth Cheney, owned by John Cheney, of Connecticut; and one of the elder Booth. In statuary he has produced "Cleopatra," "Timon of Athens," "Ariel," a portrait statue of "John Hancock," which was exhibited at the centennial celebration of the battle of Lexington in 1875, and is now in Lexington town-hall. His portrait statue of John A. Andrew, a commission from the soldiers of the Grand army of the Republic, was placed beside the grave of that statesman in the Hingham cemetery, Massachusetts, in 1875. In 1878 Mr. Gould visited Boston, and exhibited "The Ghost in Hamlet," a front view of a head in alto-rilievo. The two alti-rilievi representing "Steam" and "Electricity," which flank the vestibule of the Boston "Herald" building, were among his latest works.

GOULD, Walter, artist, b. in Philadelphia in 1829. He studied drawing and perspective under J. R. Smith, and painting under Sully. He became a member of the Artists' fund society of Philadelphia in 1846, working there and in Fredericksburg, Va., where he painted a large number of portraits, nearly all of which were destroyed during the civil war. He removed to Florence in 1849, spent some months of study in Paris, and made occasional sketching-tours in the east. His subjects are generally oriental, and illustrate principally the habits and customs of the Turks. In 1851 he visited Asia Minor, lived with and painted portraits of the imprisoned governor of Hungary, Kossuth, and many other prominent men. He also visited Constantinople, and painted pictures of many important persons there. "An Eastern Story-Teller," painted for the collection of Matthew Baird, of Philadelphia, is regarded as his most valuable work.

GOULDING, Thomas, clergyman, b. in Midway, Ga., 14 March, 1786; d. in Columbus, Ga., 26 June, 1848. He was educated in Wolcott, Conn., and studied law with Judge David Daggett in New Haven, but determined to devote himself to the ministry, and was the first licentiate of the Presbyterian church in Georgia that was born in the state. Having been licensed in December, 1813, he preached in White Bluff, and was ordained as the regular pastor of the church there on 1 Jan., 1816. In 1822 he removed to Lexington, Oglethorpe co. On the establishment of a theological seminary by the synod of South Carolina and Georgia, he was appointed its only professor, and taught a class in theology in connection with his pastoral work. At the end of a year the seminary was transferred to Columbia, S. C., and he was professor of ecclesiastical history and church government until January, 1835, when he took charge of the church at Columbus, Ga. He was many years president of the board of trustees of Oglethorpe university. — His son, **Francis Robert,** author, b. in Midway, Ga., 28 Sept., 1810; d. in Roswell, Ga., 22 Aug., 1881, was graduated at the University of Georgia in 1830, and at the Presbyterian theological seminary in Columbia, S. C., in 1833. His life was devoted to the ministry until the failure of his health in 1865, when he applied himself to literature. Before this he had published "Little Josephine," a Sunday-school story (New York, 1844); and "Robert and Harold, or the Young Marooners on the Florida Coast," a story of adventure for boys (Philadelphia, 1852). The latter attained great popularity in the United States and Great Britain, where it was reprinted by six different publishers. An enlarged edition was published in Georgia during the war and in Philadelphia in 1866. After retiring from the pulpit he published "Marooners' Island" (Philadelphia, 1868); "Frank Gordon" (1869); "Fishing and Fishes"; "Life Scenes from the Gospel History"; and "Woodruff Stories" (1870).

GOULEY, John William Severin, physician, b. in New Orleans, La., 11 March, 1832. His parents were of French origin. He received a classical education, and was graduated M. D. at the College of physicians and surgeons in New York city in 1853. He then established himself in practice in that city, and performed many difficult operations in surgery, such as excising half of the lower jaw, the entire radius, and the entire lower jaw. In 1856 he was professor of anatomy in the Vermont medical college at Woodstock. In 1859 he became attending physician to Bellevue hospital, New York city. In 1861–'4 he was an assistant surgeon in the U. S. army. In 1864–'6 he was demonstrator of anatomy and instructor in histology and in operative surgery in the medical department of the University of New York, in 1866–'71 professor of clinical surgery and genito-urinary diseases, and in 1876 was reappointed. He has published various papers, and a volume on "Diseases of the Urinary Organs" (New York, 1873).

GOUPIL, René, French missionary, b. in Angiers, France, in 1607; d. in Smith's Island, near Westport, N. Y., 29 Sept., 1642. He was known in his native town as "the good René." He studied to be a physician, but left the profession to become a novice of the Society of Jesus. He was forced by ill-health to leave the novitiate, and then became a "donné" of the society—that is, one who gives his whole services to religion, receiving only a support. He went as a missionary to Canada, and accompanied Father Jogues on his return from Quebec to St. Mary's of the Hurons in August, 1642. The flotilla of canoes, in one of which they sailed, reached Three Rivers on 1 Aug., and had scarcely gone three leagues from that place when it was riddled with bullets by Mohawks in ambush. During the panic that ensued Father Jogues and René could have escaped from the Mohawks, who were wholly intent on securing their Huron prisoners. They surrendered themselves, however, in order to be near the captives. Goupil was cruelly beaten by his captors, and dragged from village to village for seven days, witnessing the deaths, one by one, of the Huron Christians. He was engaged in constant prayer during the whole agony, and in the middle of his torments instructed the young Indians to make the sign of the cross and to pray. This infuriated the savages still further, and finally, while in the act of teaching an Indian girl to make the sign of the cross, near the village of Andagoron, he was killed by a young Mohawk. Miracles are said to have attested his sanctity, and his name occurs in the list of martyrs recommended for canonization by the plenary council of Baltimore held in 1884.

GOURGUES, Dominique de, French soldier, b. in Mont-de-Marsan, France, in 1537; d. in Tours, France, in 1593. He served in the Italian wars under Maréchal de Strozzi, was captured by Spaniards in 1557, and then by the Turks, and served several years in the galleys. After his return to France he made a voyage to Brazil and the West Indies, and then entered the naval service of the house of Lorraine, and was employed against the Huguenots. The massacre by Pedro Menendez d'Aviles of the French colonists who had estab-

lished themselves on the St. John's river in Florida, and there built the Caroline fort, or Fort Charles, aroused indignation in France among Protestants and Roman Catholics alike. The king sent complaints to the Spanish court, but Menendez and his associates, instead of being punished for the deed, received rewards and honors. Capt. de Gourgues, embittered by the cruelty and indignity that he had received from the Spaniards, determined to avenge the death of his Protestant compatriots, though he was himself a Catholic. He sold a part of his estate, fitted out an expedition, and sailed from France on 22 Aug., 1567, with one small and two large vessels, with a commission to capture slaves at Benin. The real object of the expedition was not disclosed even to the soldiers who joined it. Arriving there, after a fight with some negro chiefs, he gained possession of the harbor, and sailed away with a cargo of slaves for the West Indies. At Puerto de la Plata, in Santa Domingo, one of his Spanish customers furnished him with a pilot for the coast of Florida. His force consisted of 150 arquebusiers, who volunteered from among the nobility and commonalty of Gascony, and 80 sailors who could serve as soldiers. According to the romantic French account of the expedition, he did not declare his intention until they were opposite Hispaniola. His squadron passed two batteries at the entrance of the St. John's river, being taken for Spanish vessels, and anchored at the mouth of the St. Mary's. The survivors of the former expedition had fled into the wilderness rather than trust themselves to the mercy of the bloodthirsty Menendez, who had attached placards to the murdered Huguenots with the inscription, "Not as Frenchmen, but as heretics." They had made friends with some of the Indians, and were protected by Saturiba, the only cacique who refused to submit to the Spaniards. This chief readily joined Gourgues in an attack on Fort San Mateo, as the Spaniards had rechristened the stone fort that the French had built on the St. John's river. The redoubt on the opposite side of the river was easily captured. The French then crossed in boats, while their Indian allies swam across. The French accounts relate that about sixty Spaniards sallied from each of the two forts, and that all were slain by the French and Indians excepting fifteen, who were taken prisoners, and afterward hanged. The artillery of the forts was placed on board, but, before the rest of the spoils could be removed, a train of gunpowder left by the Spaniards was accidentally lighted by an Indian who was cooking, and the magazine exploded, destroying everything. Descending the river, Gourgues captured the works at the mouth, and hanged thirty more Spaniards, erecting the inscription, "Not as Spaniards, but as treacherous robbers and assassins." Gourgues returned to the port of La Rochelle on 6 June, 1568. He was received cordially by Monluc, governor of Bordeaux, and with enthusiasm by the nation, but coldly by the court, which feared a rupture with Spain. Nevertheless, he was taken into the king's naval service in August, 1568, and given command of a vessel. A few days later he participated in the siege of La Rochelle, commanding the largest vessel of the squadron. Many years afterward, Queen Elizabeth, with the consent of the French king, offered him the command of the fleet that she sent to the aid of the king of Portugal. While on the journey to England he died. See "Le Voyage du Capitaine de Gourgues dans la Floride" in Bazanier's "L'Histoire notable de la Floride" (Paris, 1586; Latin version by De Bry). An English translation was made by Hakluyt (London, 1587), reprinted in French's "Historical Collections of Louisiana and Florida" (New York, 1869).

GOURLAY, Robert Fleming, Canadian statistician, b. in Fifeshire, Scotland, in 1778; d. in Edinburgh, 1 Aug., 1863. In 1801 he was employed by the imperial government in making inquiries into the condition of the British poor, and on his report a bill was introduced into the house of commons and adopted, but was rejected by the house of lords. In 1817 he arrived in New York, and soon afterward proceeded to Canada. Here he secured the ill-will of the authorities by calling a convention of deputies from the Upper Canadian constituencies to deliberate on the propriety of sending commissioners to Great Britain to call attention to the affairs of the province. The convention petitioned the prince-regent relative to the alleged mismanagement of the crown lands and the hostile attitude taken by the provincial government with relation to immigration. Gourlay was then ordered by the authorities to leave the province within six months, and, having failed to do this, he was arrested in 1819 and confined in Niagara jail. He was soon afterward banished from the province, and resided for a time in the United States. In 1836 the sentence of banishment was annulled, and Gourlay's imprisonment was admitted to have been illegal. In 1842 he petitioned the house for compensation, and was granted a pension of £50 a year, which he declined, as he claimed to be a creditor of the government. He is the author of "A General Introduction to a Statistical Account of Upper Canada" (1822), and of numerous pamphlets.

GOUVION, Jean Baptiste, French soldier, b. in Toul, 8 Jan., 1747; d. near Grisnelle, 11 June, 1792. He was an officer of engineers in the French army, came to America in 1777, served on the staff of Lafayette, was appointed major and afterward lieutenant-colonel of engineers, and received a pension for services at Yorktown. He returned to France at the end of the war, became adjutant-general in 1787, and major-general in the national guard in 1789. In 1791–'2 he was a deputy in the national assembly. He was made a lieutenant-general, and commanded the vanguard of Lafayette's army when he was killed.

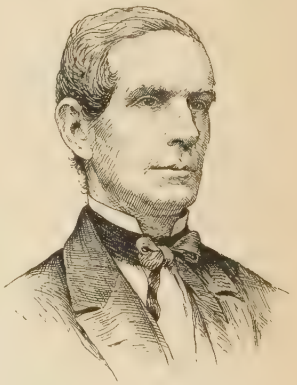
GOVE, William Hazeltine, politician, b. in Weare, N. H., 10 July, 1817; d. there, 11 March, 1876. He received a common-school education, taught in Lynn, Mass., one year, and an equal length of time in Rochester, N. Y. He also studied law a short time in Boston. He early became an active worker in the anti-slavery cause, a supporter of the Liberty party, and later a prominent Free-soiler. While connected with the latter party he became well known as a stump speaker, and gained the title of the "silver-tongued orator of New Hampshire." He was a member of the first Free-soil convention, held in Buffalo, N. Y., in 1848, was a candidate of his party for the legislature year after year, and in 1851, by a combination of Free-soilers and Whigs, he was elected. He was re-elected in 1852 and 1855. After the Free-soil organization was merged in the Republican party, Mr. Gove was for many years an active Republican. During the administrations of Lincoln and Johnston he held the office of postmaster. In 1871, having become dissatisfied with his party, he engaged in forming a labor reform party, whose voters, combining with the Democrats, elected him to the lower branch of the legislature, of which body he was chosen speaker. In 1872 he was a delegate to the Liberal Republican convention at Cincinnati, and acted thence-

forth with the Democratic party, which elected him to the state senate in 1873–'4. In the latter year he was made its president. As a young man Mr. Gove was engaged in the Washingtonian temperance movement, and spoke and wrote eloquently in aid of the cause. He edited for a short time the "Temperance Banner," published at Concord, N. H.

GOWAN, James Robert, jurist, b. in County Wexford, Ireland, 22 Dec., 1817. His parents emigrated to Upper Canada in 1821. The son studied law, was admitted to the bar in 1839, and in 1843 was elected judge of the judicial district of Simcoe, Upper Canada. He became associate judge of queen's bench and common pleas in 1857, and chairman of the board of county judges, which regulates the procedure of the division courts. He aided in preparing the bills to make the criminal law uniform in Canada, embodying a consolidation of the criminal laws in force in the several confederated provinces, with valuable additions and improvements in procedure, which were enrolled on the statute-book of 1869, and are now in force. In 1873 he was one of the royal commissioners to investigate charges against the ministry in connection with the Canada Pacific railroad contract. When the consolidation of the statute law for Ontario was determined in 1876, Judge Gowan was appointed with other judges on a commission issued for that purpose, and rendered important service, for which he received a gold medal from the government of Ontario. He retired from the bench in 1883. He has been interested in educational matters, serving as chairman of the board of public instruction from its foundation, and for many years as chairman of the senior high-school board of the county of Simcoe. He was appointed to the senate in 1885. In 1855 he established the first legal periodical in his province, "The Upper Canada Law Journal," to which he was a frequent contributor. The degree of LL. D. was conferred upon him by Queen's college in 1883. "The Addresses and Proceedings in Connection with the Retirement from the Bench of His Honor Judge James Robert Gowan," with selections from printed matter regarding his career, have been published for private circulation (1884).

GOWAN, Ogle Robert, member of the Canadian parliament, b. in County Wexford, Ireland, in 1796; d. in Toronto 21 Aug., 1876. His father, Capt. John Hunter Gowan, of Mount Nebo, was a leading county magistrate and distinguished in crushing the Irish rebellion of 1798. In early life he edited the "Antidote," a newspaper in Dublin. He removed to Canada in 1829, residing for a time in Escott, Leeds co., Ontario, and subsequently in Toronto. During the rebellion of 1837 he was appointed captain in the Leeds militia, and was present at the capture of Hickory island, near Kingston, in 1838. In the same year he was appointed lieutenant-colonel of militia. At the engagement between the British troops and the invaders, at "the Windmill," near Prescott, in November, 1838, he commanded the right wing of the British forces, and was three times wounded. For his bravery on that occasion, Lieut.-Col. Gowan was thanked in the military general orders, and by a general order of 4 Dec., 1838, his regiment, as a mark of distinction and approbation, was hereafter to be known as "The Queen's Royal Borderers." He was subsequently appointed to the command of 2d regiment of Leeds militia, and during the McKenzie-Papineau rebellion of 1837–'9 he was designated "the right arm of British power in America," being the head of a most powerful body of loyal men organized and sworn to support British supremacy. For twenty years he was the grand master of the Orange lodges of North America, of which he was the founder. He was a member of the Canadian parliament from 1834 till 1841, and was an ardent supporter of the administrations of Lords Seaton, Metcalf, and Cathcart. Mr. Gowan as a post-office inspector, and afterward a license-officer in Toronto. He was the author of "Annals of Orangeism" and "Orangeism: its Origin and History."

GOWANS, William, antiquarian bookseller, b. in the parish of Lismahagow, Scotland, 29 March, 1803; d. in New York city, 27 Nov., 1870. His parents desired to educate him for the ministry, but he was disinclined for so serious a profession and returned to work on his father's farm. In June, 1821, the family emigrated to the United States, and, after working on a flat-boat on the Mississippi, William became a gardener in New York city in 1825, and afterward successively a stone-cutter, stevedore, vender of newspapers, and bill-distributer for the Bowery theatre. In May, 1827, he obtained a clerkship in a small book-store, and in the following year began to trade on his own account, buying at auctions and vending as a book-pedler in the streets of New York city. In 1828 he opened a book-stall on the sidewalk in Chatham street. Here he remained two years, and thereafter opened a small store in the "Arcade" building, but soon returned to Chatham street. In 1837 Mr. Gowans became a book auctioneer. In 1840 he paid a brief visit to his native land, and on his return to New York city once more became a dealer in second-hand books, finally settling in Nassau street, where he remained till his death. His earliest publications were "Phædon" (New York, 1833), and "The Phœnix" (1835). From time to time followed re-publications of rare tracts and pamphlets, in limited editions, most of them historical Americana. After the death of his wife in 1863 he retired from contact with his fellow-men, and spent his time in his store and at the book auctions. At these places it had for a long time become the rule to knock down all lots for which there were no bona-fide bidders at the auctioneer's estimated value to Mr. "Chase," his commercial pseudonym. Many were the anecdotes related illustrating his peculiarities. A single one may be mentioned. While the writer was in conversation with the dealer on one occasion, a person entered the Nassau street shop and asked for a rare book, which was handed to him with the price, in answer to the customer's inquiry. "Is that not very high?" the latter asked; and Gowans, taking the work from his hand, said: "Well, I'll put it higher," and to the astonishment of the clerical customer replaced the volume on the shelf. When the latter remarked that he would take it, the irate antiquarian answered that it was not for sale, and turning his back on him resumed the interrupted conversation with the writer. Gowans's



William Gowans.

first book-catalogue was issued in 1842, his last one, No. 28, in 1870. These brochures were interspersed with valuable notes on books, and remarks on noted persons with whom the author had come in contact. Among these were Audubon, Burr, Bennett, Forrest, Fanny Kemble, Halleck, Macdonald Clarke, the mad poet, Poe, and Simms. Gowans's stock of books at the time of his death numbered nearly 300,000 volumes, and were disposed of by auction. The catalogue was in sixteen parts, containing 2,476 pages, and the sale began 30 Jan., 1871, and ended 5 Feb., 1872, lasting for about a month in each season. His funeral discourse was delivered by the Rev. John Thompson, D. D., and memorial sketches were written by his friend and physician, Dr. Samuel S. Purple, and the Rev. S. I. Prime, D. D., of the "New York Observer."

GOWEN, Franklin Benjamin, railroad manager, b. in Philadelphia, Pa., 9 Feb., 1836. He was educated at Emmitsburg, Md., and in a Moravian school at Litiz, Pa. In 1858 he entered into the business of mining coal, which he soon abandoned, and began the study of the law. He was admitted to the bar in 1860, and began practice in Schuylkill, rising to distinction in his profession. In 1862 he was elected district-attorney of Schuylkill county. On resuming his general practice at the bar, he was retained as counsel for the Philadelphia and Reading railroad, and of the Girard coal-trusts, in connection with their large interests in the mining region. In 1869 he was chosen to the presidency of the former company, and filled the office until 1881, when because of oppositition to his plans for the relief of the finances of the road he failed of a re-election. But he was again chosen in 1882. In 1872 he was elected a member of the Constitutional convention of Pennsylvania, and in this body ranked as one of its ablest members. Mr. Gowen conceived and established the Philadelphia and Reading coal and iron company, which is probably the largest land and mining company ever organized in this country. To him is also due the honor of being the one who conceived and put in operation the movement against the famous organization known as the "Mollie Maguires," which had produced a reign of terror in the coal region, extending over a period of twenty years, and which the ordinary machinery of the law had been unable to suppress. In the trials which followed this movement in 1876, Mr. Gowen was one of the counsel for the commonwealth. He is an orator of force and eloquence, and has been eminent as a financier and railroad manager. His argument in the case of the State *vs.* Thomas Munley (one of the Molly Maguire trials) has been published (Pottsville, Pa., 1876).

GOYENECHE Y BARREDA, José Manuel (go-yay-nay'-chay), count of Guaqui, South American soldier, b. in Arequipa, Peru, 13 June, 1775; d. in Madrid, Spain, 15 Oct., 1846. He entered the military service as a cadet in the organized militia, and in 1793 was lieutenant of the cavalry of Camana. He went to Spain in 1795, and in 1801 was sent to the different countries of Europe, to study the progress of military tactics and their application for the defence of Spain. On his return he rose to the rank of brigadier, and after the entry of the French into Madrid was appointed by Soult to go to South America in the interest of the French domination, but on his way espoused the cause of Ferdinand VII. In 1809 he was appointed captain-general and president of the audiencia of Peru, and in that year marched against the revolutionists and defeated them, 25 Oct., near La Paz. After the declaration of independence in Buenos Ayres, 25 May, 1810, Goyeneche marched against the republican forces of that province, reconquering the whole upper part of it. He subsequently won other battles, but his lieutenant, Tristan, was defeated, and Goyeneche, disgusted with the prosecution of a war of which he could see no end, asked for his relief, and retired to Spain in 1813. There he fought against the French under Soult, and was rewarded with the grand cross of Isabel la Catolica, the title of count of Guaqui, and the rank of lieutenant-general. He continued to serve the king as councillor of state, senator, and commander-in-chief of several provinces, received many orders, and in 1846 was elevated to the rank of hereditary grandee of Spain. The historian Funes says of him: "Goyeneche was Bonapartist in Madrid, federalist in Seville, autocrat in Montevideo, royalist in Buenos Ayres, and despot in Peru."—His brother, **José Sebastian,** Peruvian R. C. bishop, b. in Arequipa, 19 Jan., 1784; d. in Lima, 19 Feb., 1872, studied in the College of the Immaculate Conception of Arequipa, and in the University of Lima, where in 1806 he was appointed assistant professor of theology, and in the same year was graduated in law at the royal audiencia. He was appointed assessor of the commercial and mining tribunals, but in 1807 entered holy orders and became successively curate of Calca and of Santa Marta in Arequipa. He was also for some time ecclesiastical governor of that bishopric, and in 1811 prebendary of the cathedral. In 1816 he was appointed inquisitor, and in 1817 bishop of Arequipa, being consecrated in 1818. When the independence of Peru was proclaimed, 23 July, 1821, he accepted the situation, although his brother, the count of Guaqui, belonged to the opposite party. In 1860 he was appointed archbishop of Lima, and during his incumbency organized the seminary of that city.

GRACE, Thomas L., R. C. bishop, b. in Charleston, S. C., 16 Nov., 1814. At the age of fifteen he entered the Roman Catholic seminary in Charleston, with the view of becoming a priest. He left after a year and became a member of the order of St. Dominick in St. Rose's convent, Ky. He was afterward sent to Rome, and studied theology for seven years in the College of the Minerva. He was ordained priest at Rome, 21 Dec., 1839, returned to the United States five years afterward, and was engaged in missionary work for several years in Kentucky and Tennessee. In Memphis he built the Church of St. Peter and St. Paul, one of the finest in the city, as well as the convent of St. Agnes, and an orphan asylum. He was consecrated bishop of St. Paul in the cathedral of St. Louis by Archbishop Kenrick, 24 July, 1859. The administration of this large diocese taxed him to the utmost, and in 1875 he succeeded in having northern Minnesota set off as a vicariate, and John Ireland was appointed his coadjutor. Dakota, which had also been under his jurisdiction, was placed under a vicar-apostolic in 1879. Although the diocese of St. Paul was thus reduced within comparatively narrow limits, it contained in 1884 one hundred and fifty priests and over two hundred churches, with hospitals, asylums, protectories, and schools. Bishop Grace celebrated his silver jubilee in July, 1884, and in the same year resigned his see, and became titular bishop of Mennith.

GRAEME, Thomas, physician, b. in Balgowan, Scotland, 20 Oct., 1688; d. in Graeme Park, near Philadelphia, Pa., 4 Sept., 1772. He came to this country in 1717, in the company of Sir William Keith, lieutenant-governor of Pennsylvania. Having previously studied medicine, shortly after his

arrival he entered on its practice in Philadelphia, occupying a prominent place in his profession throughout his life. In 1727 he was appointed naval officer at Philadelphia, was again chosen in 1741, and continued to fill the office for over twenty years thereafter. In February, 1726, he became a member of the provincial council, in 1731 a justice of the supreme court, in which office he served several years, in 1749 was chosen the first president of St. Andrew's society, and in 1751–3 was physician to the Pennsylvania hospital, of which charity he was one of the founders. He was one of the early members of the American philosophical society of Philadelphia.

GRAFF, Frederick, engineer, b. in Philadelphia, Pa., 27 Aug., 1775; d. there 13 April, 1847. His early life was devoted to the trade of a carpenter, and he acquired skill as a draughtsman. When twenty years old he met with an accident, and was employed by H. B. Latrobe, as his assistant engineer, in erecting the first water-works in Philadelphia, which were in Centre square, the site of the present city-hall. On 1 April, 1805, he was elected superintendent and engineer of the works. These were found to be wholly inadequate after several years of trial, and in 1811 he recommended Fairmount as the proper place for the water-works, and was intrusted with their construction. At this time the pipes were made of wood, but he devised the iron-pipe system which is now universally used. He brought the work to perfection, and patterns of his fire-plugs and stop-cocks were sent to England. His experience and ability now became acknowledged throughout the country, and he supplied detailed information to about thirty-seven corporations in the United States, including New York and Boston. He was engaged for forty-two years in the service of the city of Philadelphia, and a monument to his memory is erected in the grounds at Fairmount water-works. In 1822 the city water committee sent him a resolution of thanks, and he was presented with a silver vase. In 1828 he received another from the water committee "as a testimonial of respect for his talents and zeal effectually displayed in overcoming unforeseen difficulties encountered in the construction of the northeast reservoir at Fairmount."

GRAFF, John Michael, Moravian bishop, b. in Saxe-Meiningen, Germany, 28 Sept., 1714; d. in Salem, N. C., 28 Aug., 1782. He was graduated at the University of Jena, came to this country in 1751, and served for two years as an itinerant evangelist in Pennsylvania and the neighboring colonies. After this he took charge of the Moravian church at Nazareth, Pennsylvania, where he labored until 1761. During the French and Indian war Graff displayed no little prudence in caring for the safety of his parishioners. On several occasions hostile bands of the savages came into the neighborhood of Nazareth, but never ventured to attack the town. From Nazareth he was transferred to the new Moravian settlement in North Carolina, where, in 1773, he was appointed a member of the southern governing board, and on 6 June of the same year consecrated to the episcopacy. In this office, amid many trying circumstances, he labored with great zeal and courage until his death.

GRAFFENRIED de, pioneer, lived in the 17th and 18th centuries. During the settlement of Carolina by the Palatines, fugitives from the Rhine and Neckar, the Tuscarora tribe of Indians became greatly indignant at their encroachments. Graffenried, who had undertaken the charge of establishing the exiles, accompanied by Lawson, the surveyor-general of the northern provinces, ascended the Neuse river in 1711 to discover how far it was navigable, and also to explore the neighboring country. They were seized by a party of sixty well-armed Indians and taken to a village of the Tuscaroras, where a council was assembled. Complaints were made of the conduct of the settlers in Carolina, especially that of Lawson, who had divided their territory into lots. They charged him with being "the man who had sold our land." After a discussion of two days, the death of the prisoners was decreed. A fire was kindled, a ring formed around the victims, and the council assembled. Behind the two rows of chiefs about 300 Indians were dancing. No reprieve was granted to Lawson, but after five weeks Graffenried was permitted to return through the woods on foot to the settlements, after promising to occupy no land without the consent of the tribe.

GRAFTON, Edward C., naval officer, b. in Boston, Mass.; d. in New York city, 24 June, 1876. His father, Joseph, rose to the rank of major in the regular army, won distinction in the war of 1812, and afterward became surveyor of customs in Boston. The son entered the navy as midshipman in 1841, and became passed midshipman in 1847. He was commissioned lieutenant, 15 Sept., 1855; lieutenant-commander, 16 July, 1862; commander, 20 Dec., 1866, and was retired, 18 Jan., 1871. At the time when the Confederate ram "Merrimac" attempted to raise the blockade, Lieut. Grafton was flag-officer of the frigate "Minnesota," then lying near the mouth of the James river. In the engagement that followed in Hampton Roads he played an active part. On being commissioned lieutenant-commander he was placed in command of the steam gun-boat "Genesee," and participated in the bombardment of Fort Morgan, Mobile bay. In 1866 he was in command of the "Gettysburg," of the North Atlantic squadron.

GRAFTON, Joseph, clergyman, b. in Newport, R. I., 9 June, 1757; d. in Newton, Mass., 16 Sept., 1836. His early education was confined to the elementary branches. He was licensed to preach as a Congregationalist, but in 1787, having changed his views, he united with the 1st Baptist church in Providence, R. I. Soon afterward he accepted a call to Newton, Mass., and was ordained as pastor of the Baptist church in that place, 18 June, 1788. Here he remained for nearly half a century. He was one of the best-known and most honored preachers of his denomination. He was for a time president of the board of trustees of the Newton theological institution.

GRAHAM, Charles Kinnaird, civil engineer, b. in New York city, 3 June, 1824. He was entered in the U. S. navy as midshipman in 1841, and served in the Gulf during the war with Mexico, at the close of which, in 1848, he resigned, returned to New York, and devoted himself for several years to the study of engineering. About 1857 he was appointed constructing engineer of the Brooklyn navy-yard, the dry-dock and landing-ways being built under his supervision. At the beginning of the civil war he volunteered in the National army, about 400 men in his employ in the navy-yard following his example. The Excelsior brigade was organized, in which Graham subsequently became major and colonel. Throughout the early part of the contest he was actively engaged in the Army of the Potomac. In November, 1862, he was commissioned brigadier-general, and fought at the battle of Gettysburg, where he was severely wounded. He was afterward assigned to the command of a gun-boat flotilla on the James river under Gen. Butler, and was the first to carry the national

colors up that river. He subsequently took part in the attack on Fort Fisher, and remained on duty at different points until the close of the war, when he returned to the practice of engineering in New York city. He was brevetted major-general of volunteers 13 March, 1865. Among the enterprises with which he has since been connected are the Broadway pavement commission and the Beach pneumatic transit company. Gen. Graham was chief engineer of the dock department from 1873 till 1875, and surveyor of the port of New York from 1878 till 1883, when he became naval officer, and held that post until 1885.

GRAHAM, David, lawyer, b. in London, England, 8 Feb., 1808; d. in Nice, France, 27 May, 1852. At the time of his birth, Mr. Graham's father, an Irishman, was leaving Great Britain for political reasons. The son was educated partly at Columbia and partly under the supervision of his father, who, according to Prof. Charles Anthon, was one of the best scholars in the country. Young Graham studied law, and was admitted to the bar. During 1842 he served as corporation counsel. He was subsequently appointed, in conjunction with Arphaxad Loomis and David Dudley Field, "to revise, reform, simplify, and abridge the rules of practice, pleadings, forms, and proceedings of the courts of record" of the state of New York, under the constitution adopted 3 Nov., 1846. This was the forerunner of the present system of practice, and occupied Mr. Graham and his associates several years. Meantime he was successful as a lawyer, especially in criminal cases. In the trial of Bishop Benjamin T. Onderdonk before the house of bishops in 1844, Mr. Graham, as counsel for the defendant, added greatly to his reputation. On the opening of the New York university in the spring of 1838, he was appointed professor of the law of pleading and practice. Mr. Graham is the author of "Practice of the Supreme Court of the State of New York" (New York, 1832). It passed through a second edition (1836), and he had finished revising the first volume of a third (1847) at the time of his death. He also published "New Trials" (1834; new ed., greatly enlarged, by D. Graham, Jr., and Thomas W. Watterman, 3 vols., 1856), and "Courts of Law and Equity in the State of New York" (New York, 1839). In addition to the above, he issued an annotated edition of Smith's "Chancery Practice," which was published as the second American edition of that work in 1842.

GRAHAM, George, soldier, b. in Chester county, Pa., in 1758; d. near Charlotte, N. C., 29 March, 1826. His mother was left a widow with six children, and but slender means. The son emigrated to North Carolina, and was educated at the Queen's museum, Charlotte. When only seventeen, with a few others, he rode all night to reach Salisbury, and there seized two Tory lawyers, Dunn and Boothe by name, and carried them to Camden, S. C., where they were imprisoned, but subsequently sent for safe-keeping to Charleston as "persons inimical to the country." He served throughout the Revolutionary war, and on 3 Oct., 1780, was one of twelve who attacked and drove back a superior British force seven miles to the south of Charlotte. He was also active, when the enemy was encamped near his residence, in attacking their foraging parties. After the declaration of peace he served several terms in the legislature, was for a long time clerk of the court of Mecklenburg county, became major-general of militia, and filled other responsible offices.—His brother, **Joseph,** soldier, b. in Chester county, Pa., 13 Oct., 1759; d. in Lincoln county, N. C., 12 Nov., 1836. At the age of seven he accompanied his widowed mother to North Carolina. He was educated at Queen's museum in Charlotte, and at the age of nineteen enlisted in the 4th regiment of North Carolina regular troops, under Col. Archibald Lytle. He was called into active service in the autumn of 1778, and accompanied Gen. Rutherford to the banks of the Savannah soon after the defeat of Gen. Ashe at Brier Creek. He was with Gen. Lincoln while the latter was manœuvring against Prevost, and was in the severe battle at Stono in June, 1779. He was afterward prostrated by a fever, and returned home, but rejoined the army after the fall of Charleston. He was appointed adjutant of the Mecklenburg regiment, and saw considerable service, meeting the enemy while covering the retreat of Major William R. Davie, near Charlotte, in the autumn of 1780. In the latter encounter he was cut down by a British dragoon, and received six sabre-thrusts and three bullet-wounds. After recovering from these, he raised a company of mounted riflemen, and with fifty men disputed the passage of the British army at Cowan's ford. Subsequently, with the assistance of some troops from Rowan, he surprised and captured a British guard at Hart's mill, only a short distance from headquarters at Hillsborough, and the next day was with Gen. Henry Lee when Pyles was defeated. The following September he was appointed major of a legion of cavalry he had been ordered to raise, and went toward Wilmington to rescue Gov. Burke, who had been abducted from Hillsborough by Fanning, a noted loyalist. South of Fayetteville he met a band of Tories, and after a severe skirmish, defeated them, although his force numbered only 136 against the enemy's 600. After he had engaged in two or three other bold enterprises, the surrender of Cornwallis put an end to hostilities in the south. He married in 1787, and in 1792 erected iron-works and settled in Lincoln county. He had previously resided in Mecklenburg county, which he frequently represented in the state senate. In 1814, 1,000 men were raised in North Carolina to aid the Tennessee and Georgia volunteers against the Creek Indians. Graham was given the command and commissioned major-general. He arrived with his corps just after the Creeks had submitted to Gen. Jackson, Gen. Coffee, and Gen. Carroll, after the battle at the Horse Shoe. For many years afterward he was the senior officer of the 5th division of the state militia.—His son, **James,** lawyer, b. in Lincoln county, N. C., in January, 1793; d. in Rutherford county, N. C., in September, 1851, was graduated at the University of North Carolina in 1814, studied law, was admitted to the bar, and practised successfully in his native county for many years. Removing to Rutherford county, he served several terms in the legislature in 1822–'9, and was elected to congress as a Whig, serving from 2 Dec., 1833, till 3 March, 1843, excepting from 25 March, 1836, to 5 Dec., 1836, when a Democratic house declared his seat vacant, although it was not given to his competitor. Mr. Graham was again chosen at a new election. He was also elected to the 29th congress, serving from 1 Dec., 1845, till 3 March, 1847, when he retired and devoted the remainder of his life to farming.—Another son, **William Alexander,** senator, b. in Lincoln county, N. C., 5 Sept., 1804; d. in Saratoga Springs, N. Y., 11 Aug., 1875, was graduated at the University of North Carolina in 1824, admitted to the bar at Newbern, N. C., and began to practise law in Hillsborough. He was several times elected to the state legislature between 1833 and 1840, and was more than once chosen speaker. In 1840 he was elected

to the U. S. senate to fill the vacancy occasioned by the resignation of Robert Strange, serving from 10 Dec., 1840, to 3 March, 1843. In 1844 he was elected governor by the Whigs on a larger vote than was ever before polled. He was re-elected in 1846 by an increased majority, but declined a third term, and retired to private life. He was offered the Spanish mission by President Taylor in 1849, but declined it, and in 1850 became secretary of the navy in Fillmore's cabinet, but resigned in 1852 in consequence of having been nominated by the Whigs for vice-president on the ticket with Gen. Scott. During his term of office as secretary he projected and carried out the important expedition to Japan under Com. Perry. Gov. Graham served as senator in the 2d Confederate congress from 22 Feb., 1864, until the end of the war. He was also a delegate to the Union convention at Philadelphia in 1866, which was called to sustain the policy of Andrew Johnson. At the time of his death he was acting as one of a commission that had been appointed to settle the boundary dispute between the states of Maryland and Virginia.

Wm. A. Graham

GRAHAM, George Rex, editor, b. in Philadelphia, Pa., 18 Jan., 1813. He was early intended for the bar, but the death of his father compelled him to relinquish this ambition, and he lived with his uncle in Montgomery county, Pa., where he employed every spare moment in reading. In 1832 he returned to Philadelphia and began to learn the trade of a cabinet-maker, meanwhile devoting six hours daily, after his work was completed, to literary pursuits. A few years later he was enabled to enter a law-office, and in 1839 was admitted to the bar. He had already contributed a series of papers to the Philadelphia press, which met with such favor that he was invited to become the editor of the "Saturday Evening Post," and afterward was one of its proprietors. His relations with this journal continued until 1846. He purchased in 1839 a monthly called "Atkinson's Casket," which he published until 1841, when, uniting with it the "Gentleman's Magazine," he began the publication of "Graham's Magazine." This periodical attained a large circulation under his management, and its contributors included William C. Bryant, J. Fenimore Cooper, Henry W. Longfellow, Edgar A. Poe, and Bayard Taylor. For many years it was the best periodical of its kind published in the United States. In 1846 he purchased the "North American," and in 1847 the "United States Gazette," which he incorporated with the "North American." Later he engaged in stock operations, losing thereby much of his money, and was compelled to part with the "North American" and the "Magazine." But subsequently he regained control of the "Magazine," and continued its publication until about 1851. He then lived by his pen, but failing health led to his being supported through the liberality of George W. Childs. At present (1887) he is an inmate of the New York ophthalmic hospital, where he is awaiting an operation for cataract on both eyes.

GRAHAM, Isabella, philanthropist, b. in Lanarkshire, Scotland, 29 July, 1742; d. in New York city, 27 July, 1814. She was the daughter of John Marshall, who educated her carefully. In 1765 she married Dr. John Graham, a physician of Paisley, and accompanied him with his regiment to Canada, where she spent four years. Her husband was then ordered to the island of Antigua, where he died in 1774. Mrs. Graham returned to Scotland, but in 1789 came to New York city, and established a school for young ladies, in which for many years she was eminently successful. Before leaving Scotland she had founded the Penny society, now known as the Society for the relief of the destitute sick, and she continued to labor in the same field in New York. Among the more important of the institutions established by her are the Widows and Orphans' asylum societies, the Society for the promotion of industry, and the first Sunday-school for ignorant adults. She also aided in organizing the first missionary society, and the first monthly missionary prayer-meeting in the city of her residence. She was the first president of the Magdalen society, systematically visited the inmates of the hospital and the sick female convicts in the state-prison, and distributed Bibles and tracts long before there was a Bible or tract society in New York.—Her daughter, **Joanna,** who survived her, was the mother of George W. Bethune (*q. v.*). Of the "Life and Letters" of Mrs. Graham (1816; last edition, London, 1838) more than 50,000 copies have been sold in this country, and many editions issued in England and Scotland. See "Letters and Correspondence," selected by her daughter, Mrs. Bethune (New York, 1838); and Mason's "Memoir of Isabella Graham," published by the American tract society.

GRAHAM, James Lorimer, consul, b. in New York city in January, 1835; d. in Florence, Italy, 30 April, 1876. He was partly educated at Amiens, France, where, on account of his precocious literary talent, he was selected to deliver a poetical address of welcome to Lamartine when the latter visited the school in 1848. Mr. Graham lived for a time in Rio Janeiro, and, after returning to New York, was a passenger in the steamer "San Francisco," which foundered in a gale off Cape Hatteras. His experience in this wreck injured his health and hastened his death. In 1856 he married and settled in New York, where he became widely known through his taste for art and literature and his brilliant conversational talents. As a member of the Century club, the Geographical society, and kindred institutions, he made the acquaintance of many artists and authors. He spent the years 1862–'3 in Europe, and after remaining in New York until 1866 again went abroad. Meantime he had been busily engaged in acquiring whatever curiosities he had found in his travels, until he had large collections of coins, autographs, drawings, and books. Some time after his return to Europe, Mr. Graham was appointed U. S. consul-general for Italy, and resided in Florence. When the capital was transferred to Rome, he preferred to accept the office of a simple consul rather than change his home.

GRAHAM, John, clergyman, b. in Edinburgh, Scotland, in 1694; d. in Woodbury, Conn., in December, 1774. He was a descendant of one of the marquises of Montrose. He was educated at Glasgow, and studied medicine. Coming to this country with emigrants from Londonderry in 1718, he first resided at Exeter, N. H., but afterward studied theology, and was ordained as the first clergyman of Stafford, Conn., in 1723. He obtained his dis-

missal in 1731 on the ground of insufficient support, and in 1733 he was called to the 2d church of Southbury, then Woodbury, where he spent over forty years. During the great New England revival of 1740 he was especially active. Mr. Graham was the author of "A Ballad against the Church of England in Connecticut" (1832), a "Tract" on the same subject, and "A Rejoinder to Johnson's Answer." (See Chandler's "Life of Samuel Johnson.")—His son, **Andrew,** physician, d. in 1785, was a patriot of the Revolution, and represented Woodbury, Conn., for many years in the legislature. In the battle of Danbury he acted as regimental surgeon, and in the engagement at White Plains, N. Y., was taken prisoner and was not released until the surrender of Gen. Cornwallis. —Andrew's son, **John Andrew,** advocate, b. in Southbury, Conn., 10 June, 1764; d. in New York city, 29 Aug., 1841, was admitted to the Connecticut bar in 1785, and at once removed to Rutland, Vt. He subsequently went on an unsuccessful mission to England to obtain the consecration of Bishop Peters from the English bishops, and on a second visit to Europe in 1796 he received the degree of LL. D. from the University of Aberdeen. After 1805 he resided constantly in New York city, and became well known as an able criminal lawyer. He published "A Descriptive Sketch of the Present State of Vermont" (London, 1797); a volume of speeches (1812); and "Memoirs of John Horne Tooke; also, Proofs Identifying him as the Author of Junius" (New York, 1828).—**John Hodges,** naval officer, son of John Andrew, b. in Vermont 9 March, 1794; d. in Newbury, N. H., 15 March, 1878, entered the navy as midshipman, 18 June, 1812, was promoted to be lieutenant, 5 March, 1817, and captain, 7 March, 1849. He was placed on the reserved list in 1855, and made commodore on the retired list, 4 April, 1867. He served in the war of 1812, and, while a midshipman under Com. Chauncey on Lake Ontario, was one of twelve officers who took part in an expedition against the British stronghold opposite Black Rock, N. Y. Nine of the party were killed or severely wounded. Among the latter was young Graham, who subsequently was compelled to submit to the amputation of a leg. In the engagement on Lake Champlain, 11 Sept., 1814, he had command of Com. McDonough's flag-ship. After the declaration of peace, Com. Graham was engaged in shore duty.—**John Lorimer,** lawyer, another son of John Andrew, b. in London, England, 20 March, 1797; d. in Flushing, N. Y., 22 July, 1876, was admitted to the New York bar in 1821, and soon acquired a large practice. In 1834 he was appointed regent of the state university, and from 1840 till 1844 was postmaster of New York city. He occupied important offices in the state militia, and in 1861 received an appointment in the treasury department at Washington. He was elected to the council of the University of the city of New York, in which institution he founded a free scholarship.

GRAHAM, John, diplomatist, b. in Dumfries, Prince William co., Va., in 1774; d. in Washington, D. C., 6 Aug., 1820. He was graduated at Columbia in 1790, and emigrated to Kentucky, where he represented Lewis county in the legislature. He was then sent by President Jefferson to the territory of Orleans as secretary, and subsequently held a similar office in the American legation in Spain. During the time when James Madison was secretary of state, Graham was chief clerk under him. In 1818 he accompanied a commission to obtain political information in Buenos Ayres, and wrote an elaborate report, which was printed by the state department. He was next sent by President Monroe as minister to the court of Portugal, then resident in Rio Janeiro. His health gave way under the Brazilian climate, and he died soon after returning to Washington.—His brother, **George,** acting secretary of war, b. in Dumfries, Prince William co., Va., about 1772; d. in Washington, D. C., in August, 1830, was graduated at Columbia in 1790, studied law, and practised in his native town. He afterward removed to Fairfax county, and raised and commanded the "Fairfax light-horse" during the war of 1812. On the retirement of Gen. Armstrong from the war department after the burning of Washington, Graham was placed in charge as chief clerk. During the last two years of Madison's administration, and until relieved by John C. Calhoun in the first year of Monroe's term, he was acting secretary of war. In 1818, at Mr. Calhoun's request, he made a long and perilous journey to inspect a settlement which had been made by Gen. Lallemande, Napoleon's chief of artillery, with 600 armed colonists, at Orcoguises Bluffs, on Trinity river. Finding the colonists on Galveston island, he induced them to submit to the authority of the United States and abandon their enterprise. On his return he became president of the Washington branch of the U. S. bank, which office he held until he was appointed commissioner of the land office in 1823, serving in the latter capacity during the remainder of his life. While connected with the bank he was employed by the government to wind up the "Indian factorage" affairs, and in doing so is said to have saved the country not less than $250,000.

GRAHAM, Henry Hale, jurist, b. in London, England, 1 July, 1731; d. in Philadelphia, Pa., 24 Jan., 1790. He came to this country with his father, William Graham, in 1733, and settled in Chester county, Pa. He became a lawyer, and was a man of large influence in the province. He held the office of register, recorder, prothonotary, and clerk of the several courts of Chester county, and from 1761 till 1789 was one of the judges of the courts of the county. During the latter year Delaware county was created, and he was commissioned president judge of its court of common pleas. In 1790 he was chosen a delegate to the constitutional convention of the state, and died during the sitting of the convention, which body, out of respect to his memory, adjourned, and sent three of their members to Chester to attend his funeral.

GRAHAM, Sylvester, vegetarian, b. in Suffield, Conn., in 1794; d. in Northampton, Mass., 11 Sept., 1851. His father was an English clergyman, a graduate of Oxford, who came to this country and settled in Suffield. At nineteen years of age he began to teach, and continued as long as his health would permit. In 1823 he matriculated at Amherst with the intention of preparing for the ministry, but, having exhibited unusual powers of elocution, he was denounced as a "stage actor" and a "mad enthusiast," and did not complete the course. He, however, entered the Presbyterian ministry soon after his marriage in 1826. In 1830 he was employed by the Pennsylvania temperance society as a lecturer, and while thus engaged he became convinced that the prevention and cure of intemperance would be best achieved by the adoption of a purely vegetable diet, which he supposed would take away the desire for stimulants. He subsequently applied this theory to all forms of disease. He published an "Essay on the Cholera" (1832); "Graham Lectures on the Science of Human Life" (2 vols., Boston, 1839); "Bread and Bread-making"; "A Lecture to Young Men on

Chastity"; and "The Philosophy of Sacred History" (only one volume of which was completed).

GRAHAM, William Montrose, soldier, b. in Prince William county, Va., in 1798; d. in Mexico, 8 Sept., 1847. He was graduated at the U. S. military academy in 1817, and entered the army as lieutenant of artillery. He was promoted through the various grades to be lieutenant-colonel of the 11th infantry in April, 1847. He served on recruiting duty, constructing military roads in Mississippi and in Florida, and in garrison until 1835. He took part in the campaigns against the Seminole Indians in 1835–'8 and in 1841–'2, being twice severely wounded. In the Mexican war he was engaged in the battles of Palo Alto, Resaca de la Palma, Monterey, Contreras, Churubusco, and Molino del Rey, where he was killed while leading an assault on the enemy's works.—His brother, **James Duncan,** topographical engineer, b. in Prince William county, Va., 4 April, 1799; d. in Boston, Mass., 28 Dec., 1865, was graduated at the U. S. military academy in 1817, and became lieutenant of artillery. He was promoted several steps in this arm of the service, and employed on topographical duty, but it was not until 1829 that his specialty was recognized. He was then brevetted captain and afterward major, that he might enter the corps of topographical engineers, receiving the full commission of major in 1838. In 1839–'40 he was astronomer of the surveying party that, in behalf of the United States, established the boundary-line between the latter and the then new republic of Texas. In 1840 he was appointed commissioner for the survey and exploration of the northeast boundary of the United States, and was employed along the Maine and New York frontiers until 1843. In the same year he was ordered to duty as astronomer on the part of the United States for the joint demarcation of the boundary between the United States and the British provinces, under the treaty of Washington. He was thus employed during the Mexican war. On its conclusion he was brevetted lieutenant-colonel, the commission reading, "for valuable and highly distinguished services, particularly on the boundary-line between the United States and the provinces of Canada and New Brunswick." In 1850 Col. Graham was engaged by the states of Maryland, Pennsylvania, and Delaware, to examine certain disputed questions regarding the intersection of the boundary-line of those states. He made a thorough survey of the line originally made by Mason and Dixon, and published a voluminous report thereon. He was employed in the final settlement of the questions resulting from the war with Mexico, and during 1851 was U. S. astronomer in the survey of the boundary-line between this country and Mexico. For the next ten years he was in charge of various harbor improvements on the northern and northwestern lakes, in which he discovered the existence of a lunar tide (1858–'9). At the time of his death he was superintending engineer of the sea-walls in Boston harbor, and of the repairs of harbor works on the Atlantic coast from Maine to the capes of the Chesapeake. He was promoted to be colonel of the engineer corps, 1 June, 1863. He was a member of several scientific societies.—Another brother, **Lawrence Pike,** soldier, b. in Amelia county, Va., 8 Jan., 1815, was appointed 2d lieutenant of the 2d dragoons in 1837, and subsequently promoted 1st lieutenant and captain. In 1842 he served in the campaign against the Seminoles, and was present at the battle of Lochahatchee. In the Mexican war he was brevetted major for gallantry in the engagements at Palo Alto and Resaca de la Palma, and promoted major, 14 June, 1858. In October, 1861, he was made lieutenant-colonel of the 5th cavalry, colonel 4th cavalry, 9 May, 1864, and brevet brigadier-general for meritorious services during the civil war, 13 March, 1865. Previously, in August, 1861, he was commissioned brigadier-general of volunteers, and in 1862 raised and commanded a brigade of cavalry in the Army of the Potomac. He afterward acted as president of a general court-martial at St. Louis, and of a board for the examination of invalid officers at Annapolis. He was mustered out of the volunteer service, 24 Aug., 1865, and placed on the retired list, 15 Dec., 1870.

GRAHAME, James, historian, b. in Glasgow, Scotland, 21 Dec., 1790; d. in London, England, 3 July, 1842. He was graduated at St. John's college, Cambridge, and in 1812 was admitted an advocate at the Scottish bar. After practising for fourteen years, and finding that his health required a residence in a milder climate, he removed to the south of England, where he began a "History of the Rise and Progress of the United States of North America till the British Revolution of 1688." The first two volumes appeared in 1827, and a new edition (4 vols.) in 1836, bringing the work down to the year 1776; but its thoroughly American spirit interfered with its success in England, and for several years it was little known in the United States. In 1841 a genial notice of the "History," by the historian Prescott, appeared in the "North American Review," in which it was styled "the most thorough work, and incomparably the best on the subject, previous to Mr. Bancroft's." A Philadelphia edition (4 vols.) was published in 1845, and one (2 vols.) in 1846–'8, the former containing a memoir of Grahame by Josiah Quincy. Mr. Quincy also published a work entitled "The Memory of the Late James Grahame, the Historian of the United States, Vindicated from the Charges of Mr. Bancroft" (Boston, 1846). In 1837 Mr. Grahame undertook to continue the "History" to the close of the Revolution, but was compelled by failing health to relinquish literary labor of all kinds. The last production of his pen was the pamphlet "Who is to Blame? or, Cursory Review of the American Apology for American Accession to Negro Slavery" (London, 1842).

GRAINGER, James, Scottish physician, b. in Dunse, Scotland, about 1723; d. in the island of St. Christopher in 1767. He served as a surgeon in the British army, and afterward practised medicine in London, and still later in the West Indies. He published a treatise on "Dysentery" (London, 1756), one on "West India Diseases" (1764), and other professional writings. Besides translations from Tibullus, an "Ode to Solitude," and other poetical productions, he published in 1764 a poem on "The Sugar-Cane," in which he described, sometimes in absurd poetical diction, but with picturesque force and interesting detail, the scenery and life of the plantations and all the processes connected with sugar-culture.

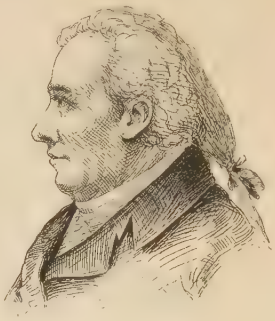
GRANBERY, John Cowper, M. E. bishop, b. in Norfolk, Va., 5 Dec., 1829. He was graduated at Randolph-Macon college in 1848, and the same year became a preacher in the M. E. church, south. During the civil war he was a chaplain in the Confederate army. From 1875 till 1882 he was professor of moral philosophy and practical theology in Vanderbilt university, Nashville, Tenn., and in the latter year was appointed a bishop in the M. E. church, south. Randolph-Macan college gave him the degree of D. D. in 1870. He has published a "Bible Dictionary" (Nashville, Tenn., 1882).

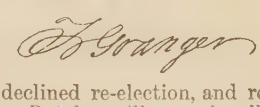
GRANDIN, Vital Justin, Canadian R. C. bishop, b. in St. Pierre-sur-Orne, France, 8 Feb., 1829. He was educated at Precigné, and in divinity at Marseilles, where he was ordained priest in 1854. He was sent to British America in the same year, and in 1859 was consecrated coadjutor bishop of St. Boniface. In 1871 he became the first bishop of St. Albert, Canada. Bishop Grandin, in the discharge of his official duties, has travelled widely for 30 years past over British North America.

GRANDMONT, Louis de, buccaneer, b. in Paris in 1645; d. at sea about 1686. He belonged to a good family. An officer having treated him as a child, Grandmont forced him to accept a challenge, wounded him mortally, and was arrested, but was pardoned, and entered the navy, where he distinguished himself by his bravery and intelligence. He obtained command of a privateer and sailed to Martinique, where he captured a Dutch merchantman, valued at 400,000 francs, but, having spent the entire sum in dissipation, he fled to Santo Domingo, and joined the buccaneers. His fine appearance, distinguished manners, and daring gained for him the confidence of his new associates. Placing himself at the head of a certain number among them, he captured in 1678 Maracaibo, and in 1679 Puerto Cabello, participated in April, 1683, with Graaf and Van Horn in the capture of Vera Cruz, and in August of the same year succeeded in getting possession of the town of Campeachy, where he gained a large booty. In order to obtain the freedom of two of his companions, who had been made prisoners by the commander of Merida, he offered in exchange to surrender the governor of Campeachy, and to release the captured garrison. The commander refused to consent, and even answered Grandmont's threat to destroy the entire town and massacre all the inhabitants by saying that he had money enough to rebuild it and men enough to repeople it; whereupon the buccaneer cut off the heads of five Spaniards, burned the city, blew up the fortifications, and on the festival of St. Louis burned logwood valued at 200,000 crowns in honor of Louis XIV., who, as a reward for his courage and military talent, had created him "lieutenant of the king," and had desired to appoint him governor of the southern part of Santo Domingo. But Grandmont, with the object of rendering himself still more worthy of the favors of his master, determined to enter on a new campaign, and sailed from Santo Domingo in October, 1686, with a single vessel and a crew of 180 men. The vessel probably perished, as nothing further was heard of it.

GRANGER, Daniel Tristram, lawyer, b. in Saco, Me., 18 July, 1807; d. in Eastport, 27 Dec., 1854. He was graduated at Bowdoin in 1826, his part in the commencement being an oration in French, then first introduced among the exercises. He studied law in the office of Judge Ether Shepley, was admitted to the bar in 1829, and began practice in Newfield. In July, 1833, he moved to Eastport, and became a partner of Frederic Hobbs, and in 1837 he assumed the management of the whole of the extensive business of the firm. In 1854 he was appointed a judge on the supreme bench of Maine, but declined the appointment because of failing health. He was distinguished throughout the state for his profound legal learning, his sagacity as a counsellor, the extreme care with which his cases were prepared, and the fluency and earnestness with which they were presented.

GRANGER, Gideon, statesman, b. in Suffield, Conn., 19 July, 1767; d. in Canandaigua, N. Y., 31 Dec., 1822. He was graduated at Yale in 1787, became a lawyer, and served for several years in the legislature of Connecticut, where he took a leading part in the establishment of the school fund, of which he has sometimes been called the father. He became postmaster-general of the United States in 1801, and held that office for thirteen years, discharging its arduous duties during the whole of Mr. Jefferson's and during a large part of Mr. Madison's administration. On leaving Washington, in 1814, he established himself at Canandaigua, N. Y., and a few years afterward became a member of the New York senate. He was conspicuous for his advocacy of the great system of internal improvements, with which the name of his illustrious friend, DeWitt Clinton, is identified. In 1821 failing health compelled him to withdraw from public service. He delivered a 4th of July oration at Suffield in 1797, which is in print, and his "Political Essays," under the signature of Algernon Sidney and Epaminondas, were published in pamphlet-form.—His son, **Francis,** statesman, b. in Suffield, Conn., 1 Dec., 1792; d. in Canandaigua, N. Y., 28 Aug., 1868. He was graduated at Yale in 1811, was educated as a lawyer, and, on his father's removal to Canandaigua in 1814, became a member of the Ontario bar. For many years he represented Ontario county in the legislature of New York, and was twice an unsuccessful candidate of his party for governor, being defeated by a small Democratic majority. In 1836 he was the candidate of the National Republicans, or Whigs, for vice-president of the United States, on the ticket with William H. Harrison. Two years afterward he was elected to congress. On the accession of Gen. Harrison to the presidency in 1841, Mr. Granger was called to a place in the cabinet, and discharged the duties of postmaster-general with efficiency until the dissolution of the cabinet under President Tyler. He declined the offer of a foreign mission, and was once more elected a representative in congress, of which he had been a member for several previous terms. At the close of the 27th congress he declined re-election, and retired to private life. But he still occasionally attended meetings of his old Whig friends, and his silver-gray hair gave the name to a party that originated in a convention of which he was president. He was also, by appointment of the gov-





ernor of New York, a member of the peace convention in Washington in February, 1861. He was a man of great intelligence, of quick wit, of warm heart, of popular manners, of imposing appearance, and of impressive speech, singularly happy in temperament, and making everybody happy around him. Webster and Clay, Preston and Crittenden, Edward Everett and Abbott Lawrence, and many others of all sections and parties were on terms of intimacy with him. He married in 1817 Cornelia Rutson Van Rensselaer, of Utica, N. Y., who died in 1823, leaving two children, one of whom became the wife of the late John Eliot Thayer, of Boston, and is now Mrs. Robert C. Winthrop. The other was Gideon Granger, a graduate of Yale in 1843, educated to the law, who died at Canandaigua five days after his father, 3 Sept., 1868.—**Amos Phelps**, cousin of Francis, politician, b. in Suffield, Conn., 3 June, 1789; d. in Syracuse, N. Y., 20 Aug., 1866, settled in Manlius, Onondaga co., N. Y., in 1811, and engaged in mercantile business. He raised and commanded a company of militia that served at Sackett's Harbor in the war of 1812–'15. He removed to Syracuse in 1820, and acquired a fortune through real-estate investments. He was chairman of the Whig delegation from New York in the National convention of 1852 that nominated Winfield Scott for the presidency. In the Auburn convention of 1853 he wrote and offered the resolutions which, it is claimed, originated the Republican party. He was elected to congress in 1854 and in 1856.

GRANGER, Gordon, soldier, b. in New York in 1821; d. in Santa Fe, New Mexico, 10 Jan., 1876. He was graduated at the U. S. military academy in 1845, and took part in the principal battles of the Mexican war, being brevetted 1st lieutenant and captain for bravery at Contreras and Churubusco and at Chapultepec. When the civil war began he served on the staff of Gen. McClellan in Ohio, then in Missouri, being engaged at Dug Spring, and brevetted major for gallant services at Wilson's Creek, and on 2 Sept., 1861, became colonel of the 2d Michigan cavalry. On 26 March, 1862, he was made a brigadier-general, and commanded the cavalry in the operations that led to the fall of Corinth. He became a major-general of volunteers on 17 Sept., 1862, and was placed in command of the Army of Kentucky. He conducted operations in Tennessee in the spring of 1863, repelled Forrest's raid in June, and took part in Rosecrans's Tennessee campaign. He distinguished himself in the battle of Chickamauga, was soon afterward assigned to the command of the 4th army corps, and took a prominent part in the operations around Chattanooga and in the battle of Missionary Ridge. He commanded a division at Fort Gaines, Ala., in August, 1864, and was in command of the 13th army corps in the capture of Fort Morgan, and throughout the operations that resulted in the fall of Mobile in the spring of 1865. He was brevetted lieutenant-colonel and colonel, U. S. army, for services at Chickamauga and Chattanooga, brigadier-general for gallantry in the capture of Mobile, and major-general for the capture of Forts Gaines and Morgan. He was mustered out of the volunteer service on 15 Jan., 1866, was promoted colonel on 28 July, 1866, and at the time of his death commanded the district of New Mexico.

GRANGER, Robert Seaman, soldier, b. in Zanesville, Ohio, 24 May, 1816. His father was a cousin of Gideon Granger, and his mother a sister of Attorney-General Henry Stanbery. He was graduated at the U. S. military academy in 1838, became a 1st lieutenant of infantry in 1839, served in the Florida war, and was assistant instructor of tactics at West Point in 1843–'4. He served in the war with Mexico, receiving promotion as captain on 8 Sept., 1847, and afterward on the Texas frontier. On 27 April, 1861, he was captured with Maj. Sibley's command on the coast of Texas, and put on parole not to serve in the field till August, 1862, when he was exchanged. He was made a major on 9 Sept., 1861, organized a brigade at Mansfield, Ohio, was commandant at Louisville, Ky., and on 1 Sept., 1862, was commissioned brigadier-general of Kentucky volunteers, and commanded the Kentucky state troops, being engaged at Shepherdsville, in the skirmish at Lebanon Junction, and in the action at Lawrenceburg, for which he was brevetted colonel, U. S. army. He received his commission as brigadier-general of U. S. volunteers on 20 Oct., 1862, and commanded a division, and during 1863 the districts of Nashville and middle Tennessee consecutively. In the first part of 1864 he superintended the defences and organized the depot at Nashville. He was then assigned to the command of the district of northern Alabama, and was engaged in the capture of Gen. Roddy's camp, in the expulsion of Gen. Wheeler from middle Tennessee, and in the defence against Gen. Forrest's raid. In October, 1864, he defended Decatur against Gen. Hood's army, made a sortie on the Confederate siege-works, and received the brevet of brigadier-general for these services. He commanded in northern Alabama in 1865 during the occupation. He was brevetted major-general, U. S. army, for services during the rebellion, was promoted lieutenant-colonel on 12 June, 1865, colonel on 16 Aug., 1871, and was placed on the retired list on 1 Jan., 1873.

GRANJA, Juan de la (gran'-ha), Spanish journalist, b. in Balmaseda, Spain, about 1785; d. in Mexico, 6 March, 1853. He was in business in Madrid from 1800–'14, when, in consequence of the political disturbances in Spain, he resolved to settle in Mexico. After travelling widely in that country and the United States, he engaged in mercantile business in Mexico in 1820–'6, but in the latter year fixed his residence in New York, where he established the "Noticioso de Ambos Mundos," probably the first Spanish newspaper published in this country. He called the attention of the Mexican government to the proposed annexation of Texas, and in acknowledgment of his services was appointed, in May, 1838, vice-consul of Mexico in New York. When in 1842 the truth of his assertions of an intended annexation of Texas became apparent, the Mexican government declared him a Mexican citizen, and promoted him to consul-general in New York. In 1846 he resolved to share the fate of his adopted country, and sailed for Mexico, where he was elected member of congress for the state of Vera Cruz, and took an active part in the discussion of the treaty of peace with the United States in 1848, being one of the few deputies who voted in the negative. Afterward, Granja devoted himself to his long-cherished idea of establishing telegraphic communication in the republic. To obtain the means for his preliminary studies, he embarked first in a mining enterprise in San Luis Potosí, and afterward established a bookstore in the city of Mexico. After many failures he formed a company, and on 5 Nov., 1851, the first telegraphic line in Mexico, from the capital to Nopalucan, a distance of forty-five leagues, was opened. The line was now rapidly extended; but Granja had overtaxed his strength, and the unusual labor soon caused his death.

GRANT, Anne, author, b. in Glasgow, Scotland, 21 Feb., 1755; d. in Edinburgh, 7 Nov., 1838. Her father, Duncan MacVicar, was an officer in a Highland regiment, her mother a member of the family of Stewart, of Invernahyle, Argyllshire. In 1758 Mrs. MacVicar and her daughter came to this country, and settled at Claverack on the Hudson, where her husband was stationed with his regiment. Here Anne was taught to read by her mother, and learned to speak Dutch. In 1760 Capt. MacVicar conducted his company through the wilderness to Oswego, accompanied by his wife and child. In the summer of 1762 her talents attracted the attention of Madame Schuyler, with whom she resided in Albany for several years. Soon after the conquest of Canada, MacVicar resigned from the army and became a settler in Vermont, where he received a grant of land from the British government, to which he made large additions by purchase from his brother officers. His career of prosperity was interrupted by impaired health and low spirits, and in 1768 he decided to return to his native land. Anne accompanied her parents, and at the age of thirteen left the New World never to see it again. Unfortunately for MacVicar and "the young American heiress," he took his departure from the country without disposing of his property, which, soon after, upon the beginning of the war, was confiscated by the new republican government. He was, therefore, compelled to depend chiefly upon his limited pay as barrack-master of Fort Augustus in Inverness-shire, to which position he had been appointed in 1773, and his daughter was no longer looked upon as an heiress. Her residence there terminated in 1779 with her marriage to the Rev. James Grant, the military chaplain and an accomplished scholar, when they removed to the parish of Laggan, to which he had been appointed. Her lines had fallen in pleasant places. In the simple life of a Highland parish, many happy years passed in Laggan. In 1801 Mr. Grant died, leaving his widow with eight children dependent upon her own exertions. Her poems, written during a series of years, were collected in an octavo volume in 1803, and through the aid of the celebrated Duchess of Gordon three thousand subscribers were obtained. This was followed in 1806 by her "Letters from the Mountains." Through the efforts of Miss Lowell, of Boston, and a few other ladies, an American edition of this work was published in that city, and the profits, amounting to three hundred pounds, remitted to Mrs. Grant. Her best-known work, begun at the age of fifty-two, and issued in London in 1808, is entitled "Memoirs of an American Lady." It is a charming picture of New York colonial life, and one that was greatly admired by Sir Walter Scott and Robert Southey, who said the description of the breaking up of the ice in the upper Hudson was "quite Homeric." A second edition of the memoir of Mrs. Schuyler appeared in 1809, and was reprinted the same year in Boston and New York. Other editions were issued in the latter city in 1836 and 1846, while a third edition was published in London in 1817. The previous American editions being out of print, another appeared in 1876, accompanied by a fine steel portrait of Mrs. Grant, and a memoir written by her godson, the senior editor of this work, to whom she gave her husband's name. Mrs. Grant removed in 1810 from Stirling, where she had resided since her husband's death, to Edinburgh, which continued to be her home for twenty-eight years. The year following she published "Essays on the Superstitions of the Highlanders," a work full of enthusiasm for the people among whom she so long resided. So conspicuous was her pre-eminence in her beautiful translations of Highland poetry and her thorough knowledge of the people, that the earlier volumes of the Waverley novels were frequently attributed to her pen. "Eighteen Hundred and Thirteen," a metrical poem, appeared in 1814, followed by her last literary production, entitled "Popular Models and Impressive Warnings for the Sons and Daughters of Industry," which was published in 1815. During the interval of twenty-three years between the appearance of her last volume and her death, Mrs. Grant's literary labors were no longer necessary for her support, as she was in receipt of a pension of £100 from the British government, in consideration of her literary talents, which, with the profits of her writings, the emolument from her pupils, and several legacies from friends, rendered her life free from pecuniary cares. Among the latter was one of $5,000, as a mark of affectionate veneration for her character, from John Lowell, Jr., of Boston, who became acquainted with Mrs. Grant during a residence of several years in Edinburgh. Her house in Manor place was frequented by Scott, Francis Jeffrey, Henry Mackenzie, and other magnates of the Scottish literary world; and few Americans of distinction visited Edinburgh without being welcomed by Mrs. Grant, usually designated "of Laggan," to distinguish her from her friend and contemporary, Mrs. Grant of Carron. To the closing year of her long life she continued to correspond with Mrs. Alexander Hamilton and many other American friends. She was buried beneath the shadows of the stately castle of Edinburgh, and near her resting-place, in what is known as the Auld West Kirk, is the grave of Thomas De Quincey. Her letters, with a memoir by her only son, John Peter Grant, appeared in 3 vols. (London, 1844; revised edition, 1845 and 1853). Mr. Grant died in 1870, leaving a widow and four children, two of whom are sons, in the service of the British government. The accompanying portrait is copied from a miniature made at the age of threescore and ten, while an earlier one, painted by Sir John Watson Gordon for Mrs. Douglas Cruger, of New York, was by her heirs presented in 1876 to her daughter-in-law, Mrs. John P. Grant, of Edinburgh. See "The Poets and Poetry of Scotland" (New York, 1876).

Anne Grant

GRANT, Asahel, missionary, b. in Marshall, Alleghany co., N. Y., 17 Aug., 1807; d. in Mosul, Asiatic Turkey, 25 April, 1844. He studied medicine, and had acquired a large practice in Utica, N. Y., when, in 1834, his attention was directed to missionary work. The field of Oroomiah, a district in Persia along the Turkish frontier, was selected by him, and in May, 1835, he sailed from Boston, reaching his new home in October. Dr. Grant's character as a physician secured him the

favor of the Persian governor, and the Nestorian bishops and priests gave him a hearty welcome. For five years he worked with great assiduity among this remnant of the once great Nestorian church. Schools were established both for boys and girls, and great good was wrought among those who came under his influence. His wife's death and his own failing health led him to return to the United States, but receiving the appointment of missionary to those Nestorians who lived in the rugged hills of Koordistan, known as the "Waldenses of the East—the Protestants of Asia," he again went to Persia a year later, and opened a school. Ascertaining that an alliance had been made tending toward the destruction of the independence of this people, he endeavored to persuade them to make terms with the Turks; but this they were unwilling to do, and in consequence a massacre occurred in 1843, in which 10,000 were killed. The missionaries were compelled to fly for their lives, and Dr. Grant, settling for a while in Mosul, devoted all his energies to the work of relieving the wretched fugitives who crowded the city. He published "The Nestorians, or the Lost Tribes, with Sketches of Travel in Assyria, Armenia, Media, and Mesopotamia" (London and Boston, 1841). See "Memoir of Asahel Grant, M. D." (New York, 1847) and "Grant and the Nestorians" (Boston, 1853).

GRANT, Clement Rollins, artist, b. in Freeport, Me., 10 July, 1849. At the age of eighteen he went to Europe, spending some months in study and observation in Great Britain and France, and on his return established a studio in Boston and became a member of the Boston art club. His specialty is landscape and portrait painting. Among his pictures are "Amy Wentworth," an illustration of Whittier's poem, "Marguerita"; "O for the Touch of a Vanished Hand"; "Delusions of the Past, 1692," which was exhibited in 1878; "A Normandy Fisherwoman"; and "Œnone."

GRANT, George Monroe, Canadian educator, b. in Stellarton, Pictou co., Nova Scotia, 22 Dec., 1835. He was educated at Pictou academy and at the West River seminary of the Presbyterian church in his native province, winning at the latter, in 1853, a bursary that entitled him to a theological course in the University of Glasgow. Here he distinguished himself, and on his return to Nova Scotia he spent some time as a missionary in the maritime provinces, and in May, 1863, became pastor of St. Matthew's church, Halifax, which office he retained until 1877, when he was appointed principal of Queen's university, Kingston. In the summer of 1872 he accompanied Sandford Fleming on a tour across the continent, and the same year published "Ocean to Ocean," a diary of his journey. He is a contributor to periodicals, and editor of "Picturesque Canada."

GRANT, James, soldier, b. in Ballendalloch, Scotland, in 1720; d. 13 April, 1806. He was appointed major of the Montgomerie Highlanders in 1757, and in September, 1758, marched with 800 men to reconnoitre Fort Duquesne. Dividing his forces in order to tempt the enemy into an ambuscade, he was himself surprised and defeated, with a loss of 295 killed and prisoners. He and nineteen officers were captured. He was appointed governor of East Florida in 1760, and lieutenant-colonel of the 40th foot, and sent by Gen. Amherst early in 1761, with a force of 1,300 regulars, to reduce the mountaineers in Carolina. In May, 1761, he led the expedition against the Cherokees, defeating them in a severe battle at Etchoe, and was promoted to a colonelcy, 25 May, 1772. In the battle of Long Island, August, 1776, he commanded the 4th and 6th brigades of the British army. In December, 1776, Lord Howe gave him the command in New Jersey at a most critical period; the American victories of Trenton and Princeton immediately followed. In 1777 he was made a major-general, and commanded the 2d brigade of Howe's army; led the 1st and 2d at Brandywine, and at Germantown, 4 Oct., forced the left of the American army to give way. In May, 1778, he was detached with a strong force to cut off Lafayette on the Schuylkill, but was unsuccessful. He defeated Lee at Monmouth, and on 4 Nov. sailed in command of the troops sent against the French West Indies. In December he took St. Lucia, and in 1791 was made governor of Stirling castle, a lieutenant-general in November, 1782, and a general in May, 1796.

GRANT, James Alexander, Canadian physician, b. in Inverness-shire, Scotland, 8 Aug., 1829. His father was Dr. James Grant, of Edinburgh, and his paternal grandfather was well known as a writer on archæological subjects. When Dr. Grant was one year old his parents removed to Canada. He was educated at Queen's college, Kingston, and at McGill, Montreal, where he took his medical degree in 1854. He settled in Ottawa, and has ever since enjoyed a lucrative practice. He has also been physician to all the governors-general of Canada from the time of Lord Monk to the present (1887). In 1872 he was elected president of the Canadian medical association, and shortly afterward of the St. Andrew society of Ottawa, and in 1885 was elected an honorary member of the British medical association. In 1867, as a Conservative, he was elected as the first member from the county of Russell to the Dominion parliament, was re-elected in 1872, but was defeated in 1874. While in parliament, Dr. Grant introduced the original Pacific railway bill, and was the first to advocate the admission of the Northwest territory into the Dominion. In addition to numerous contributions to British and Canadian medical periodicals, he has published papers on geology.

GRANT, Lewis A., soldier, b. in Vermont about 1820. He was commissioned major of the 5th Vermont infantry, 15 Aug., 1861; lieutenant-colonel, 25 Sept., 1861; and colonel, 16 Sept., 1862. He commanded the 2d brigade of the 2d division, 6th corps, at the battle of Chancellorsville, and was commissioned brigadier-general of volunteers, 27 April, 1864. He was brevetted major-general of volunteers on 19 Oct., 1864, and mustered out of service, 24 Aug., 1865.

GRANT, Robert, author, b. in Boston, Mass., 24 Jan., 1852. He was educated first at the Boston Latin-school, and was graduated at Harvard in 1873; received the degree of Ph. D. in 1876, and was graduated at Harvard law-school in 1879. Subsequently he entered on the practice of law in Boston. Mr. Grant has written some clever verse and several novels. His published works include "The Little Tin Gods on Wheels," a satire in verse (Cambridge, 1879); "The Confessions of a Frivolous Girl" (Boston, 1880); "The Lambs" (1882); "Yankee Doodle," a ΦΒΚ poem delivered at Harvard (1883); "An Average Man," contributed originally as a serial to the "Century" magazine (1883); "The King's Men," with others (New York, 1884); "The Knave of Hearts" (Boston, 1885); "A Romantic Young Lady" (1886); "Face to Face" (New York, 1886); and a poem on the 250th anniversary of the Boston Latin-school, which was published with other exercises under the title of "The Oldest School in America" (Boston, 1885).

GRANT, Ulysses S., eighteenth president of the United States, b. at Point Pleasant, Clermont co., Ohio, 27 April, 1822; d. on Mount McGregor, near Saratoga, N. Y., 23 July, 1885. (See the accompanying view of Grant's birthplace.) He was of Scottish ancestry, but his family had been

American in all its branches for eight generations. He was a descendant of Matthew Grant, who arrived at Dorchester, Mass., in May, 1630. His father was Jesse R. Grant, and his mother Hannah Simpson. They were married in June, 1821, in Clermont county, Ohio. Ulysses, the oldest of six children, spent his boyhood in assisting his father on the farm, a work more congenial to his tastes than working in the tannery of which his father was proprietor. He attended the village school, and in the spring of 1839 was appointed to a cadetship in the U. S. military academy by Thomas L. Hamer, M. C. The name given him at birth was Hiram Ulysses, but he was always called by his middle name. Mr. Hamer, thinking this his first name, and that his middle name was probably that of his mother's family, inserted in the official appointment the name of Ulysses S. The officials at West Point were notified by Cadet Grant of the error, but they did not feel authorized to correct it, and it was acquiesced in and became the name by which he was always known. As a student, Grant showed the greatest proficiency in mathematics, but he gained a fair standing in most of his studies, and at cavalry-drill he proved himself the best horseman in his class, and afterward was one of the best in the army. He was graduated in 1843, standing twenty-first in a class of thirty-nine. He was commissioned, on graduation, as a brevet 2d lieutenant, and was attached to the 4th infantry and assigned to duty at Jefferson barracks, near St. Louis. (See portrait taken at this period on page 711.) In May, 1844, he accompanied his regiment to Camp Salubrity, Louisiana. He was commissioned 2d lieutenant in September, 1845. That month he went with his regiment to Corpus Christi (now in Texas) to join the army of occupation, under command of Gen. Zachary Taylor.

He participated in the battle of Palo Alto, 8 May, 1846; and in that of Resaca de la Palma, 9 May, he commanded his company. On 19 Aug. he set out with the army for Monterey, Mexico, which was reached on 19 Sept. He had been appointed regimental quartermaster of the 4th infantry, and was placed in charge of the wagons and pack-train on this march. During the assault of the 21st on Black Fort, one of the works protecting Monterey, instead of remaining in camp in charge of the quartermaster's stores, he charged with his regiment, on horseback, being almost the only officer in the regiment that was mounted. The adjutant was killed in the charge, and Lieut. Grant was designated to take his place. On the 23d, when the troops had gained a position in the city of Monterey, a volunteer was called for, to make his way to the rear under a heavy fire, to order up ammunition, Lieut. Grant volunteered, and ran the gantlet in safety, accomplishing his mission. Garland's brigade, to which the 4th infantry belonged, was transferred from Twiggs's to Worth's division, and ordered back to the mouth of the Rio Grande, where it embarked for Vera Cruz, to join the army under Gen. Scott. It landed near that city on 9 March, 1847, and the investment was immediately begun. Lieut. Grant served with his regiment during the siege, until the capture of the place, 29 March, 1847. On 13 April his division began its march toward the city of Mexico; and he participated in the battle of Cerro Gordo, 17 and 18 April. The troops entered Pueblo on 15 May, and Lieut. Grant was there ordered to take charge of a large train of wagons, with an escort of fewer than a thousand men, to obtain forage. He made a two days' march, and procured the necessary supplies. He participated in the capture of San Antonio and the battle of Churubusco, 20 Aug., and the battle of Molino del Rey, 8 Sept., 1847. In the latter engagement he was with the first troops that entered the mills. Seeing some of the enemy on the top of a building, he took a few men, climbed to the roof, received the surrender of six officers and quite a number of men. For this service he was brevetted a 1st lieutenant. He was engaged in the storming of Chapultepec on 13 Sept., distinguished himself by conspicuous services, was highly commended in the reports of his superior officers, and brevetted captain. While the troops were advancing against the city of Mexico on the 14th, observing a church from the top of which he believed the enemy could be dislodged from a defensive work, he called for volunteers, and with twelve men of the 4th infantry, who were afterward joined by a detachment of artillery, he made a flank movement, gained the church, mounted a howitzer in the belfry, using it with such effect that Gen. Worth sent for him and complimented him in person. He entered the city of Mexico with the army, 14 Sept., and a few days afterward was promoted to be 1st lieutenant. He remained with the army in the city of Mexico till the withdrawal of the troops in the summer of 1848, and then accompanied his regiment to Pascagoula, Miss. He there obtained leave of absence and went to St. Louis, where, on 22 Aug., 1848, he married Miss Julia B. Dent, sister of one of his classmates. He was soon afterward ordered to Sackett's Harbor, N. Y., and in April following to Detroit, Mich. In the spring of 1851 he was again transferred to Sackett's Harbor, and on 5 July, 1852, he sailed from New York with his regiment for California via the Isthmus of Panama. While the troops were crossing the isthmus, cholera carried off one seventh of the command. Lieut. Grant was left behind in charge of the sick, on Chagres river, and displayed great skill and devotion in caring for them and supplying means of transportation. On arriving in California, he spent a few weeks with his regiment at Benicia barracks, and then accompanied it to Fort Vancouver, Oregon. On 5 Aug., 1853, he was promoted to the captaincy of a company stationed at Humboldt bay, Cal., and the next September he went to that post.

He resigned his commission, 31 July, 1854, and settled on a small farm near St. Louis. He was engaged in farming and in the real-estate business in St. Louis until May, 1860, when he removed to Galena, Ill., and there became a clerk in the hardware and leather store of his father, who in a letter

to Gen. Jas. Grant Wilson, dated 20 March, 1868, writes: "After Ulysses's farming and real-estate experiments in St. Louis county, Mo., failed to be self-supporting, he came to me at this place [Covington, Ky.] for advice and assistance. I referred him to Simpson, my next oldest son, who had charge of my Galena business, and who was staying with me on account of ill health. Simpson sent him to the Galena store, to stay until something else might turn up in his favor, and told him he must confine his wants within $800 a year. That if that would not support him he must draw what it lacked from the rent of his house and the hire of his negroes in St. Louis. He went to Galena in April, 1860, about one year before the capture of Sumter; then he left. That amount would have supported his family then, but he owed debts at St. Louis, and did draw $1,500 in the year, but he paid back the balance after he went into the army." When news was received of the beginning of the civil war, a public meeting was called in Galena, and Capt. Grant was chosen to preside. He took a pronounced stand in favor of the Union cause and a vigorous prosecution of the war. A company of volunteers was raised, which he drilled and accompanied to Springfield, Ill. Gov. Yates, of that state, employed Capt. Grant in the adjutant-general's department, and appointed him mustering officer. He offered his services to the National government in a letter written on 24 May, 1861, but no answer was ever made to it. On 17 June he was appointed colonel of the 21st Illinois regiment of infantry, which had been mustered in at Mattoon. The regiment was transferred to Springfield, and on 3 July he went with it from that place to Palmyra, Mo., thence to Salt River, where it guarded a portion of the Hannibal and St. Joseph railroad, and thence to the town of Mexico, where Gen. Pope was stationed as commander of the military district. On 31 July, Grant was assigned to the command of a sub-district under Gen. Pope, his troops consisting of three regiments of infantry and a section of artillery. He was appointed a brigadier-general of volunteers on 7 Aug., the commission being dated back to 17 May, and was ordered to Ironton, Mo., to take command of a district in that part of the state, where he arrived 8 Aug. Ten days afterward he was ordered to St. Louis, and thence to Jefferson City. Eight days later he was directed to report in person at St. Louis, and on reaching there found that he had been assigned to the command of the district of southeastern Missouri, embracing all the territory in Missouri south of St. Louis, and all southern Illinois, with permanent headquarters at Cairo. He established temporary headquarters at Cape Girardeau, on the Mississippi, to superintend the fitting out of an expedition against the Confederate Col. Jeff. Thompson, and arrived at Cairo on 4 Sept. The next day he received information that the enemy was about to seize Paducah, Ky., at the mouth of the Tennessee, having already occupied Columbus and Hickman. He moved that night with two regiments of infantry and one battery of artillery, and occupied Paducah the next morning. He issued a proclamation to the citizens, saying, "I have nothing to do with opinions, and shall deal only with armed rebellion and its aiders and abettors." Kentucky had declared an intention to remain neutral in the war, and this prompt occupation of Paducah prevented the Confederates from getting a foothold there, and did much toward retaining the state within the Union lines. Gen. Sterling Price was advancing into Missouri with a Confederate force, and Grant was ordered, 1 Nov., to make a demonstration on both sides of the Mississippi, to prevent troops from being sent from Columbus and other points to reenforce Price. On 6 Nov., Grant moved down the river with about 3,000 men on steamboats, accompanied by two gun-boats, debarked a few men on the Kentucky side that night, and learned that troops of the enemy were being ferried across from Columbus to re-enforce those on the west side of the river. A Confederate camp was established opposite, at Belmont, and Grant decided to attack it. On the morning of the 7th he debarked his troops three miles above the place, left a strong guard near the landing, and marched to the attack with about 2,500 men. A spirited engagement took place, in which Grant's horse was shot under him. The enemy was routed and his camp captured, but he soon rallied, and was re-enforced by detachments ferried across from Columbus, and Grant fell back and re-embarked. He got his men safely on the steamboats, and was himself the last one in the command to step aboard. He captured 175 prisoners and two guns, and spiked four other pieces, and lost 485 men. The Confederates lost 642. The opposing troops, including re-enforcements sent from Columbus, numbered about 7,000.

In January, 1862, he made a reconnoissance in force toward Columbus. He was struck with the advantage possessed by the enemy in holding Fort Henry on Tennessee river, and Fort Donelson on the Cumberland, and conceived the idea of capturing them before they could be further strengthened, by means of an expedition composed of the troops under his command, assisted by the gun-boats. He went to St. Louis and submitted his proposition to the department commander, Gen. Halleck, but was listened to with impatience, and his views were not approved. On 28 Jan. he telegraphed Halleck, renewing the suggestion, and saying, "If permitted, I could take and hold Fort Henry on the Tennessee." Com. Foote, commanding the gun-boats, sent a similar despatch. On the 29th Grant also wrote, urging the expedition. Assent was obtained on 1 Feb., and the expedition moved the next day. Gen. Tilghman surrendered Fort Henry on the 6th, after a bombardment by the gun-boats. He with his staff and ninety men were captured, but most of the garrison escaped and joined the troops in Fort Donelson, eleven miles distant, commanded by Gen. Floyd, who, after this re-enforcement, had about 21,000 men. Grant at once prepared to invest Donelson, and on the 12th began the siege with a command numbering 15,000, which was increased on the 14th to 27,000; but about 5,000 of these were employed in guarding roads and captured places. His artillery consisted of eight light batteries. The weather was extremely cold, the water high, much rain and snow fell, and the sufferings of the men were intense. The enemy's position, naturally strong, had been intrenched and fortified. There was heavy fighting on three successive days. On the 15th the enemy, fearing capture, made a desperate assault with the intention of cutting his way out. Grant detected the object of the movement, repelled the assault, and by a vigorous attack secured so commanding a position that the enemy saw further resistance would be useless. Floyd turned over the command to Pillow, who in turn resigned it to Buckner, and Floyd and Pillow escaped in the night on a steamboat. Over 3,000 infantry and the greater portion of Forrest's cavalry made their escape at the same time. On the 16th Buckner wrote proposing that commissioners be appointed to arrange for terms of capitulation. Grant replied: "No terms other than an unconditional and immediate surrender can be accepted.

I propose to move immediately upon your works." The garrison was surrendered the same day, unconditionally. The capture included 14,623 men, 65 cannon, and 17,600 small-arms. The killed and wounded numbered about 2,500. Grant's loss was 2,041 in killed, wounded, and missing. This was the first capture of a prominent strategic point since the war began, and indeed the only substantial victory thus far for the National arms. It opened up two important navigable rivers, and left the enemy no strong foothold in Kentucky or Tennessee. Grant was soon afterward made a major - general of volunteers, his commission dating from 16 Feb., and his popularity throughout the country began from that day. He urged a prompt following up of this victory, and set out for Nashville, 28 Feb., without waiting for instructions, but telegraphing that he should go if he received no orders to the contrary. For this, and under the pretence that he had not forwarded to his superiors in command certain reports showing the strength and positions of his forces, he was deprived of his command, and ordered to remain at Fort Henry. He was not restored to command until 13 March, when his services were again required in view of the enemy's having concentrated a large army near Corinth, Miss., and he transferred his headquarters to Savannah, on Tennessee river, on the 17th. He found the forces under his command, numbering about 38,000 men, encamped on both sides of the river, and at once transferred them all to the west side and concentrated them in the vicinity of Pittsburgh Landing. He there selected a favorable position, and put his army in line, with the right resting at Shiloh Church, nearly three miles from the river. He was directed not to attack the enemy, but to await the arrival of Gen. Buell's army of 40,000 men, which was marching southward through Tennessee to join Grant. On 6 April the Confederate army, numbering nearly 50,000 men, commanded by Gen. Albert S. Johnston, made a vigorous attack at daylight, drove the National troops back in some confusion, and continued to press the advantage gained during the entire day. Gen. Johnston was killed about one o'clock, and the command of the Confederates devolved upon Gen. Beauregard; 5,000 of Grant's troops did not arrive on the field during the day, so that his command was outnumbered, and it required all his efforts to hold his position on the river until evening. Late in the afternoon the head of Buell's column crossed the river, but not in time to participate actively in the fighting, as the enemy's attacks had ceased. Grant sought shelter that night in a hut; but the surgeons had made an amputating hospital of it, and he found the sight so painful that he went out into the rain-storm and slept under a tree. He had given orders for an advance all along the lines the next morning. Buell's troops had now joined him, and the attack was pushed with such vigor that the enemy were steadily driven back, and retreated nineteen miles to Corinth. On this day Grant's sword-scabbard was broken by a bullet. His loss in the battle was 1,754 killed, 8,408 wounded, 2,885 missing; total, 13,047. The enemy acknowledged a loss of 1,728 killed, 8,012 wounded, and 957 missing; total, 10,699; but there are evidences that it was much greater. The National officers estimated the Confederate dead alone at 4,000. On the 11th Gen. Halleck arrived at headquarters, and took command in person. The forces consisted now of the right and left wings, centre, and reserve, commanded respectively by Gens. Thomas, Pope, Buell, and McClernand, numbering in all nearly 120,000 men. The enemy was behind strong fortifications, and numbered over 50,000. Grant was named second in command of all the troops, but was especially intrusted with the right wing and reserve. On 30 April an advance was begun against Corinth, but the enemy evacuated the place and retreated, without fighting, on 30 May. On 21 June, Grant moved his headquarters to Memphis. Gen. Halleck was appointed general-in-chief of all the armies, 11 July. Grant returned to Corinth on 15 July, and on the 17th Halleck set out for Washington, leaving Grant in command of the Army of the Tennessee; and on 25 Oct. he was assigned to the command of the Department of the Tennessee, including Cairo, Forts Henry and Donelson, northern Mississippi, and portions of Kentucky and Tennessee west of Tennessee river. He ordered a movement against the enemy at Iuka to capture Price's force at that place, and a battle was fought on 19 and 20 Sept. The plan promised success, but the faults committed by the officer commanding one wing of the troops engaged permitted the enemy to escape. The National loss was 736, that of the Confederates 1,438. Grant strengthened the position around Corinth, and remained there about eight weeks. When the enemy afterward attacked it, 3 and 4 Oct., they met with a severe repulse. Gen. William S. Rosecrans was in immediate command of the National troops. On the 5th they were struck while in retreat, and badly beaten in the battle of the Hatchie. The entire National loss was 2,359. From the best attainable sources of information, the Confederates lost nearly twice that number.

U. S. Grant
Bvt. 2d Lt. 4th Infty.

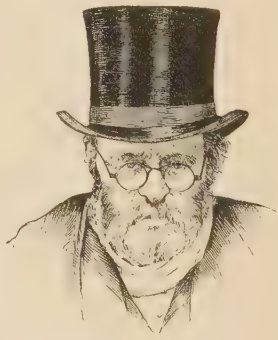
After the battle of Corinth, Grant proposed to Halleck, in the latter part of October, a movement looking to the capture of Vicksburg. On 3 Nov. he left Jackson, Tenn., and made a movement with 30,000 men against Grand Junction, and on the 4th he had seized this place and La Grange. The force opposing him was about equal to his own. On the 13th his cavalry occupied Holly Springs; on 1 Dec. he advanced against the enemy's works on the Tallahatchie, which were hastily evacuated, and on the 5th reached Oxford. On the 8th he ordered Sherman to move down the Mississippi from Memphis to attack Vicksburg, Grant's column to cooperate with him by land. On 20 Dec. the enemy captured Holly Springs, which had been made a secondary base of supplies, and seized a large amount of stores. Col. Murphy, who surrendered the post without having taken any proper measures of defence, was dismissed the service. The difficulties of protecting the long line of communication necessary for furnishing supplies, as well as other considerations, induced Grant to abandon the land expedition, and take command in person of the movement down the Mississippi. Sherman had reached Milliken's Bend, on the west side of the river, twenty miles above Vicksburg, on the

24th, with about 32,000 men. He crossed the river, ascended the Yazoo to a point below Haines's Bluff, landed his forces, and made an assault upon the enemy's strongly fortified position at that place on the 29th, but was repelled with a loss of 175 killed, 930 wounded, and 743 missing. The enemy reported 63 killed, 134 wounded, and 10 missing. Grant's headquarters were established at Memphis on 10 Jan., and preparations were made for a concentrated movement against Vicksburg. On the 29th he arrived at Young's Point, opposite the mouth of the Yazoo, above Vicksburg, and took command in person of the operations against that city, his force numbering 50,000 men. Admiral Porter's co-operating fleet was composed of gun-boats of all classes, carrying 280 guns and 800 men. Three plans suggested themselves for reaching the high ground behind Vicksburg, the only position from which it could be besieged: First, to march the army down the west bank of the river, cross over below Vicksburg, and co-operate with Gen. Banks, who was in command of an expedition ascending the river from New Orleans, with a view to capturing Port Hudson and opening up a line for supplies from below. The high water and the condition of the country made this plan impracticable at that time. Second, to construct a canal across the peninsula opposite Vicksburg, through which the fleet of gun-boats and transports could pass, and which could be held open as a line of communication for supplies. This plan was favored at Washington, and was put into execution at once; but the high water broke the levees, drowned out the camps, and flooded the country, and after two months of laborious effort Grant reported it impracticable. Third, to turn the Mississippi from its course by opening a new channel via Lake Providence and through various bayous to Red river. A force was set to work to develop this plan; but the way was tortuous and choked with timber, and by March it was found impossible to open a practicable channel. In the mean time an expedition was sent to the east side of the river to open a route via Yazoo pass, the Tallahatchie, the Yalabusha, and the Yazoo rivers; but insurmountable difficulties were encountered, and this attempt also had to be abandoned. Grant, having thoroughly tested all the safer plans, now determined to try a bolder and more hazardous one, which he had long had in contemplation, but which the high water had precluded. This was to run the batteries with the gun-boats and transports loaded with supplies, to march his troops down the west side of the river from Milliken's Bend to the vicinity of New Carthage, and there ferry them across to the east bank. The movement of the troops was begun on 29 March. They were marched to New Carthage and Hard Times. On the night of 16 April the fleet ran the batteries under a severe fire. On 29 April the gun-boats attacked the works at Grand Gulf, but made little impression, and that night ran the batteries to a point below. On 30 April the advance of the army was ferried across to Bruinsburg, below Grand Gulf and 30 miles south of Vicksburg, and marched out in the direction of Port Gibson. Everything was made subordinate to the celerity of the movement. The men had no supplies except such as they carried on their persons. Grant himself crossed the river with no personal baggage, and without even a horse; but obtained one raggedly equipped horse on the east side. The advance encountered the enemy, under Gen. Bowen, numbering between 7,000 and 8,000, on 1 May, near Port Gibson, routed him, and drove him in full retreat till nightfall. Grant's loss was 131 killed and 719 wounded. The Confederates reported their loss at 448 killed and wounded, and 384 missing; but it was somewhat larger, as Grant captured 650 prisoners. At Port Gibson he learned of the success of Grierson, whom he had despatched from La Grange, 17 April, and who had moved southward with 1,000 cavalry, torn up many miles of railroad, destroyed large amounts of supplies, and arrived, with but slight loss, at Baton Rouge, La., 2 May. On 3 May, Grant entered Grand Gulf, which had been evacuated. He was now opposed by two armies—one commanded by Gen. John C. Pemberton at Vicksburg, numbering about 52,000 men; the other by Gen. Joseph E. Johnston at Jackson, 50 miles east of Vicksburg, who was being rapidly re-enforced. Gen. Sherman had been ordered to make a demonstration against Haines's Bluff, to compel the enemy to detach troops for its defence and withhold them from Grant's front; and this feint was successfully executed, 30 April and 1 May, when Sherman received orders to retire and join the main army. Grant determined to move with celerity, place his force between the two armies of the enemy, and defeat them in detail before they could unite against him. He cut loose from his base, and ordered that the three days' rations issued to the men should be made to last five days. Sherman's command reached Grand Gulf on the 6th. On the 12th Grant's advance, near Raymond, encountered the enemy approaching from Jackson, and defeated and drove him from the field with a loss of 100 killed, 305 wounded, 415 prisoners, and 2 guns. Grant's loss was 66 killed, 339 wounded, and 37 missing. He pushed on to Jackson, and captured it on the 14th, with a loss of 42 killed, and 251 wounded and missing. The enemy lost 845 in killed, wounded, and missing, and 17 guns. Grant now moved rapidly toward Vicksburg, and attacked Pemberton in a strong position at Champion Hill. After a hotly contested battle, the enemy was completely routed, with a loss of between 3,000 and 4,000 killed and wounded, 3,000 prisoners, and 30 guns; Grant's loss being 410 killed, 1,844 wounded, and 187 missing. The enemy made a stand at Big Black river bridge on the 17th, holding a strongly intrenched position; but by a vigorous assault the place was carried, and the enemy was driven across the river in great confusion, with the loss of many killed, 1,751 prisoners, and 18 guns. Grant's loss was but 39 killed, 237 wounded, and 3 missing. On the 18th the National army closed up against the outworks of Vicksburg, driving the enemy inside his fortifications. Sherman took possession of Haines's Bluff, a base for supplies was established at Chickasaw Landing, and on the 21st the army was once more supplied with full rations. On 19 and 22 May assaults were made upon the enemy's lines, but only a few outworks were carried, and on the 23d the siege was regularly begun. By 30 June there were 220 guns in position, all light field-pieces except six 32-pounders and a battery of heavy guns supplied by the navy. Grant now had 71,000 men to conduct the siege and defend his position against Johnston's army threatening him in the rear. The operations were pressed day and night; there was mining and countermining; and the lines were pushed closer and closer, until the garrison abandoned all hope. On 3 July, Pemberton asked for an armistice, and proposed the appointment of commissioners to arrange terms of capitulation. Grant replied that there would be no terms but unconditional surrender; and this was made on the 4th of July. He permitted the officers and

men to be paroled, the officers to retain their private baggage and side-arms, and each mounted officer one horse. Grant showed every consideration to the vanquished, supplied them with full rations, and, when they marched out, issued an order saying, "Instruct the commands to be orderly and quiet as these prisoners pass, and to make no offensive remarks." The surrender included 31,600 prisoners, 172 cannon, 60,000 muskets, and a large amount of ammunition. Grant's total loss in the Vicksburg campaign was 8,873; that of the enemy nearly 60,000. Port Hudson now surrendered to Banks, and the Mississippi was opened from its source to its mouth. Grant was made a major-general in the regular army; and congress, when it assembled, passed a resolution ordering a gold medal to be presented to him (see illustration), and returning thanks to him and his army.

He soon recommended a movement against Mobile, but it was not approved. He went to New Orleans, 30 Aug., to confer with Banks, and while there was severely injured by a fall from his horse, while engaged in a trial of speed with the senior editor of this work. For nearly three months he was unable to walk unaided, but on 16 Sept. set out for Vicksburg, being carried on board the steamboat. He received orders from Washington on the 27th to send all available forces to the vicinity of Chattanooga, to co-operate with Rosecrans. While personally superintending the carrying out of this order, he received instructions, 10 Oct., to report at Cairo. He arrived there on the 16th, and was directed to proceed to Louisville. At Indianapolis he was met by Mr. Stanton, secretary of war, who accompanied him to Louisville and delivered an order to him placing him in command of the military division of the Mississippi, which was to embrace the departments and armies of the Tennessee, the Cumberland, and the Ohio. He at once went to Chattanooga, arriving on the 23d, and took command there in person. On 29 Oct. the battle of Wauhatchie was fought, and a much-needed line of communication for supplies was opened to the troops in and around Chattanooga, besieged by Bragg's army, which held a strongly fortified position. Thomas commanded the Army of the Cumberland, which held Chattanooga; Sherman, who had succeeded Grant in command of the Army of the Tennessee, was ordered to bring all his available troops to join Thomas; and Burnside, who was in Knoxville, in command of the Army of the Ohio, besieged by Longstreet's corps, was ordered to hold his position at all hazards till Bragg should be crushed and a force could be sent to the relief of Knoxville. Grant, having concentrated his troops near Chattanooga, made an assault upon the enemy's lines on the 23d, which resulted in carrying important positions. The attack was continued on the 24th and 25th, when the enemy's entire line was captured, and his army completely routed and driven out of Tennessee. Grant's forces consisted of 60,000 men; those of the Confederates, 45,000. The enemy's losses were reported at 361 killed and 2,180 wounded, but were undoubtedly greater. There were captured 6,442 men, 40 pieces of artillery, and 7,000 stands of small-arms. Grant's losses were 757 killed, 4,529 wounded, and 330 missing. On the 28th a force was despatched to Knoxville, the command of the expedition being given to Sherman. On the 29th Longstreet assaulted Knoxville before the arrival of the troops sent for its relief, but was repelled by Burnside, and retreated. Grant visited Knoxville the last week in December, and went from there to Nashville, where he established his headquarters, 13 Jan., 1864. He now ordered Sherman to march a force from Vicksburg into the interior to destroy the enemy's communications and supplies. It moved on 3 Feb., went as far as Meridian, reaching there 14 Feb., and, after destroying railroads and great quantities of supplies, returned to Vicksburg. The grade of lieutenant-general was revived by act of congress in February, and Grant was nominated for that office on 1 March, and confirmed by the senate on the 2d. He left Nashville on the 4th, in obedience to an order calling him to Washington, arrived there on the 8th, and received his commission from the president on the 9th. He was assigned to the command of all the armies on the 12th (Sherman being given the command of the military division of the Mississippi on the 18th), and established his headquarters with the Army of the Potomac at Culpepper, Va., on the 26th.

Grant now determined to concentrate all the National forces into several distinct armies, which should move simultaneously against the opposing Confederate armies, operate vigorously and continuously, and prevent them from detaching forces to strengthen threatened points, or for the purpose of making raids. He announced that the Confederate armies would be the only objective points in the coming campaigns. Sherman was to move toward Atlanta against Johnston. Banks's army, after it could be withdrawn from the Red river expedition, was to operate against Mobile. Sigel was to move down the valley of Virginia against Breckenridge to destroy communications and supplies, and prevent raids from that quarter. Butler was to ascend the James river and threaten Richmond. The Army of the Potomac, re-enforced by Burnside's troops and commanded by Meade, was to cover Washington, and assume the offensive against the Army of northern Virginia, commanded by Gen. Robert E. Lee. Orders were issued for a general movement of all the armies in the field on 4 May. During the night of the 4th and 5th Grant crossed the Rapidan and encountered Lee in the Wilderness, where a desperate battle was fought on the 5th, 6th, and 7th. Grant's loss was 2,261 killed, 8,785 wounded, and 2,902 missing. Lee's losses have never been reported; but, as he was generally the attacking party, he probably lost more. He fell back on the 7th, and on that day and the next took up a strong defensive position at Spottsylvania. Grant moved forward on the night of the 7th. As he rode through the troops, the men greeted him as their new commander with an extraordinary demonstration in recognition of the victory, shouting, cheering, and kindling bonfires by the road-side as he passed. The 8th and 9th were spent by both armies in skirmishing and manœuvring for position. Sheridan's cavalry was despatched on the 9th to make a raid in rear of the enemy and threaten Richmond. On the 10th there was heavy fighting, with no decisive results, and on the 11th skirmishing



and reconnoitring. On the morning of this day Grant sent a letter to Washington containing the famous sentence, "I propose to fight it out on this line, if it takes all summer." On the 12th a heavy assault was made on Lee's line, near the centre, in which he lost nearly 4,000 prisoners and 30 guns. Violent storms now caused a cessation in the fighting for several days. On the 19th, Ewell's corps, of Lee's army, moved around Grant's right flank and attacked, but was repelled after hard fighting. Grant's losses from the 8th to the 21st of May, around Spottsylvania, were 2,271 killed, 9,360 wounded, and 1,970 missing. The estimate of the enemy's loss, in killed and wounded, was nearly as great as that of the National army, besides about 4,000 prisoners and 30 cannon captured. In the mean time Butler had occupied Bermuda Hundred, below Richmond. Sherman had reached Dalton, Ga., and was steadily driving Johnston's army toward Atlanta. But Sigel had been forced to retreat before Breckinridge. On the 21st, Grant moved by the left flank to North Anna river, where he again encountered Lee, and after several engagements moved again by the left from that position on the 27th toward Cold Harbor. Grant's losses between the 20th and 26th were 186 killed, 792 wounded, and 165 missing. Lee's losses during this period have never been fully ascertained. After much fighting by detached portions of the two armies, Grant made a general assault upon Lee's heavily intrenched position at Cold Harbor on 3 June, but did not succeed in carrying it, being repelled with a loss of about 7,000 in killed, wounded, and missing, while Lee's loss was probably not more than 2,500. The campaign had now lasted thirty days. Grant had received during this time about 40,000 re-enforcements, and had lost 39,259 men—6,586 killed, 26,047 wounded, and 6,626 missing. Lee had received about 30,000 re-enforcements. There are no official figures as to his exact losses, but they have been estimated at about equal to his re-enforcements. Sherman had now reached Kenesaw, within thirty miles of Atlanta; and on the 7th news arrived that Hunter, who had succeeded Sigel, had gained a victory and had seized Staunton, on the Virginia Central railroad. Grant made preparations for transferring the Army of the Potomac to the south side of James river, to operate against Petersburg and Richmond from a more advantageous position. The army was withdrawn from the enemy's front on the night of 12 June, and the crossing of the river began on the 13th, and occupied three days. A force had also been sent around by water, by York and James rivers to City Point, to move against Petersburg. On the 15th the advanced troops attacked the works in front of that place; but, night coming on, the successes gained were not followed up by the commanders, and the next morning the position had been re-enforced and strengthened. An assault was made on the afternoon of the 16th, which was followed up on the 17th and 18th, and the result was the capture of important outworks, and the possession of a line closer to Petersburg. Lee's army had arrived, and again confronted the Army of the Potomac. Grant's headquarters had been established at City Point. On 22 and 23 June he made a movement from the left toward the Weldon railroad, and heavy fighting took place, with but little result, except to render Lee's use of that line of communication more precarious. Sheridan had set out on a raid from Pamunkey river, 7 June, and, after defeating the enemy's cavalry, in the battle of Trevilian Station, destroying portions of the Virginia railroad, and inflicting other damage, he returned to White House, on York river, on the 20th. From there he crossed the James and rejoined the Army of the Potomac. A cavalry force under Gen. James H. Wilson had also been sent to the south and west of Petersburg, which destroyed railroad property, and for a time seriously interrupted the enemy's communications via the Danville and South-side railroads. Hunter, in the valley of Virginia, had destroyed the stores captured at Staunton and Lexington, and moved to Lynchburg. This place was re-enforced, and, after sharp fighting, Hunter fell back, pursued by a heavy force, to Kanawha river. Early's army drove the National troops out of Martinsburg, crossed the upper Potomac, and moved upon Hagerstown and Frederick. There was great consternation in Washington, and Grant was harassed by many anxieties. On 11 July, Early advanced against the fortifications on the north side of Washington; but Grant had sent the 6th corps there, which arrived opportunely, and the enemy did not attack. Sherman had outflanked Johnston at Kenesaw, crossed the Chattahoochee on 17 July, driven the enemy into his works around Atlanta, and destroyed a portion of the railroad in his rear. In Burnside's front, before Petersburg, a large mine had been constructed beneath the enemy's works. Many of Lee's troops had been decoyed to the north side of the James by feints made upon the lines there. The mine was fired at daylight on the morning of 30 July. A defective fuse caused a delay in the explosion, and when it occurred the assault ordered was badly executed by the officers in charge of it. Confusion arose, the place was re-enforced, and the National troops had to be withdrawn, after sustaining a heavy loss. Grant, in his anxiety to correct the errors of his subordinates, dismounted and made his way to the extreme front, giving directions in person, and exposing himself to a most destructive fire. He went to Monocacy 5 Aug., had Sheridan meet him there on the 6th, and placed him in command of all the forces concentrated in Maryland, with directions to operate against Early's command. On 14 Aug., Hancock's corps was sent to the north side of the James, and made a demonstration against the enemy at Deep Bottom, to develop his strength and prevent him from detaching troops to send against Sheridan. This resulted in the capture of six pieces of artillery and a few prisoners. On 18 Aug., Warren's corps moved out and, after heavy fighting, seized and held a position on the Weldon railroad. Fighting continued on the 19th, with Warren's troops re-enforced by part of the 9th corps. Lee attempted to recover the Weldon road by an assault on the 21st, but was repelled. On the 23d Ream's Station was occupied by the National troops, and the enemy attacked them in this place in force. Two assaults were successfully met, but the place was finally captured, and the National troops were compelled to fall back. Sherman's series of brilliant battles and manœuvres around Atlanta had forced the enemy to evacuate that place, and his troops entered the city on 2 Sept. Sheridan attacked Early's army on 19 Sept., and in the battle of Winchester completely routed him. He pursued the enemy to Fisher's Hill, and on the 22d gained another signal victory. Grant now made several movements against Richmond and Petersburg, intended to keep Lee from detaching troops, to extend the National lines, and to take advantage of any weak spot in the enemy's front, with a view to penetrate it. On 29 Sept., Butler's forces were ordered to

make an advance upon the works at Deep Bottom. Fort Harrison, the strongest work north of the James, was captured, with 15 guns and several hundred prisoners. On the 30th the enemy made three attempts to retake it by assault, but was each time repelled with heavy loss. On the same day Meade moved out and carried two redoubts and a line of rifle-pits at Peebles's farm, two miles west of the Weldon railroad. On 1 Oct., Meade's left was attacked; but it successfully repelled the assault, and he advanced his line on the 2d. Butler lost, in the engagements of the 29th and 30th, 394 killed, 1,554 wounded, and 324 missing. Meade lost, from 30 Sept. to 2 Oct., 151 killed, 510 wounded, and 1,348 missing. On 19 Oct., Sheridan's army was attacked by Early at Cedar Creek. Sheridan, who was on his return from Washington, rode twenty miles from Winchester, turned a defeat into a decisive victory, captured 24 guns, 1,600 prisoners, and 300 wagons, and left the enemy a complete wreck. On 27 Oct., Butler was ordered to make a demonstration against the enemy's line in his front, and had some fighting. At the same time, Meade moved out to Hatcher's run; but the enemy was found strongly intrenched, the ground very difficult, and no assault was attempted. In the afternoon a heavy attack was made by the enemy, but was successfully resisted. That night the National forces were withdrawn to their former positions. Meade's loss was 143 killed, 653 wounded, and 488 missing. The enemy's casualties were greater, as he lost in prisoners alone about 1,300 men. Butler lost on this day 700 in killed and wounded, and 400 prisoners.

Sherman destroyed the railroad in his rear, cut loose from his base, and set out from Atlanta, 16 Nov., on his march to Savannah. Gen. John D. Hood, who had superseded Johnston, instead of following Sherman, turned northward and moved his army against Thomas, who had been placed in command of the troops left for the defence of Tennessee. Thomas concentrated his forces in the vicinity of Nashville. Schofield was at Franklin, twenty-five miles from Nashville, with about 26,000 men. Hood attacked him on 30 Nov., but after a hotly contested battle was repelled with heavy loss. Thomas, with his entire army, attacked Hood, and in the battle of Nashville, 15 and 16 Dec., completely defeated the enemy, capturing 53 guns and 4,462 prisoners, and drove him south of Tennessee river. Sherman reached the sea-coast near Savannah on 14 Dec., after destroying about 200 miles of railroad and $100,000,000 worth of property. He invested Savannah, and forced the enemy to evacuate it on the night of 20 Dec. Grant had sent Butler in charge of an expedition against Fort Fisher, at the mouth of Cape Fear river, to act in conjunction with the naval fleet under Admiral Porter. He sailed from Fort Monroe, 14 Dec., landed his troops, 25 Dec., and advanced against the fort, which had been vigorously shelled by the navy; but, while the assaulting party had every prospect of entering the work, they received an order to fall back and re-embark. The expedition reached Fort Monroe on its return 27 Dec. Butler was relieved, and Gen. E. O. C. Ord was assigned to the command of the Army of the James. Grant fitted out another expedition against Fort Fisher, under Gen. Alfred H. Terry, which sailed from Fort Monroe on 6 Jan., 1865. On the 13th the navy directed a heavy fire against the fort. Terry landed his troops, intrenched against a force of the enemy threatening him from the direction of Wilmington, and on the 15th made a vigorous assault, capturing the fort with its garrison and 169 heavy guns, and a large quantity of ammunition. It was at first thought best to transfer Sherman's army by sea to Virginia, but this plan was abandoned, and on 27 Dec. he was ordered to move north by land. His army numbered 60,000 men, and was accompanied by 68 guns and 2,500 wagons. On 7 Jan., Schofield was directed to bring his army, then at Clifton, Tenn., to the sea-coast. It reached Washington and Alexandria, 31 Jan., and on 9 Feb. arrived at the mouth of Cape Fear river, with instructions to operate against Wilmington and penetrate the interior. He entered Wilmington on 22 Feb., it having been evacuated by the enemy, and took 51 heavy guns, 15 light guns, and 800 prisoners. His own loss in these operations was about 200 in killed and wounded. He moved thence to Goldsboro, where it was intended he should form a junction with Sherman. On 2 March, Lee addressed a letter to Grant, suggesting a personal meeting with a view to arranging subjects of controversy between the belligerents to a convention; but Grant replied that he had no authority to accede to the proposition; that he had a right to act only on subjects of a purely military character.

Sheridan moved down the valley of Virginia, from Winchester, 27 Feb., and defeated Early at Waynesboro, 2 March, capturing and scattering nearly his entire command. He then turned eastward, destroyed many miles of the James river canal, passed around the north side of Richmond, and tore up the railroads, arrived at White House on the 19th, and from there joined the Army of the Potomac. Grant had been anxious for some time lest Lee should suddenly abandon his works and fall back to unite with Johnston's forces in an attempt to crush Sherman and force Grant to pursue Lee to a point that would compel the Army of the Potomac to maintain a long line of communications with its base, as there would be nothing left in Virginia to subsist on after Lee had traversed it. Sleepless vigilance was enjoined on all commanders, with orders to report promptly any movement looking to a retreat. Sherman captured Columbia on 17 Feb., and destroyed large arsenals, railroad establishments, and forty-three cannon. The enemy was compelled to evacuate Charleston. On 3 March, Sherman struck Cheraw, and seized a large quantity of material of war, including 25 guns and 3,600 barrels of powder. At Fayetteville, on the 11th, he captured the finely equipped arsenal and twenty guns. On the 16th he struck the enemy at Averysboro, and after a stubborn fight drove him from his position, losing 554 men. The Confederates reported their loss at 500. On the 19th Johnston's army attacked a portion of Sherman's forces at Bentonville, and made six heavy assaults, which were all successfully met, and on the night of the 21st the enemy fell back. The National loss was 191 killed and 1,455 wounded and missing; that of the Confederates was reported at 223 killed, 1,467 wounded, 653 missing, but Sherman reports his captures of prisoners at 1,621. On the 23d Sherman reached Goldsboro, where Schofield had arrived two days before, and was again in communication with the sea-coast, and able to draw supplies. On 20 March, Gen. George Stoneman set out to march eastward from east Tennessee, toward Lynchburg, and on the same day Gen. E. R. S. Canby moved against Mobile. Gen. Pope, who had succeeded Rosecrans in Missouri, was ordered to drive Price beyond Red river. Hancock had been assigned to command the middle division when Sheridan joined the Army of the Potomac, and the troops under him near Washington were held in readiness to move.

All was now in readiness for the spring campaign, which Grant intended should be the last. President Lincoln, between whom and Grant had sprung up a strong personal attachment, visited him at City Point on 22 March, and Sherman came there on the 27th. They, with Grant and Admiral Porter, held an informal conference, and on the 28th Sherman set out again to join his army. At daylight, on 25 March, Lee had made a determined assault on Grant's right, capturing Fort Steadman, breaking through the National lines, and gaining possession of several batteries. In a few hours he was driven back, and all the captured positions were regained. Lee took this step to endeavor to force the withdrawal of troops in front of his left, and enable him to leave his intrenchments and retreat toward Danville. Its failure prevented the attempt. The country roads being considered sufficiently dry, Grant had issued orders for a general advance on the 29th, and these were carried out at the appointed time. Sheridan, with his cavalry, was sent in advance to Dinwiddie Court-House. The 5th corps had some fighting on the 29th, and in moving forward on the 31st was attacked and driven back a mile. Supported by a part of the 2d corps, it made a counter-attack, drove the enemy back into his breastworks, and secured an advanced position. Sheridan had pushed on to Five Forks, but his command encountered a strong force of infantry and cavalry, and after heavy fighting all day he fell back to Dinwiddie Court-House, where he repelled the repeated assaults made upon him, and held the place. The 5th corps was that night ordered to report to Sheridan. The enemy, on the morning of 1 April, fell back toward Five Forks, closely followed by the cavalry, which pressed him closely. In the afternoon he had taken up a strongly intrenched position at Five Forks, on Lee's extreme right. The 5th corps having joined Sheridan, he made a combined attack, with infantry and cavalry, and by nightfall had gained a brilliant victory, capturing the Confederate works, 6 guns, and nearly 6,000 prisoners. His cavalry pursued the broken and flying enemy for six miles beyond the field of battle. That night, after getting the full details of Sheridan's success, Grant determined to make a vigorous assault the next day, with all his troops, upon the lines around Petersburg. It began at daylight, 2 April; the works were carried, and in a few hours Grant was closing in upon the inner defences of the city. Two of the forts, Gregg and Whitworth, were secured in the afternoon. The former was captured by assault, the latter was evacuated; 12,000 prisoners and over fifty guns were already in Grant's hands. Richmond and Petersburg were evacuated that night, and the National forces entered and took possession on the morning of the 3d. Grant, anticipating this, had begun a movement westward during the night, to head off Lee from Danville, and a vigorous pursuit by the whole army was ordered. It became evident that Lee was moving toward Amelia Court-House, and a force was urged forward to Jetersville, on the Danville railroad, to get between him and Danville. Part of Sheridan's cavalry and the head of the 5th corps reached there on the afternoon of the 4th and intrenched. The Army of the Potomac arrived by forced marches on the 5th, while the Army of the James, under Ord, pushed on toward Burkesville. An attack was ordered upon Lee on the morning of the 6th, but he had left Amelia Court-House during the night, and was pushing on toward Farmville by the Deatonsville road. He was closely pursued, and on the afternoon of the 6th, Sheridan, with his cavalry and the 6th corps, attacked him at Sailor's Creek, capturing 7 general officers, about 7,000 men, and 14 guns. The 2d corps had kept up a running fight with the enemy all day, and had captured 4 guns, 1,700 prisoners, 13 flags, and 300 wagons. Lee was continuing his retreat through Farmville, and Grant urged troops to that place by forced marches on the 7th. The 2d corps and a portion of the cavalry had been repelled in their attacks on Lee, north of the Appomattox, and the 6th corps crossed from Farmville on the evening of the 7th to re-enforce them. That night Grant sent a note from Farmville to Lee, calling his attention to the hopelessness of further resistance, and asking the surrender of his army. He received a reply from Lee on the morning of the 8th, saying he was not entirely of Grant's opinion as to the hopelessness of further resistance, but asking what terms would be offered. Grant, who was still at Farmville, immediately replied, saying that, as peace was his great desire, he would insist on but one condition—that the men and officers surrendered should be disqualified from taking up arms again until properly exchanged. On the 8th Lee's troops were in full retreat on the north side of the Appomattox. The 2d and 6th corps followed in hot pursuit on that side, while Sheridan, Ord, and the 5th corps were pushed forward with all speed

on the south side to head off Lee from Lynchburg. Near midnight on the night of the 8th Grant received another note from Lee, saying he had not intended to propose the surrender of his army, but desired to know whether Grant's proposals would lead to peace, and suggested a meeting at 10 A. M. the next morning. Grant replied that such a meeting could lead to no good, as he had no authority to treat on the subject of peace, but suggested that the south's laying down their arms would hasten the event and save thousands of lives and hundreds of millions of property. Early on the morning of 9 April, Lee's advance arrived at Appomattox Court-House; but by extraordinary forced marches, Sheridan, Ord, and Griffin reached that place at the same time. Lee attacked the cavalry; but, when he found infantry in his front, he sent in a flag of truce, and forwarded a note to Grant, asking an interview in accordance with the offer contained in Grant's letter of the day before. Grant received it on the road while riding toward Appomattox Court-House, and sent a reply saying he would move forward and meet Lee at any place he might select. They met in the McLean house, in Appomattox (see accompanying illustration), on the afternoon of the 9th, and the terms of surrender were drawn up by Grant and accepted by Lee. The conference lasted about three hours. The men and officers were paroled and allowed to

return to their homes; all public property was to be turned over, but the officers were allowed to keep their side-arms, and both officers and men to retain their private horses and baggage. These terms were so magnanimous, and the treatment of Lee and his officers so considerate, that the effect was to induce other Confederates to seek the same terms and bring the rebellion to a speedy close. In riding to his camp after the surrender, Grant heard the firing of salutes. He sent at once to suppress them, and said: "The war is over; the rebels are again our countrymen, and the best sign of rejoicing after the victory will be to abstain from all demonstrations in the field." The number paroled was 28,356. In addition to these, 19,132 had been captured during the campaign since 29 March. The killed were estimated at 5,000. After 9 April, over 20,000 stragglers and deserters besides came in and surrendered. The National losses during this period were 2,000 killed, 6,500 wounded, and 2,500 missing. Grant's losses, including those of Butler's army, during the year beginning with the battle of the Wilderness, were 12,663 killed, 49,559 wounded, and 20,498 missing; total, 82,720. No accurate reports of the Confederate losses can be obtained; but Grant's captures in battle during this year were 66,512.

On 10 April, Grant went to Washington to hasten the disbanding of the armies, stop purchases of supplies, and save expense to the government. He did not stop to visit Richmond. President Lincoln was assassinated on the 14th, and Grant would probably have shared the same fate but for his having left Washington that day. On 18 April, Sherman received the surrender of Johnston's army, but on terms that the government did not approve, and Grant was sent to North Carolina to conduct further negotiations. On the 26th Johnston surrendered to Sherman on terms similar to those given to Lee, and 31,243 men were paroled. Grant remained at Raleigh and avoided being present at the interview, leaving to Sherman the full credit of the capture. Canby's force appeared before Mobile on 27 March, the principal defensive works were captured on 9 April, and Mobile was evacuated on the 11th, when 200 guns and 4,000 prisoners were captured, but about 9,000 of the garrison escaped. Wilson's cavalry command captured Selma, Ala., on 2 April, and Tuscaloosa on the 4th, occupied Montgomery on the 14th, and took West Point and Columbus, Ga., on the 16th. Macon surrendered on the 21st. Kirby Smith surrendered his command, west of the Mississippi, on the 26th. There was then not an armed enemy left in the country, and the rebellion was ended. Grant established his headquarters in Washington. He was greeted with ovations wherever he went, honors were heaped upon him in every part of the land, and he was universally hailed as the country's deliverer. In June, July, and August, 1865, he made a tour through the northern States and Canada. In November he was welcomed in New York by a demonstration that exceeded all previous efforts. It consisted of a banquet and reception, and the manifestations of the people in their greetings knew no bounds. Immediately after the war, Grant sent Gen. Sheridan with an army corps to the Rio Grande river to observe the movements of the French, who were then in Mexico supporting the Imperial government there in violation of the Monroe doctrine. This demonstration was the chief cause of the withdrawal of the French. Maximilian, being left without assistance from a European power, was soon driven from his throne, and the republic of Mexico was re-established.

The U. S. court in Virginia had found indictments against Gen. Lee and other officers prominent in the rebellion, and much anxiety was manifested by them on this account. Two months after the war, Lee applied by letter to be permitted to enjoy privileges extended to those included in a proclamation of amnesty, which had been issued by the president. Grant put an indorsement on the letter, which began as follows: "Respectfully forwarded through the secretary of war to the president, with the earnest recommendation that the application of Gen. Robert E. Lee for amnesty and pardon be granted him." But President Johnson was at that time embittered against all participants in the rebellion, and seemed determined to have Lee and others punished for the crime of treason. Lee afterward made a strong appeal by letter to Grant for protection. Grant put a long and emphatic endorsement upon this letter, in which he used the following language: "In my opinion, the officers and men paroled at Appomattox Court-House, and since upon the same terms given to Lee, can not be tried for treason so long as they preserve the terms of their parole. . . . The action of Judge Underwood in Norfolk has already had an injurious effect, and I would ask that he be ordered to quash all indictments found against paroled prisoners of war, and to desist from further prosecution of them." Grant insisted that he had the power to accord the terms he granted at Appomattox, and that the president was bound to respect the agreements there entered into unless they should be abrogated by the prisoners violating their paroles. He went so far as to declare that he would resign his commission if so gross a breach of good faith should be perpetrated by the executive. The result was the abandonment of the prosecutions. This was the first of a series of contests between Grant and President Johnson, which finally resulted in their entire estrangement. In December, Grant made a tour of inspection through the south. His report upon affairs in that section of the country was submitted to congress by the president, and became the basis of important reconstruction laws. In May, 1866, he wrote a letter to the secretary of war, which was submitted to congress, and became the basis for the reorganization of the army, and also for the distribution of troops through the south during the process of reconstruction. The Fenians were now giving the government much trouble, and, in consequence of their acts, the relations between the United States and Great Britain were becoming strained. They had organized a raid into Canada, to take place during the summer; but Grant visited Buffalo in June, took effective measures to stop them, and prevented all further unlawful acts on their part. Congress had passed an act creating the grade of general, a higher rank than had before existed in the army, to be conferred on Grant as a reward for his illustrious services in the field, and on 25 July, 1866, he received his commission.

In the autumn of 1866, President Johnson having changed his policy toward the south, finding that Grant refused to support him in his intentions to assume powers that Grant believed were vested only in congress, ordered him out of the country, with directions to proceed on a special mission to Mexico. Grant refused, saying that this was not a military service but a diplomatic mission, and that he claimed the right possessed by every citizen to decline a civil appointment. An effort was afterward made to send him west, to prevent his presence in Washington, but it was soon abandoned. The 39th congress, fearing the result of this action

on the part of the president, attached a clause to the army appropriation bill, passed on 4 March, 1867, providing that "all orders and instructions relating to military operations shall be issued through the general of the army," and added that he should "not be removed, suspended, or relieved from command, or assigned to duty elsewhere than at the headquarters in Washington, except at his own request, without the previous approval of the senate." The president signed the bill, with a protest against this clause, and soon obtained an opinion from his attorney-general that it was unconstitutional. The president then undertook to send this opinion to the district commanders, but, finding the secretary of war in opposition, he issued it through the adjutant-general's office. Gen. Sheridan, then at New Orleans, in command of the fifth military district, inquired what to do, and Grant replied that a "legal opinion was not entitled to the force of an order," and "to enforce his own construction of the law until otherwise ordered." This brought on a crisis. The president claimed that under the constitution he could direct the district commanders to issue such orders as he dictated, and was met by an act of congress, passed in July, making the orders of the district commanders "subject to the disapproval of the general of the army." Thus Grant was given chief control of affairs relating to the reconstruction of the southern states. The president still retained the power of removal, and on the adjournment of congress he removed Sheridan and placed Gen. Hancock in command of the fifth military district. Some of Hancock's orders were revoked by Grant, which caused not a little bitterness of feeling between these officers, and provoked opposition from the Democratic party. Subsequently, when a bill was before congress to muster Gen. Hancock out of the service for his acts in Louisiana, Grant opposed it, and it was defeated. Soon afterward he recommended Hancock for a major-generalship in the regular army, to which he was appointed.

The "tenure-of-office" act forbade the president from removing a cabinet officer without the consent of the senate; but President Johnson suspended Sec. Stanton, and appointed Grant secretary of war *ad interim* on 12 Aug., 1867. Grant protested against this action, but retained the office until 14 Jan., 1868, when the senate refused to confirm the suspension of Stanton. Grant immediately notified the president, who, finding that the general of the army would not retain the place in opposition to the will of congress, and that Sec. Stanton had re-entered upon his office, ordered Grant verbally to disregard Stanton's orders. Grant declined to do so unless he received instructions in writing. This led to an acrimonious correspondence. The president claimed that Grant had promised to sustain him. This Grant emphatically denied, and in a long letter reviewing his action said: "The course you would have it understood I agreed to pursue, was in violation of law, and was without orders from you, while the course I did pursue, and which I never doubted you understood, was in accordance with law. . . . And now, Mr. President, when my honor as a soldier and integrity as a man have been so violently assailed, pardon me for saying that I regard this whole matter, from the beginning to the end, as an attempt to involve me in the resistance of law for which you hesitate to assume the responsibility in orders." On 21 Feb. the president appointed Lorenzo Thomas adjutant-general of the army, secretary of war, and ordered him to take possession of the office. On 24 Feb. articles of impeachment were passed by the house of representatives. Throughout these years of contest between the executive and congress, Grant's position became very delicate and embarrassing. He was compelled to execute the laws of congress at the risk of appearing insubordinate to his official chief, but his course was commended by the people, his popularity increased, and when the Republican convention met in Chicago, 20 May, 1868, he was unanimously nominated for the presidency on the first ballot. In his letter of acceptance, dated nine days after, he made use of the famous phrase, "Let us have peace." The Democratic party nominated Horatio Seymour, of New York. When the election occurred, Grant carried twenty-six states with a popular vote of 3,015,071, while Seymour carried eight states with a popular vote of 2,709,613. It was claimed that the state of New York was really carried by Grant, but fraudulently counted for Seymour. Out of the 294 electoral votes cast for president, Grant received 214 and Seymour 80 —Mississippi, Texas, and Virginia not voting.

Grant possessed in a striking degree the essential characteristics of a successful soldier. His self-reliance was one of his most pronounced traits, and enabled him at critical moments to decide promptly the most important questions without useless delay in seeking advice from others, and to assume the gravest responsibilities without asking any one to share them. He had a fertility of resource and a faculty of adapting the means at hand to the accomplishment of his purposes, which contributed no small share to his success. His moral and physical courage were equal to every emergency in which he was placed. His unassuming manner, purity of character, and absolute loyalty to his superiors and to the work in which he was engaged, inspired loyalty in others and gained him the devotion of the humblest of his subordinates. He was singularly calm and patient under all circumstances, was never unduly elated by victory or depressed by defeat, never became excited, and never uttered an oath or imprecation. His habits of life were simple, and he was possessed of a physical constitution that enabled him to endure every form of fatigue and privation incident to military service in the field. He had an intuitive knowledge of topography, and never became confused as to locality in directing the movements of large bodies of men. He exhibited a rapidity of thought and action on the field that enabled him to move troops in the presence of an enemy with a promptness that has rarely been equalled. He had no hobby as to the use of any particular arm of the service. He naturally placed his main reliance on his infantry, but made a more vigorous use of cavalry than any of the generals of his day, and was judicious in apportioning the amount of his artillery to the character of the country in which he was operating. While his achievements in actual battle eclipse by their brilliance the strategy and grand tactics employed in his campaigns, yet the extraordinary combinations effected and the skill and boldness exhibited in moving large armies into position entitle him, perhaps, to as much credit as the qualities he displayed in the face of the enemy. On 4 March, 1869, Grant was inaugurated the eighteenth president of the United States.

Gen. Grant had never taken an active part in politics, and had voted for a presidential candidate but once. In 1856, although his early associations had been with the Whigs, he cast his vote for James Buchanan, the Democratic candidate; but this was on personal rather than political grounds, as he believed that the Republican candidate did not possess the requisite qualifications

for the office. So much doubt existed as to his political proclivities that prominent Democrats had made overtures to him to accept a nomination from their party only a few months before the nominating conventions were held. But he was at heart in thorough accord with the principles of the Republican party. He believed in a national banking system, a tariff that would fairly protect American industries, in the fostering of such internal improvements as would unite our two seaboards and give the eastern and western sections of the country mutual support and protection, in the dignifying of labor, and in laws that would secure equal justice to all citizens of the republic, regardless of race, color, or previous condition.

As early as August, 1863, he had written a letter to Elihu B. Washburne, member of congress, in which he said: "It became patent to my mind early in the rebellion that the north and south could never live at peace with each other except as one nation, and that without slavery. As anxious as I am to see peace established, I would not, therefore, be willing to see any settlement until this question is forever settled." In his inaugural address he declared that the government bonds should be paid in gold, advocated a speedy return to specie payments, and made many important recommendations in reference to public affairs. Regarding the good faith of the nation he said: "To protect the national honor, every dollar of government indebtedness should be paid in gold, unless otherwise expressly stipulated in the contract. . . . Let it be understood that no repudiator of one farthing of our public debt will be trusted in public place, and it will go far toward strengthening a credit which ought to be the best in the world, and will ultimately enable us to replace the debt with bonds bearing less interest than we now pay." Congress acted promptly upon his recommendation, and on 18 March, 1869, an act was passed entitled "An act to strengthen the public credit." Its language gave a pledge to the world that the debts of the country would be paid in coin unless there were in the obligations express stipulations to the contrary. Both in his inaugural address and in his first annual message to congress he took strong ground in favor of an effort to "civilize and Christianize" the Indians, and fit them ultimately for citizenship. His early experience among these people, while serving on the frontier, had eminently fitted him for inaugurating practical methods for improving their condition. He appointed as commissioner of Indian affairs the chief of the Six Nations, Gen. Ely S. Parker, a highly educated Indian, who had served on his staff, and selected as members of the board of Indian commissioners gentlemen named by the various religious denominations throughout the country. Although such men were not always practical in their views, and many obstacles had to be overcome in working out this difficult problem, great good resulted in the end; public attention was attracted to the amelioration of the condition of our savage tribes; they came to be treated more like wards of the nation, were gathered upon government reservations, where they could be more economically provided for, the number of Indian wars was reduced, and large sums of money were saved to the government.

The 15th amendment to the constitution, adopted 26 Feb., 1869, guaranteed the right of suffrage without regard to race, color, or previous condition of servitude. It was ratified by the requisite three fourths of the states, and declared in force, 30 March, 1870. The adoption of this amendment had been recommended by President Grant, and had had his active support throughout, and it is largely due to his efforts that it is now a part of the constitution. He proclaimed its adoption by the somewhat unusual course of sending a special message to congress, in which he said: "I regard it as a measure of grander importance than any other one act of the kind from the foundation of the government to the present day." He also urged in this message that congress should encourage popular education, in order that the negro might become better fitted for the exercise of the privileges conferred upon him by this amendment.

In the summer of 1869 a representative from Santo Domingo informed the president that the government and people of that republic favored annexation to the United States. The president sent several officers of the government to investigate the condition of affairs there, and became so clearly impressed with the advantages that would result from the acquisition of that country that he negotiated a treaty of annexation, and submitted it to the senate at the next meeting of congress. In May, 1870, he urged favorable action on the part of that body in a message in which he set forth the reasons that had governed him, and again called attention to it in his second annual message. He claimed, among other things, that its admission into the Union as a territory would open up a large trade between the two lands, furnish desirable harbors for naval stations, and a place of refuge for negroes in the south who found themselves persecuted in their old homes; would favor the abolition of slavery in the West Indies, would be in harmony with the Monroe doctrine, and would redound to the great benefit of both countries and to civilization, and that there was danger, if we failed to receive it, that it would be taken by some European power, and add another to the list of islands off our coast controlled by European powers, and likely to give us trouble in case we became engaged in war. The measure was debated for a long time, but the senate did not act favorably upon it. In 1871 a commission of distinguished citizens was sent to investigate and report upon all matters relating to Santo Domingo and the proposed treaty. They visited that country, and made an exhaustive report, which was highly favorable to the plan of annexation; but the treaty was constitutionally rejected, having failed to receive the necessary two-third vote, and was never brought up again. The president declared that he had no policy to enforce against the will of the people. He referred to the subject in his last annual message to congress, and reviewed the grounds of his action, not in order to renew the project, but, as he expressed it, "to vindicate my previous action in regard to it." Many outrages had been committed in the south against the freedmen, and congress spent much time in considering measures for the suppression of these crimes. On 31 May, 1870, a bill was passed, called the Enforcement act, which empowered the president to protect the freedmen in their newly acquired rights, and punish the perpetrators of the outrages. Several supplements to this were subsequently enacted, and a most onerous and exacting duty was imposed upon the executive in enforcing their provisions.

The reconstruction of the states recently in rebellion now progressed rapidly under the 14th amendment, which guaranteed equal civil rights to all citizens, and in July, 1870, all the states had ratified this amendment and been readmitted to the Union. The votes of Arkansas and Louisiana were not received by congress in the presidential election of 1872; but this was on ac-

count of fraud and illegal practices at the polls. In the president's annual message to congress, December, 1869, he recommended the passage of an act authorizing the funding of the public debt at a lower rate of interest. This was followed by the passing of an act, approved 14 July, 1870, which authorized the secretary of the treasury to issue bonds to the amount of $200,000,000, bearing interest at the rate of 5 per cent., $300,000,000 at the rate of 4½ per cent., and $1,000,000,000 at the rate of 4 per cent. Under this act, and subsequent amendments thereto, the national debt has been refunded from time to time, until the average rate of actual interest does not exceed 3½ per cent.

In 1870 President Grant sent special messages to congress urging upon that body the necessity of building up our merchant marine, and the adopting of methods for increasing our foreign commerce, and relating to our relations with Spain, which had become strained in consequence of the action of Spanish officials in Cuba. In August of this year, soon after the beginning of the war between France and Germany, he issued a proclamation of neutrality as to both of those nations, and defined the duties of Americans toward the belligerents. He directed the U. S. minister to France, Elihu B. Washburne, to remain at his post in Paris, and extend the protection of the American flag to peoples of all nationalities who were without the protection of their own flag—an act that saved much suffering and loss to individuals.

In his annual message in 1870, the president took strong ground in favor of civil service reform, saying: "I would have it govern, not the tenure, but the manner of making all appointments," and "The present system does not secure the best men, and not even fit men, for public place." This subject gave rise to a spirited controversy in congress, many declaring the principle to be wholly un-American, and calculated to build up a favored class, who would be in great measure independent of their executive chiefs, etc. But on 3 March, 1871, an act was passed authorizing the president to appoint a civil service commission, and to prescribe rules and regulations governing the appointments of civil officers. He appointed seven gentlemen on this commission, selecting those who had been most prominent in advocating the measure, and transmitted their report to congress, with a special message urging favorable action. The plan recommended, which provided for competitive examinations, was approved, and was put into operation 1 Jan., 1872. An appropriation was procured for the expenses of the commission and the carrying out of the plan, but congress gave little countenance to the measure. Up to 1874 the president continued to urge that body to give legislative sanction to the rules and methods proposed, and declared that it was impossible to maintain the system without the "positive support of congress." He finally notified congress that if it adjourned without action he would regard it as a disapproval of the system, and would abandon it; but he continued it until its expenses were no longer provided for. The agitation of the question had been productive of much good. The seeds thus sown had taken deep root in the minds of the people, and bore good fruit in after years. In March, 1871, the disorders in the southern states, growing out of conflicts between the whites and the blacks, had assumed such proportions that the president sent a special message to congress requesting "such legislation as shall effectually secure life, liberty, and property, and the enforcement of law in all parts of the United States." On 20 April congress passed an act that authorized the president to suspend, under certain defined circumstances, the writ of habeas corpus in any district, and to use the army and navy in suppressing insurrections. He issued a proclamation, 4 May, ordering all unlawful armed bands to disperse, and, after expressing his reluctance to use the extraordinary power conferred upon him, said he would "not hesitate to exhaust the power thus vested in the executive, whenever and wherever it shall become necessary to do so for the purpose of securing to all citizens of the United States the peaceful enjoyment of the rights guaranteed to them by the constitution and the laws." As this did not produce the desired effect, he issued a proclamation of warning, 12 Oct., and on the 17th suspended the writ of habeas corpus in parts of North and South Carolina. He followed this by vigorous prosecutions, which resulted in sending a number of prominent offenders to prison, and the outrages soon ceased. The most important measure of foreign policy during President Grant's administration was the treaty with Great Britain of 8 May, 1871, known as the treaty of Washington. Early in his administration the president had begun negotiations looking to the settlement of the claims made by the United States against Great Britain, arising from the depredations upon American vessels and commerce by Confederate cruisers that had been fitted out or obtained supplies in British ports, and the questions growing out of the Canadian fishery disputes and the location of our northern boundary-line at its junction with the Pacific ocean, which left the jurisdiction of the island of San Juan in controversy. Neither of the two last-mentioned questions had been settled by the treaty of peace of 1783, or any subsequent treaties. The fishery question was referred to arbitration by three commissioners, one to be chosen by the United States, one by Great Britain, and the third by the other two, provided they should make a choice within a stated time, otherwise the selection to be made by the Emperor of Austria. The two commissioners having failed to agree, the third was named by the Austrian emperor. The award was unsatisfactory to the United States, the decision of the commission was severely criticised, and the dispute has from time to time been reopened to the detriment of both countries. The San Juan question was referred to the emperor of Germany as arbitrator, with sole power. His award fully sustained the claim of the United States. A high joint commission had assembled at Washington, composed of American and English statesmen, which formulated the treaty of Washington, and by its terms the claims against Great Britain growing out of the operations of the Confederate cruisers, commonly known as the "Alabama claims," were referred to a court of arbitration, which held its session at Geneva, Switzerland. In September, 1872, it awarded the United States the sum of $15,-

500,000, which was subsequently paid by the British government. War had at one time seemed imminent, on account of the bitterness felt against Great Britain in consequence of her unfriendly acts during our civil war; but the president was a man who had seen so much of the evils of war that he became a confirmed believer in pacific measures as long as there was hope through such means. In his inaugural address he said: "In regard to foreign policy, I would deal with nations as equitable law requires individuals to deal with each other. . . . I would respect the rights of all nations, demanding equal respect for our own. If others depart from this rule in their dealings with us, we may be compelled to follow their precedent." The adoption of the treaty was a signal triumph for those who advocated the settlement of international disputes by peaceful methods. The adoption of the rules contained in the treaty for the government of neutral nations was of far more importance than the money award. These rules were to govern the action of the two contracting parties, and they agreed to bring them to the notice of other nations, and invite them to follow the precedent thus established. The rules stipulated that a neutral shall not permit a belligerent to fit out, arm, or equip in its ports any vessel that it has reasonable ground to believe is intended to cruise or carry on war against a nation with which it is at peace, and that neither of the contracting parties shall permit a belligerent to make use of its ports or waters as a base of operations against the other. The two nations also agreed to use due diligence to prevent any infraction of these rules.

On 22 May, 1872, the amnesty bill was passed by congress, restoring their civil rights to all but about 350 persons in the south who had held conspicuous positions under the Confederate government. President Grant's first administration had been vigorous and progressive. Important reforms had been inaugurated, and measures of vital moment to the nation, both at home and abroad, had been carried to a successful conclusion in the face of opposition from some of the most prominent men of his own political party. Not a few Republicans became estranged, feeling that they were being ignored by the executive, and formed themselves into an organization under the name of "Liberal Republicans." This opposition resulted in the holding of a convention in Cincinnati, and the nomination of Horace Greeley as its candidate for the presidency, which nomination was afterward adopted by the Democratic party. The Republican convention met in Philadelphia, 5 June, 1872, renominated President Grant, and adopted a platform approving the principles advocated by him in his previous administration. When the election took place, he carried 31 states, with a popular vote of 3,597,070, the largest that had ever been given for any president, while Greeley carried 6 states with a popular vote of 2,834,079. Grant received 286 electoral votes against 66 that would have been cast for Mr. Greeley if he had lived. The 14 votes of Arkansas and Louisiana were not counted, because of fraud and illegality in the election. The canvass had been one of the most aggressive and exciting in the history of the country, and abounded in personal attacks upon the candidates. Gen. Grant, in his inaugural address on 4 March, 1873, said, in alluding to the personal abuse that had been aimed at him: "To-day I feel that I can disregard it, in view of your verdict, which I gratefully accept as my vindication." His second term was a continuation of the policy that had characterized his first. His foreign policy was steadfast, dignified, and just, always exhibiting a conscientious regard for the rights of foreign nations, and at the same time maintaining the rights of our own. He instructed the ministers to China and Japan to deal with those powers as "we would wish a strong nation to deal with us if we were weak." During the insurrection in the island of Cuba, which had lasted for several years, a number of American citizens had been arrested by the Spanish authorities, under the pretence that they had been furnishing aid to the insurgents, and American vessels plying in Cuban waters had at times been subjected to much inconvenience. Then matters culminated in the seizure by Spain, without justification, of an American vessel named the "Virginius." The excitement created in the United States by this outrage was intense, and many statesmen were clamorous for war. But the president believed that pacific measures would accomplish a more satisfactory result, and, by acting with promptness and firmness, he soon wrung from Spain ample apology and full reparation.

Political troubles were still rife in certain states of the south. The result of the election in Louisiana in 1872 was in dispute, and armed violence was threatened in that state. Early in 1873 the president called the attention of congress to the inadequacy of the laws applying to such cases, saying that he had recognized the officers installed by the decision of the returning-board as representing the *de facto* government, and added: "I am extremely anxious to avoid any appearance of undue interference in state affairs, and if congress differs from me as to what ought to be done, I respectfully urge its immediate decision to that effect." Congress, however, took no action, and left with the executive the sole responsibility of dealing with this delicate question. The next year the trouble was renewed, and the fierce contest that was waged

between the Republicans under Kellogg, and the Democrats under McEnery, their respective candidates for the governorship, resulted in armed hostilities. Kellogg, the *de facto* governor, called upon the Federal authority for protection, and Gen. Emory was sent to New Orleans with U. S. troops, and the outbreak was for a time suppressed. But difficulties arose again, and the president sent Gen. Sheridan to Louisiana to report upon the situation of affairs, and, if necessary, to take command of the troops and adopt vigorous measures to preserve the peace. Gen. Sheridan became convinced that his duty was to sustain the government organized by Kellogg, and, on the demand of the governor, he ejected some of McEnery's adherents from the state capitol. The president submitted the whole history of the case to congress, asking for legislation defining his duties in the emergency. Getting no legislation on the subject, he continued his recognition of the government, of which Kel-

logg was the head, until the election of a new governor; but there was afterward no serious trouble in Louisiana. Difficulties of the same nature arose in Arkansas and Texas, which were almost as perplexing to the executive; but thess attracted less attention before the public. Difficulties of a somewhat similar kind were encountered also in Mississippi, but the president in this case avoided interference on the part of the general government.

In April, 1874, congress passed what was known as the "Inflation bill," which increased the paper currency of the country, and was contrary to the financial principles that the president had always entertained and advocated in his state papers. Many of his warmest political supporters had approved the measure, and unusual efforts were made to convince him that it was wise financially and expedient politically. The president gave much thought and study to the question, and at one time wrote out the draft of a message in which he set forth all the arguments that could be made in its favor, in order that he might fully weigh them; but, on reading it over, he became convinced that the reasons advanced were not satisfactory, and that the measure would in the end be injurious to the true business interests of the country, and delay the resumption of specie payment. He therefore returned the bill to congress, with his veto, 22 April. The arguments contained in his message were unanswerable, the bill was not passed over his veto, and his course was sustained by the whole country. Perhaps no act of his administration was more highly approved by the people at large, and the result amply proved the wisdom of the firmness he exhibited at this crisis. About two months after this, in a conversation at the executive mansion with Senator Roscoe Conkling, of New York, and Senator John P. Jones, of Nevada, the president entered at length upon his views concerning the duty of the government to take steps looking to the return to specie payment. His earnestness on this subject, and the advantages of the methods proposed, so impressed the senators that they asked him to commit his views to writing. He complied with this request by writing a letter addressed to Senator Jones, dated 4 June, 1874, in which he began by saying: "I believe it a high and plain duty to return to a specie basis at the earliest practical day, not only in compliance with legislative and party pledges, but as a step indispensable to national lasting prosperity." Then followed his views at length. This letter was made public, and attracted much attention, and in January, 1875, the "Resumption act" was passed, which, to a large extent, embodied the views that had been suggested by the president. There were doubts in the minds of many as to the ability of the government to carry it into effect; but it proved entirely successful, and the country was finally relieved from the stigma of circulating an irredeemable paper currency.

During 1875 the president had reason to suspect that frauds were being practised by government officials in certain states in collecting the revenue derived from the manufacture of whiskey. He at once took active measures for their detection, and the vigorous pursuit and punishment of the offenders. He issued a stringent order for their prosecution, closing with the famous words, "Let no guilty man escape." Many indictments soon followed, the ringleaders were sent to the penitentiary, and an honest collection of the revenue was secured. Some of the revenue officials were men of much political influence, and had powerful friends. The year for nominating a president was at hand, and the excitement ran high. Friends of the convicted, political enemies and rivals for the succession in his own party, resorted to the most desperate means to break the president's power and diminish his popularity. The grossest misrepresentations were practised, first in trying to bring into question the honesty of his purpose in the prosecution of offenders, and afterward in endeavoring to rob him of the credit of his labors after they had purified the revenue-service. But these efforts signally failed.

In September, 1875, Gen. Grant, while attending an army reunion in Iowa, offered three resolutions on the subject of education, and made a speech in which he used this language: "Let us labor for the security of free thought, free speech, free press, pure morals, unfettered religious sentiments, and equal rights and privileges for all men, irrespective of nationality, color, or religion; encourage free schools; resolve that not one dollar appropriated to them shall go to the support of any sectarian school; resolve that neither state nor nation shall support any institution save those where every child may get a common-school education, unmixed with any atheistic, pagan, or sectarian teaching; leave the matter of religious teaching to the family altar, and keep church and state forever separate." This was published broadcast, and was received with marked favor by the press and people.

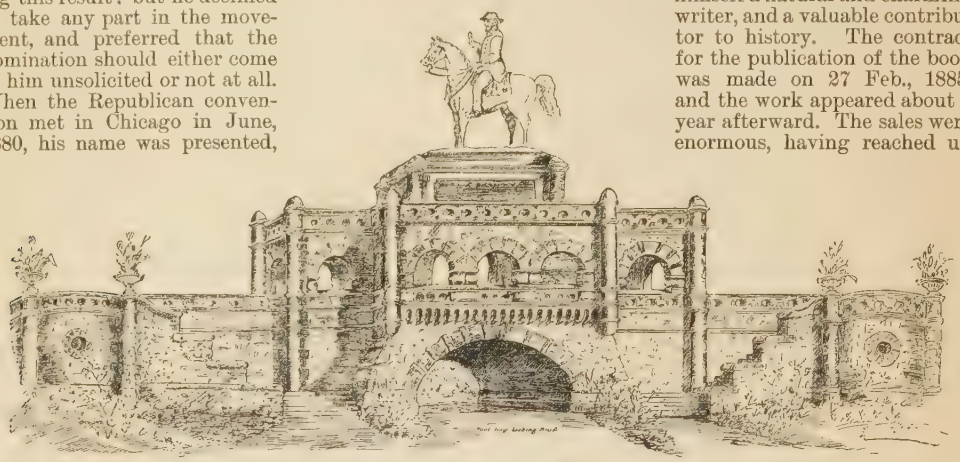
In 1876 Samuel J. Tilden, of New York, was nominated for the presidency by the Democrats, and Gen. Rutherford B. Hayes, of Ohio, by the Republicans. When the election was held in November, the result was in dispute, and a bitter contest was likely to follow in determining which was the legally elected candidate. After an exciting debate in congress, a bill was passed providing for an electoral commission, to whose decision the question was to be referred. It decided in favor of Gen. Hayes, and he was inaugurated on 4 March, 1877. During all this time the political passions of the people were raised to fever-heat, serious threats of violence were made, and the business interests of the country were greatly disturbed. President Grant took no active part in the determination of the question, but devoted himself to measures to preserve the peace. There were many changes in the cabinet during Grant's two administrations. The following is a list of its members, giving the order in which they served: Secretaries of state, Elihu B. Washburne, of Illinois; Hamilton Fish, of New York. Secretaries of the treasury, Alexander T. Stewart, of New York (appointed, but not confirmed, on account of the discovery of an old law rendering him ineligible because of his being engaged in the business of an importing merchant); George S. Boutwell, of Massachusetts; William M. Richardson, of Massachusetts; Benjamin H. Bristow, of Kentucky; Lot M. Morrill, of Maine. Secretaries of war, Gen. John M. Schofield, U. S. army; John A. Rawlins, of Illinois; William W. Belknap, of Iowa; Alonzo Taft, of Ohio; J. Donald Cameron, of Pennsylvania. Secretaries of the navy, Adolph E. Borie, of Pennsylvania; George M. Robeson, of New Jersey. Postmasters-General, John A. J. Creswell, of Maryland; Marshall Jewell, of Connecticut; James A. Tyner, of Indiana. Attorneys-General, Ebenezer R. Hoar, of Massachusetts; Amos T. Akerman, of Georgia; George H. Williams, of Oregon; Edwards Pierrepont, of New York; Alonzo Taft, of Ohio. Secretaries of the interior, Gen. Jacob D. Cox, of Ohio; Columbus Delano, of Ohio; Zachariah Chandler, of Michigan. (See articles on each of these cabinet offi-

cers.) During President Grant's administrations the taxes had been reduced over $300,000,000, the national debt over $450,000,000, the interest on the debt from $160,000,000 to $100,000,000; the balance of trade had changed from $130,000,000 against this country to $130,000,000 in its favor; the reconstruction of the southern states had been completed; the first transcontinental railroad had been finished; all threatening foreign complications had been satisfactorily settled; and all exciting national questions seemed to have been determined and removed from the arena of political contests. Gen. Grant, while president, exhibited the same executive ability as in the army, insisting upon a proper division of labor among the different branches of the government, leaving the head of each department great freedom of action, and holding him to a strict accountability for the conduct of the affairs of his office. He decided with great promptness all questions referred to him, and suggested many measures for improving the government service, but left the carrying out of details to the proper chiefs. While positive in

his views, and tenacious of his opinions when they had once been formed after due reflection, he listened patiently to suggestions and arguments, and had no pride of opinion as to changing his mind, if convincing reasons were presented to him. He was generally a patient listener while others presented their views, and seldom gave his opinions until they were thoroughly matured; then he talked freely and with great force and effect. He was one of the most accessible of all the presidents. He reserved no hours that he could call his own, but was ready to see all classes of people at all times, whether they were high in position or from the ranks of the plain people. His patience was one of the most characteristic traits of his character, and his treatment of those who came in contact with him was frank and cordial to the highest degree. His devotion to his friends was proverbial, and his loyalty to others commanded loyalty from them, and accounted, in great measure, for the warmth and devotion of his followers. Wherever he placed trust he reposed rare confidence, until it was shaken by actual proofs of betrayal. This characteristic of his nature led him at times to be imposed upon by those who were not worthy of the faith he placed in them; but persons that once lost his confidence never regained it.

After retiring from the presidency, 4 March, 1877, Gen. Grant decided to visit the countries of the Old World, and on 17 May he sailed from Philadelphia for Liverpool on the steamer "Indiana," accompanied by his wife and one son. His departure was the occasion for a memorable demonstration on the Delaware. Distinguished men from all parts of the country had assembled to bid him good-by, and accompanied him down the river. A fleet of naval and commercial vessels and river boats, decorated with brilliant banners, convoyed his steamer, crowds lined the shores greeting him with cheers, bells rang, whistles sounded from mills and factories, and innumerable flags saluted as he passed. On his arrival in Liverpool, 28 May, he received the first of a series of ovations in foreign lands scarcely less cordial and demonstrative than those which had been accorded him in his own country. The river Mersey was covered with vessels displaying the flags of all nations, and all vied with each other in their demonstrations of welcome. He visited the places of greatest interest in Great Britain, and was accorded the freedom of her chief cities, which means the granting of citizenship. He received a greater number of such honors than had ever been bestowed even upon the most illustrious Englishman. In London he was received by the queen and the Prince of Wales, and afterward visited her majesty at Windsor Castle. While he was entertained in a princely manner by royalty, the most enthusiastic greetings came from the masses of the people, who everywhere turned out to welcome him. His replies to the numerous addresses of welcome were marked by exceeding good taste and were read with much favor by his own countrymen. Upon leaving England he visited the continent, and the greetings there from crowned heads and common people were repetitions of the receptions he had met ever since he landed in Europe. The United States man-of-war "Vandalia" had been put at his disposal, and on board that vessel he made a cruise in the Mediterranean, visiting Italy, Egypt, and the Holy Land. He sailed from Marseilles for India, 23 Jan., 1879, arrived at Bombay, 12 Feb., and from there visited Calcutta and many other places of interest. His journey through the country called forth a series of demonstrations which resembled the greetings to an emperor passing through his own realms. He sailed in the latter part of March for Burmah, and afterward visited the Malacca peninsula, Siam, Cochin China, and Hong-Kong, arriving at the latter place on 30 April. He made a tour into the interior of China, and was everywhere received with honors greater than had ever been bestowed upon a foreigner. At Pekin, Prince Kung requested him to act as sole arbitrator in the settlement of the dispute between that country and Japan concerning the Loo Choo islands. His plans prevented him from entering upon the duties of arbitrator, but he studied the questions involved and gave his advice on the subject, and the matters in dispute were afterward settled without war. On 21 June he reached Nangasaki, where he was received by the imperial officials and became the guest of the mikado. The attention shown him while in Japan exceeded in some of its features that which he had received in any of the other countries included in his tour. The entertainments prepared in his honor were memorable in

the history of that empire. He sailed from Yokohama, 3 Sept., and reached San Francisco on the 20th. He had not visited the Pacific coast since he had served there as a lieutenant of infantry. Preparations had been made for a reception that should surpass any ever accorded to a public man in that part of the country, and the demonstration in the harbor of San Francisco on his arrival formed a pageant equal to anything of the kind seen in modern times. On his journey east he was tendered banquets and public receptions, and greeted with every manifestation of welcome in the different cities at which he stopped. Early in 1880, he travelled through some of the southern states and visited Cuba and Mexico. In the latter country he was hailed as its staunchest and most pronounced friend in the days of its struggle against foreign usurpation, and the people testified their gratitude by extending to him every possible act of personal and official courtesy. On his return he took his family to his old home in Galena, Ill. A popular movement had begun looking to his renomination that year for the presidency, and overtures were made to him to draw him into an active canvass for the purpose of accomplishing this result; but he declined to take any part in the movement, and preferred that the nomination should either come to him unsolicited or not at all. When the Republican convention met in Chicago in June, 1880, his name was presented,



and for thirty-six ballots he received a vote that only varied between 302 and 313. Many of his warmest admirers were influenced against his nomination by a traditional sentiment against a third presidential term, and after a long and exciting session the delegates to the convention compromised by nominating Gen. James A. Garfield. Gen. Grant devoted himself loyally during this political canvass to the success of the party that had so often honored him, and contributed largely by his efforts to the election of the candidate.

In August, 1881, Gen. Grant bought a house in New York, where he afterward spent his winters, while his summers were passed at his cottage at Long Branch. On Christmas eve, 1883, he slipped and fell upon the icy sidewalk in front of his house, and received an injury to his hip, which proved so severe that he never afterward walked without the aid of a crutch. Finding himself unable with his income to support his family properly, he had become a partner in a banking-house in which one of his sons and others were interested, bearing the name of Grant and Ward, and invested all his available capital in the business. He took no part in the management, and the affairs of the firm were left almost entirely in the hands of the junior partner. In May, 1884, the firm without warning suspended. It was found that two of the partners had been practising a series of unblushing frauds, and had robbed the general and his family of all they possessed, and left them hopelessly bankrupt. Until this time he had refused all solicitations to write the history of his military career for publication, intending to leave it to the official records and the historians of the war. Almost his only contribution to literature was an article entitled "An Undeserved Stigma," in the "North American Review" for December, 1882, which he wrote as an act of justice to Gen. Fitz-John Porter, whose case he had personally investigated. But now he was approached by the conductors of the "Century" magazine with an invitation to write a series of articles on his principal campaigns, which he accepted, for the purpose of earning money, of which he was then greatly in need, and he accordingly produced four articles for that periodical. Finding this a congenial occupation, and receiving handsome offers from several publishers, he set himself to the task of preparing two volumes of personal memoirs, in which he told the story of his life down to the close of the war, and proved himself a natural and charming writer, and a valuable contributor to history. The contract for the publication of the book was made on 27 Feb., 1885, and the work appeared about a year afterward. The sales were enormous, having reached up to this time 312,000 sets. The amount that Mrs. Grant has already (June, 1887) received as her share of the profits is $394,459.53, paid in two checks, of $200,000 and $150,000, and several smaller amounts, the largest sum ever received by an author or his representatives from the sale of any single work. It is expected by the publishers that the amount of half a million of dollars will be ultimately paid to the general's family. In the summer of 1884 Gen. Grant complained of a soreness in the throat and roof of the mouth. In August he consulted a physician, and a short time afterward the disease was pronounced to be cancer at the root of the tongue. The sympathies of the entire nation were now aroused, messages of hope and compassion poured in from every quarter, and on 4 March, 1885, congress passed a bill creating him a general on the retired list, thus restoring him to his former rank in the army. He knew that his disease would soon prove fatal. He now bent all his energies to the completing of his "Memoirs," in order that the money realized from the sale might provide for his family. He summoned all his will power to this task, and nothing in his career was more heroic than the literary labor he now performed. Hovering between life and death, suffer-

ing almost constant agony, and speechless from disease, he struggled through his daily task, and laid down his pen only four days before his death. At this time the last portrait was made of the great soldier, which appears on page 713.

On 16 June, 1885, he was removed to the Joseph W. Drexel cottage on Mount McGregor, near Saratoga, N. Y., where he passed the remaining five weeks of his life. (See illustration on page 721.) The cottage was offered by its owner as a gift to the U. S. government. As it was not accepted, Mr. Drexel keeps the cottage and its contents in the condition they were in at the time of the general's death, and will continue to do so. On Thursday, 23 July, at eight o'clock in the morning, Grant passed away, surrounded by his family. The remains were taken to New York, escorted by a detachment of U. S. troops and a body of the Grand army of the republic composed of veterans of the war. A public funeral was held in that city on Saturday, 8 Aug., which was the most magnificent spectacle of the kind ever witnessed in this country. The body was deposited in a temporary tomb in Riverside park, overlooking the Hudson river, where it is proposed to erect an imposing monument, for which about $125,000 have already (June, 1887) been subscribed. In Chicago a bronze equestrian statue of the general, executed by Rebisso, will soon be erected near the centre of Lincoln park, overlooking Lake Michigan. The illustration on page 723 is a representation of the statue, and on the following page is a view of the eastern façade of the structure, designed by Whitehouse, which is surmounted by the statue. The large collection of swords, gold-headed canes, medals, rare coins, and other articles that had been presented to Gen. Grant passed into the possession of William H. Vanderbilt as security in a financial transaction shortly before the general's death. After that event Mr. Vanderbilt returned the articles to Mrs. Grant, by whom they were given to the United States government, and the entire collection is now in the National museum at Washington. Among the many portraits of the great soldier, perhaps the best are those painted by Healy for the Union league club about 1865, and another executed in Paris in 1877, now in the possession of the family, those painted in 1882 by Le Clear for the White House at Washington and the Calumet club of Chicago, and one executed by Ulke for the U. S. war department, where is also to be seen a fine marble bust, executed in 1872–'3, by Hiram Powers. See "Military History of Ulysses S. Grant, from April, 1861, to April, 1865," by Adam Badeau (3 vols., New York, 1867–'81); "Life and Public Services of Gen. U. S. Grant," by James Grant Wilson (1868); revised and enlarged edition (1886); "The Ancestry of General Grant and their Contemporaries," by Edward C. Marshall (1869); "Around the World with General Grant," by John Russell Young (1880); and "Personal Memoirs of U. S. Grant," written by himself (2 vols., 1885–'6); also various biographies and numerous addresses, among them one by Henry Ward Beecher, delivered in Boston, 22 Oct., 1885.—His wife, **Julia Dent**, b. in St. Louis, Mo., 26 Jan., 1826, is the daughter of Frederick and Ellen Wrenshall Dent. Her father was the son of Capt. George Dent, who led the forlorn hope at Fort Montgomery, when it was stormed by Mad Anthony Wayne. On her mother's side she was descended from John Wrenshall, who came from England to this country to escape religious intolerance, and settled in Philadelphia, Pa. At the age of ten years she was sent to Miss Moreau's boarding-school, where she remained for eight years. Soon after her return home she met Lieut. Grant, then of the 4th infantry, stationed at Jefferson barracks at St. Louis, and in the spring of 1844 became engaged to him. Their marriage, deferred by the war with Mexico, took place on 22 Aug., 1848. The first four years of her married life were spent at Detroit, Mich., and at Sackett's Harbor, N. Y., where Capt. Grant was stationed. In 1852 Mrs. Grant returned to her father's home in St. Louis, her health not being sufficiently strong to accompany her husband to California, whither his command had been ordered.

Julia D Grant

Two years later he resigned from the army and joined his family in St. Louis. During the civil war Mrs. Grant passed much of the time with Gen. Grant, or near the scene of action, he sending for her whenever opportunity permitted. She was with him at City Point in the winter of 1864–'5, and accompanied him to Washington when he returned with his victorious army. She saw her husband twice inaugurated president of the United States, and was his companion in his journey around the world. She herself has said: "Having learned a lesson from her predecessor, Penelope, she accompanied her Ulysses in his wanderings around the world." After Gen. Grant's death a bill was passed by congress giving his widow a pension of $5,000 a year. She is the fourth to whom such a pension has been granted, the others being Mrs. Tyler, Mrs. Polk, and Mrs. Garfield. Four children were born to her—three sons, Frederick Dent, Ulysses, Jr., and Jesse, and one daughter, Nellie, who, in 1874, married Algernon Sartoris, and went to reside with him in England. Mrs. Grant resides in New York city, surrounded by her children and grandchildren.—Their eldest son, **Frederick Dent**, b. in St. Louis, Mo., 30 May, 1850, accompanied his father during the civil war, and was in five battles before he was thirteen years of age. In 1867 he entered the U. S. military academy, where he was graduated in 1871 and assigned to the 4th cavalry. During the summer of 1871 he was employed on the Union Pacific and Colorado Central railroads as an engineer. Late in 1871 he visited Europe with Gen. Sherman, and in 1872 was detailed to command the escort to the party that was making the preliminary survey for the Southern Pacific railroad. In 1873 he was assigned to the staff of Gen. Sherman as lieutenant-colonel, in which capacity he served eight years, accompanying nearly every expedition against the Indians. He was with his father in 1879 in the oriental part of the journey round the world, and in 1881 resigned his commission. During his father's illness, Col. Grant remained constantly with him and assisted somewhat in the preparation of the "Personal Memoirs." Since Gen. Grant's death his son has had the care of his mother and her estate, residing with her.

GRASSE, François Joseph Paul, count de, b. in Provence, France, in 1723; d. in France, 11 Jan., 1788. He entered the navy at the age of

fifteen. While lieutenant of a frigate he was captured by a British ship in 1742 and confined in England until he was exchanged. He served under La Galissonière during the Seven Years' war, and assisted in taking Minorca. He was engaged under D'Ache in three actions with Pococke in the East Indies, and toward the end of the war was made captain. At the beginning of 1781 he was appointed to command a French fleet to assist the Americans against the British, and, although much younger than Count de Barras, he was made superior in command, with the title of lieutenant-general. When Cornwallis was fortifying Yorktown, and Washington was uncertain what course to pursue, the agreeable intelligence was despatched from Count de Barras that Grasse would sail from Cape François, W. I., on 13 April, for the mouth of the Chesapeake, with twenty-nine sail and 3,000 troops under command of the Marquis St. Simon. They arrived at the close of August, and at Cape Henry found an officer sent from Lafayette to give information to Grasse respecting the situation of the armies in Virginia. Although Rodney was informed of the movements of the French, he did not leave Sandy Hook until after their arrival in the Chesapeake. Carefully eluding the British fleet, Grasse blockaded the York and James rivers and debarked his men, so as to cut off Cornwallis's retreat. Owing to the failure of the British admiral to bring his forces together, and to the adroitness of Grasse, the first encounter resulted in a victory for the French. On 17 Sept., Washington, accompanied by Rochambeau, Chastellux, Gen. Knox, and Gen. Du Portail, visited Grasse on his flag-ship "La Ville de Paris," off Cape Henry, to make arrangements with regard to the attack upon Cornwallis at Yorktown. During this engagement the American troops were stationed on the right wing, the French on the left, and Grasse remained in Lynn Haven bay to prevent naval assistance from reaching Cornwallis. When Washington announced the victory, congress voted honors to him, to Rochambeau, and to Grasse, with especial thanks to the French troops, as "victory had twined double garlands around the banners of France and America." At the close of the Virginia campaign Grasse embarked for the West Indies, receiving two horses as a token of personal esteem from Washington. On his arrival he established the naval power of France, recaptured and restored St. Eustatius to the United Provinces, and took St. Christopher Nevis and Montserrat. On 19 Feb., 1782, Rodney, who had been carefully watching his movements, appeared at Barbadoes with re-enforcements. In order to cope with him, Grasse decided to unite with the Spanish squadron, and on 8 April, 1782, he sailed for Hispaniola. An engagement took place on 9 April at St. Domingue, and three days later Rodney, by skilful movements, drew the French into a broad expanse of waters between several small islands. Having the advantage of ships in good repair and finely disciplined men, as well as advantage in numbers, he began the attack. Although the French handled their guns well at a distance, they needed presence of mind for a close engagement, and about the middle of the day the battle was concluded by a ship-to-ship encounter, and the "Ville de Paris" foundered. Grasse lost the favor of the king after this defeat, and lived unhappily until his death, six years later. Washington, alluding to the death of Grasse in a letter to Rochambeau, writes: "His frailties should now be buried in the grave with him, while his name will be long deservedly dear to this country on account of his successful career in the glorious campaign of 1781."

GRASSI, John, clergyman, b. in Verona, Italy, 1 Oct., 1778; d. in Italy, 12 Dec., 1849. He entered the Society of Jesus in 1799, and in 1810 was sent to Maryland as superior of Jesuit missions. He was recalled to Italy in 1817, and afterward held several important offices in the order. He was rector of the College of the propaganda, and at the time of his death assistant of Italy. He wrote on his return to Italy "Notizie varie sullo Stato presente della Repubblica degli Stati Uniti dell' America Settentrionale scritte al principio del 1818" (Rome, 1818; Turin, 1822).

GRATACAP, Louis Pope, naturalist, b. in Brooklyn, N. Y., 1 Nov., 1850. He was graduated at the College of the city of New York in 1869 and at the Columbia school of mines in 1876. Subsequently he received the appointment of assistant curator in paleontology and mineralogy in the American museum of natural history in New York, where the arrangement of the specimens in the present building was largely conducted under his supervision. Mr. Gratacap has also held the office of chemist to the Metropolitan gaslight company in New York for many years. He has been a large contributor to scientific journals, and, besides botanical notes in the "Bulletin of the Torrey Botanical Club," has published a series of papers on "The Ice Age" in the "Popular Science Monthly" for 1878, a series on "Gas and Gas-Making" in the "Scientific American Supplement" (1880), and a valuable series on archæology in the "American Antiquarian" (1883–'4). Mr. Gratacap is also the author of "Philosophy of Ritualism, or Apologia pro Ritu" (New York, 1887).

GRATIOT, Charles, soldier, b. in Missouri in 1788; d. in St. Louis, Mo., 18 May, 1855. He was graduated at the U. S. military academy in 1806, and entered the army as 2d lieutenant of engineers. He was appointed captain in 1808, and served with distinction in the war with Great Britain as chief engineer of Harrison's army in 1813–'14, when he was brevetted colonel. He was engaged in the defence of Fort Meigs in 1813, and in the attack on Fort Mackinac in 1814. In 1815 he was appointed major of engineers, and superintended the fortifications on the Delaware river, and subsequently those in Hampton Roads, Va. He became lieutenant-colonel in 1819, and colonel and principal engineer in charge of the engineer bureau of Washington, D. C., in 1828. He was brevetted brigadier-general, 24 May, 1828, and appointed to be inspector of West Point, which office he held until 6 Dec., 1838, when he was dismissed by the president for having failed to pay into the treasury certain balances of money placed in his hands for public purposes. After holding a clerkship in the land-office in Washington, D. C., from 1840 till 1855, he went to St. Louis, where he died

in destitute circumstances. Fort Gratiot, on St. Clair river, Mich., and the villages of Gratiot, in Michigan and Wisconsin, were named in his honor.

GRATTAN, Thomas Colley, English author, b. in Dublin, Ireland, in 1796; d. in London, England, 4 July, 1864. He studied law in Dublin, but soon renounced this profession, and obtained a commission in the army. He then married and settled in France, but went to Belgium in 1828 and resided principally in Brussels, devoting himself to literature. Having taken an active part in supporting the pretensions of King Leopold to the throne of Belgium, he was, at that monarch's special request, appointed in 1839 British consul at Boston. He held this office until 1853, when he accepted an office in the queen's household. His works include a pamphlet on the "Boundary Question between Great Britain and the United States" (1842); "Civilized America," a splenetic attack on American society and institutions (2 vols., London, 1859); "The Woman of Color"; and "England and the Disrupted States of America" (1861).

GRAU, Miguel (graouw), Peruvian naval officer, b. in Piura in June, 1834; d. at sea, 8 Oct., 1879. He shipped on board a merchant vessel at the age of ten years, and, after spending a short time at the naval school of Callao, became, in 1852, a midshipman in the Peruvian navy. He joined in the revolt of 1856 against the government of Castilla, and, on its suppression in 1858, returned to the merchant service. He re-entered the navy in 1860, was given command of the "Lersundi," and in 1865, when the war with Spain began, had reached the rank of captain. He took a distinguished part in the combat of Abtao in October, and on 2 May, 1866, participated in the defence of Callao against the Spanish bombardment, in command of the monitor "Manco Capac." He afterward took command of the turret-ship "Huascar." In 1875 he was a deputy to congress, and a supporter of the government of Manuel Pardo. He was appointed director of the naval academy, and when the war against Chili began, 5 April, 1879, held the rank of rear-admiral. He at once joined the fleet, and took command of his old ship, the "Huascar," and of the small Peruvian fleet. On 21 May he attacked two small Chilian vessels off Iquique with the "Huascar" and "Independencia," and sank one of them, but the "Independencia" was disabled by the other. As this loss left the Peruvian fleet still more inferior to the Chilian than before, Grau received orders to avoid an engagement with the Chilian iron-clads, and, owing to his superiority in speed, made a successful cruise along the coast, seriously harassing the enemy. At daybreak of 23 July, the "Huascar" and "Unión" captured off Antofagasta the powerful Chilian transport-steamer "Rimac," with a cavalry regiment of 300 on board. His successful depredations on the coast caused the Chilian government to strain every nerve for the capture of the "Huascar." On 8 Oct., in thick, foggy weather, while the Peruvian vessels were cruising near Antofagasta, Grau was surprised and forced to a combat by the Chilian fleet. Ordering the "Unión" to part company, and try by her superior speed to escape, he resolved to fight his way through the enemy. Half an hour after the beginning of the contest, a shell from the "Cochrane" burst inside the "Huascar's" tower, killing the admiral and his signal-officer. Shortly afterward the other division of the Chilian fleet came up, and, after an hour and a half of fighting, the flag of the "Huascar" was lowered, 64 men out of 193 being killed. After the war, the Peruvian nation erected a monument to Grau in Lima.

GRAVEL, Elphige, Canadian R. C. bishop, b. in St. Antoine, Rivière Chambly, Quebec, 12 Oct., 1838. He was educated at St. Hyacinthe and Montreal colleges, and has been a professor of rhetoric and philosophy. He became parish priest of Bedford in 1873, of St. Hyacinthe in 1880, and canon of that place in the same year. In 1885 he was consecrated first bishop of Nicolet.

GRAVES, Thomas, naval officer, b. in Ratcliffe, England, 6 June, 1605; d. in Charlestown, Mass., 31 July, 1653. From 1632 till 1635 he was master of several ships sailing between England and this country. On 7 Oct., 1639, he was admitted to the church in Charlestown with his wife Catherine Coytmore. In 1643 he was master of "The Tryal," which was the first ship ever built in Boston. As a reward for his capture of a Dutch privateer in the English Channel, during Cromwell's protectorate, he was appointed to command a ship-of-war and made a rear-admiral. He was presented with a silver cup by the owners of his ship.

GRAVES, William Jordan, lawyer, b. in Newcastle, Ky., in 1805; d. in Louisville, Ky., 27 Sept., 1848. He received an academic education, studied law, and was admitted to the bar. He was a member of the state house of representatives in 1834, and served in congress from 1835 till 1841, having been chosen as a Whig. During his term of office he fought a duel with rifles, on 24 Feb., 1838, at Bladensburg, Md., near Washington, with Jonathan Cilley, a representative from Maine, in which the latter was killed. He was re-elected to the legislature of Kentucky in 1843, representing Jefferson county. In 1848 he was a presidential elector.

GRAVES, Zwinglius Calvin, educator, b. in Chester, Vt., in 1816. After attending various academies he went to Ohio, and at the age of twenty-one opened a school in Ashtabula. He was soon elected principal of Kingsville academy, in the same state, where he remained until 1850. In this year he was called to take charge of the Mary Sharpe female college, Winchester, Tenn., which was founded with the aim of making its curriculum substantially that of Brown University.—His wife, **Adelia Cleopatra,** author, b. in Kingsville, Ashtabula co., Ohio, 17 March, 1821, is the daughter of Dr. D. M. Spencer, whose brother, P. R. Spencer, was the originator of the Spencerian system of penmanship. She was educated at the Jefferson and Kingsville academies, and after her graduation in 1841 became teacher of Latin and English composition in the latter institution, where she remained until 1847. In 1841 she married Mr. Graves, and after his removal to Mary Sharpe college served there as matron and professor of rhetoric until 1881, and since that date has been secretary and treasurer. For many years she has been an invalid. In 1856–'9 she edited the "Southern Child's Book." In 1869 she wrote children's stories for the Baptist Sunday-school union under the pen-name of "Aunt Alice." These include a "Life of Columbus," two volumes of "Poems for Children," and she also wrote "The New Testament Catechism of Questions and Answers in Rhyme" under her own signature. Her other publications are "Jephthah's Daughter," an illustrated drama for the use of schools (Memphis, 1867); "Seclusaval, or the Arts of Romanism" (Memphis, 1869); and "Woman in Sacred Song" (Boston, 1885).—Zwinglius Calvin's brother, **James Robinson,** clergyman, b. in Chester, Vt., 10 April, 1820, became a teacher at the age of nineteen, first in Vermont and subsequently in Kentucky, whither he removed on account of impaired health. While teaching he pursued the studies of a college

course without any assistance. In Kentucky he was ordained to the Baptist ministry. In 1845 he opened an academy in Nashville, Tenn., and in the same year became pastor of the 2d Baptist church in that city. In the following year he was made editor of the "Tennessee Baptist." In 1848 he originated the "Southwestern Publishing House," Nashville, Tenn. He has been widely known as a vigorous controversialist, particularly in support of the Baptist high church views that have received the name of "Old Landmarkism." His published works are "The Great Iron Wheel" (Nashville, Tenn., 1854); "The Little Iron Wheel" (1856); "The Intermediate State" (Memphis, 1869); "Old Landmarkism (1878); "The Intercommunion of Churches" (1879); "The Redemptive Work of Christ" (1883); "The New Great Iron Wheel" (1884); "Denominational Sermons" (1885); and "The Parables and Prophecies of Christ" (1887).

GRAVIER, James, missionary, b. in France; d. in Mobile, Ala., in 1708. He was a member of the Society of Jesus, and was sent as a missionary to Canada, but it is uncertain at what time. He was stationed at Sillery in the autumn of 1684 and the ensuing spring, but must have gone west soon afterward, as he was on the Illinois mission in 1688, and succeeded Allouez about 1690 as superior. He was appointed vicar-general by Bishop de Saint Vallier in the following year. He has left a journal of his mission extending from 20 March, 1693, to 15 Feb., 1694. He built a chapel outside the French fort for the convenience of the Miami Indians on St. Joseph's river, among whom he labored with great success. He also visited the Peorias, but without result. His chief success was with the Kaskaskias, whose chief he converted, and of whom he baptized 206 in less than eight months. He also planned missions to the Cahokia and Tamarois bands of indians, which he subsequently carried out, as well as to the Osages and Missouris, who sent ambassadors to him. In 1696 he went to Montreal, but soon returned and devoted himself to the more distant missions. In 1705 some of the Illinois, instigated by their medicine-men, attacked him, and he was severely wounded. The missionary proceeded to Paris for treatment, but obtained little relief. He then went to Louisiana, and landed at Isle Massacre, 12 Feb., 1708. His wound, aggravated by his long voyage, proved fatal soon afterward. Father Gravier was the first to analyze the Illinois language, and compile its grammar, which subsequent missionaries brought to perfection.

GRAY, Alfred G., naval officer, b. in Norfolk, Va., in 1818; d. in Brooklyn, N. Y., 10 Nov., 1876. He went to sea at the age of seventeen, and became a captain when twenty-seven. He was appointed lieutenant in the Texan service in 1843, when he commanded the sloop-of-war "Austin" in the engagement off Campeachy with the Mexican war steamships "Regenerador," "Guadalupe," and "Montezuma." During the civil war he was for three years captain of the army transport "McClellan" and other vessels. In 1865 he entered the service of the Pacific mail steamship company, by whom he was made commodore in 1874.

GRAY, Alonzo, educator, b. in Townsend, Vt., 21 Feb., 1808; d. in Brooklyn, N. Y., 10 March, 1860. He was graduated at Amherst in 1834, and at Andover theological seminary in 1838. Meanwhile he had become professor of natural science in Phillips Andover academy, where he remained until 1843, after which, in 1844–'5, he was professor of chemistry in Marietta college. In 1845 he became a teacher in the Brooklyn heights female academy, and six years later founded the Brooklyn heights female seminary, of which he was principal until his death. He published "Elements of Chemistry" (Andover, 1841; 40th ed., New York, 1853); "Elements of Scientific and Practical Agriculture" (Andover, 1842); "Elements of Natural Philosophy" (New York, 1851); and, with Charles B. Adams, "Elements of Geology" (1852).

GRAY, Asa, botanist, b. in Paris, Oneida co., N. Y., 18 Nov., 1810. He received his early education in the Clinton grammar-school and in the Fairfield academy, after which he began the study of medicine with Dr. John F. Trowbridge in Bridgewater, N. Y., and was graduated at the College of physicians and surgeons of the western district of New York in 1831. He soon left his practice and began the study of botany with Dr. John Torrey. In 1834 he was appointed botanist to the U. S. exploring expedition sent out under the command of Capt. Charles Wilkes, but, in consequence of the delay of that enterprise, resigned the post in 1837. He was elected professor of botany in the new University of Michigan, but he declined this chair, and accepted in 1842 the Fisher professorship of natural history at Harvard, continuing there till 1873, when he retired from the active duties of his office, but retained charge of the herbarium. Prof. Gray's scientific work began at a time when the old artificial systems of botany were giving way to the natural system, and, with Dr. John Torrey, he was among the first to attempt the classification of species on the natural basis of affinity. His first paper, presented to the New York lyceum of natural history in December, 1834, bears the title "A Notice of Some New, Rare, or Otherwise Interesting Plants from the Northern and Western Portions of the State of New York." Four years later, under the joint authorship of John Torrey and Asa Gray, the first part of the "Flora of North America" appeared. This work was continued in numbers that were published from time to time until the *Compositæ* were finished, when the accumulation of fresh material had so increased that to complete the undertaking would require an appendix greater than the "Flora" itself. In other ways, however, this classification was still carried on. The valuable acquisitions of the U. S. government expeditions were referred to these botanists, and their results are to be found in numerous memoirs published in the government reports, and as separate monographs. The most important of these are "Plantæ Lindheimerianæ," an account of plants collected in western Texas by Ferdinand Lindheimer (Boston, 1845–'50); "Plantæ Fendlerianæ Novi Mexicanæ," a description of plants collected in New Mexico by August Fendler (1849); "Plantæ Wrightianæ Texano-Neo-Mexicanæ," describing the extensive collections made by Charles Wright (Washington, 1852–'3); "Plantæ Thurberianæ" (Boston, 1854); and "Genera Floræ Americæ Boreali-Orientalis Illustrata" (New York, 1848–'50).

Asa Gray

Prof. Gray's herbarium, numbering more than 200,000 specimens, and his library of 2,200 botanical works, were presented to Harvard on the completion, in 1864, of a fire-proof building for their reception. He received the degree of A. M. from Harvard in 1844, and of LL. D. from Hamilton in 1860, and has delivered three courses of lectures in the Lowell institute. In 1874 he received the appointment of regent of the Smithsonian institution, succeeding Louis Agassiz in that office. For ten years, from 1863 till 1873, he was president of the American academy of arts and sciences, and in 1872 was president of the American association for the advancement of science, delivering his retiring address at the Dubuque meeting. Prof. Gray was one of the original members of the National academy of sciences, and has since passed to the grade of honorary membership. Besides his connections with societies in this country, he is either corresponding or honorary member of the Linnean society and the Royal society in London, and of the academies of sciences in Berlin, Munich, Paris, St. Petersburg, Stockholm, and Upsala. Prof. Gray has been a very large contributor to periodical literature, and his separate papers include nearly 200 titles. For many years he has been one of the editors of the "American Journal of Science," and his "Botanical Contributions" have long been published in the "Proceedings of the American Academy of Sciences and Arts." He has also written biographical sketches of many who have achieved eminence in science, and of these the more important American subjects have been Jacob Bigelow, George Engelmann, Joseph Henry, Thomas P. James, John A. Lowell, William B. Sullivant, John Torrey, and Jefferies Wyman. His literary works are "A Free Examination of Darwin's Treatise on the Origin of Species, and of its American Reviewers" (Cambridge, 1861); "Darwinia: Essays and Reviews pertaining to Darwinism" (New York, 1876); and "Natural Science and Religion" (1880). Prof. Gray's series of text-books are used extensively throughout the United States, and have passed through many editions. They include "Elements of Botany" (1836), republished as "Botanical Text-Book" (1853), and now called "Structural and Systematic Botany" (New York, 1858); "Manual of the Botany of the Northern United States" (Cambridge, 1848; 5th ed., New York, 1867); "Lessons in Botany and Vegetable Physiology" (New York, 1857); "Botany for Young People and Common Schools," comprising "How Plants Grow" (1858) and "How Plants Behave" (1872); "Field, Forest, and Garden Botany" (1868), which, with the "Lessons in Botany," have been bound together under the title "School- and Field-Book of Botany" (1875); "Structural Botany or Organography on the Basis of Morphology" (1879), being the first volume of the series called "Gray's Botanical Text-Book"; "Botany of the United States Pacific Exploring Expedition" (Washington, 1854); and "Synoptical Flora of North America" (New York, 1878).

GRAY, David, journalist, b. in Edinburgh, Scotland, 9 Nov., 1836. He emigrated with his father's family to the United States in May, 1849, and was among the early settlers of Marquette county, Wis. Thence he went to Buffalo, N. Y., in 1856, and three years later entered the service of the "Courier" as a reporter. In 1865–'8 he travelled and studied in Europe and the east. Returning to Buffalo the latter year, he became managing editor of the "Courier," and in 1876 its editor-in-chief. In 1882, owing to impaired health, he left journalism, and for two years, with his family, lived abroad. In 1886 he was appointed treasurer and secretary of the board of commissioners of the New York state reservation at Niagara. His writings, both in prose and poetry, largely of an occasional character, and published in numerous journals and magazines, have not been collected.

GRAY, Edgar Harkness, clergyman, b. in Bridport, Vt., 28 Nov., 1815. He was graduated at Waterville college (now Colby university) in 1838, and was ordained as pastor of the Baptist church in Freeport, Me., in 1839. After having ministered in various places he was called in 1863 to the E street Baptist church in Washington, D. C. After the beginning of the 39th congress he was elected chaplain of the U. S. senate, and continued in that office four years. He was one of the four clergymen who officiated at the funeral services of President Lincoln in Washington. The degree of D. D. was conferred upon him in 1864 by the University of Rochester.

GRAY, Elisha, inventor, b. in Barnesville, Ohio, 2 Aug., 1835. He was apprenticed at an early age to a blacksmith, and afterward to a carpenter and boat-builder. On the completion of his time he entered Oberlin college, where he devoted special attention to physical science, meanwhile supporting himself by working at his trade. As a student, he constructed the pieces of apparatus used in the class-room experimentation. In October, 1867, he obtained his first patent for telegraphic apparatus, and since then has received nearly fifty more, most of which relate to the telephone. The remainder have reference to the telegraphic repeater, telegraphic switch, annunciator, and type-printing telegraph. He found when one end of a secondary coil was connected with the zinc lining of a bath-tub, dry at the time, that when he held the other end of the coil in his left hand, and touched the lining of the tub with his right hand, it would glide along the side for a short distance in making contact, giving rise to a sound that had the same pitch and quality as that of the vibrating contact-breaker. This discovery led to the invention of his speaking telephone, for which he filed specifications on 14 Feb., 1876. Its peculiarity is that it reproduces articulate speech by varying the resistance of a battery current. In November, 1874, he filed a caveat, and in January, 1877, received a patent for a multiplex telegraph. His system is "based upon the ability to transmit a number of tones simultaneously over the same wire, and analyze them at the receiving end. So that each tone will be audible on a particular instrument which is tuned to it, but on no other." He transmitted four messages at the same time on one wire between New York and Boston in August, 1875, and a year later he succeeded in sending eight messages in the same way between New York and Philadelphia. In 1874 he visited Europe in order to perfect himself in the study of acoustics. From 1869 till 1873 he was engaged in the manufacture of telegraphic apparatus in Chicago and Cleveland, and since has held the office of electrician to the Western electric manufacturing company. He has received the degree of D. Sc., and has published "Experimental Researches in Electro-Harmonic Telegraphy and Telephony" (New York, 1878).

GRAY, George, b. in Philadelphia, Pa., 26 Oct., 1725; d. in "Whitby Hall," near Philadelphia, in 1800. He was fifth of the name in lineal descent from George Gray, a wealthy gentleman of Barbadoes. He took an active interest in the affairs of the colony, and served in the assembly as delegate from Philadelphia from 1772 until 1775, when he resigned to take his place as member of the com-

mittee of safety. In 1777 he was transferred to the board of war, of which he eventually became chairman, and on which he served until the close of the Revolution. He was the author of the famous "Treason Resolutions" that were reported to the assembly by the committee of which he was chairman. After the Revolution he again represented Philadelphia in the assembly, of which he was chosen speaker. In 1789–'90 he was a member of the Constitutional convention of Pennsylvania.

GRAY, George, senator, b. in New Castle, Del., 4 May, 1840. He was graduated at Princeton in 1859, and, after studying law at Harvard, was admitted to the bar in 1863. He first opened an office in New Castle, but in 1879 removed to Wilmington on being appointed attorney-general of Delaware, which office he filled until March, 1885. He was a delegate to the National Democratic conventions of 1876, 1880, and 1884, and was elected to the U. S. senate to fill the vacancy caused by the appointment of Thomas F. Bayard as secretary of state. He took his seat on 19 March, 1885, and in January, 1887, was re-elected for a full term.

GRAY, George Edward, civil engineer, b. in Verona, N. Y., 12 Sept., 1818. He received his early education in the public schools, and studied civil engineering under Peletiah Rawson. In 1853 he was appointed chief engineer of the New York Central railroad, and held the office till 1865, when he resigned and was appointed consulting engineer of the Central Pacific railroad. He remained connected with this road until 1871, when he was appointed chief engineer of the Southern Pacific railroad of California, but resigned when that road was leased to the Southern Pacific company in 1885. Mr. Gray has also been chief engineer of the Southern Pacific railroad of Arizona, of the Southern Pacific railroad of New Mexico, and directed the location and construction of the Galveston, Harrisburg, and San Antonio railroad from El Paso to San Antonio, Texas. He is a life member of the British institute of civil engineers, a member of the American society of civil engineers, and a life member of the California academy of sciences, and president of its board of directors. Mr. Gray has been appointed (1887) one of the trustees of the university in California founded by Leland Stanford in memory of his son.

GRAY, George Zabriskie, clergyman, b. in New York city, 14 July, 1838. He was graduated at the University of New York in 1858. From 1859 till 1861 he studied for the ministry at the Alexandria seminary. He was ordered deacon by Bishop Horatio Potter, 22 April, 1862, and ordained priest by the same bishop on 22 Jan., 1863. After holding pastorates in Vernon, N. J., Kinderhook, N. Y., and Bergen Point, N. J., he was appointed, in 1876, dean of the Protestant Episcopal theological school in Cambridge, Mass., which place he now occupies (1887). The University of New York gave him the degree of D. D. in 1876. He has published "The Children's Crusade in the Thirteenth Century" (Boston, 1872); "Recognition in the World to Come" (New York, 1875); and "Husband and Wife, or the Theory of Marriage" (Boston, 1885).—His brother, **Albert Zabriskie,** clergyman, b. in New York city, 2 March, 1840, was graduated at the University of New York in 1860, and at the General theological seminary of the Protestant Episcopal church in 1864. During the civil war he served as chaplain of the 4th Massachusetts cavalry. After holding various pastorates, he was elected warden of Racine college, Wis., in 1882, which post he now occupies (1887), and he has been associated with the work of church reform and reunion in Europe undertaken by the Protestant Episcopal church, and was a delegate to the general convention in 1886. His publications are "The Land and the Life, or Sketches and Studies in Palestine" (New York, 1876); "Mexico as it Is" (1878); "Words of the Cross" (1880); and "Jesus Only, and Other Sacred Songs" (1882).

GRAY, Henry Peters, artist, b. in New York city, 23 June, 1819; d. there, 12 Nov., 1877. He entered the studio of Daniel Huntington in 1838, and in the following year went to Europe for study. In 1843 he returned to New York and executed several genre and historical paintings. He made a second trip to Europe in 1846, where he produced several of his most characteristic works, including "Cupid begging his Arrows," "Proserpine and Bacchus," and "Teaching a Child to Pray." He then established himself in New York, and was elected, in 1869, president of the National academy, which place he held until 1871, when he went to Florence, and remained there till 1874. Classical subjects were his favorites, and he was fond of studying the old Venetian masters, especially Titian. During the latter years of his life he devoted his time to the painting of portraits, of which he left more than 250. Among his works are "Wages of War"; "Hagar and the Angel"; "Cleopatra"; "Charity"; "St. Christopher"; "I Fiore di Fiesole"; "Portia and Bassanio"; "Genevieve"; "The Model from Cadore"; "The Immortality of the Soul"; "The Birth of Our Flag"; "Greek Lovers"; "Twilight Musings"; "Normandy Girl"; an illustration of Irving's "Pride of the Village"; and the "Apple of Discord," for which he was commended by the judges at the Centennial exhibition in Philadelphia (1876).

GRAY, Isaac Pusey, governor of Indiana, b. in Chester county, Pa., 18 Oct., 1828. In 1836 he was clerk in a dry-goods store in New Madison, Ohio, and afterward became its proprietor. In 1855 he removed to Union City, Ind., where he engaged in business for three years. At this time he began to practise law, which he had studied at an early age. He served in the civil war as captain in the 4th Indiana cavalry, but was compelled to retire, owing to feeble health. Subsequently he recruited the 147th Indiana infantry. He was at first a Whig, and then a Republican, but since 1871 has acted with the Democratic party. In 1868 he was elected to the state senate, and served four years. He was a delegate to the Liberal Republican convention in 1872, and was elected lieutenant-governor on the Democratic ticket in 1876 and governor in 1884.

GRAY, James, clergyman, b. in Ireland, 25 Dec., 1770; d. in Gettysburg, Pa., 20 Sept., 1824. He was graduated at the University of Glasgow in 1793, studied theology, and was licensed to preach by the presbytery of Monaghan. He came to the United States in 1797, and, after laboring in Washington, N. Y., until 1803, he became pastor of an Associate Reformed church in Philadelphia. He was active in establishing the theological seminary of that denomination in New York city, assisted in the organization of the Philadelphia Bible society in 1808, and was for some time its corresponding secretary. In connection with Dr. S. B. Wylie he opened at this time a classical academy, but retired after several years and went to Baltimore, Md., where he devoted himself to the study of special subjects in theology. For one year he edited the "Theological Review." He published "Mediatorial Reign of the Son of God"; "Dissertation on the Priesthood of Jesus Christ and Melchisedec, together with the Life of Christ" (Hagerstown, Md., 1850); and sermons.

GRAY, John, soldier, b. in Fairfax Court-House, Va., 6 Jan., 1762; d. in Noble county, Ohio, 29 March, 1868. At the age of sixteen he entered the continental army, and served throughout the entire war. He removed to Ohio before it was a state, and remained there until his death. For a few years previous to that event congress had granted him a pension of $500 per annum. He was reputed to be the last surviving soldier of the American Revolution.

GRAY, J. H., Canadian statesman, b. in St. George's, Bermuda, in 1814. He removed to Canada, was admitted to the bar in 1837, and entered parliament in 1850. He became a member of the executive council in 1851, and premier of New Brunswick in 1856. In 1857 he was umpire between Great Britain and the United States under the treaty of Washington, and was royal commissioner on the tenant-right question in Prince Edward Island. He was arbitrator for the Dominion in 1867, was appointed puisne judge of the supreme court of British Columbia in 1872, and was a member of the Canadian Chinese immigration commission in 1884. He is the author of "Confederation," a history (1871).

GRAY, John Perdue, physician, b. in Halfmoon, Centre co., Pa., 6 Aug., 1825; d. in Utica, N. Y., 29 Nov., 1886. He was graduated at Dickinson in 1846, and at the medical department of the University of Pennsylvania in 1848. In 1851 he was appointed third assistant physician to the New York state lunatic asylum in Utica, and in 1853 became acting superintendent. When the Michigan state asylum was projected in that year, he was elected its medical superintendent, and designed the plans for the new institute at Kalamazoo. In 1854 he resigned and became medical superintendent of the Utica asylum, where he spent the rest of his life. He did much to better the condition of the insane in this country, to improve modes of treatment, and to bring the poor insane within reach of the hospitals. Dr. Gray introduced into the asylums of this country the microscopical study of the brain. He was appointed consulting manager of the state asylum for insane criminals at Auburn in 1858, and acted as commissioner and adviser in establishing other asylums in the state. He served as president of the State medical society, and in 1870 of the psychological section of the International medical congress in Philadelphia, where he read a paper on "Mental Hygiene." He was made professor of psychological medicine and jurisprudence in Bellevue hospital medical college in 1874, and in the Albany medical college in 1876, and held these offices until 1882. His services as an expert on insanity were frequently employed in the courts, and he was regarded as good authority on all medical questions relating to life-insurance. His management of the New York state asylum gave that institution a wide reputation. His influence was felt in the state legislation on the subject of insanity, and his papers and reports were valuable contributions to science. In addition to his service in the asylum, he edited for many years the "American Journal of Insanity," of which he took charge in 1854. He took great interest in all public charities, and was active in the establishment of orphan asylums, hospitals, and all societies for the relief of the destitute. On 16 March, 1882, he was shot by Henry Remshaw, a lunatic, and never fully recovered from the effects of the wound. Dr. Gray was a member of numerous medical societies both here and abroad. Hamilton gave him the degree of LL. D. in 1874. He delivered many addresses, including "Homicide in Insanity" (1857); "Thoughts on the Causation of Insanity" (1874); "Mental Hygiene" (1876); "Abstract of the Laws of New York relative to Insanity" (1878); "Heredity" (1884); and "Insanity and Some of its Preventable Causes" (1885). These lectures will shortly be published by his widow.

GRAY, Robert, discoverer, b. in Tiverton, R. I., in 1755; d. in Charleston, S. C., in 1806. He commanded the sloop "Washington," which was fitted out with the ship "Columbia," by merchants of Boston, for the purpose of trading with the natives on the northwest coast. The vessels sailed on 30 Sept., 1787, and carried with them medals for distribution among the Indians, bearing on one side a ship and a sloop under sail with the words "Columbia and Washington, commanded by John Kendrick," and on the reverse, "fitted out at Boston, N. America, for the Pacific ocean by," encircling the names of the six proprietors. He returned in 1790 in the "Columbia" by way of Canton, China, and was the first man to carry the American flag around the globe. Later he made a second voyage, and on 11 May, 1791, discovered the mouth of a great river to which he gave the name "Columbia," after his own vessel. Subsequently he commanded trading vessels from Boston until his death.

GRAY, Solomon S., inventor, b. in Bowdoinham, Me., in 1820. He became a carpenter, and a maker of doors, sashes, and blinds, and perceiving that these could be made more easily by the application of improved machinery devised Gray and Wood's planing machine. He disposed of his interest to his partner in 1861, and turned his attention to the manufacture of paper collars, for which he took out eight distinct patents. He was the inventor of the "molded collar."

GRAY, William, merchant, b. in Lynn, Mass., 27 June, 1750; d. in Boston, Mass., 4 Nov., 1825. He was of humble parentage and was apprenticed to merchants in Salem. He afterward began business for himself, and amassed a fortune, having at one time more than sixty square-rigged ships on the ocean. He was a Democrat, and sympathized with Jefferson during the embargo, notwithstanding the pecuniary injury to his business and its unpopularity in New England. He removed to Boston, became a state senator, and in 1810 was elected lieutenant-governor.—His wife, **Elizabeth Chipman,** b. in Essex county, Mass., in May, 1756; d. in Boston, 24 Sept., 1823, married Mr. Gray in 1782. Although the wife of the richest man in Massachusetts, and probably in New England, she managed her domestic affairs personally. A portion of her time was devoted to the poor, who were the constant recipients of her benefactions.—Their son, **Francis Calley,** lawyer, b. in Salem, Mass., 19 Sept., 1790; d. in Boston, 29 Dec., 1856, was graduated at Harvard in 1809. He studied law with William Prescott, but did not practise his profession. He was private secretary to John Quincy Adams while the latter was minister to Russia, and served frequently in the Massachusetts legislature.

He was president of the Boston athenæum, and a fellow of Harvard in 1826–'36. In 1841 the degree of LL. D. was conferred on him by Harvard. He left a collection of 3,000 rare engravings, with $16,000 for keeping it in order and publishing a catalogue. He also left $50,000 for the establishment and maintenance of a museum of comparative zoölogy. The bestowal of these bequests was left to the option of his nephew, William, and the latter presented them to Harvard in 1858, and also contributed $25,000 for the purchase of books for the college library. The sum for the establishment of a museum was supplemented by legislative appropriation and private subscription, and a building erected, which was dedicated in November, 1859, and placed in charge of Prof. Louis Agassiz. Mr. F. C. Gray published numerous orations and addresses, and a work on "Prison Discipline" (Boston, 1847). He discovered a manuscript copy of the Massachusetts "Body of Liberties" of 1641, which was published in the "Collections" of the State historical society (3d series, vol. viii.). Gray's Hall, one of the buildings of Harvard, was named for these benefactors of the college.—Another son, **John Chipman,** lawyer, b. in Salem, Mass., 29 Dec., 1793; d. in Boston, Mass., 3 March, 1881, was graduated at Harvard in 1811. He never practised law, but took an active interest and part in public affairs, serving many years in the common council of Boston, and in each branch of the Massachusetts legislature, and in the governor's council. He delivered an oration for the Phi Beta Kappa society in 1821, and address before the Massachusetts horticultural society, and a number of addresses before the city authorities.—**Horace,** grandson of William, jurist, b. in Boston, Mass., 1828, was graduated at Harvard in 1845, and at the law-school in 1849. He was admitted to the bar in 1851. In 1854 he was appointed reporter of the Massachusetts supreme court, and served for seven years. On 23 Aug., 1864, he became associate justice of the court, which office he held till he was appointed its chief justice on 5 Sept., 1873. In 1882 he was made associate justice of the U. S. supreme court, which office he now fills (1887).

GRAYDON, Alexander, author, b. in Bristol, Pa., 10 April, 1752; d. in Philadelphia, Pa., 2 May, 1818. He was the son of Col. Alexander Graydon of the Provincial army of Pennsylvania. He was educated in Philadelphia, and lived with his mother, at whose residence he met some of the notable people of the time. Mr. Graydon acquired a knowledge of law, but in 1775 received the appointment of captain from congress, and raised recruits for the army. He served in the battle of Long Island, and was taken prisoner in the subsequent action on Harlem heights. For a time he was confined in New York and then in Flatbush, but afterward was released on parole. He then passed through the American camp in Morristown, and then went to Reading, Pa. He was exchanged in 1778, but did not again join the army. He received the appointment of prothonotary of Dauphin county, Pa., and, settling in Harrisburg, held that office until a change of administration caused his removal in 1799. Subsequently, until 1816, when he removed to Philadelphia, he resided near Harrisburg. Mr. Graydon was a contributor to literary and political journals, and, under the title of "Notes of a Desultory Reader," furnished in 1813–'14 a series of papers to the Philadelphia "Portfolio," which included comment on the classics, and English and French literature. He published "Memoirs of a Life, chiefly passed in Pennsylvania, within the Last Sixty Years; with Occasional Remarks upon the General Occurrences, Character, and Spirit of that Eventful Period" (Harrisburg, 1811; re-printed in London; Edinburgh, 1822; Philadelphia, 1846).—His brother, **William,** lawyer, b. near Bristol, Pa., 4 Sept., 1759; d. in Harrisburg, Pa., 13 Oct., 1840. He was educated in Philadelphia, and studied law there. On the organization of the county of Dauphin, he settled in Harrisburg, and began the practice of his profession, being admitted to the bar in 1786. He was commissioned the first notary public in September, 1791, and was a leader in the borough during the "Mill-dam troubles" of 1794–'5. For many years he was a member of the town-council, becoming its president, and subsequently was one of the burgesses. He published a "Digest of the Laws of the United States" (Harrisburg and London, 1803); "Appendix" (1813); "Justice and Constable's Assistant" (Philadelphia, 1820); and "Forms of Conveyancing and of Practice in the Various Courts and Public Offices" (1845).

GRAYSON, John Breckenridge, soldier, b. in Kentucky in 1807; d. in Florida in 1862. He was graduated at the U. S. military academy in 1826, serving in the artillery-school for practice at Fortress Monroe till 4 June, 1828, and was then on topographical duty till 29 March, 1832. He was on duty in various forts and garrisons until 1835, became 1st lieutenant, 30 April, 1834, served in the Seminole war in 1835–'6, and on commissary duty at New Orleans in 1836–'47. He was promoted to a captaincy, 11 Dec., 1838, and served in the Mexican war in 1847–'8, as chief of commissariat of the army under Gen. Scott. He was at Vera Cruz, Cerro Gordo, Churubusco, where he was brevetted major, Molino del Rey, Chapultepec, where he was brevetted lieutenant-colonel, and at the assault and capture of the city of Mexico. On his return to the United States he was assigned to commissary duty at Detroit, Mich., was promoted major, 21 Oct., 1852, and made chief of the commissariat of the department of New Mexico till 1861. He resigned his commission on 1 July, 1861, and joined the Confederate army.

GRAYSON, William, senator, b. in Prince William county, Va.; d. in Dumfries, Md., 12 March, 1790. He was graduated at the University of Oxford, England, and studied law at the Temple in London. He then returned to the colonies, settled in Dumfries, Md., and entered on the practice of his profession. He was appointed aide-de-camp to Washington, 24 Aug., 1776, became colonel of a Virginia regiment on 1 Jan. following, and distinguished himself at the battle of Monmouth in 1778. He was a commissioner on the board of war in 1780–'1; a commissioner to treat with Sir William Howe respecting prisoners while the army was at Valley Forge; a member of the Continental congress in 1784–'7; a member of the Virginia convention of 1788 on the adoption of the Federal constitution, and was one of the minority who opposed the ratification. He was one of the senators from Virginia to the 1st congress, taking his seat on 21 May, 1789, and serving until his death.—His son, **William J.,** statesman, b. in Beaufort, S. C., in November, 1788; d. in Newbern, 4 Oct., 1863, was graduated at the College of Charleston, S. C., in 1809, and bred to the legal profession. Entering upon its practice at Beaufort, he became a commissioner in equity of South Carolina, a member of the state legislature in 1813, and a senator in 1831. He opposed the tariff act in 1831, but was not disposed to push the collision to the extreme of civil war. He served in congress from 2

Dec., 1833, till 3 March, 1837, and in 1841 was appointed collector of customs at Charleston. In 1843 he retired to his plantation. During the secession agitation of 1850 he published a "Letter to Gov. Seabrook," deprecating disunion, and pointing out the evils that would follow it. He died of an illness following on a paralytic stroke. He was a frequent contributor to the "Southern Review," and also published "The Hireling and Slave," a poem (Charleston, S. C., 1854); "Chicora and Other Poems"; "The Country," a poem; "The Life of James L. Petigru" (New York, 1866); and is supposed to have been the author of a narrative poem entitled "Marion."

GRAYSON, William, statesman, b. in Maryland in 1786; d. in Queen Anne county, Md., 9 July, 1868. He was a planter in his native state, at an early period identified himself with the Democratic party, and became one of its leaders. He served with distinction for several years in both houses of the general assembly in Maryland, and took an active part in the struggle to obtain a new and more liberal constitution for the state, which began in 1836, and successfully terminated in 1838. Gratitude to Mr. Grayson induced his constituents to nominate him for governor, and he was elected, serving from 1838 to 1841. On the expiration of his term of service he retired to private life.

GREATHOUSE, Lucien, soldier, b. in Carlinsville, Ill., in 1843; d. near Atlanta, Ga., 21 June, 1864. He was graduated at the Illinois Wesleyan university, and studied law. At the beginning of the civil war he volunteered as a private, and, after passing through every intermediate grade, was commissioned colonel of the 48th Illinois. His regiment bore a conspicuous part in the movements of the Army of the Tennessee.

GREATON, John, soldier, b. in Roxbury, Mass., 10 March, 1741; d. there, 16 Dec., 1783. Before the war he was an inn-keeper and officer of militia in Roxbury. On 12 July, 1775, he was appointed colonel of the 24th regiment, and in October following colonel of the 36th, and afterward colonel of the 3d Massachusetts, on the continental establishment. During the siege of Boston he led an expedition which destroyed the buildings on Long Island in Boston harbor. On 15 April, 1776, he was ordered to Canada, in December joined Washington in New Jersey, and was afterward transferred to Heath's division at West Point. Congress made him a brigadier-general, 7 Jan., 1783.

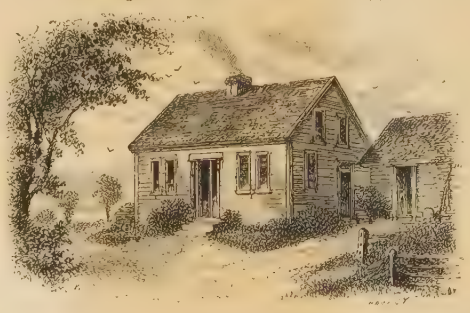
GREATOREX, Henry Wellington, musician, b. in Burton-on-Trent, England, in 1816; d. in Charleston, S. C., in September, 1858. He received a thorough musical education from his father, who was for many years organist of Westminster Abbey, and conductor of the London "concerts of ancient music." He came to this country in 1839, settled in New York city as a teacher of music and organist of Calvary church, and frequently sang in concerts and oratorios. For some years he was organist and conductor of the choir at St. Paul's chapel. Greatorex did much to advance the standard of sacred music in the days when country singing-school teachers imposed their trivial melodies and the convivial measures of foreign composers on the texts of our hymn-books. He published a "Collection of Psalm and Hymn Tunes, Chants, Anthems, and Sentences" (Boston, 1851). — His wife, **Eliza,** artist, b. in Manor Hamilton, Ireland, 25 Dec., 1819, was the daughter of Rev. James Calcott Pratt, and came to New York in 1840, where in 1849 she married Mr. Greatorex. Subsequently she studied art with William H. Witherspoon and James Hart in New York, with Emile Lambinet in Paris, and also at the Pinakothek in Munich. During 1879 she studied etching with C. Henri Toussaint. In 1857 she visited England, and spent 1861–'2 in Paris. She was also abroad in 1870–'3, visiting Nuremberg and Ober-Ammergau, Germany, and various parts of Italy. In 1868 she was elected an associate of the National academy, being the first woman who received that recognition, and she is also the only woman who is a member of the Artists' fund society of New York. Mrs. Greatorex has acquired reputation by her pen-and-ink sketches, many of which have appeared in book-form, notably "The Homes of Ober-Ammergau" (Munich, 1872); "Summer Etchings in Colorado" (New York, 1873); "Etchings in Nuremberg" (1875); and "Old New York from the Battery to the Bloomingdale" (1876), the text of which was prepared by her sister, Mrs. Matilda P. Despard. Eighteen of the sketches illustrative of New York were exhibited at the Centennial exhibition in Philadelphia in 1876. Her large pen-drawing of "Durer's House in Nuremberg" is in the Vatican, Rome. Among her paintings are "Bloomingdale" (1868); "Chateau of Madame Oliffe" (1869); "Bloomingdale Church," painted on a panel taken from the North Dutch church, Fulton street; "St. Paul's Church" and "The North Dutch Church," each painted on panels taken from these churches (1876); "Normandy" (1882); and "The Home of Louis Philippe in Bloomingdale, N. Y." (1884). — Their daughter, **Kathleen Honora,** artist, b. in Hoboken, N. J., 10 Sept., 1851, has studied art in New York, Rome, and Munich. She has devoted herself to decorative work and book illustration, but latterly has won success as a painter, obtaining honorable mention for her work in the Paris salon of 1886. Many of her paintings have been flower-pieces, and she has exhibited "The Last Bit of Autumn" (1875); "Goethe's Fountain, Frankfort" (1876); panels with "Thistles" and "Corn" (1877); and "Hollyhocks" (1883). — Another daughter, **Elizabeth Eleanor,** artist, b. in New York, 26 May, 1854, has studied art in the National academy of design and at the Art students' league in New York, in Paris with Carolus Duran, in Munich, and in Italy. Like her sister, she has decorated china, and illustrated books, but now gives her chief attention to painting. She has exhibited at the National academy "The Bath" (1884), and "Color that Burns as if no Frost could Tame" (1885).

GREBLE, John Trout, soldier, b. in Philadelphia, 19 Jan., 1834; killed in the battle of Big Bethel, Va., 10 June, 1861. He was graduated at the U. S. military academy in 1854, assigned to the 2d artillery, and stationed at Newport, R. I. In September of that year he was made 2d lieutenant and sent to Tampa, Fla., where he served in the Indian troubles for two years. He was compelled, in consequence of a severe fever, to return home on sick leave, but in the beginning of 1856 resumed his duties, acting part of the time as quartermaster and commissary till December, 1856, when he was appointed acting assistant professor of geography, history, and ethics in the military academy, where he remained till 24 Sept., 1860. He was promoted 1st lieutenant on 3 March, 1857, detailed for active duty at Fort Monroe in March, 1861, and rendered efficient service in preventing its seizure. On 26 May, 1861, he was sent to Newport News as master of ordnance, superintended the fortifications of that point, and trained the volunteers to artillery practice. When the disastrous expedition to Big Bethel was planned, he was unexpectedly detailed to accompany it with two

guns, though in his own judgment it was ill-advised and would probably prove fatal to him. When the National troops were repelled, by his admirable management of the guns he protected them from pursuit and destruction. Just at the close of the action, when he had given the orders to withdraw his guns from the field, he was struck by a rifle-ball on the right temple and instantly killed. For his bravery in the two days' action he was brevetted captain, major, and lieutenant-colonel, on the day of his death.

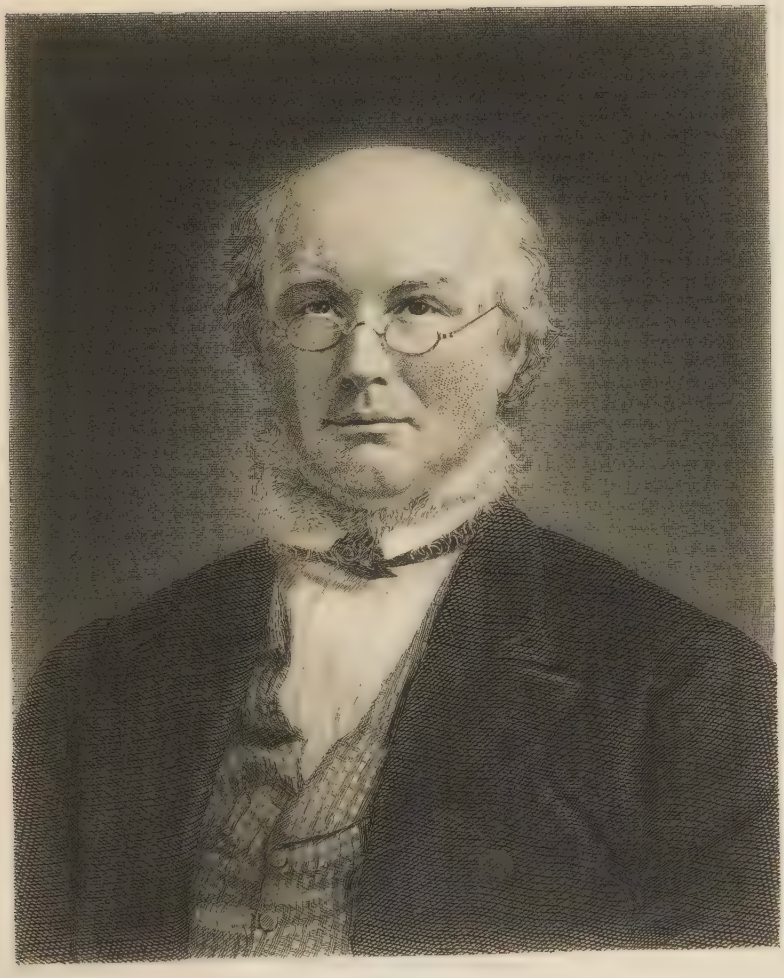
GREELEY, Horace, journalist, b. in Amherst, N. H., 3 Feb., 1811; d. in Pleasantville, near New York city, 29 Nov., 1872. His birthplace is shown in the accompanying engraving. On both sides his ancestors were of Scotch-Irish origin, but had been settled in New England for some generations. His father, Zaccheus Greeley, was a small farmer, always poor, and, by the time Horace was ten years old, a bankrupt and a fugitive from the state, to escape arrest for debt. Horace was the third child, four followed him, and when the little homestead of fifty acres of stony land at Amherst was lost and his father became a day-laborer at West Haven, Vt., the united exertions of all that were able to work brought the family only a hard and bare subsistence. Horace had been a precocious child, feeble, and not fond of sports, but with a strong bent to books. He could read before he could talk plainly, when he was not yet three years old, and he was soon after the acknowledged chief in the frequent contests of the village spelling-match. He received only a common-school education, and after his sixth year had schooling only in winter, laboring at other times in the field with his father and brothers. When six years old he declared he would be a printer, and at eleven he tried to be apprenticed in the village office. He was rejected then on account of his youth, but tried again, three years later, at East Poultney, Vt., in the office of the "Northern Spectator," and was accepted as an apprentice for five years, to be boarded and lodged, and, after six months, to be paid at the rate of $40 a year. He learned the business rapidly, became an accurate compositor, gained the warm regard of his employer and of the whole village, showed a special aptitude for politics and political statistics, rose to be the neighborhood oracle on disputed points, took a leading part in the village debating-society, and was intrusted with a portion of the editorial work on the paper. Meantime he spent next to nothing, dressed in the cheapest way, went without a coat in summer and without an overcoat in winter, was laughed at as "gawky" and "stingy," and sent almost every cent of his forty dollars a year to his father. At last, in June, 1830, the paper was suspended, and young Greeley, then in his twentieth year, was released from his apprenticeship, and turned out upon the world as a "tramping jour printer." Fourteen months of such experience sufficed. He visited his father, who had now removed to the "new country" near Erie, Pa., worked with him on the farm when he could not find employment in country printing-offices, sent home most of his earnings, when he could, and at last decided to seek his fortune in New York. With his wardrobe in a bundle, slung over his shoulder by a stick, he set out on foot through the woods, walked to Buffalo, thence made his way, partly on canal-boats, partly by walking the tow-path, to Albany, and then down the Hudson on a tug-boat. With $10 in his pocket, and his stick and bundle still over his shoulder, on 18 Aug., 1831, he entered the city in which he was to be recognized as the first of American journalists. He wandered for days from one printing-office to another vainly searching for work. His grotesque appearance was against him; nobody supposed he could be a competent printer, and most thought him a runaway apprentice. At last an Irishman at the cheap boarding-house he had found told him of an office where a compositor was needed; a Vermont printer interceded for him, when he was about to be rejected on his appearance, and at last he was taken on trial for the day. The matter assigned him had been abandoned by other printers because of its uncommon difficulty. At night his was found the best day's work that anybody had yet done, and his position was secure.

He worked as a journeyman printer in New York for fourteen months, sometimes in job-offices, for a few days each in the offices of the "Evening Post" and the "Commercial Advertiser," longer in that of the "Spirit of the Times," making friends always with the steady men he encountered, and saving money. Finally, in January, 1833, he took part in the first effort to establish a penny paper in New York. His partner was Francis V. Story, a fellow-printer; they had $150 between them, and on this capital and a small lot of type bought



on credit from George Bruce, on his faith in Greeley's honest face and talk, they took the contract for printing the "Morning Post." It failed in three weeks, but they had only lost about one third of their capital, and still had their type. They had therefore become master job-printers, and Greeley never worked again as a journeyman. They got a "Bank-note Reporter" to print, which brought them in about $15 a week, and a little tri-weekly paper, "The Constitutionalist," which was the lottery organ. Its columns regularly contained the following card: "Greeley and Story, No. 54 Liberty street, New York, respectfully solicit the patronage of the public to their business of letter-press-printing, particularly lottery-printing, such as schemes, periodicals, and so forth, which will be executed on favorable terms."

Mr. Greeley had renewed his habit of writing for the papers on which he was employed as a compositor. He was thus a considerable contributor to the "Spirit of the Times," and now, by an article contributed to the "Constitutionalist," defending the lotteries against a popular feeling then recently aroused, he attracted the attention of Dudley S. Gregory, of Jersey City, the agent of a great lottery association, whose friendship soon became helpful and was long-continued. His partner, Story, died after seven months, and his brother-in-law, Jonas Winchester, was taken into the partnership instead. The firm prospered, and by 1834 Mr. Greeley again began to think of editorship. The firm now considered itself worth $3,000. With this capital and the brains of the senior partner, the "New Yorker," the best literary weekly then



Horace Greeley.

in America, was founded. Shortly before its appearance James Gordon Bennett visited Mr. Greeley and proposed to unite with him in establishing a new paper to be called the "New York Herald." In declining, Mr. Greeley recommended another partner, who accepted and continued the partnership with Bennett until the "Herald" office was burned, when he retired. The "New Yorker" appeared on 22 March, 1834, sold one hundred copies of its first number, and for three months scarcely increased its circulation from this point over one hundred copies a week. By September, however, it had risen to 2,500. At the end of a year it was 4,500, at the end of the second year 7,000, and of the third 9,500. It was steadily popular with the press and people, and steadily unsuccessful pecuniarily. The first year showed a loss of $3,000, the second year of $2,000 more, and the third year of a further $2,000. Mr. Greeley became widely known and respected as its editor, was able to add to his income by furnishing editorials to the "Daily Whig" and other journals, and within four years had attained such prominence that the tow-headed printer who was mistaken for a runaway apprentice and dismissed from the "Evening Post" office, because the proprietors wished to have "at least decent *looking* men at the cases," was selected by William H. Seward and Thurlow Weed as the best man available for the conduct of a campaign paper, which they desired to publish at Albany, to be called the "Jeffersonian." He continued his work on the "New Yorker," but went back and forth between New York and Albany each week. The "Jeffersonian," for a campaign paper, was unusually quiet, calm, and instructive; but it seems to have given the Whig central committee satisfaction, and it still further brought its editor to the notice of the press and of influential men throughout the state. The "Jeffersonian" lasted until the spring of 1839, and Mr. Greeley was paid a salary of $1,000 for conducting it. A few months later the country entered upon the extraordinary popular excitements attending the presidential canvass of 1840, and when Mr. Greeley, prompt to seize the opportunity, issued simultaneously at New York and Albany, under the firm-name of "H. Greeley & Co.," the first number of a new campaign paper called the "Log Cabin," it sprang at once into a remarkable circulation; 20,000 copies of the first issue were printed, and this was thought to be an extravagant supply; but it was speedily exhausted. Other editions were called for, and finally, the type having been distributed, the number had to be reset, and in all 48,000 copies were sold. In a few weeks 60,000 subscriptions had been received, and the advance did not cease until the weekly issue had risen to between 80,000 and 90,000 copies—a circulation then absolutely unprecedented. The "Log Cabin" was a vivacious political journal, much more aggressive than the "Jeffersonian" had been, and displaying many of the personal peculiarities of its editor, his quaintness, his homely common sense, and an extraordinary capacity for compact and pungent statement. It printed rough caricatures of Van Buren and other Democrats, gave a good deal of campaign poetry, with music attached, and yet made room for lectures upon the "Elevation of the Laboring Classes." In all the heat and fury of that turbulent campaign its editor set in one respect an example of moderation not always followed in contests of a much later date. In answer to a correspondent he said flatly: "Articles assailing the personal character of Mr. Van Buren or any of his supporters cannot be published in the 'Log Cabin.'" Meantime, Mr. Greeley was widely consulted, was appointed on campaign committees, asked to make speeches, and called hither and thither to aid in adjusting political differences. He had become a person of influence and a political factor. He continued his paper for one week after the term promised, in order to send to his readers a complete account of the victory, the election of Gen. Harrison as president, with as full returns of the vote as possible. After an interval of a few weeks it was resumed as a family political paper, and continued until it was able, on 3 April, 1841, to announce that "on Saturday, April 10th instant, the subscriber will publish the first number of a new morning journal of politics, literature, and general intelligence. 'The Tribune,' as its name imports, will labor to advance the interests of the people and to promote their moral, social, and political well-being. The immoral and degrading police reports, advertisements, and other matter which have been allowed to disgrace the columns of our leading penny papers will be carefully excluded from this, and no exertion spared to render it worthy of the hearty approval of the virtuous and refined, and a welcome visitant at the family fireside. Horace Greeley, 30 Ann street."

Until this time Mr. Greeley had acquired great reputation, but no money. In spite of the brilliant success of the "Log Cabin," and the general esteem for the "New Yorker," neither had ever been profitable, and their editor, always talked of as "able, but queer," began also to be recognized as lacking in business qualifications. He gave credit profusely, loaned money when he had it to almost any applicant, made his paper sometimes too good for the popular demand, and had no faculty for advertising his own wares. Once, when admitting that his paper was not profitable, he frankly said: "Since the 'New Yorker' was first issued, seven copartners in its publication have successively withdrawn from the concern, generally, we regret to say, without having improved their fortunes by the connection, and most of them with the conviction that the work, however valuable, was not calculated to prove lucrative to its proprietors. 'You don't humbug enough' has been the complaint of more than one of our retiring associates; 'You ought to make more noise, and vaunt your own merits. The world will never believe you print a good paper unless you tell them so.' Our course has not been changed by these representations."

Mr. Greeley, although eccentric enough in his appearance and habits, had thus far developed but few eccentricities of thought. He was temperate almost to the verge of total abstinence, partly, no doubt, from taste, partly also, perhaps, from his observations on the intemperate habits common about his father's early home in New Hampshire. He was opposed to slavery, but rather deprecated northern interference: approved of the colonization society, and opposed anti-slavery societies at the north. He believed prohibition impracticable, but was warmly in favor of high license. He was vehemently in favor of a protective tariff, and always, as he expressed it, "an advocate of the interests of unassuming industry." He had been captivated by vegetarian notions, and was for a short time an inmate of a Grahamite boarding-house. There he met Miss Cheney, a young teacher from Connecticut, who was making a short stay in New York, on her way to North Carolina. She was a highly nervous, excitable person, full of ideas, prone to "isms," and destined to have a strong and not always helpful influence on

his life. He continued the acquaintance by correspondence, became engaged, married her in North Carolina, and made a short wedding-journey, of which his first visit to Washington was the principal feature. About the same period he contributed a good many verses to the "Log Cabin"—"Historic Pencillings," "Nero's Tomb," "Fantasies," "On the Death of William Wirt," etc. They are not destitute of poetic feeling, but in later years he was never glad to have them recalled. In 1859, learning that Robert Bonner, of the "New York Ledger," proposed to include them among representative poems in a volume to be made up from authors not appearing in Charles A. Dana's "Household Book of Poetry," Mr. Greeley wrote: "Mr. Bonner, be good enough—you must—to exclude me from your new poetic Pantheon. I have no business therein, no right and no desire to be installed there. I am no poet, never was (in expression), and never shall be. True, I wrote some verses in my callow days, as I suppose most persons who can make intelligible pen-marks have done; but I was never a poet, even in the mists of deluding fancy. . . . Within the last ten years I have been accused of all possible and some impossible offences against good taste, good morals, and the common weal; I have been branded aristocrat, communist, infidel, hypocrite, demagogue, disunionist, traitor, corruptionist, and so forth, and so forth, but cannot remember that any one has flung in my face my youthful transgressions in the way of rhyme. . . . Let the dead rest! and let me enjoy the reputation, which I covet and deserve, of knowing poetry from prose, which the ruthless resurrection of my verses would subvert, since the unobserving majority would blindly infer that *I* considered them poetry."

In establishing the "Tribune," Mr. Greeley had considerable reputation, wide acquaintance among newspaper men and practical politicians, one thousand dollars in money borrowed from James Coggeshall, and the promise from another source of a thousand more, which was never realized. He had employed, some time before, at $8 a week, a young man fresh from the University of Vermont. This young man, Henry J. Raymond, now became his chief assistant in the conduct of the new paper, and gradually a considerable force of people of similar fitness gathered about him, the paper always having an attraction for men of intellect and scholarly tastes. In the early years it thus enjoyed the services of George William Curtis, William Henry Fry, Charles A. Dana, Margaret Fuller, Albert Brisbane, Bayard Taylor, Count Gurowski, and others. Of its first number, 5,000 copies were printed, and, as Mr. Greeley said, "with difficulty given away." About 600 subscribers had been procured through the exertions of his personal and political friends. Being published at first at one cent a copy, it was regarded as a serious rival by the cheap papers, and the "Sun" especially undertook to interfere with its circulation by forbidding its newsboys to sell the new paper. The public considered this unfair, and the "Tribune" was greatly helped. In four weeks it reached a circulation of 6,000; in four weeks more its circulation had risen to the limit of the press, being between 11,000 and 12,000. Its business management was chaotic, but by July the chances for a permanent success were so clear that Thomas McElrath, a business man of excellent standing, was taken in as an equal partner. A weekly issue was projected, and on 20 Sept. the "New Yorker" and the "Log Cabin" were merged in the first number of "The New York Weekly Tribune," which soon attained considerable circulation and ultimately became a great political and social force in rural communities, particularly in the period of the anti-slavery discussion prior to and during the war for the Union. From this time forward Mr. Greeley's business prosperity was secure, but the "Tribune" might easily have been far more successful from the mere money point of view if its editor had been less outspoken and indifferent to the light in which the New York public might regard his opinions. The controlling influences in the city were then largely favorable to free-trade; but he made the "Tribune" aggressively protectionist. A commercial community was necessarily conservative, but the "Tribune" soon came to be everywhere regarded as radical. New York had close business connections with the south, but the "Tribune" gradually became more and more explicit in its anti-slavery utterances. The prevailing religious faith among the better educated classes was orthodox; Mr. Greeley connected himself almost from the outset with a Universalist church. He aimed always to practise the utmost hospitality toward new ideas and their exponents, so that people soon talked of the "isms" of the "Tribune." Sympathizing profoundly with workingmen, he was led constantly to schemes for bettering their condition, and became interested in the theories of Fourier. Before the "Tribune" was a year old he had discussed the subject of "Fourierism in France" in an article beginning thus: "We have written something, and shall yet write much more, in illustration and advocacy of the great social revolution which our age is destined to commence, in rendering all useful labor at once attractive and honorable, and banishing want and all consequent degradation from the globe. The germ of this revolution is developed in the writings of Charles Fourier." In March, 1842, he began publishing, under a contract with a number of New York Fourierites, one column daily on the first page of the "Tribune" on Fourierite topics, from the pen of Albert Brisbane. The theories here advanced were also occasionally defended in the editorial columns. Mr. Greeley became a subscriber to one or two Fourierite associations, notably that of the "American Phalanx" at Red Bank, N. J., and occasionally addressed public meetings on the subject. When the famous Brook Farm experiment was abandoned, its chief, George Ripley, sought employment on the "Tribune," and was soon its literary editor. Another of its members, Charles A. Dana, became in time the "Tribune's" managing editor. Another, Margaret Fuller, contributed literary work and occasional editorials, and lived in Mr. Greeley's family; and another, George William Curtis, was also employed. In 1846 Henry J. Raymond, who had now, owing to some disagreement, left the "Tribune" and become a leading editor on the "Courier and Enquirer," saw that Fourierism offered an inviting point for attack upon the "Tribune." Mr. Greeley, whose conduct of the paper was always argumentative and pugnacious, responded to some criticism by challenging Mr. Raymond to a thorough discussion of the whole subject, in a series of twelve articles and replies, to be published in full in all the editions of each paper. Mr. Raymond accepted, and made therein his first wide reputation in New York. Mr. Greeley's articles were undoubtedly able, but he was not so adroit a fencer as his opponent, and he had the unpopular side. The discussion left on the public mind the impression that Mr. Raymond was the victor, and the Fourierite movement from that date began its de-

cline in America. Mr. Greeley was always careful to mark his dissent from many of Fourier's propositions. In the discussion Mr. Raymond endeavored to force him into the position that no man can rightfully own land (substantially the doctrine of which Henry George has since been the apostle), but Mr. Greeley indignantly repudiated it. In later years he dwelt upon the principle of association as the only one in Fourier's scheme that particularly attracted him; and in the form of co-operation among working-men this always received his zealous support.

The rappings and alleged spiritual manifestations of the Fox sisters at Rochester early attracted attention in the "Tribune," and were fairly described and discussed without absolute incredulity. In 1848, at Mrs. Greeley's invitation, the Fox sisters spent some time in his family as his guests. He listened attentively to what they said, inquired with interest into details, but hesitated to accept the doctrine of actual spiritual communications, and at any rate failed, he said, to see that any good came of them. Nevertheless, the open-minded readiness that he displayed in investigating this, like any other new subject presented to him, led to his identification for some time in the public mind with the spiritualistic movement, so that as effective a weapon as could be used against the "Tribune" in commercial and conservative New York was to call it a Fourierite and spiritualistic organ. With all his radicalism, however, there were two subjects on which, then and throughout life, he was steadily conservative. He constantly defended the sanctity and permanence of the family relation, and protested against anything in legislation or public practice tending to break down the sanction of the Sabbath as a day of rest.

Meanwhile, the "Tribune" prospered moderately and almost continuously, and if Mr. Greeley had not been hopelessly incapable in business matters, should soon have placed him in a position of comfortable independence. In twenty-four years it invested from its earnings $382,000 in real estate and machinery, and divided among its owners a sum equal to an annual average of over $50,000. But Mr. Greeley inherited his father's tendency to reckless indorsements for his friends, was readily imposed upon by adventurers, and found it easier to give a dollar to every applicant than to inquire into his deserts. In spite of an income liberal for those days, he was thus often in serious straits for money, and lived in an extremely plain if not always economical fashion. Presently, as his property became more valuable, he contracted the habit of raising money for immediate necessities by parting with some of it. After it was clear to practical men that the "Tribune" was a success, he sold half of it to Thomas McElrath for $2,000. By the time it was seven years old he owned less than a third of it. In 1860 his interest was reduced to three twentieths, in 1868 to less than one tenth, and by 1872 he actually owned only six shares out of the hundred into which the property was then divided. Meantime, though always hampered by his business ideas, the property had advanced in value until in 1867 he was able to sell at $6,500 a share, and his last sale was at $9,600. The price of the daily "Tribune" was kept at one cent until the beginning of its second volume, when it was advanced to two cents for a single number, or nine cents a week. It then had 12,000 subscribers, and did not lose 200 of them by the increase in price. A year later it had reached a circulation of 20,000, and advertisements were so numerous that frequent supplements were issued. After a time the price was again advanced to three cents, and finally to four. The circulation rose to a steady average of 35,000 to 40,000, and there were periods of extraordinary interest, especially during the civil war, when for months it reached from 60,000 to 65,000. The weekly edition, being free then from competition, with strong weekly issues in the inland cities, gained a wide circulation throughout the entire north, being probably more generally read for some years in the northern states and territories than any other one newspaper. During political canvasses it sometimes reached a total circulation of a quarter of a million copies, and often for years ranged steadily above 100,000 copies a week. A semi-weekly edition was begun for the benefit of weekly readers enjoying mail facilities that led them to want their news oftener, and this edition ultimately attained a steady circulation of from 15,000 to 20,000 copies.

First Whig, then Anti-slavery Whig, then Republican, the "Tribune's" political course was generally in accord with the more popular and aggressive tendency of these parties. But it was also a highly individualized journal, constantly representing many opinions advocated by its editor irrespective of party affiliations, and sometimes against them. He held that the worst use any man could be put to was to hang him, and for many years vehemently opposed capital punishment. He favored the movement for educating women as physicians, and sought in many ways to widen the sphere of their employments. But he opposed woman suffrage unless it could be first shown that the majority of women themselves desired it. He assailed repudiation in every form, north or south, and was the bitterest critic of the repudiating states. In practice a total abstinent, he always favored the repression of the liquor traffic, and, where possible, its prohibition. He did not believe prohibition possible in states like New York, and there he favored high license and local option. He thought popular education had been directed too much toward literary rather than practical ends, and earnestly favored the substitution of scientific for classical studies. He gave the first newspaper reports of popular lectures by Prof. Louis Agassiz and other eminent scientists; but he thought ill of theatres, and in the early days of the "Tribune" would not insert their advertisements. He encouraged the discussion of a reformed spelling; but, while allowing the phonetic system to be commended in his columns, refused to adopt it. He gave much space to accounts of all co-operative movements among laborers, and sought to encourage co-operation in America as a surer protection for labor than trades-unionism. He sought to remain on good terms with the latter, and even accepted the first presidency of Typographical Union No. 6; but when subsequently, under this union, a strike was ordered in his office to prevent the insertion of an advertisement for printers by a rival paper, he gave notice that thenceforward he would tolerate no trades-union meddling, should mind his own business, and require them to mind theirs. He was a warm friend to every movement in behalf of the Irish people, and particularly for the restoration to them of a greater measure of self-government. He advocated judicious but liberal appropriations for internal improvements, and was conspicuous in urging government aid for the construction of the first Pacific railroad. He strove to diffuse knowledge of the west and promote its settlement, giving much space to descriptions of different localities, and making removal to the west his panacea for all sorts of misfortune and ill-luck

in the east. He actively encouraged one of his agricultural editors to establish a colony in Colorado on land that could be cultivated only by irrigation, and was proud that the successful town founded by this colony was called by his name, and that its first newspaper bore as its title the "Greeley Tribune," in an enlarged fac-simile of his own handwriting. He had personally a great fondness for farming, but little success at it, though he derived great comfort and recreation from his experiments on the farm that he bought at Chappaqua, thirty-three miles north of New York, where his family resided in the summer, and where for many years he spent his Saturdays chopping down or trimming his trees, and occasionally assisting at other farm labor. He favored an international copyright. He constantly watched for new men in literature, was one of the first editors in America to recognize the rising genius of Dickens, and copied a sketch by "Boz" in the first issue of his first newspaper. He was one of the earliest in the east to discover Bret Harte, and perhaps the earliest to recognize Swinburne. He held frequent public discussions—one with Samuel J. Tilden and Parke Godwin on protection, another with Robert Dale Owen on marriage and divorce. He frequently addressed, in his editorial columns, open letters to distinguished public men, promptly printed replies if any came, and was apt to follow these with a telling rejoinder. Thurlow Weed, Benjamin F. Butler, Oliver P. Morton, John J. Crittenden, Samuel J. Tilden, and many others, were thus singled out. He was fond of taking readers into his confidence. Thus he published details of his experiments in farming, and printed serially a charming autobiography. He announced his intended movements, particularly his trips to Europe and through the west. The latter proved an ovation, especially in the territories and in California. Being arrested once in Paris as a director of the American world's fair, at the suit of a disappointed French exhibitor, he published a graphic and amusing account of his imprisonment in Clichy. He admired Fenimore Cooper, and yet was involved in the series of libel suits instituted by that novelist, through a letter (written by Thurlow Weed) published anonymously in the "Tribune"; whereupon he pleaded his own case, and promptly published an amusing report of the trial and the adverse verdict. Sometimes, especially in discussion, he was less good-humored. In an angry letter to a state officer about some public documents advertised in the New York "Times," he referred to its editor as "that little villain, Raymond." Replying to a charge against him by the "Evening Post" of some corrupt association with the slave interest, he began, "You lie, villain, wilfully, wickedly, basely lie." A subscriber in Aurora, N. Y., discontinued his newspaper on the ground of Greeley's opposition to William H. Seward, and angrily said his only regret in parting was that he was under the necessity of losing a three-cent stamp to do it. Greeley published the letter with this reply: "The painful regret expressed in yours of the 19th inst. excites my sympathies. I enclose you a three-cent stamp to replace that whose loss you deplored, and remain, Yours placidly." Quaint letters like this, the oddities of his excessively crabbed handwriting, peculiarities of dress, his cravat (apt to be awry), his white coat, his squeaky voice, his shuffling manner, came to be universally known, and only seemed to add to the personal fondness with which his readers and a large portion of the general public regarded him. He became, in spite of almost every oratorical defect, a popular speaker, always in demand, and always greeted with the loudest applause on whatever occasion, social, educational, reformatory, or political, he appeared. As early as January, 1843, he was announced as a lecturer on the subject of "Human Life," the advertisement being accompanied with the request, "If those who care to hear will sit near the desk, they will favor the lecturer's weak and husky voice." He was afterward able to make this weak and husky voice heard by mass meetings of thousands, and by the delivery of lectures throughout the west he often more than doubled in a winter the annual salary that he received from the "Tribune." But he went, whenever he could, wherever he was asked, whether paid or not. He was always ready to write for other people's papers, too, sometimes for pay, because he needed the money, but almost as readily without it, because he craved new audiences.

In 1848 he was elected to the National house of representatives, to fill a vacancy for three months. Regarding as an abuse the methods then pursued by congressmen in charging mileage, he published a list of the members' mileage accounts. This caused great indignation, which was heightened by the free comments on congressional proceedings contributed daily to the "Tribune" over his signature. Thus he said that if either house "had a chaplain who dared preach of the faithlessness, neglect of duty, iniquitous waste of time, and robbery of the public by congressmen, there would be some sense in the chaplain business; but any ill-bred Nathan or Elijah who should untertake such a job would be kicked out in short order." He broke down the mileage abuse. He also introduced the first bill giving homesteads, free, to actual settlers on the public lands. In 1861 he was a candidate for U. S. senator against William M. Evarts, defeating Evarts, but being defeated in turn by the combination between Evarts's supporters and a few men favoring Ira Harris, of Albany, who was elected. In 1864 he was one of the Republican presidential electors. In 1867 his friends again put him forward for the senate, but his candor in needlessly restating the views he held on general amnesty, then very unpopular, made his election impossible. The same year he was chosen delegate-at-large to the convention for revising the state constitution. At first he took great interest in the proceedings, but grew weary of the endless talk, and finally refused either to attend the body or draw his salary. Two years later he was made the Republican candidate for state comptroller, at a time when the election of the ticket was known to be hopeless, and in 1870 he was again nominated for congress by the Republicans in a hopelessly Democratic district, where he reduced the adverse majority about 1,700, and ran largely ahead of the Republican candidate for governor. On the death of Charles G. Halpine ("Miles O'Reilly"), he accepted an appointment to the city office that Halpine had held, and discharged the duties gratuitously, turning over the salary to Col. Halpine's widow. With one notable exception, this completes his career as office-holder or candidate for office.

Mr. Greeley's hostility to slavery grew stronger from the beginning of his editorial career. In 1848 he was intense in opposition to the Mexican war, on the ground that it was intended to secure more slave territory. In 1852 he sympathized with the Free-soil movement, and disapproved of the Whig platform—"spat upon it," as he said editorially—but nevertheless supported the Whig candidate, Gen. Winfield Scott, because he thought that better than, by supporting a ticket that he knew could not be elected, to risk the success of the

Democrats. In 1856 he was an enthusiastic supporter of John C. Frémont, and during the next four or five years may be said to have been the chief inspiration and greatest popular leader in the movement that carried the Republican party into power. He was indicted in Virginia in 1856 for circulating incendiary documents—viz., the "Tribune." Postmasters in many places in the south refused to deliver the paper at all, and persons subscribing for it were sometimes threatened with lynching. Congressman Albert Rust made a personal assault upon him in Washington, and no northern name provoked at the south more constant and bitter denunciation. Throughout the Kansas-Nebraska excitement the "Tribune" was constantly at a white heat, and its voluminous correspondence and ringing editorials greatly stimulated the northern movement that made Kansas a free state. Still, he favored only legal and constitutional methods for opposing the aggressions of slavery, and brought upon himself the hostility of the Garrison and Wendell Phillips abolitionists, who always distrusted him and often stigmatized him as cowardly and temporizing.

Up to this time the popular judgment regarded Seward, Weed, and Greeley as the great Republican triumvirate. But in 1854 Mr. Greeley had addressed a highly characteristic letter to Gov. Seward complaining that Seward and Weed had sometimes used their political power to his detriment, and shown no consideration for his difficulties, while some of Seward's friends thought Greeley an obstacle to the governor's advancement. Having labored to secure a legislature that would send Mr. Seward to the U. S. senate, it seemed to him "a fitting time to announce the dissolution of the political firm of Seward, Weed, and Greeley by the withdrawal of the junior partner." The letter showed that the writer was hurt, but it was not unfriendly in tone, and it ended thus: "You have done me acts of valued kindness in the line of your profession; let me close with the assurance that these will be ever gratefully remembered by Yours, Horace Greeley." Gov. Seward's friends claimed that on account of Greeley's disappointment as an office-seeker, as shown in this private letter, he had resolved to prevent Seward's nomination for the presidency in 1860. Mr. Greeley denied this emphatically, but declared that he did not think the nomination advisable, and that in opposing Seward he discharged a public duty, in utter disregard of personal considerations. At any rate, he did oppose him successfully. The Seward men prevented his reaching the National convention as a delegate from New York; but he secured a seat as delegate from Oregon in place of an absentee, and made such an effectual opposition to Mr. Seward that he may fairly be said to have brought about the nomination of Abraham Lincoln. In the canvass that followed, the "Tribune" was still a great national force. Immediately after the election Mr. Greeley said: "If my advice should be asked respecting Mr. Lincoln's cabinet, I should recommend the appointment of Seward as secretary of state. It is the place for him, and he will do honor to the country in it."

When the civil war approached, Mr. Greeley at first shrank from it. He hoped, he said, never to live in a Union whereof one section was pinned to the other by bayonets. But after the attack on Fort Sumter and the uprising at the north he urged the most vigorous prosecution of the war, to the end that it might be short. He chafed at the early delays, and the columns of his paper carried for weeks a stereotyped paragraph, "On to Richmond!" demanding the speediest advance of the National armies. Rival newspapers hastened in consequence to hold him responsible for the disaster at Bull Run, and his horror at the calamity, and sensitiveness under the attacks, for a time completely prostrated him. He subsequently replied to his critics in an editorial, which became famous, headed "Just Once," wherein he defended the demands for aggressive action, though denying that the "On to Richmond" paragraph was his, and saying he would have preferred not to iterate it. Henceforth he would bar all criticism on army movements in his paper "unless somebody should undertake to prove that Gen. Patterson is a wise and brave commander." If there was anything to be said in Patterson's behalf, he would make an exception in his favor. He continued to support the war with all possible vigor, encourage volunteering, and sustain the drafts, meantime making more and more earnest appeals that the cause of the war—slavery—should be abolished. Finally he addressed to President Lincoln a powerful letter on the editorial page of the "Tribune," which he entitled "The Prayer of Twenty Millions." He made in it an impassioned appeal for the liberty of all slaves whom the armies could reach, and said: "On the face of this wide earth, Mr. President, there is not one disinterested, determined, intelligent champion of the Union cause who does not feel that all attempts to put down the rebellion, and at the same time uphold its inciting cause, are preposterous and futile; that the rebellion, if crushed out to-morrow, would be renewed within a year if slavery were left in full vigor; that army officers who remain to this day devoted to slavery can at best be but half-way loyal to the Union; and that every hour of deference to slavery is an hour of added and deepened peril to the Union. I appeal to the testimony of your ambassadors in Europe. It is freely at your service, not mine. Ask them to tell you candidly whether the seeming subserviency of your policy to the slave-holding, slavery-upholding interest is not the perplexity, the despair of statesmen and of parties; and be admonished by the general answer." This appeal made a profound impression upon the country, and drew from the president within two days one of his most characteristic and remarkable letters, likewise published in the "Tribune." Mr. Lincoln, after saying that "if there be perceptible in it [Mr. Greeley's letter] an impatient and dictatorial tone, I waive it in deference to an old friend, whose heart I have always supposed to be right," continued: "My paramount object is to save the Union, and not either to save or destroy slavery. . . . What I do about slavery and the colored race I do because I believe it helps to save this Union, and what I forbear I forbear because I do not believe it would help to save the Union. . . . I have here stated my purpose according to my views of official duty, and I intend no modification of my oft-expressed personal wish that all men everywhere should be free." The emancipation proclamation was issued within a month after this correspondence.

In 1864 Mr. Greeley became convinced that the rebels were nearer exhaustion than was thought, and that by a little diplomacy they could be led into propositions for surrender. He accordingly besought the president to send some one to confer with alleged Confederate commissioners in Canada. Mr. Lincoln finally sent Mr. Greeley himself, subsequently despatching one of his private secretaries, Col. John Hay, to the spot to watch the proceedings. It was found that the so-called commissioners had not sufficient authority. The nego-

tiations failed, and Mr. Greeley's share in the business brought upon him more censure than it deserved. As soon as the surrender did come he was eager for universal amnesty and impartial suffrage, and he thought the treatment of Jefferson Davis a mistake. When, after imprisonment and delay, the government still failed to bring Mr. Davis to trial, Mr. Greeley visited Richmond and in the open court-room signed his bail-bond. This act provoked a storm of public censure. He had been writing a careful history of the civil war under the title of "The American Conflict." The first volume had an unprecedented sale, and he had realized from it far more than from all his other occasional publications combined. The second volume was just out, and its sale was ruined, thousands of subscribers to the former volume refusing to take it. On the movement of George W. Blunt, an effort was made in the Union League club to expel Mr. Greeley. This roused him to a white heat. He refused to attend the meeting, and addressed to the president of the club one of his best letters. "I shall not attend your meeting this evening. . . . I do not recognize you as capable of judging or even fully apprehending me. You evidently regard me as a weak sentimentalist, misled by a maudlin philosophy. I arraign you as narrow-minded blockheads, who would like to be useful to a great and good cause, but don't know how. Your attempt to base a great enduring party on the heat and wrath necessarily engendered by a bloody civil war is as though you should plant a colony on an iceberg which had somehow drifted into a tropical ocean. I tell you here that, out of a life earnestly devoted to the good of human kind, your children will recollect my going to Richmond and signing the bail-bond as the wisest act, and will feel that it did more for freedom and humanity than all of you were competent to do, though you had lived to the age of Methuselah. I ask nothing of you, then, but that you proceed to your end by a brave, frank, manly way. Don't sidle off into a wild resolution of censure, but move the expulsion which you purposed and which I deserve if I deserve any reproach whatever. . . . I propose to fight it out on the line that I have held from the day of Lee's surrender. So long as any man was seeking to overthrow our government, he was my enemy; from the hour in which he laid down his arms, he was my formerly erring countryman." The meeting was held, but the effort at any censure whatever failed.

Mr. Greeley did not greatly sympathize with the movement to make the foremost soldier of the war president in 1868, but he gave Gen. Grant a cordial support. He chafed at the signs of inexperience in some of the early steps of the administration, and later at its manifest disposition to encourage, in New York chiefly, the wing of the Republican party that had been unfriendly to himself. He disapproved of Gen. Grant's scheme for acquiring Santo Domingo, and was indignant at the treatment of Charles Sumner and John Lothrop Motley. The course of the "carpet-bag" state governments at the south, however, gave him most concern, and brought him into open hostility to the administration he had helped to create. In 1871 he made a trip to Texas, was received everywhere with extraordinary cordiality, and returned still more outspoken against the policy of the government toward the states lately in rebellion. Dissatisfied Republicans now began to speak freely of him as a candidate for the presidency against Gen. Grant. Numbers of the most distinguished Republicans in the senate and elsewhere combined in the formation of the Liberal Republican party, and called a convention at Cincinnati to nominate a national ticket. Eastern Republicans, outside of New York at least, generally expected Charles Francis Adams to be the nominee, and he had the united support of the whole revenue reform and free-trade section. But Mr. Greeley soon proved stronger than any other with western and southern delegates. On the sixth ballot he received 332 votes, against 324 for Adams, a sudden concentration of the supporters of B. Gratz Brown upon Mr. Greeley having been effected. Immediate changes swelled his majority, so that when the vote was finally announced it stood: Greeley, 482; Adams, 187. In accepting the nomination, which he had not sought, but by which he was greatly gratified, Mr. Greeley made the restoration of all political rights lost in the rebellion, together with a suffrage impartially extended to white and black on the same conditions, the cardinal principle of the movement. His letter ended with this notable passage: "With the distinct understanding that, if elected, I shall be the president, not of a party, but of the whole people, I accept your nomination in the confident trust that the masses of our countrymen, north and south, are eager to clasp hands across the bloody chasm which has too long divided them, forgetting that they have been enemies in the joyful consciousness that they are and must henceforth remain brethren."

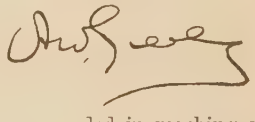
Mr. Greeley's nomination at first caught the popular fancy, and his canvass promised for a time to resemble that of 1840, in the enthusiastic turmoil of which he had first risen to national prominence. But, contrary to his judgment (though in accordance with that of close friends), the Democrats, instead of putting no ticket in the field, as he had expected, formally nominated him. This action of his life-long opponents alienated many ardent Republicans. The first elections were considered in his favor, and when in the summer North Carolina voted, it was believed that his friends had carried the state. The later official vote, however, gave the state to the Grant party, and from that time the Greeley wave seemed to be subsiding. At last, on appeals from his supporters, who thought extraordinary measures needful, he took the stump in person. The series of speeches made in his tour, extending from New England through New York, Pennsylvania, Ohio, and Indiana, evoked great enthusiasm. All sides regarded them as an exhibition of brilliant and effective work unprecedented in that generation. But they were not enough to stem the rising tide. Mr. Greeley received 2,834,079 of the popular vote, against Gen. Grant's 3,597,070; but he carried none of the northern states, and of the southern states only Georgia, Kentucky, Maryland, Missouri, Tennessee, and Texas.

He had always been more sensitive to attacks and reverses than the public imagined, and now the strain proved too great. The canvass had been one of extraordinary bitterness, his old associates reviling him as a turn-coat and traitor, and some of the caricatures being unparalleled for their ferocity. His wife, always feeble, and of late years suffering greatly from a combination of nervous and other diseases, fell ill while he was absent on his tour. On his return he watched almost continuously for weeks at her bedside, and he buried her in the closing weeks of the canvass. For years he had been a sufferer from insomnia; he had necessarily lost much sleep, and during and after his wife's illness he scarcely slept at all. He was not disappointed in the election, for he had known for

weeks that defeat was inevitable. Nor did this act, though generally disapproved by his friends, weaken his friendships. Henry Ward Beecher wrote: "You may think, amidst clouds of smoke and dust, that all your old friends who parted company with you in the late campaign will turn a momentary difference into a life-long alienation. It will not be so. I speak for myself, and also from what I perceive in other men's hearts. Your mere political influence may for a time be impaired, but your own power for good in the far wider fields of industrial economy, social and civil criticism, and the general well-being of society, will not be lessened, but augmented." But Mr. Greeley's nervous exhaustion resulted in an inflammation of the upper membrane of the brain. He resumed his editorial duties, but in a few days was unable to continue them. He remained sleepless, delirium soon set in, and he died on 29 Nov., 1872.

The personal regard in which he was held, even by his bitterest opponents, at once became manifest. His body lay in state in the city hall, and a throng of many thousands moved during every hour of the daylight through the building to see it. The president, vice-president, and chief justice of the United States, with a great number of the leading public men of both parties, attended the funeral, and followed the hearse, preceded by the mayor of the city and other civic authorities, down Fifth avenue and Broadway. John G. Whittier described him as "our later Franklin," and the majority of his countrymen have substantially accepted that phrase as designating his place in the history of his time, while members of the press consider him perhaps the greatest editor, and certainly the foremost political advocate and controversialist, if not also the most influential popular writer, the country has produced. In 1867 Francis B. Carpenter painted a portrait of Mr. Greeley for the "Tribune" association; a larger one, executed by Alexander Davis, was exhibited in the Paris salon, afterward became the property of Whitelaw Reid, and is now (1887) in the "Tribune" counting-room. At the time of Mr. Greeley's visit to Rome, Hiram Powers made a portrait bust, and at a later date Ames Van Wart executed one in marble, on a commission from Marshall O. Roberts. The bronze bust in Greenwood cemetery was presented by the printers of the United States. John Q. A. Ward is now (1887) completing a colossal sitting figure, to be cast in bronze and placed at the entrance of the "Tribune" building. The accompanying portrait is from an excellent photograph by Bogardus. Mr. Greeley's works are "Hints Toward Reforms" (New York, 1850); "Glances at Europe" (1851); "History of the Struggle for Slavery Extension" (1856); "Overland Journey to San Francisco" (1860); "The American Conflict" (2 vols., Hartford, 1864–'6); "Recollections of a Busy Life" (New York, 1868; new ed., with appendix containing an account of his later years, his argument on marriage and divorce with Robert Dale Owen, and miscellanies, New York, 1873); "Essays on Political Economy" (Boston, 1870); and "What I Know of Farming" (New York, 1871). He also assisted his brother-in-law, John F. Cleveland, in editing "A Political Text-Book" (New York, 1860), and supervised for many years the annual issues of the "Whig Almanac" and the "Tribune Almanac." Lives of Horace Greeley have been written by James Parton (New York, 1855; new eds., 1868, and Boston, 1872); L. U. Reavis (New York, 1872); and Lewis D. Ingersoll (Chicago, 1873). There is also a "Memorial of Horace Greeley" (New York, 1873).

GREELY, Adolphus Washington, explorer, b. in Newburyport, Mass., 27 March, 1844. He was graduated at Brown high-school in 1860, and enlisted in the 19th Massachusetts regiment on 3 July, 1861. After rising to the rank of 1st sergeant, he was appointed 2d lieutenant in the 81st U. S. colored infantry, 18 March, 1863, was promoted to 1st lieutenant, 26 April, 1864, and on 13 March, 1865, was brevetted major of volunteers for faithful services during the civil war. He was appointed 2d lieutenant in the 36th regular infantry, 7 March, 1867, assigned to the 5th cavalry on 14 July, 1869, and promoted to 1st lieutenant, 27 May, 1873. Soon after the war he was detailed for duty in the signal service, and in 1881 was selected to command the expedition sent into the arctic regions by the government, in accordance with the plan of the Hamburg international geographical congress of 1879, to establish one of a chain of thirteen circumpolar stations for scientific purposes. His party, twenty-five in all, sailed from St. John's, Newfoundland, in the "Proteus," on 7 July, 1881, and reached Discovery harbor, lat. 81° 44′ N., long. 64° 45′ W., on 12 Aug., 1881, taking with them materials for a house, instruments for scientific observation, and stores for twenty-seven months. Arrangements had been made to send out expeditions in the summers of 1882 and 1883, with additional stores for the party; but Greely was ordered, if these expeditions failed to reach him, to abandon the station not later than September, 1883, and retreat southward along the coast by boat. The party remained at Discovery harbor nearly two years, frequent explorations being made into the surrounding country. On 15 May, 1882, three of the party succeeded in reaching a point farther north than any previously attained. (See Brainard, D. L.) Lieut. Greely made two trips into the interior of Grinnell Land in the summer of 1882, discovering a lake sixty miles long, which he named Lake Hazen, two new mountain ranges, the altitude of whose highest peak, Mount Arthur, was 5,000 feet, and many rivers and glaciers. Meanwhile, the two relief expeditions had failed to reach Discovery harbor. That of 1882, in the "Neptune," under Lieut. Beebe, only succeeded in reaching lat. 71° 20′ N., and that of 1883, in the "Proteus" and the "Yantic," under Lieut. Garlington, resulted in the destruction of the former vessel by the ice. Both expeditions left stores in caches at various points. On 9 Aug., 1883, Greely and his party set out on their retreat southward, after making, during nearly two years, systematic observations of temperature, atmospheric pressure, the direction and height of the tides, the velocity of the wind, and the intensity of gravity. The health of all, up to this time, had been excellent. On 15 Oct., after meeting with various adventures, drifting about Smith sound for thirty days on an ice-floe, and being compelled to abandon their steam launch in the ice, they reached Cape Sabine, where they established their winter quar-



ters. Here they suffered greatly from want of provisions, and were finally forced to live on boiled strips of seal-skin, lichens, and shrimps. Sixteen of the party died of starvation, one was drowned, and one, Private Henry, was shot by Lieut. Greely's orders, on the ground that he repeatedly stole food. The seven survivors were rescued by the third relief expedition, under Capt. Winfield Schley, on 22 June, 1883, in so exhausted a condition that forty-eight hours' delay would have been fatal. Since the return of Lieut. Greely he has been charged with incapacity and arbitrary conduct in his management of the expedition; but these charges have not been listened to by his superiors. He was promoted to captain, 11 June, 1886, and in 1887, after the death of Gen. William B. Hazen, was appointed by President Cleveland to succeed that officer as chief of the signal-service corps, with the rank of brigadier-general. In 1885 he was given the queen's gold medal by the Royal geographical society of London, and he has also received a gold medal from the Paris geopraphical society. He has published "Three Years of Arctic Service"(New York, 1886). See also "The Rescue of Greely," by Capt. Winfield S. Schley, U. S. N. (1885).

GREEN, Alexander Little Page, clergyman, b. in Sevier county, Tenn., 6 June, 1806; d. in Nashville, 15 July, 1874. He received an academic education, was ordained elder in the Tennessee conference of the Methodist Episcopal church in 1827, and, besides performing missionary abor, filled several pastorates. In 1844 he was a delegate to the general conference which met in New York city to adopt measures for the organization of the Methodist Episcopal church, south, and was one of the commissioners in the adjustment of the church property question consequent on the division. He was the principal organizer of the publishing-house at Nashville, and chairman of the book committee. Mr. Green was a trustee of Vanderbilt and Nashville universities, and was an authority in Indian lore. He published "Church in the Wilderness" (Nashville, 1840), and was preparing a work on "The Fishes of North America."

GREEN, Anna Katharine, author, b. in Brooklyn, N. Y., 11 Nov., 1846. She was graduated at Ripley female college, Poultney, Vt., in 1867, and in 1857–'60 lived in Buffalo. In November, 1884, she married Charles Rohlfs, of Brooklyn. Her novels, all of which are detective stories, include "The Leavenworth Case" (New York, 1878); "A Strange Disappearance" (1879); "The Sword of Damocles" (1881); "X. Y. Z." (1883); "Hand and Ring" (1883); "The Mill Mystery" (1886); and "7 to 12" (1887). She has also published "The Defence of the Bride, and other Poems" (1882), and "Risifi's Daughter," a dramatic poem (1886).

GREEN, Beriah, reformer, b. in New York state in 1794; d. in Whitestown, N. Y., 4 May, 1874. He was graduated at Middlebury college in 1819, and studied theology with the intention of becoming a Presbyterian minister, but formed a creed of his own, which did not admit of his joining any denomination. He removed to Kennebunk, Me., in 1820, and the following year to Ohio, and was professor of sacred literature in the Western Reserve college. His determined opposition to slavery shortened his stay in this community, and three years later he became president of the Oneida institute, Ohio. Throughout his life he was the earnest friend of Gerrit Smith and other abolitionists, and in 1834, having taken an active part in the formation of the American anti-slavery society, was chosen its president. Mr. Green was also a temperance advocate and promoter of public education. In 1845 he founded the Manual labor school in Whitestown, N. Y. He had just addressed the board of excise in the town-hall of Whitestown, urging the prohibition of intoxicating liquors, and was waiting at the head of a line of citizens to place his vote in the ballot-box, when he fell dead. He published "History of the Quakers" (Albany, 1823) and "Sermons and Discourses, with a Few Essays and Addresses" (Utica, N. Y., 1833).

GREEN, Charles, naval officer, b. in Connecticut in 1814; d. in Providence, R. I., 7 April, 1887. He entered the U. S. navy, 1 May, 1826, became passed midshipman, 28 April, 1832, lieutenant, 8 March, 1837, commander, 14 Sept., 1855, captain, 16 July, 1862, and commodore, 4 April, 1867. On account of incapacity resulting from long and faithful service he was placed on the retired list, 15 Nov., 1862. When commanding the "Jamestown" in 1861–'2, and on blockade duty off Savannah, Ga., Fernandina, Fla., and Wilmington, N. C., he took six prizes. While on the coast of Florida he sent out a boat-expedition and destroyed the bark "Alvarado" under the guns of the fort at Fernandina.

GREEN, Duff, politician, b. in Georgia, about 1780; died in Dayton, Ga., 10 June, 1875. He studied law in early life, and was admitted to practice. In 1801 he published a newspaper in Baltimore, called "The Merchant," and from 1825 to 1829, during the administration of John Quincy Adams, edited the opposition journal at Washington. During Jackson's first term he conducted the administration organ, "The United States Telegram." Mr. Green was credited with immense party power, and it was believed that he influenced the policy of the executive; but in 1830, on the alienation of John C. Calhoun, he took sides with the vice-president. He supported Henry Clay for the presidency in 1832, and Mr. Calhoun in 1836, and for many years was a political power in his section of the country. His later life was devoted to the advancement of the industrial interests of the south.

GREEN, Ezra, physician, b. in Malden, Mass., 17 June, 1746; d. in Dover, N. H., 25 July, 1847. He was graduated at Harvard in 1765, and began the practice of medicine in 1768. In June, 1775, he joined the continental army as surgeon, was on the Canada expedition, and in the sloop-of-war "Ranger," under Paul Jones, in 1777. He remained in the service until 1781, when he resigned and engaged in trade. Dr. Green was a Federalist in politics, and a delegate to the New Hampshire constitutional convention of 1820.

GREEN, Francis, merchant, b. in Boston, 1 Sept., 1742; d. in Medford, Mass., 21 April, 1809. His father, Benjamin, was president of the council and commander-in-chief of Nova Scotia. Francis was graduated at Harvard in 1760; joined the army as an ensign after the beginning of the French war, was present at the siege of Louisburg in 1758, at that of Martinique, and in 1762 at the capture of Havana. In 1765 he went to England, and on his return sold his commission and settled in business in Boston. At the beginning of the Revolution, although he declared that he was the friend of liberty, he adhered to the crown. In 1776 he went to Halifax, where he was appointed a magistrate, returned to New York in 1777, and the next year was proscribed and banished. He remained in England till 1784, when he returned to Nova Scotia, and was sheriff of the county of Halifax and senior judge of the court of common pleas. He returned to Massachusetts in 1797, and settled in Medford. He published "The Art of Impairing Speech" (London, 1783), and a translation of the "Letters of Abbé de l'Epée" (Boston, 1803).

GREEN, Francis Marshall, naval officer, b. in Boston, Mass., 23 Feb., 1835. He early became a seaman, and in June, 1861, was appointed acting master in the U. S. navy, and attached to the sloop "Vincennes," of the West Gulf squadron. Subsequently he saw active service at the passes of the Mississippi, served on the sloop "Oneida," and commanded the steamer "Commodore." In April, 1864, he was promoted to acting volunteer lieutenant, and served on special duty on the "Niagara." Later he commanded the "Boxer," and participated in the capture of Fort Fisher. After the close of the war he was transferred to the regular navy, and in December, 1868, was commissioned lieutenant-commander. From 1873 till 1883 he was connected with five expeditions for determining exact latitudes and longitudes in various parts of the world. In July, 1883, he was made commander, and after some time spent on shore duty was given command of the "Yantic." Commander Green has been associated in the publication of government reports, such as "Navigation of the Caribbean Sea" (1877); "A Report on Telegraphic Determination of Longitudes in the West Indies and Central America" (1877); similar reports for South America (1880), and the East Indies, China, and Japan (1883), and a work on "Geographical Positions" (1883).

GREEN, Horace, physician, b. in Crittenden, Rutland co., Vt., 24 Dec., 1802; died in Sing Sing, N. Y., 29 Nov., 1866. He was educated at the high-school at Brandon and the classical school of Rutland, Vt., and in 1824 was graduated in medicine in Middlebury. He began practice in Rutland, and after several years went abroad, and studied in the hospitals of Edinburgh, London, and Paris, making a specialty of the diseases of the throat and air-passages. He was elected, on his return, to the chair of these diseases in the Medical college of Castleton, Vt., and remained there until his removal to New York city in 1850. He revisited the hospitals in Paris in 1851, and on his return was elected to the chair of the theory and practice of medicine in the New York medical college. He assisted in establishing the "American Medical Monthly" in 1854, and became one of its editors. His health failing in 1860, he resigned his professorship and went to Cuba, dying of a lingering pulmonary disease. The degree of LL. D. was conferred on him by the University of Vermont. His works are "A Treatise on the Diseases of the Air-Passages" (New York, 1846); "Pathology and Treatment of Croup" (1849); "Surgical Treatment of the Polypi of the Larynx" (1852); "Report of a Hundred Cases of Pulmonary Diseases" (1858); and "Selections from the Favorite Prescriptions of Living American Physicians" (1858).

GREEN, Jacob, patriot, b. in Malden, Mass., 22 June, 1722; d. in Morristown, N. J., 24 May, 1796. His parents were poor and he was apprenticed to a trade in order to meet his college expenses. He was graduated at Harvard in 1744, and under the influence of George Whitefield became a clergyman in 1745, and was installed pastor of the Presbyterian church in Morristown, N. J. To support his family he also studied and practised medicine while occupying this pulpit. In 1757 he was elected president of the College of New Jersey. He was a delegate to the Provincial congress of that state in 1775, was chairman of the committee that drafted the state constitution, and wrote a series of articles on the depreciation of paper currency, which had wide circulation. His suggestions regarding the redemption of continental currency were much the same as were those afterward adopted by congress. Mr. Green's published works are "Sermons" (Philadelphia, 1768); "Sermons" (1769); "A Pamphlet on the Jewish Church" (1768); and an "Autobiography," which was published in "The Christian Advocate" by his son.—His son, **Ashbel,** clergyman, b. in Hanover, Morris co., N. J., 6 July, 1762; d. in Philadelphia, 19 May, 1848, taught to acquire the means to attend college, but in 1778 his studies were interrupted by the Revolutionary war, in which he served as a sergeant until the spring of 1782. He then entered Princeton, was graduated in 1784, and the next year was appointed tutor, and afterward became professor of mathematics and natural philosophy. In 1786 he was licensed to preach by the presbytery of New Brunswick, and the next year was installed pastor of the 2d Presbyterian church of Philadelphia. He was a delegate to the general assembly of his church in 1790, and moved a renewal of communications between this and the Congregational church. In 1792 he was appointed chaplain to congress. The Princeton college buildings were destroyed by fire in 1802, and when it was rebuilt, Dr. Green, who had been one of its trustees since 1790, was elected its president in 1812. The same year the title of LL. D. was given him by the University of North Carolina, and he was elected president of the board of trustees of Princeton theological seminary. He resigned the presidency of Princeton in 1822, and removed to Philadelphia, where he edited "The Christian Advocate" for twelve years, and during a portion of the time "The Assembly's Magazine." During this period he frequently supplied vacant pulpits. He was a voluminous writer. His principal works are "Discourse delivered in the College of New Jersey, with a History of the College" (Boston, 1822); "Presbyterian Missions" (1820); "Sermons on the Assembly's Catechism" (1818); "Sermons from 1790 to 1836" (1836); and "Reports and Addresses from 1793 to 1836" (1837). He also edited Dr. Witherspoon's works, and an autobiography of Jacob Green (Philadelphia, 1802).—Ashbel's son, **Jacob,** scientist, b. in Philadelphia, 26 July, 1790; d. there, 1 Feb., 1841, in his boyhood developed a taste for botany, and made a large collection of plants. At an early age he wrote a treatise on electricity which gave him a reputation. In 1806 he was graduated at the University of Pennsylvania, studied law, and began practice, but accepted in 1818 the chairs of chemistry, experimental philosophy, and natural history, in Princeton. In 1822 he became professor of chemistry in Jefferson medical college, where he remained until his death. He is the author of "Chemical Diagrams"; "Chemical Philosophy" (Philadelphia, 1829); "Astronomical Recreations" (1829); "A Syllabus of a Course of Chemistry" (1835); "Trilobites" (2 vols., 1832); "The Botany of the United States" (1833); "Notes of a Traveller" (1831); and "Diseases of the Skin" (1841).

GREEN, James Stephen, politician, b. in Fauquier county, Va., 28 Feb., 1817; d. in St. Louis, Mo., 9 Jan., 1870. He received a common-school education, removed to Alabama, and afterward to Missouri, where he was admitted to the bar, and began to practise at Canton. He was presidential elector on the Polk and Dallas ticket in 1844, and was elected to congress as a Democrat, serving from 1847 till 1851. He was chargé d'affaires in the United States of Columbia in 1853, and was appointed consul in 1854, but did not act in that capacity. On his return in 1856 he was again elected representative to congress, but did not take his seat, having been chosen to the U. S. senate, where he served from 1857 till 1861. He bore a

conspicuous part in the Kansas contest, 1857–'8, and presented the majority report of the committee on territories in favor of its admission as a state, under the Lecompton constitution.

GREEN, John, physician, b. in Worcester, Mass., in 1783; d. there, 17 Oct., 1865. He was graduated at Harvard in 1804, and received his medical degree from both Brown and Harvard in 1826. He established a large practice in Dorchester, accumulated a valuable professional library, and in 1859 presented 7,000 miscellaneous works to the city of Worcester as a basis for a public library.—His grandson, **John,** b. in Worcester, Mass., 2 April, 1835, was graduated at Harvard in 1855, admitted a fellow of the Massachusetts medical society by examination in 1858, studied medicine at Cambridge and in Europe in 1855–'60, and took his medical degree at Harvard in 1866. In 1857 he accompanied Prof. Jeffries Wyman on a scientific expedition to Surinam. He began practice in Boston in 1861, and during 1862 was in the medical service of the Western sanitary commission of the U. S. army, and acting assistant surgeon in the Army of the Tennessee. He visited Europe in 1865 in order to pursue studies in ophthalmology, and removed to St. Louis in 1866. He is an original member of the Ophthalmological society of America, was elected professor of this branch and of otology in the St. Louis college of physicians and surgeons in 1868, became surgeon to the St. Louis eye and ear infirmary in 1872, and ophthalmic surgeon to St. Luke's hospital in 1874. He is a member of the principal medical societies both of the state and country, and has contributed numerous papers on his specialty to various professional journals.

GREEN, John Cleve, merchant, b. in Lawrenceville, N. J., 14 April, 1800; d. in New York city, 28 April, 1875. He received an academic education, and in early manhood entered a counting-house in New York city. He went as supercargo to South America and China from 1823 till 1833, and while in Canton became a member of the firm of Russell & Co., and was eminently successful in business. He returned to New York in 1839 with a large fortune, and settled there, continuing his connection with the China trade. Much of his time was devoted to religious and charitable enterprises. He was a trustee of the New York hospital, of the Deaf and dumb asylum, president of the board of directors of the Home for cripples, and for many years financial agent and trustee of Princeton theological seminary. He endowed Princeton seminary with the Helena professorship of history, built one of the professor's houses, renovated the chapel, expending a sum which amounted to its original cost, remodelled the dining-hall, and bequeathed to the institution $50,000. Mr. Green also founded at Princeton the "John C. Green" school of science, and was liberal in his gifts to the University of New York. A Green memorial alcove containing his portrait was added to the New York society library by his widow, who gave $50,000 for that object.—His brother, **Henry Woodhull,** jurist, b. in Lawrenceville, N. J., 20 Sept., 1802; d. in Trenton, 19 Dec., 1876, was graduated at Princeton in 1820, admitted to the bar of Trenton in 1825, and continued in practice there for twenty-one years. He was a member of the legislature in 1842, of the Constitutional convention of 1844, and was appointed afterward chancery reporter. He was chief justice of the state supreme court from 1846 till 1860, when he became chancellor, but failing health compelled him to resign in 1866. His later years were given to study and to educational and charitable enterprises. He was a trustee of the Princeton theological seminary from 1833 till his death, and from 1860 till 1876 was president of the board. In 1850 the degree of LL. D. was conferred on him by Princeton. He published two volumes of "Reports of Cases in the Courts in Chancery of New Jersey" (New York, 1842–'6).

GREEN, John Orne, physician, b. in Malden, Mass., 14 May, 1799; d. in Lowell, Mass., 23 Dec., 1886. He was graduated at Harvard in 1817, and at the medical school in 1822. He then settled in East Chelmsford (now Lowell), Mass., and practised his profession. In 1834 Dr. Green was councillor of the Medical society of Massachusetts, and in 1846 delivered the annual address before that body. From 1868 till his death he was senior physician of St. John's hospital. For many years he was president of the "Old residents' historical society," chairman of the school committee, and was interested in municipal affairs. He published "History of Small-Pox in Lowell" (Boston, 1837); "Memorial of John C. Dalton" (1864); "An Address before the Citizens of Lowell at the Dedication of the Green School-House" (Lowell, 1865); "Lowell and Harvard College in the 'Transactions of the Old Residents' Association'" (1877); and an address before that body (1868).—His son, **John Orne,** physician, b. in Lowell, Mass., 7 June, 1841, was graduated at Harvard in 1863, and at the medical school in 1866. In 1867 he visited Europe, and studied in Berlin, Vienna, and Würzburg, his specialty being aural surgery. On his return he settled in Boston, Mass. In 1869–'70 he was instructor in aural surgery in Harvard, and since that date has been aural surgeon in the Boston city hospital. Dr. Green has contributed frequent papers to medical and surgical journals.

GREEN, John Thompson, jurist, b. in Mechanicsville, S. C., 18 Oct., 1827; d. in Sumter, S. C., 27 Jan., 1875. He was educated at the College of South Carolina, studied law, and was admitted to the bar in 1849. He frequently served in the state legislature between 1850 and 1865, having been first elected on the co-operative ticket, in opposition to that which advocated the secession of the state, and throughout the war he was a consistent Unionist. From 1868 until civil rule was reinstated he was provost of Sumter county. On the reconstruction of the state government he was appointed judge of the 3d judicial district, and held office till his death. In 1874 he was the unsuccessful candidate for governor of the Independent Republican and Conservative parties.

GREEN, Jonathan H., "the reformed gambler," b. near Lawrenceburg, Ind., in 1813. His mother died while he was in infancy, and his father, who was dissipated, bound him to an unkind master. After various adventures, he ran away from his employer in 1829, and obtained work in Cincinnati, where, for some boyish offence, he was arrested and thrown into jail, where he contracted the habit of card-playing with his companions. For the next twelve years he led a wandering life, travelling up and down the Mississippi, under feigned names, and engaging in gambling as a profession. He was often imprisoned, and once escaped from jail in Louisville, Ky., by means of false keys. He reformed in 1842, and the next year began a lecturing tour, in which he revealed the vices of gambling. He was received by respectable citizens, visited state prisons, held open-air meetings, and was active in the cause of reform. In 1847 he engaged in a controversy with an avowed gambler, named Freeman, before the citi-

zens of Philadelphia. The press commented favorably on Mr. Green's good sense and good nature during the discussion, and the three days' argument was published in most of the newspapers and some of the periodicals of that date. He has published "Gambling Unmasked, an Autobiography" (Philadelphia, 1847), and "Secret Band of Brothers" (1847). He was living in Philadelphia in 1887.

GREEN, Joseph, poet, b. in Boston, Mass., in 1706; d. in London, England, 11 Dec., 1780. He was graduated at Harvard in 1726, and espoused the patriot cause; in 1760 he was one of the fifty-eight Boston memorialists who arrayed themselves against the crown, and in 1764 a member of the committee with Samuel Adams to report instructions to the Boston representatives. He changed his political views, however, on the prospect of the war, and was appointed in 1774, by Gov. Thomas Gage, one of the "mandamus" council for remodelling the government of Massachusetts in order to curtail the rights of the colonists. He did not take the oath of office, but signed the loyal address approving Gov. Hutchinson's political course, and in 1776 was proscribed and banished. Green was regarded as the wit of his day, and his political lampoons, in which he satirized first one and then the other party, gave him a wide celebrity. His works include "The Wonderful Lament of Old Mr. Tenor," written after the change in currency (Boston, 1744), and "Poems and Satires" (1780).

GREEN, Joseph F., naval officer, b. in Maine, 24 Nov., 1811. He was appointed midshipman, 1 Nov., 1827, and promoted to passed midshipman, 10 June, 1833. He was commissioned lieutenant, 28 Feb., 1838, and throughout the Mexican war was attached to the ship-of-line "Ohio," of the Pacific squadron, and took part in all the important actions on the Pacific coast. From 1850 till 1858 he served at the Boston navy-yard on ordnance duty, and at the naval academy. He was commissioned commander, 14 Sept., 1855, captain in 1862, commanded the steam sloop "Canandaigua," of the South Atlantic blockading squadron, in 1862–'4, and participated in the bombardment of Fort Wagner, 18 July, 1863. From 1866 till 1868 he was on ordnance duty at the Boston navy-yard, and was commissioned as commodore, 24 July, 1867. He was assigned to special duty in 1869, commanded the southern squadron of the Atlantic fleet in 1870, was commissioned rear-admiral the same year, and retired 25 Nov., 1872.

GREEN, Louis Warner, educator, b. in Boyle county, Ky., 28 Jan., 1806; d. in Danville, Ky., 26 March, 1863. He was graduated at Centre college, Ky., in 1830, and at the Princeton theological seminary in 1832. He was then licensed to preach and appointed professor in Centre college, and, after remaining there two years, went to Europe, where he spent some months in study. On his return, Mr. Green was appointed vice-president of Centre college, and professor of belles-lettres, and at the same time was associate pastor of the Presbyterian church in Danville. He was afterward elected to the chair of oriental literature in the Western theological seminary at Alleghany, Pa., where he remained for seven years. He then became pastor of the 2d Presbyterian church in Baltimore, and in 1848 was chosen president of Hampden Sidney college, where he remained until 1856. In that year he removed to Kentucky, and was president of the State normal school. He afterward accepted the presidency of Centre college, and returned to Danville.

GREEN, Martin E., soldier, b. in Lewis county, Mo., about 1825; d. in Vicksburg, Miss., 27 June, 1863. At the beginning of the civil war he organized a regiment near Paris, Mo., and, joining Gen. Sterling Price, contributed largely to the success of the Confederates in the capture of Lexington, Mo., and the Union garrison commanded by Col. James A. Mulligan. He ordered his men to roll hemp-bales up the river-bank, which formed movable breastworks. After this battle he was appointed brigadier-general, served with Gen. Price throughout the Missouri campaign, and was conspicuous for bravery in the battles of Farmington, Iuka, Corinth, and Baker's Creek.

GREEN, Norvin, capitalist, b. in New Albany, Ind., 17 April, 1818. He was graduated in medicine at the University of Louisville, Ky., in 1840, and afterward served three terms in the Kentucky legislature. He became president of the Southwestern telegraph company about 1854, was afterward vice-president of the American and Western union companies, and in 1878 succeeded William Orton as president of the last-named corporation. Dr. Green was also president of the Louisville, Cincinnati, and Lexington railroad in 1869–'73.

GREEN, Samuel, printer, b. in England, in 1615; d. in Cambridge, Mass., 1 Jan., 1702. He was one of the first printers in New England, being the successor of Stephen Daye (*q. v.*). He printed the "Cambridge Platform" in 1649, and a revised edition of the Psalms in 1650. In October, 1658, Green was granted by act of legislature 300 acres of land, "where it is to be found." It was subsequently laid out for him in Haverhill. In 1655 a second press arrived from England, and in 1659 he printed a version of the Psalms in the Indian tongue. In 1661 the New Testament was issued; and in 1663 the entire Old and New Testament, with the New England Psalms in Indian verse, translated by Rev. John Eliot (*q. v.*), was published in the dialect of the Nipmuck or Natick Indians. A second edition of the Indian Bible was printed in 1685. Green continued printing to an advanced age. He had nineteen children, and, although his descendants were nearly all printers, there was no printing done in Cambridge for many years after his death.—His son, **Bartholomew,** printer, b. in Cambridge, Mass., 12, Oct., 1666; d. in Boston, Mass., 28 Dec., 1732, succeeded to his father's business. He first set up his press in Cambridge, and afterward at Boston, where it was destroyed by fire, 16 Sept., 1690. In the winter of 1692–'3 he resumed business in Boston. On 24 April, 1704, he issued the first number of the "Boston News Letter," which was continued by him during his life. It was printed weekly, and published "by authority" of John Campbell, postmaster, who was the proprietor. It became the property of Green eighteen years afterward, and for fifteen years was the only newspaper in the colonies. The contents of the first number, covering three pages of folio post, were extremely meagre, and it contained but one advertisement, that of the proprietor. Green endeavored to avoid partisan discussions of the religious and political quarrels of the times. "The Design of this Paper" said his prospectus "is not merely to Amuse the Reader, much less to Gratify any ill tempers by Reproach or Ridicule, to Promote Contention, or Espouse any Party among us." For about forty years Green was printer for the government, and the foremost publisher in Boston. It was said of him at his death that he "had much of that primitive Christianity which has always been the distinguishing glory of New England." After his death the "News Letter" was carried on by his son-in-law, John Draper, and then by the latter's son Richard (*q. v.*).

GREEN, Samuel Abbott, physician, b. in Groton, Mass., 16 March, 1830. He was graduated at Harvard in 1851, and received his medical degree three years later, after which he spent several years in Europe. On his return he began practice in Boston, and became one of the district physicians for the city dispensary. On 19 May, 1858, he was appointed by Gov. Banks surgeon of the 2d militia regiment. At the beginning of the civil war he was commissioned assistant surgeon of the 1st Massachusetts regiment of volunteers, and was the first medical officer mustered in for three years' service. He was promoted surgeon of the 24th Massachusetts regiment on 2 Sept., 1861, where he remained until 2 Nov., 1864, serving on the staffs of various cavalry officers. He had charge of the hospital ship "Recruit," of the Burnside expedition to Roanoke island, of the hospital ship "Cosmopolitan" on the coast of South Carolina, and during the siege of Fort Wagner was chief medical officer on Morris island. In October, 1863, he was sent to Florida, and was post-surgeon at St. Augustine and Jacksonville; thence he was sent to Virginia, and was with the army when Bermuda Hundred was taken. He was appointed acting staff-surgeon, and was stationed three months at Richmond after the fall of that city. For gallant and distinguished services in the field in 1864 he was brevetted lieutenant-colonel of volunteers. Dr. Green organized "Roanoke cemetery" in 1862, which was one of the first regular burial-places for National soldiers. After the close of the war Dr. Green was from 1865 until 1872 superintendent of the Boston dispensary, a member of the Boston school board in 1860–'2 and 1866–'72, trustee of the public library in 1868–'78, and acting librarian from October, 1877, to October, 1878. In 1870 Gov. Claflin appointed him one of a commission to care for disabled soldiers. In 1871 he became city physician of Boston, and retained the office till 1880. He was chosen a member of the board of experts authorized by congress in 1878 to investigate the yellow fever, and in 1882 he was elected mayor of Boston. Dr. Green has given much time to historical studies, and for some years has been librarian of the Massachusetts historical society. In addition to a large number of papers on scientific and historical subjects, he has published "My Campaigns in America: a Journal kept by Count William de Deux-Ponts, 1780–'1," translated from the French manuscript, with an introduction and notes (Boston, 1868); "An Account of Percival and Ellen Green and of Some of their Descendants" (printed privately, Groton, Mass., 1876); "Epitaphs from the Old Burying-Ground in Groton, Massachusetts" (1879); "The Early Records of Groton, Mass., 1662–1677" (1880); "History of Medicine in Massachusetts," a centennial address delivered before the Massachusetts medical society at Cambridge, 7 June, 1881 (Boston, 1881); "Groton during the Indian Wars" (Groton, 1883); "Groton during the Witchcraft Times" (1883); "The Boundary-Lines of Old Groton" (1885); "The Geography of Groton," prepared for the use of the Appalachian (mountain) club (1886); and "Groton Historical Series" (20 numbers, 1883–'7).

GREEN, Seth, pisciculturist, b. in Rochester, N. Y., 19 March, 1817. He received a common-school education, but early manifested a passion for hunting, fishing, and woodcraft. For many years he was the proprietor of the only fish and game market near his home. In 1837 he conceived the idea of the artificial propagation of fish, and in 1838, during a trip to Canada, made observations on the habits of salmon. Observing that as soon as the spawn was cast the male salmon and other fish ate it, he devoted his attention to methods of protecting it, and increased the yield of fish till he had raised the product to ninety-five per cent. In 1864 he discovered a method of artificially impregnating dry spawn, and began the propagation of fish as a business at Caledonia, Livingston co., N. Y. In 1867, by invitation of the fish commissioners of four of the New England states, he experimented on the hatching of shad at Holyoke, on the Connecticut river, and by his improvements hatched in a fortnight's time 15,000,000, and in 1868, 40,000,000. His work was afterward extended to the Hudson, the Potomac, the Susquehanna, and other important rivers, where he succeeded in artificially propagating fifteen of the more common species with largely increased products. In 1868 he was appointed one of the fish commissioners of New York, and soon afterward made superintendent of fisheries in that state. He transported in 1871 the first shad ever taken to California. As a result, over 1,000,000 marketable shad were sold on the Pacific coast in 1885. He has hatched artificially the spawn of about twenty kinds of fish, and has also hybridized striped bass with shad, shad with herring, brook trout with salmon trout, brook trout with California salmon, salmon trout with white-fish, and European trout with American brook trout. He has been decorated with two gold medals by the Société d'acclimatation of Paris. He has invented important appliances for use in hatching shad, trout, and other fishes, and is the author of "Trout Culture" (Rochester, 1870), and "Fish Hatching and Fish Catching" (1879).

GREEN, Thomas, governor of Maryland, b. in England; d. in Maryland. He was one of the Roman Catholic pilgrims that accompanied Leonard Calvert to Maryland in 1634, and was appointed a privy councillor in 1639. Leonard Calvert named him governor on his death-bed. He served in 1637–'8, and was again chief executive for a part of 1649, during the absence of Gov. Stone. He was reappointed a privy councillor toward the end of the same year, and as such took part in the assembly that passed the toleration act. The date of his death is not known.

GREEN, Thomas, soldier, b. in Virginia in 1816; d. in Blair's Plantation, La., 14 April, 1864. His father was chief justice of Tennessee and president of Lebanon law-college. The son removed to Texas in early manhood, was a ranger in the war of Texan independence, and also served in the Mexican war. In 1855–'8 he was clerk of the supreme court of Texas. He afterward joined the Confederate army, and was engaged in the battles of Valverde, Bisland, and Galveston, and the capture of the "Harriet Lane." In the campaign of 1863 he commanded the cavalry of Gen. Richard Taylor's division, and repulsed the National army, commanded by Gen. Godfrey Weitzel and Gen. Cuvier Grover, at the battle of Bayou la Fourche. After this action he was appointed major-general for distinguished services, and placed in command of the cavalry of the trans-Mississippi department. In April, 1864, he commanded the Texas infantry in the Red river campaign. He was mortally wounded near Pleasant Hill, 12 April, 1864, by a shot from a National gun-boat.

GREEN, Thomas Jefferson, soldier, b. in Warren county, N. C., in 1801; d. there, 13 Dec., 1863. He removed to Texas early in life, and served as brigadier-general of volunteers in the war of Texan independence. In 1843, with other officers, he refused to obey the orders of Gen. Summerville

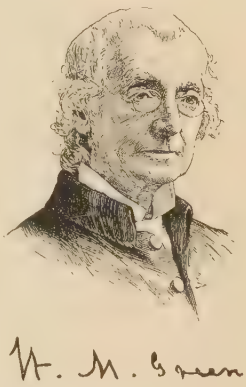
whose loyalty he doubted, and, with a small force, left the main body of troops and attacked the town of Mier. The battle was disastrous to the Texans, and 193 officers and men were taken prisoners. In attempting to escape, they were recaptured, taken to the city of Mexico, and every tenth man was ordered to be shot by Santa-Anna. Green was kept a prisoner at hard labor till 16 Sept., 1844, when, with 103 others, he was released. He removed to California several years later, served in the state senate, and was major-general of militia. When the civil war began he entered the Confederate army, and was engaged in the early Virginia campaigns. He published "The Mier Expedition" (New York, 1845).—His son, **Wharton Jackson,** politician, b. in St. Mark's, Fla., about 1840, was educated at Harvard, the U. S. military academy, and the universities of Virginia and Cumberland, Tenn. He visited Europe in 1858, and on his return settled as a planter in Warren county, N. C. He served throughout the civil war in the Confederate army as lieutenant-colonel of a North Carolina regiment, was wounded at Washington, N. C., and Gettysburg, and imprisoned at the close of the war at Johnson's island. He was a delegate to the Democratic national convention of 1868, and was elected to congress in 1882, and re-elected in 1884.

GREEN, Traill, chemist, b. in Easton, Pa., 25 May, 1813. He was graduated at the medical department of the University of Pennsylvania in 1835, was for a year physician to the Philadelphia dispensary, and then settled in Easton, where he has since practised. In 1837 he was elected professor of general and applied chemistry in Lafayette, and four years later was called to the chair of natural sciences in Marshall college, where he remained until 1847. He returned during the same year to Easton, resuming his chair in Lafayette, which he has since occupied. At his own expense he erected an observatory there, and on the establishment of the Pardee scientific department of Lafayette he became its dean. Dr. Green has held several state appointments in connection with hospitals and similar work, and was for some time president of the school board at Easton. He is a member of many scientific societies, was president of the Pennsylvania medical society in 1868, and first president of the American academy of medicine. He delivered the annual address before the medical department of the University of Pennsylvania in 1880, and received the degree of LL. D. from Washington and Jefferson colleges in 1866.

GREEN, William Alexander, physician, b. in Augusta, Ga., 5 Jan., 1834. He spent his early life as a clerk in a drug-store, devoting his spare hours to the study of medicine. In 1857 he was graduated from the Augusta medical college. He then settled in Americus, Ga., and remained there till 1861, when he entered the Confederate army. He afterward became surgeon, and then chief surgeon of artillery in the 3d army corps, on the staff of Gen. D. P. Hill, where he remained till the surrender of Lee. He served on many battle-fields, and was the first to bring to the notice of the medical authorities in the field the operation for resection. He was the inventor of a hypodermic syringe, the designer of a hypodermic syringe-needle, and of Green's "pocket-cases." He introduced many new remedies hypodermically, and gave much attention to pharmacy and chemistry. After the war he returned to Americus, and in 1875 removed to Macon. He has published many articles in medical journals, and is the author of papers on the "Small-Pox," "Vaccination and its Results," and "The Use of the Hypodermic Syringe."

GREEN, William Henry, clergyman, b. in Groveville, Burlington co., N. J., 27 Jan., 1825. He was graduated at Lafayette in 1840, studied theology at Princeton, where he became a teacher in 1846, and was ordained in 1848. He became pastor of the Central Presbyterian church in Philadelphia in 1849, and since 1851 has been professor of Hebrew and Old Testament literature in Princeton theological seminary. He was chairman of the Old Testament company of the American committee for the revision of the Bible. In 1868 the presidency of Princeton was offered him, but he declined it. In addition to many of the leading articles in the "Princeton Review," he has published "Hebrew Grammar"; "Elementary Hebrew Grammar"; "Hebrew Chrestomathy"; "The Pentateuch Vindicated from the Aspersions of Colenso"; and "The Argument of the Book of Job Unfolded."

GREEN, William Mercer, P. E. bishop, b. in Wilmington, N. C., 2 May, 1798; d. in Sewanee, Tenn., 13 Feb., 1887. His father, a wealthy rice-planter, died when his son was a boy. On his mother's side he was of Quaker origin, and owed much to the example and strict discipline which she furnished and enforced. He was graduated at the University of North Carolina in 1818, and studied theology. He was ordered deacon in Christ church, Raleigh, N. C., by Bishop R. C. Moore, 29 April, 1821, and ordained priest in St. James's church, Wilmington, N. C., 20 April, 1822, by the same bishop. He became rector of St. John's church, Williamsborough, in 1821. Four years later he removed to Hillsborough and became rector of St. Matthew's church, which was founded by him. In 1837 he was appointed chaplain and professor of belles-lettres in the University of North Carolina. He received the degree of D. D. from the University of Pennsylvania in 1845. Dr. Green was elected to be the first bishop of the diocese of Mississippi in 1849, and was consecrated in St. Andrew's church, Jackson, Miss., 24 Feb., 1850. Bishop Green devoted himself to his work with energy, but after thirty-three years of faithful service was compelled, by the infirmities of age, to avail himself of the aid of an assistant (1883). He was among the earliest and most earnest founders of the University of the South, at Sewanee, Tenn., in 1860. In 1867 he became its chancellor. Bishop Green printed a few sermons on "Baptismal Regeneration" and "Apostolic Succession," and also an oration on "The Influence of Christianity upon the Welfare of Nations" (Hillsborough, N. C., 1831); but his chief publications were a brief "Memoir of the Right Reverend Bishop Ravenscroft, of North Carolina" (1830), and a "Life of the Right Reverend Bishop Otey, of Tennessee" (New York, 1886).



W. M. Green

GREENE, Albert Gorton, lawyer, b. in Providence, R. I., 10 Feb., 1802; d. in Cleveland, Ohio, 4 Jan., 1868. He was graduated at Brown in 1820, studied law with John Whipple, and was admitted to the bar in 1823. He practised in Providence, where, in 1832, he was elected clerk of the city council, and clerk of the municipal court, which

office he held for twenty-five years. He was chosen judge of the municipal court in 1858, and after failing health compelled his resignation, in 1867, he resided with his daughter in Cleveland. He was actively connected with the educational interests of Rhode Island, and is said to have drafted the original school bill of the state. Judge Greene was associated in the founding of the Providence athenæum, and was president of the Rhode Island historical society from 1854 till his death. He began a collection of American poetry, which passed into the hands of Caleb Fiske Harris, from whose estate it was purchased by Henry B. Anthony and bequeathed to Brown university. A catalogue of the collection has been prepared and published by John C. Stockbridge (Providence, 1886). Judge Greene published in 1833 a quarterly entitled the "Literary Journal," but discontinued it at the end of the year. He was the author of several well-known poems, including "Old Grimes," "The Militia Muster," "Adelheid," "The Baron's Last Banquet," and "Canonchet," published in Wilkins Updike's "History of the Episcopal Church in Narragansett" (New York, 1847).

GREENE, Asa, author, b. in Ashburnham, Mass., in 1788; d. in New York city in 1837. He was graduated at Williams in 1813, and received his medical degree at the Berkshire medical school in 1827. About 1830 he settled in New York, where he became a bookseller, and for some time edited the "New York Evening Transcript." He possessed great humor, and had good powers of description. His books include "The Life and Adventures of Dr. Dodimus Duckworth, A. N. Q.; to which is added the History of a Steam Doctor" (New York, 1833); "The Perils of Pearl Street" (1834); "The Travels of Ex-Barber Fribbelton in America" (1835); "A Yankee among the Nullifiers" (1835); "A Glance at New York" (1837); and "Debtors' Prison" (1837).

GREENE, Charles Ezra, engineer, b. in Cambridge, Mass., 12 Feb., 1842. He was graduated at Harvard in 1862, and later, during the civil war, served as a volunteer in the U. S. army. He was graduated at the Massachusetts institute of technology in 1868, and in 1872 became professor of civil engineering in the University of Michigan. In addition to his teaching he has constructed the Huron river trestle bridge at Ann Arbor. Professor Greene is a member of the American society of civil engineers, and scientific associations. Besides papers contributed to engineering journals, he has published "Graphical Methods for Analysis of Bridge Trusses, extending to Continuous Girders and Draw-Spans" (New York, 1875); and "Graphics for Engineers, Architects, and Builders," in three volumes, entitled, respectively, "Roof Trusses," "Bridge Trusses," and "Arches in Wood, Iron, and Stone" (1876–'80).

GREENE, Christopher, soldier, b. in Warwick, R. I., 12 May, 1737; d. in Westchester county, N. Y., 13 May, 1781. He served in the Rhode Island legislature in 1772–'4, and was chosen a lieutenant in the Kentish Guards in 1774. In May, 1775, he was appointed by the legislature a major in the army of observation, was given command of a company, marched to Cambridge, and subsequently was placed by Washington in command of the first battalion under Benedict Arnold, whom he accompanied on his expedition to Quebec. In the assault on that city under Richard Montgomery he led a detachment of troops, and when Arnold was wounded he was taken prisoner. He was exchanged after eight months' confinement, and in June, 1776, he was promoted to major under James M. Varnum. In October he was made colonel, with charge of Fort Mercer, on the Delaware. A year later, in October, 1777, the fort was assaulted by the Hessians, under Count Donop, who were repulsed with heavy loss, and their commander mortally wounded. Congress voted Greene a sword, which in 1786 was presented to his son by Gen. Henry Knox, who was then secretary of war. In 1778 Col. Greene and his regiment were detached for special service in Rhode Island, and was placed under the command of Gen. John Sullivan, whose headquarters were in Providence. Early in 1781, while in command on the Croton river, his headquarters were surrounded by a party of loyalists, by whom he was killed. A monument to his memory was erected near Red Bank, N. J., in October, 1829, by New Jersey and Pennsylvania volunteers.

Greene

GREENE, David, clergyman, b. in Stoneham, Mass., 15 Nov., 1791; d. in Westborough, Mass., 7 April, 1866. He was graduated at Yale in 1821, spent two years in teaching, and then was graduated at the Andover theological seminary in 1826. Two years later he became assistant secretary of the American board of commissioners for foreign missions, and during his first year of service made a tour extending over nearly 6,000 miles, and lasting eight months, during which he visited nearly thirty missions to the Indian tribes. In 1832 he was chosen corresponding secretary, succeeding Jeremiah Evarts, and was ordained as a Congregational minister in August, 1833. He continued his connection with the board until 1848, and his duties consisted largely in editing the "Missionary Herald," and in correspondence with the Indian missions. Failing health caused him to decline a re-election, and he settled in Westborough, where he spent the remainder of his life, except a short residence in Windsor, Vt. Mr. Greene prepared twelve of the "special reports" of the society, many of which were of great value. He was also associated with Lowell Mason in the compilation of the hymn-book called "Church Psalmody."

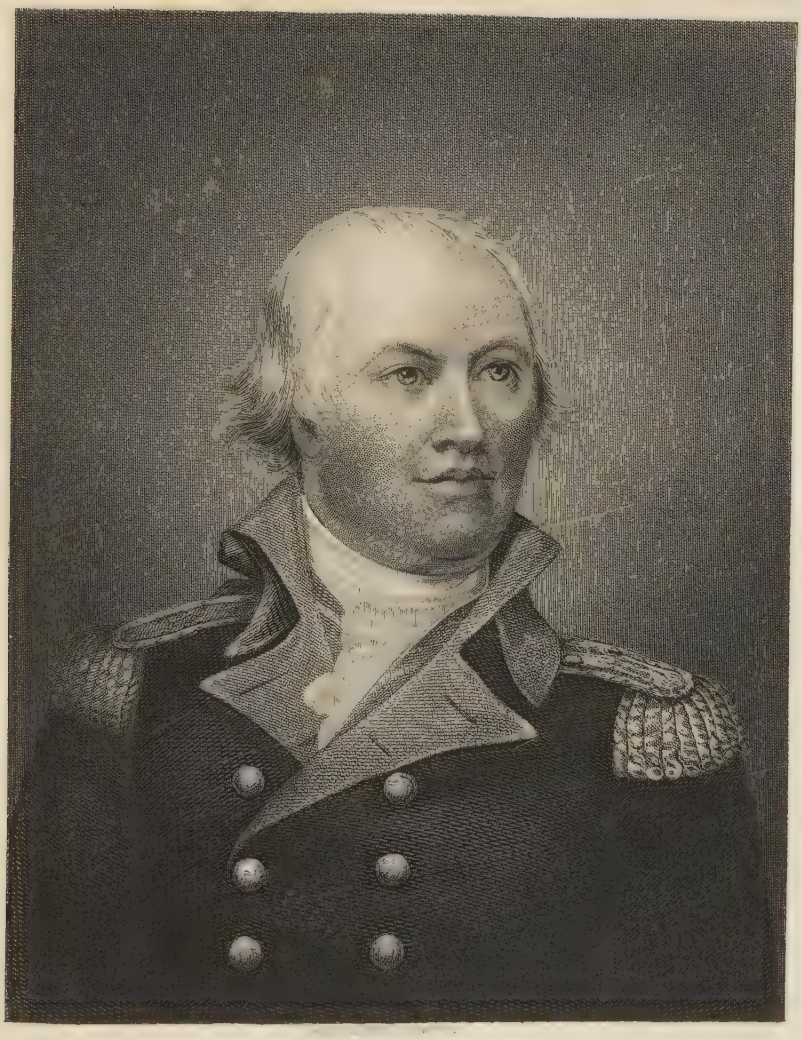
GREENE, Frances Harriet, author, b. in Smithfield, R. I., 4 Sept., 1805; d. in California, 10 June, 1875. She was educated in Providence, R. I., and was early thrown on her own resources for support through the business failure of her father, George Whipple, who was at one time a wealthy citizen of Smithfield. In 1842 she married at Lowell, Mass., Charles C. Greene, an artist, and removed to Springfield, Mass. The marriage proved uncongenial, and she was divorced in September, 1847. In 1860 she visited California, was married in 1862 to William C. McDougal, of that state, and remained there till her death. In the Dorr rebellion in Rhode island, in May, 1842, she became a violent partisan of the suffrage party, and suffered much

social unpopularity from her course. During this year she conducted "The Wampanoag," a journal designed for the elevation of the laboring classes, and contributed frequently to "reform periodicals," particularly to "The Spiritual Philosopher," a paper devoted to the exposition of the principles of nature in their application to individual and social life. In 1848 she became the editor of "The Young Ladies' Journal of Science, Literature, and Art," a monthly magazine published in New York city. Mrs. Greene is the author of "The Original" (Providence, R. I., 1829); "Memoir of Eleanor Eldridge, a Colored Woman" (1838); "The Mechanic" (1841); "Might and Right, a History of the Dorr Rebellion" (1844); "Primary Class-Book of Botany" (New York, 1855); "Shahmah in Pursuit of Freedom" (1858); "The Dwarf Boy, and Minor Poems" (1858); and a work published posthumously, entitled "Beyond the Veil," by Emanuel Swedenborg and others, through the mind of Frances H. Greene McDougal (1878).

GREENE, George Sears, soldier, b. in Apponaug, Warwick, R. I., 6 May, 1801. He is a descendant in the sixth generation from John Greene, deputy governor of Rhode Island, whose father, John, came from Salisbury, England, in 1635, and settled in Warwick, R. I., in 1645. George Sears was graduated at the U. S. military academy in 1823, second in his class. He served in various garrisons and as instructor at West Point until 1836, when he left the army and became a civil engineer, building many railroads in the states of Maine, Massachusetts, Rhode Island, New York, Maryland, and Virginia. In 1856 he served in the Croton aqueduct department in the city of New York. He designed and built the reservoir in Central park, and the enlargement of High Bridge. He re-entered the army in 1862 as colonel of the 60th New York regiment, and was appointed brigadier-general of volunteers, 28 April, 1862. He commanded his brigade at Cedar Mountain, 9 Aug., 1862, and was in command of the 2d division of the 12th army corps in the battle of Antietam. He also led his brigade at the battle of Chancellorsville. At Gettysburg, on the night of 2 July, 1863, with a part of his brigade, he held the right wing of the Army of the Potomac at Culp's Hill against more than a division of Confederate troops, thereby averting a disaster which would have resulted from turning the right wing of the army. He was transferred to the western armies in September, 1863, and in a night engagement at Wauhatchie, near Chattanooga, 28 Oct., 1863, was dangerously wounded in the jaw. This wound disabled him from active service till January, 1865, when he rejoined Sherman's army in North Carolina and participated in the engagements preceding Johnston's surrender. He was brevetted major-general of volunteers for his services on 13 March, 1865, and retired from the army in 1866. In 1867 he became chief engineer and commissioner of the Croton aqueduct department, and held the office till 1871, when he was made chief engineer of public works in Washington, D. C., but resigned in 1872. He was president of the American society of civil engineers from 1875 till 1877, and since that date has been engaged as consulting engineer on various works. For several years he was also president of the New York genealogical and biographical society.—His son, **George Sears,** Jr., b. in Lexington, Ky., 26 Nov., 1837, entered Harvard in 1866, but left before graduating, in order to study civil engineering under his father. He served as assistant engineer on the Croton aqueduct, on various railroads in Cuba, and in copper mining on Lake Superior. During 1868 he conducted extensive and accurate topographical surveys in Westchester county and Long Island City, N. Y., and at that time introduced several valuable improvements in instruments. These have since been adopted by the U. S. coast survey, and have come into general use. In 1875 he was appointed engineer-in-chief of the Department of docks, New York city, in which capacity he designed and executed river walls, wharves, and piers in difficult situations. In 1867 he became a member of the American society of civil engineers, was director from 1882 till 1886, and vice-president in 1885–'6. —Another son, **Samuel Dana,** naval officer, b. in Cumberland, Md., 11 Feb., 1839; d. in Portsmouth navy-yard, N. H., 11 Dec., 1884, was graduated at the U. S. naval academy in 1859, and served as midshipman on the "Hartford," of the China squadron. On his return to the United States in 1861 he volunteered for service on the iron-clad "Monitor," then building at New York, and served continuously on this vessel from the day she was launched until she foundered off Cape Hatteras on the night of 29 Dec., 1862. The "Monitor" left New York, 6 March, 1862, for Hampton Roads. She was built for river and harbor service, and on her way narrowly escaped sinking on two occasions, so that her officers and crew had been without sleep for forty-eight hours when they arrived at Hampton Roads on the morning of 9 March, 1862. Notwithstanding their exhaustion, they proceeded immediately to attack the "Merrimac," and in the memorable engagement that followed, her commanding officer, Lieut. Worden, directed the movements of the vessel from the pilot-house, while Lieut. Greene had charge of the guns in the turret. He personally fired every shot until near the close of the action, when the command devolved on him in consequence of the wounding of Lieut. Worden. In the delay incident to the change of command the vessels drifted apart. As soon as Lieut. Greene reached the pilot-house he turned the "Monitor" again toward the "Merrimac," but the latter was already in retreat toward Norfolk. Being without a pilot, he was unable to follow the "Merrimac" into the tortuous channel of the Elizabeth river, and, after firing a few shots after her, returned to the wooden vessels which had been saved from destruction by the timely arrival of the "Monitor." He was afterward engaged in the attack on Fort Darling and other naval actions on the James river. After the loss of the "Monitor" he served as executive officer of the "Florida" on blockade duty in 1863, of the "Iroquois," in search of the "Alabama," in 1864–'5, and on various other vessels from 1865 till 1869. He was promoted to lieutenant-commander in 1866, and to commander in 1872, and commanded the "Juniata" in 1875, the "Monongahela" in 1876–'7, and the "Despatch" in 1882–'4. He also served at the naval academy as assistant professor of mathematics in 1865–'8, of astronomy in 1871–'5, and as assistant to the superintendent in 1878–'82. He received a vote of thanks from the legislature of Rhode Island for his gallant services in the action between the "Monitor" and the "Merrimac."—Another son, **Francis Vinton,** soldier, b. in Providence, R. I., 27 June, 1850, was graduated at the U. S. military academy in 1870, and assigned to the engineer corps. He served on the international commission for the survey of the northern boundary of the United States, as assistant astronomer and surveyor in 1872–'6, was promoted to 1st lieutenant, 13 Jan., 1874, and was military attaché to the U. S. legation at St. Petersburg in 1877–'9,

being for a year with the Russian army in the field. He was assistant to the engineer in charge of public works in the District of Columbia in 1879–'85, being made captain in January, 1883, instructor in practical engineering at West Point from 1 Sept., 1885, to January, 1886, and on 31 Dec. of the latter year resigned his commission. He has published "Deflections of the Plumb-Line along the 49th Parallel" (1876); "The Russian Army and its Campaigns in Turkey in 1877–'8" (2 vols., New York, 1879); "Army Life in Russia" (1880); and "The Mississippi" (in "Campaigns of the Civil War" series, 1882).

GREENE, Nathanael, soldier, b. in Potowomut, within the jurisdiction of Warwick, R. I., 6 June, 1742; d. at Mulberry Grove, Ga., 19 June, 1786. He was the fifth in descent from John Greene, a surgeon, who came over in the next company after Roger Williams, and became an original proprietor in both Providence and Shawomet. Nathanael was the fourth son in a family of eight boys and one girl, two being the issue of Nathanael the elder's first marriage, and the others of the second. The elder Nathanael was a Quaker, exercising on Sunday his gift as a preacher, and his sons were brought up according to the strictest principles of that sect. Young Nathanael was trained in common with the other boys to work in the field, the mill and the forge. Young Greene was of a robust nature, fond of athletic sports, in which he excelled; but he was also of a studious disposition. A chance meeting with a young collegian named Giles aroused a desire for more knowledge than the crude educational materials in vogue in this Quaker community afforded His father was appealed to, to enlarge his means of study; and shortly afterward Nathanael, under the guidance of a Scotchman named Maxwell, began Latin and geometry. Euclid became an absorbing study, and a copy of this treatise, purchased with his own earnings, was his almost constant companion on his daily round of duty. Between 1753 and 1755 he made the acquaintance of President Stiles, then a clergyman in Newport, and under his guidance acquired a knowledge of such authors as Locke, Watts, and Swift. The latter was his literary model, and he shaped his ideas of history upon Ferguson's "History of Civil Society." About the same time he met Lindley Murray, the "grammarian of three generations of ungrateful school-boys," with whom he had many profitable discussions on the subjects of his readings. In 1760 Nathanael took a step that exhibited his independence of judgment and action. At that time a strong prejudice against inoculation prevailed, and the practice of it had been forbidden by the assemblies of Massachusetts and Rhode Island, the latter rejecting it as late as 1772. Greene, finding the scourge of small-pox raging in New York on one of his visits, submitted to inoculation, much to the scandal, it is presumed, of his neighbors and friends. In order to conduct intelligently a lawsuit in which the family had become involved, he made, in his twentieth year, a thorough study of Blackstone's "Commentaries" and Jacob's "Law Dictionary." As the business of the Greene forge, at Coventry, required the constant attention of one of the partners, Nathanael removed to that place in 1770. In April, 1765, he had been admitted a freeman in Warwick, by virtue of his proprietorship of an estate at West Greenwich. Three years later he canvassed the county for signatures to the association test, and shortly after his removal to Coventry he sat in the general assembly as a representative from that place. The disputes between the colonies and the British government were commented upon by the young legislator, and so well known were his sentiments that the royal agents appointed to seek out the offenders in the burning of the "Gaspé" at once fixed their suspicions upon him, and for some time he was in danger of being summoned to the court of inquiry at Newport. He was convinced that war would be the outcome of pending troubles, and applied himself to the study of military science. From Sharpe's "Military Guide," Turenne's "Memoirs," Cæsar's "Commentaries," and Plutarch, he derived that theoretical military knowledge which he so successfully put into practice in his military career. In 1774 an independent company, recruited from East Greenwich, Warwick, and Coventry, was formed under the name of the Kentish Guards, and Greene immediately enrolled himself as a private, after failing of an election to the office of lieutenant. Even his admission as a private was some time in doubt, owing to a slight limp in his gait. In securing his military equipment, Greene showed his customary energy, making a trip to Boston, and not only bringing back the accoutrements concealed under straw in his wagon, but also having with him a deserter from one of the British regiments in Boston, whom he had employed to act as drill-master. The Quakers looked askance at Greene's interest in military matters, and a conference resulted in the severance of his formal connection with that fraternity; but he never lost his attachment for this simple religion. The news of the battle of Bunker Hill aroused the Rhode Island assembly, and they voted to raise a brigade of three regiments to join the forces around Boston, commissioning Greene as brigadier-general. This contingent joined the American army at Jamaica Plain, on 3 June, 1776, and the young officer at once proceeded with the task of organizing the undisciplined men in his command. Washington arrived at Cambridge on 2 July, and upon Greene devolved the duty of welcoming the commander-in-chief in the name of the soldiers, which task he performed in a dignified and pleasing manner. During the siege of Boston he was stationed at Prospect Hill, and in the affair of Dorchester Heights he commanded a brigade. On the evacuation of Boston he was ordered to Long Island, but during the disastrous operations in this campaign he lay at the point of death. The American army made a stand at Harlem in the retreat from Long Island; but the critical situation induced Greene, who had been promoted to major-general, to propose to Washington the abandonment of New York, and the occupation of the Westchester shore from King's Bridge, and the council of war finally approved the plan. Fort Washington was to be held, to obstruct the passage of the Hudson; but its downfall soon followed, and Greene, who advised its retention, has suffered in reputation in consequence. The question of his responsibility has been the subject of controversy between Bancroft, the historian, and George W. Greene. Cornwallis crossed the Hudson on 18 Nov., 1776, and made a movement to cut off the American retreat to the Hackensack; but Greene engaged him at the head of the stream, and held him until the troops had crossed. The retreat through the Jerseys now began, and the harassed army brought up at Trenton on 2 Dec., where Washington at once set about getting his baggage and stores across the Delaware. On 25 Dec. the American army, with Greene in command of the left wing and Sullivan of the right,



Nath Greene

surprised the Hessian garrison at Trenton, and gained a complete victory. Greene urged a rapid pursuit of the enemy, but was overruled by a council of war. The victory, however, was soon followed by a strategic movement on the weakened garrison at Princeton, and after a sharp engagement the British retreated to join the main army under Cornwallis. Greene's conduct and wise counsels throughout the campaign had commended him to Washington; and when, in March, 1777, the latter found it necessary to present to congress his views and plans, Greene was selected for the mission. The "Conway cabal," which in the succeeding winter assumed dangerous proportions, had already begun its work of discrediting Washington and Greene with congress, and partly on this account Greene was sent. He succeeded in having a resolution passed relieving Washington from subservience to a council of war.

But Greene's most important work at this period was the part he took in the battle of the Brandywine, 11 Sept., 1777. The only hope of success for the British in the attempt to drive Washington from his very strong position at Chadd's and Brinton's fords was in turning his right flank by a circuitous march of eighteen miles up the Lancaster road and across the forks of the Brandywine toward Birmingham meeting-house. The British were safe in trying this, because their superior force (18,000 against 11,000) enabled them to separate the wings of their army with little risk. The movement was admirably conducted by Cornwallis, but he did not succeed in striking the American flank, because Washington made a new front with his right wing under Sullivan, near Birmingham meeting-house, so that Sullivan received the attack on his front. Yet, in spite of this, the superiority of the British in discipline gave them the advantage in the desperate fight that ensued, and Cornwallis succeeded in pushing Sullivan obliquely toward the village of Dilworth. If this movement had been completed it would have cut the American army in two and utterly routed it; but it was foiled by the generalship of Greene in executing Washington's prompt orders to stop the dangerous gap. Greene was in command of the reserve, stationed on a lofty eminence a little in the rear of Wayne, who commanded the centre behind Chadd's ford. On receiving Washington's order he marched his brigade five miles in forty-five minutes, and, connecting with Sullivan near Dilworth, averted the impending destruction of the army. Wayne had time to withdraw the centre, and Armstrong the right wing, in good order; and so the whole army was united at Chester in excellent condition. Careless writers have sometimes vaguely described the American army as "routed" at the battle of the Brandywine, and this notion has crept into text-books of American history. An army cannot properly be said to be "routed" when it is ready to renew the fight next day. The best commentary on the battle of the Brandywine is furnished by the fact that, while it was fought on 11 Sept., it was not until the 26th of that month that Gen. Howe reached Philadelphia. This delay was due to Washington's skilful manœuvring; but the best of generals cannot manœuvre and detain the enemy with an army that has just been routed. The reason why the Americans were not routed at the Brandywine is to be found in Greene's memorable double-quick march to Dilworth, and the admirable manner in which he sustained the languishing fight at that critical point.

On 26 Sept., Gen. Howe, having eluded Washington on the Schuylkill, entered Philadelphia, stationing the bulk of his army at Germantown, and on 4 Oct. the battle of Germantown was fought. Greene's division, moving in a circuitous course to attack the front of the British right wing, delayed by the difficulties of the route and a mistake of his guide, did not get to the field as early as was planned, and Wayne accidentally occupied the ground assigned it. When victory seemed imminent an unfortunate mishap turned the tide, and Gen. Greene again, with wonderful skill, covered the retreat. The army went into winter quarters at Valley Forge, Greene meanwhile crossing to the west bank of the Delaware to oppose Cornwallis's march for its occupation; but he prudently retired on learning the unequal strength and resources of the opposing forces. The defective organization and administration of the quartermaster-general's department had been, from the beginning of the war, a source of embarrassment to the army; and, at the earnest solicitation of Washington, Greene accepted, in March, 1778, the office of quartermaster-general, reserving his right to command on the field of battle. On 18 June the British evacuated Philadelphia and took up the line of march through the Jerseys. Greene and Hamilton urged giving them battle, and on 28 June a general attack was made on Clinton's forces at Monmouth Court-House. Gen. Charles Lee commanded the advanced corps, Stirling the left, and Greene the right wing of the American forces. Lee, who had frowned upon the plan of opposing Clinton's march, disgraced himself on the day of battle by dilatory and disobedient conduct. After the battle, Clinton continued his retreat to New York, and Washington, marching northward, crossed the Hudson and encamped in Westchester county. After the battle, Greene, taking no time for rest, immediately attended to the numerous orders and dispositions required of him as quartermaster-general.

On the arrival of Count d'Estaing with the French fleet, it was determined to make a combined attack on Newport. Greene, from local interest, wished to take part in the expedition, and in August took up his quarters with one division of the army at Tiverton. The designs of the allies failed through a variety of mishaps, chief among which was the disablement of the French fleet by a tremendous gale. Shortly afterward Greene went to Philadelphia, at the request of the commander-in-chief, to give information of the late expedition, and the causes of its failure, to congress, and there he was received with distinguished consideration. The year 1779 was inactive and uneventful, the Americans held the line of the Hudson, and the operations of the enemy were confined to burning defenceless towns on the coasts of Connecticut and Virginia. Greene found abundant labor in his difficult and annoying duties as quartermaster-general. The delays of congress in providing for a systematic method of raising supplies caused the greatest annoyance. The winter of 1780 was one of great suffering to the Americans for the want of proper shelter and lack of food. A general defection of the troops was threatened, and Knyphausen, learning of it, and hoping to deal a decisive blow, hastened from Staten Island, and on 7 July, 1780, took possession of Elizabethtown, and burned the village of Connecticut Farms, but was driven back from Springfield to the coast, where he tarried until Clinton's arrival from the south. Washington had proceeded northward with his main body, leaving Greene, with Maxwell's and Stark's brigades, Lee's corps,

and the militia, to cover the country and the public stores. Clinton attacked Greene at Springfield on 23 June, 1780; but Greene held him at bay at the Rahway bridges, and, gradually contracting his front, which had been lengthened to cover the mountain-passes, secured a strong position back of the town, and there awaited another attack. Clinton's forces, after setting fire to the town, retreated, and did not halt until they had reached Staten Island. Greene and his officers were thanked in general orders. On 17 Sept., Washington set out for Hartford, for a conference with Rochambeau, leaving Greene in command of the army. The Americans moved forward to Tappan on the 19th, and late in the evening of the 25th Greene was apprised, in a few hurried lines from Hamilton, of Arnold's treason. The captive André arrived at Tappan under close guard on 28 Sept., and the following day a board of inquiry, with Greene as president, was convened for his trial. With tears Greene signed the decree of the court condemning the young officer to death. Clinton despatched three commissioners to argue André's case, and Greene was sent by Washington to confer with them; but their efforts were unavailing. It has been asserted, but not confirmed, that Greene cast a deciding vote in the council against granting André's prayer to be shot instead of hanged. He held that André, if punished at all, should receive the punishment meted to spies according to the laws of war. In August, 1780, Gen. Greene, annoyed by the inefficiency of congress in providing supplies, and rightly suspecting an intention on its part of interfering with him in the discharge of his duties as quartermaster-general, resigned that office. Washington's enemies in congress chose to consider this action as a mark of disrespect for that body, and attempted unsuccessfully to drive him from the army. The post at West Point, left vacant by Arnold's treason, was confided to Greene, who assumed the command on 8 Oct., 1780. Gates's failure in the southern campaign compelled his recall in August, and by common consent Greene was looked upon as the fittest man to retrieve the fortunes of the southern army. Washington, empowered by congress, wrote on 14 Oct., asking Greene to take Gates's late command. The task he found before him on taking command at Charlotte, 2 Dec., 1780, was formidable enough to daunt the boldest spirit. In front of him was an army of 3,224 men, abundantly clothed and fed, well disciplined, elated with victory, and led by an able general. To oppose this force, he had an army of 2,307 men, of whom 1,482 were present and fit for duty, 547 were absent on command, and 128 were detached on extra service, half fed, scantily clothed, cast down by defeat, and many of them defiant of all discipline. Furthermore, the country was infested with Tories. Recognizing the impossibility of facing Cornwallis with such inferior numbers, Greene resolved to divide his forces, by which means he might not only secure an abundant supply of food, but could keep the enemy within narrower bounds, cut them off from the supplies of the upper country, revive the drooping spirits of the inhabitants, threaten the posts and communications of the enemy, and compel him to suspend his threatened invasion of North Carolina. Morgan was detached with the famous Maryland brigade, and Col. Washington's regiment of light dragoons, to take up a position near the confluence of the Pacolet and Broad rivers, in the hope of threatening his adversary's left flank. With the other division, Greene, after a laborious march through a barren country, took post at Hick's creek on the Pedee, near the South Carolina line. Tarleton, who was hastening forward from the main army, meditating a decisive blow at his despised opponents, attacked Morgan at the Cowpens, on 17 Jan., 1781, and, after a hard-fought battle, was utterly routed, losing over 300 men killed and wounded, with about 500 prisoners, out of a total force of 1,100. Cornwallis was infuriated by this disaster, and, ridding himself of his heavy luggage and whatever might impede his progress, at once set out in active pursuit of Morgan. In a most brilliant march Greene effected a junction of the two divisions of his army at Guilford Court-House on 9 Feb., 1781. He had expected here to meet re-enforcements from Virginia, but, as they had not yet arrived, he thought it best to retreat toward them and put the broad stream of the Dan between himself and the enemy. By practising every expedient his fertile mind could devise, he succeeded in getting across the river, without loss of men, baggage, or stores. Cornwallis, who had been close upon his heels for more than 200 miles, finding his troops fatigued and dispirited by their fruitless march, prudently retired to Hillsborough. Presently Greene received his re-enforcement, and thereupon, crossing the Dan, came to battle with Cornwallis at Guilford Court-House, 15 March. Although this battle was a tactical success for the British, the Americans nevertheless gained a decisive strategic advantage, for the enemy, being too much shattered to continue the contest, retired to Wilmington, from which point he moved into Virginia to effect a junction with the forces of Gen. Phillips. Greene immediately turned his face southward, leaving Cornwallis to proceed unmolested into Virginia. Greene's reasons for this move were given to Washington in a letter on 29 March, as follows: "I am determined to carry the war immediately into South Carolina. The enemy will be obliged to follow us, or give up the posts in that state." If the former took place, it would take the war out of the devastated state of North Carolina, and give the inhabitants time to recuperate; and, in the event of leaving the posts in South Carolina to fall, the enemy would lose far more than they could gain in Virginia.

The most important strategic post in South Carolina was Camden, which stood at the intersection of the principal roads leading to the north and west with those leading down to the seaboard. On 20 April the American army established itself in a strong position at Hobkirk's Hill, near Camden, and on the 25th it was assaulted there by the British under Lord Rawdon. This was exactly the move for which Greene had been preparing. The assault ought to have resulted in the total ruin of the British army; but, through an accidental misunderstanding of orders, Greene's very best men in the Maryland brigade behaved badly, and he was forced to abandon his position. The defeat, however, did not prevent his reaping, as he invariably did, all the fruits of victory. He had already sent Marion and Lee to take Fort Watson, and thereby cut Rawdon's communications with the coast. This operation, admirably planned and brilliantly successful, obliged Rawdon to abandon Camden and fall back toward Charleston, and from this time Greene had the game entirely in his own hands. During May and June he reconquered all the back country of South Carolina and Georgia, capturing Fort Motte, Fort Granby, Orangeburg, and Augusta, with all their garrisons. After a sanguinary siege of twenty-eight days, he forced the British to evacuate Fort Ninety-Six, and thus give up their last hold upon the interior.

Greene's army had now been incessantly in motion for seven months. After a rest of about six weeks in a secure position on the high hills of Santee, he met the British army, in the command of which Rawdon had been succeeded by Stuart, in a decisive action at Eutaw Springs. In the morning the British were driven off the field by a superb charge upon their left flank; but, after retreating some distance in disorder, they rallied in a strong position, protected by a brick house and palisaded garden, and succeeded in remaining there during the afternoon, but only because Greene desisted from further attack until the cool of the evening. For thus holding their second position a few hours, albeit on sufferance, the British absurdly claimed a victory, and the error has been repeated by American writers who ought to know better. At nightfall the British retreated, as Greene saw they must, and he now renewed his attack. The enemy were chased nearly thirty miles by Marion and Lee, and there was a wholesale capture of prisoners. Of the 2,300 men with whom Stuart had gone into the battle, scarcely more than 1,000 reached Charleston, where they remained for the next fourteen months, shut up under the shelter of their fleet. The battle of Eutaw Springs was a decisive and final victory for the Americans in South Carolina.

Congress testified its appreciation of Greene's brilliant conduct by a gold medal and a vote of thanks. Little more was done till the next July, when Savannah was taken by Wayne. On 14 Dec., 1782, Greene marched into Charleston at the head of his army, and the next summer, when the army was disbanded, he journeyed homeward, stopping at Philadelphia, where he was greeted by enthusiastic crowds and treated with high consideration by the congress that had come so near depriving the country of his services. In the autumn of 1785 he removed to a plantation at Mulberry Grove, which had been presented to him by the state of Georgia. Although his fortune was impaired by the war, and he was compelled to bear a heavy pecuniary responsibility incurred through the dishonesty of an army contractor for whom he had become security while quartermaster-general, his life on his plantation was very happy in the society of his charming wife and genial friends. His death, at the age of forty-four, was caused by sunstroke. In a speech before the Society of the Cincinnati, Alexander Hamilton said that Greene's qualifications for statesmanship were not less remarkable than his military ability, which was of the highest order. His series of campaigns from December, 1780, to September, 1781, will bear comparison with the best work of Turenne or Wellington. What he might have done on a greater scale and with more ample resources, it is, of course, impossible to say; but the intellectual qualities that he showed were precisely those that have won distinction for the foremost strategists of modern times. It would be difficult to praise too highly the superb manœuvring that drew Cornwallis 200 miles from his base, forced a battle on him at Guilford under such circumstances that victory proved hardly less fatal to him than defeat, and thus turned him off into Virginia, leaving Greene's hands free to drive Rawdon from Camden and reconquer South Carolina. Congress voted that a monument to Greene be raised at the seat of government; but more than ninety years elapsed before the resolve was fulfilled by placing an equestrian statue, from the hand of Henry Kirke Brown, in Washington. A monument, dedicated to Greene and Pulaski jointly, stands in a public square in Savannah. Greene married, 20 July, 1774, Miss Catherine Littlefield, niece of the wife of the governor of Rhode Island, the Catherine Ray of Franklin's letters, and by her he had two sons and three daughters. The authoritative life of the great general is by his grandson, George Washington Greene (3 vols., 8vo, New York, 1867–'71). The sketch previously published by the same author in Sparks's "Library of American Biography" was compiled from printed sources, not from original documents. The controversy between George Bancroft and George W. Greene, occasioned by some remarks in Bancroft's history, was carried on in the pages of the "North American Review" and the "Historical Magazine." The letters connected with this controversy are published in the second volume of Greene's life, which also contains numerous extracts from the general's private correspondence. The addresses on the presentation of the statue of Gen. Greene were published by the government at Washington in 1870, in a pamphlet of eight pages. A selection from his despatches relating to the southern campaign is preserved in two folio volumes in the state department. Some of his letters may be found in Force's "Archives," and others in Sparks's "Correspondence of the American Revolution"; but the bulk of his correspondence still remains in manuscript. Mr. Greene's intention, announced in 1870, of publishing all his grandfather's papers in a work of several volumes, was never carried out.—His grandson, **George Washington,** author, b. in East Greenwich, R. I., 8 April, 1811; d. there, 2 Feb., 1883, entered Brown university, but left before graduation on account of failing health. From 1825 till 1847 he resided in Europe, and in 1837 he was appointed U. S. consul at Rome. On his return to this country in 1848 he was appointed professor of modern languages at Brown. In 1852 he removed to New York, and devoted himself to teaching, and writing historical and other articles for periodicals. In 1853 he edited Addison's works, with copious notes (6 vols., New York). He took up his residence at his native place in 1865, and soon afterward was chosen to represent the town in the legislature. He made speeches in 1867 and 1869 on the ratification of the 14th and 15th amendments to the constitution of the United States. In 1872 he was chosen professor of American history at Cornell. His published works include, besides two text-books of botany, one of French grammar, and several addresses: "Historical Studies" (New York, 1850); "History and Geography of the Middle Ages" (1851); "Biographical Studies" (1860); "Historical View of the American Revolution" (Boston, 1865); "Nathanael Greene: an Examination of the Ninth Volume of Brancroft's History" (1866); a life of Gen. Nathanael Greene in Sparks's "American Biography," and a more extended one, published separately (3 vols., New York, 1867–'71); "The German Element in the War of American Independence" (1876); and a "Short History of Rhode Island" (Providence, 1877).—Nathanael's nephew, **Albert Collins,** U. S. senator, b. in East Greenwich, R. I., 15 April, 1791; d. in Providence, 8 Jan., 1863, was the son of Perry Greene. He received an academic education, and then studied law in New York city, where he was admitted to the bar. Subsequently he returned to Rhode Island, and there practised his profession. In 1815 he was elected to the lower branch of the state legislature, in the year following was chosen brigadier-general of the militia, and later major-general. He was again elected to the legislature, and held office from 1822 till 1825, being speaker during the last year. From 1825 till

1843 he was attorney-general of Rhode Island, then for two years a member of the state senate, when he was elected as a Whig to the U. S. senate, serving from 1 Dec., 1845, till 3 March, 1851. Subsequently he served for a single term in each branch of the legislature, and finally retired in 1857.

GREENE, Nathaniel, editor, b. in Boscawen, N. H., 20 May, 1797; d. in Boston, Mass., 29 Nov., 1877. He was left early in life dependent upon his own resources, and in 1809 became an apprentice in the office of the "New Hampshire Patriot." Three years later he became editor of the "Concord Gazette," and in 1814 removed to Portsmouth, where he had charge of the "New Hampshire Gazette." After this he settled in Haverhill, and for two years managed the "Haverhill Gazette." In May, 1817, he founded and edited the "Essex Patriot," with which journal he remained connected until 1821, when he was invited to Boston, and there established the "Boston Statesman," which first appeared as a semi-weekly and then became the foremost daily Democratic journal of the state. He was postmaster of Boston in 1829–'40, and again in 1845–'9. From 1849 till 1861 he resided in Paris, and on his return settled in Boston. He contributed more than two hundred poems to various Boston journals, which appeared over the pen-name of "Boscawen," and he published a translation of G. Sforzosi's "History of Italy" (New York, 1836); "Tales from the German" (Boston, 1837); "Tales from the German, Italian, and French" (1843); and "Improvisations and Translations" (1852).—His brother, **Charles Gordon,** journalist, b. in Boscawen, N. H., 1 July, 1804; d. in Boston, Mass., 27 Sept., 1886, was sent to the Bradford academy by Nathaniel, in whose care he was placed on the death of his father in 1812. Subsequently he entered his brother's office in Haverhill, and, following him to Boston, became his assistant on the "Statesman." In 1825 he managed and for a time edited the "Free Press" in Taunton, Mass., and after publishing the "Boston Spectator" in 1826, removed in 1827 to Philadelphia, where, with James A. Jones, he bought the "National Palladium," the first daily newspaper in Pennsylvania, to advocate the candidacy of Andrew Jackson. A year later he became connected with the "United States Telegraph" in Washington, and in 1829 he returned to Boston, succeeding his brother as proprietor and editor of the "Boston Statesman." He founded, in November, 1831, the "Boston Morning Post," which he conducted until he sold it in 1875. Mr. Greene was on several occasions a Democratic candidate for office, at one time a member of the state legislature, and naval officer of the port of Boston for two terms, having been appointed in 1853 by Franklin Pierce, and reappointed by James Buchanan in 1857.—Nathaniel's son, **William Batchelder,** author, b. in Haverhill, Mass., 4 April, 1819; d. in Weston-Super-Mare, England, 30 May, 1878, was appointed to the U. S. military academy from Massachusetts in 1835, but left before graduation. He was made 2d lieutenant in the 7th infantry in July, 1839, and, after serving through the Florida war, resigned in November, 1841. Subsequently he was connected with the Brook Farm movement, after which he studied theology, and was graduated at the Harvard divinity-school in 1845. He then became a Unitarian clergyman, and for several years was settled in Brookfield, Mass. Later he went to Europe, but returned in 1861. Although a Democrat, he was a strong abolitionist, and at the beginning of the civil war became colonel of the 14th Massachusetts infantry, afterward the 1st Massachusetts heavy artillery. In 1862, while stationed with his regiment in Fairfax, Va., he was recalled and assigned by Gen. McClellan to the command of an artillery brigade in Gen. Whipple's division. He resigned his commission in October, 1862, and returned to Boston. Mr. Greene was a member of the Massachusetts constitutional convention in 1853, was active in all reform movements, and was specially zealous for perfect freedom of speech. He was a fine mathematician, and was versed in Hebrew literature and in Hebrew and Egyptian antiquities. He published numerous pamphlets, including "Sovereignty of the People" (Boston, 1863); "Explanations of the Theory of the Calculus" (1870); "Transcendentalism" (1870); and "The Facts of Consciousness and the Philosophy of Mr. Herbert Spencer" (1871); and in book-form, "Remarks on the Science of History, followed by an a priori Autobiography" (1849); "Theory of the Calculus" (1870); and "Socialistic, Communistic, Mutualistic, and Financial Fragments" (1875).

GREENE, Samuel Stillman, educator, b. in Belchertown, Mass., 3 May, 1810; d. in Providence, R. I., 24 Jan., 1883. He was graduated at Brown, with the valedictory, in 1837. After teaching in the Baptist academy at Worcester, Mass., and in the English and grammar high-schools of Boston, he was the first superintendent of public schools in Springfield, Mass., and the first agent of the Massachusetts board of education. He was also superintendent of public schools in Providence, R. I. In 1851 he was called to the professorship of didactics in Brown, and held this place until 1855, when he was appointed professor of mathematics and civil engineering. He remained in this chair until his death. He was, at various times, president of the Rhode Island institute of instruction, of the American institute of instruction, and of the National teachers' association. He was active in the affairs of the Baptist denomination in Rhode Island. Prof. Greene was the author of "Analysis of the English Language" (1848); "First Lessons in Grammar"; "Elements of English Grammar" (1852); "English Grammar" (1867); and "Introduction to English Grammar" (1868).—His nephew, **Charles Warren,** physician, b. in Belchertown, Mass., 17 Aug., 1840. He was graduated at Brown in 1863, and subsequently studied medicine at Harvard, Berkshire medical college, and at Dartmouth, where he was graduated in 1867. In July, 1862, he entered the army, and served for three years, attaining the rank of captain. After his graduation in medicine he practised in Massachusetts until 1872, and since has devoted himself to literary pursuits. He has been a large contributor to various cyclopædias, chiefly in the domain of natural science. Dr. Greene has held the office of principal editor of recent editions of Lippincott's "Gazetteer" (1879); Worcester's "New School Dictionary" (1883); Thomas's "Biographical Dictionary" (1886); and other dictionaries, still (1887) unpublished. In addition to the foregoing he wrote "Animals; their Homes and Habits" (Philadelphia, 1886), and "Birds; their Homes and Habits" (1886).

GREENE, Theodore Phinney, naval officer, b. in Montreal, Canada, 1 Nov., 1809. He was appointed midshipman from Vermont in November, 1826, was promoted to passed midshipman in 1832, and in 1837 became lieutenant. During the Mexican war, from 1846 till 1848, he was on the "Congress," having command of the land forces in Mazatlan for six months, then on the "Cyane," of the home squadron, and in 1854–'6 at the Boston navy-yard. He was commissioned

commander in September, 1855, and subsequently, until 1860, was lighthouse-inspector, after which he was at the navy-yard on Mare island, California, until 1862. In July, 1862, he was made captain, and given command of the "Santiago de Cuba" and the "San Jacinto." While in charge of the latter, he was left in command of the East Gulf squadron. Later he commanded the "Richmond," of the West Gulf squadron, and in 1865 protected the troops while they were landing for the attack on Mobile. In 1866 he served on ordnance duty in Portsmouth, N. H., and in 1867 was given command of the "Powhatan," of the Pacific squadron. He received his commission as commodore in July, 1867, and had charge of the Pensacola navy-yard from 1868 till 1871, when he was retired. In March, 1872, he became rear-admiral on the retired list.

GREENE, William, governor of Rhode Island, b. in Warwick, R. I., 16 March, 1695; d. in Providence, R. I., 22 Feb., 1758. For many years he held the office of clerk of the county court in Providence. He became deputy-governor of Rhode Island in 1740, and was governor from 1743 till 1758.—His son, **William,** governor of Rhode Island, b. in Warwick, R. I., 16 Aug., 1731; d. there, 29 Nov., 1809. He was chief justice of the colony, and was governor of the state from 1778 till 1786, also for many years speaker of the house.—**Ray,** eldest son of the second William, senator, b. in Warwick, R. I., 2 Feb., 1765; d. there, 11 Jan., 1849. He was graduated at Yale in 1784, and then studied law in the office of Gen. James M. Varnum, in East Greenwich, R. I. Subsequently he was admitted to the Rhode Island bar, and began practice in Providence. He was appointed attorney-general of Rhode Island in 1794, succeeding William Channing, and continued in that office till 1797, when he was elected to the U. S. senate to fill a vacancy caused by the resignation of William Bradford, and served from 22 Nov., 1797, till 7 Dec., 1801. On the completion of the unexpired term, Mr. Greene was returned to the senate for a second term, but in 1801 resigned to accept the office of district judge of Rhode Island. This appointment he received from John Adams as he was about retiring from the presidential chair; but some informality connected with the appointment was discovered too late to be rectified by Mr. Adams, and his successor refused to correct the error, in consequence of which, Mr. Greene lost both his senatorial and judicial offices.

GREENE, William Houston, chemist, b. in Columbia, Pa., 30 Dec., 1854. He was educated at the Philadelphia public schools and at Jefferson medical college, where he was graduated in 1873. For the three following years he was demonstrator of chemistry at Jefferson medical college, and then spent two years studying chemistry in Adolphe Wurtz's laboratory in Paris. On his return in 1879 he became demonstrator of chemistry in the University of Pennsylvania, and a year later was appointed professor of chemistry in the Central high-school in Philadelphia, which office he now holds. Dr. Greene is a member of scientific societies at home and abroad. Besides the results of investigations in chemistry, contributed to scientific journals, he has published a translation of Wurtz's "Elements of Modern Chemistry" (Philadelphia, 1879); "Medical Chemistry" (1880); "Lessons in Chemistry" (1884); and edited Paul Bert's "First Steps in Scientific Knowledge" (1886).

GREENER, Richard Theodore, lawyer, b. in Philadelphia, Pa., 30 Jan., 1844. After studying at Cambridge grammar-school, at Oberlin preparatory school, and at Phillips Andover academy, he entered Harvard, and in 1870 was its first colored graduate. During his college course he won more prizes than any classmate or contemporary. From 1870 till 1873 he was principal of the male department of the "Institute for colored youth" in Philadelphia, and for a year filled a similar office in the preparatory high-school in Washington, D. C. He was then called to fill the chair of metaphysics and logic in the University of South Carolina, and remained there until 1877, also assisting in the departments of Latin and Greek, and teaching classes in international law and the constitution of the United States. In 1875 he was appointed a member of the board of health of Columbia, S. C., and in 1876 a member of the state commission to reorganize the common schools of South Carolina. Meanwhile he was graduated from the law department of the University of South Carolina in 1876, and was admitted to the bar in Washington, D. C., in April, 1877, where until 1882 he was dean of the law faculty in Howard university. Mr. Greener has recently made New York his residence, and in October, 1885, he was appointed examiner in the municipal civil service of New York. Prof. Greener was active as a Republican campaign orator from 1876 till 1884. He received the degree of LL. D. from the College of Liberia in Monrovia in 1882, and was elected a member of the American philological association in 1875. He has been a large contributor to journals and reviews and also to various works of reference, and has delivered numerous addresses, including his inaugural address, in the South Carolina university, on "Charles Sumner, the Idealist, Statesman, and Scholar" (June, 1874); "Eulogy on the Life and Services of William Lloyd Garrison" (June, 1879); "Socrates as a Teacher" (April, 1880); "The Intellectual Position of the Negro" (July, 1880); "Free Speech in Ireland" (October, 1882); "Benjamin Banneker, the Negro Astronomer" (February, 1882); "Henry Highland Garnet" (May, 1882); and "An African Roscius" (June, 1882).

GREENFIELD, Elizabeth Taylor, singer, b. in Natchez, Miss., in 1808; d. in Philadelphia, Pa., in 1876. She was of African descent and was born a slave, but early gave great promise as a singer, and was freed by her mistress, Mrs. Greenfield, who gave her a liberal education. She sang with success, not only in this country, but in England, where the Duchess of Sutherland and the Duchess of Argyll became her patrons. She was known as the "Black Swan."

GREENHOW, Robert, scholar, b. in Richmond, Va., in 1800; d. in San Francisco, Cal., in 1854. His father, Robert, was at one time mayor of Richmond. His mother perished at the burning of the Richmond theatre in 1811, and the son barely escaped with his life. He was graduated at William and Mary in 1816, and finished his education in New York, studying medicine with Dr. David Hosack and Dr. John W. Francis, and taking his degree at the College of physicians and surgeons in 1821. He then visited Europe, where he met Byron and other distinguished men, and on his return delivered lectures on chemistry before the New York literary and philosophical society. He became translator to the department of state in Washington in 1828, and in 1850 removed to California, where in 1853 he was associate law-agent to the U. S. land commission. He published a "History of Tripoli" (1835), and a "Report on the Discovery of the Northwest Coast of North America," prepared by order of Congress in 1837 (New York, 1840), and afterward enlarged into a "His-

tory of Oregon and California," a work of high authority (1846). Dr. Greenhow also read before the New York historical society in 1848 a paper in relation to the supposed missionary labors of Archbishop Fénelon (since found to have been those of a brother) among the Iroquois of New York.

GREENLEAF, Benjamin, educator, b. in Haverhill, Mass., 25 Sept., 1786; d. in Bradford, Mass., 29 Oct., 1864. He was graduated at Dartmouth in 1813, was principal of Bradford academy in 1814–'36, and of Bradford teachers' seminary in 1839–'48. He represented Bradford in the legislature in 1837–'9. Mr. Greenleaf published a series of mathematical text-books, the first of which was his "National Arithmetic" (Boston, 1835).

GREENLEAF, Ezekiel Price, b. in Quincy, Mass., 22 May, 1790; d. in Boston, Mass., 3 Dec., 1886. He was educated at Quincy, and engaged in business in Charleston, S. C., and in Boston, where he failed. He then removed to his father's farm in Quincy. Inheriting some property, he invested it with caution, denying himself the necessaries of life and living like a hermit. He spent fifty years in Quincy, but after 1879 lived in Boston. He bequeathed nearly all his estate, amounting to $500,000, to Harvard, with directions to keep it apart from other bequests, as the "Greenleaf fund"; $3,000 of the income is to be divided yearly into scholarships of $300 each, called the "Price Greenleaf scholarships," and part is to be devoted to a special division of the library, to be known as the "Greenleaf department." In case the regents of the university fail to comply with the conditions, it is to be equally divided between the Home for aged men and the Children's hospital of Boston.

GREENLEAF, Moses, author, b. in Newburyport, Mass., in 1778; d. in Williamsburg, Me., 20 March, 1834. Edward, his ancestor, settled in Newburyport in 1635, and Moses, his father, was a captain in the Revolutionary army. He published "Statistical View of the District of Maine" (Boston, 1816), and "Survey of the State of Maine," with a map, the best made up to that time (Portland, 1829).—His brother, **Jonathan,** clergyman, b. in Newburyport, Mass., 4 Sept., 1785; d. in Brooklyn, N. Y., 24 April, 1865, was licensed to preach in 1814, and was pastor at Wells, Me., in 1815–'28. He then took charge of the Mariner's church, Boston, removed to New York in 1833, and edited the "Sailor's Magazine." He was also secretary of the Seamen's friend society, first in Boston and then in New York, till 1841. He organized the Wallabout Presbyterian church in Brooklyn in 1843, and was its pastor till his death. Bowdoin gave him the degree of M. A. in 1824, and Princeton that of D. D. in 1863. Dr. Greenleaf published "Sketches of the Ecclesiastical History of Maine" (Portsmouth, N. H., 1821); "History of New York Churches" (New York, 1846); and "Genealogy of the Greenleaf Family" (1854).—Another brother, **Simon,** jurist, b. in Newburyport, 5 Dec., 1783; d. in Cambridge, Mass., 6 Oct., 1853, removed with his father to Maine when a child, and in 1801 began the study of law in New Gloucester, Me., with Ezekiel Whitman, afterward chief justice of the state. In 1806 he began practice in Standish, but in the same year removed to Gray, where by diligent study he laid the foundation of his subsequent legal learning. He went to Portland in 1818, and in 1820, after the admission of Maine to the Union, and the establishment of a supreme court, he became its reporter, holding the office till 1832, when he had reached the foremost rank in the Maine bar. He was appointed royal professor of law in the Harvard law-school in 1833, and in 1846, on the death of Judge Story, was transferred to the Dane professorship. On his resignation in 1848 he was made professor emeritus. During his connection with the law-school he had the direction of its internal affairs, and for many months of each year, during Judge Story's absence in Washington, the entire management and work of instruction devolved on him. Prof. Greenleaf was for many years president of the Massachusetts Bible society. Harvard gave him the degree of LL. D. in 1834. The clearness of his style and the correctness of his principles have placed him in the front rank of legal authors. His works are "Origin and Principles of Freemasonry" (Portland, 1820); "Full Collection of Cases, Overruled, Denied, Doubted, or Limited in their Application" (1821; 3d ed., by E. Hammond, New York, 1840, afterward expanded to 3 vols.); "Reports of Cases in the Supreme Court of Maine, 1820–'31" (9 vols., Hallowell and Portland, 1822–'35; digest, Portland, 1835; revised ed., 8 vols., Boston, 1852); "Treatise on the Law of Evidence," his greatest work (3 vols., 1842–'53; 14th ed., with large additions by Simon Greenleaf Croswell, 1883); "Examination of the Testimony of the Four Evangelists, by the Rules of Evidence administered in Courts of Justice, with an Account of the Trial of Jesus" (1846; London, 1847); and an enlarged edition of William Cruise's "Digest of the Laws of England respecting Real Property," adapted to American practice (3 vols., 1849–'50). He also published his inaugural discourse on entering upon his professorship (Boston, 1834), and one on the life and character of Joseph Story (1845.)

GREENOUGH, Horatio, sculptor, b. in Boston, Mass., 6 Sept., 1805; d. in Somerville, Mass., 18 Dec., 1852. His idea of form was strongly marked in early youth, and he manifested a striking mechanical aptitude for imitating objects that impressed themselves on his mind. When he was fifteen years old, a French sculptor, Binon, taught him modelling in clay, and the rudiments of his art. Soon afterward he entered Harvard, and during his two years' career there enjoyed the advice of Washington Allston. At that time the youth made the design from which the present Bunker Hill monument was constructed. Before completing his college course Greenough sailed for Florence, and thence proceeded to Rome, where he arrived in the autumn of 1825. With the exception of a short sojourn in his native city in 1826, where he was occupied in modelling the busts of many distinguished men, and a brief visit to Paris, for the purpose of modelling a bust of Lafayette, he made his permanent residence in Italy, and there produced most of his historical and ideal compositions. In 1851 the sculptor returned to the United States, for the purpose of placing a group of four historical figures, entitled "The Rescue," in Washington. This work was ordered by congress, and the artist devoted about eight years to its construction. He died suddenly of brain fever. Greenough was an industrious artist; his works are numerous, of extended scope, and highly prized. Among the most important are the colossal statue of Washington, for which congress voted an appropriation of $20,000. It was completed in 1843, and now stands in front of the National capitol. In inscribing his name on this statue, Mr. Greenough, instead of the usual Latin word "fecit" (has done it), wrote "Horatio Greenough faciebat" (tried to do it). Edward Everett wrote: "I regard Greenough's 'Washington' as one of the greatest works of sculpture of modern times. I do not know the work which can justly be preferred to it, whether we consider the purity of the taste, the loftiness

of the conception, the truth of the character, or the accuracy of an anatomical study and mechanical skill." Among Greenough's marble busts are those of John Adams, John Quincy Adams, John Jacob Astor, James Fenimore Cooper, Henry Clay, Gen. Lafayette, John Marshall, and Josiah Quincy. His ideal sculptures include "Medora," "The Guardian Angel," "Chanting Cherubs," "Venus Victrix," "Venus contending for the Golden Apple," "Lucifer," and "The Graces." For an extended notice of his works, see Henry T. Tuckerman's "Memorial of Horatio Greenough" (New York, 1853). Greenough's letters to his brother Henry have been edited by Frances B. Greenough (Boston, 1887).—His brother, **Henry,** architect, b. in Boston, Mass., 5 Oct., 1807; d. in Cambridge, Mass., 31 Oct., 1883, entered Harvard in 1823, but left in his junior year, and did not receive his degree till 1852. He studied painting and architecture abroad in 1831–'4, 1845–'50, and 1869, planned the Cambridgeport city hall, the Agassiz museum, and many private houses in Cambridge and Boston, including those of Agassiz, Guyot, and Judge Loring. In 1852 he superintended the decoration of the Crystal Palace in New York. He published two novels, "Ernest Carroll" (Boston, 1859), and "Apelles" (1860), and translated for the "Courier" Jules Sandeau's "Sacs et parchemins."—Another brother, **Richard Saltonstall,** sculptor, b. in Jamaica Plains, Mass., 27 April, 1819, practised his art in Paris at the beginning of his career, and was particularly successful as a sculptor of portrait busts. Returning to the United States, he lived for several years in Newport, R. I., during which time he produced numerous works in bronze and marble. In 1874 Greenough again returned to Europe, where he has since spent most of his time. Among his works are a statue of Franklin, placed in the city-hall square of Boston, the "Boy and Eagle," owned by the Boston athenæum; a "Carthagenian Woman"; "Cupid on a Tortoise"; "Elaine"; "Circe"; and a "Psyche," which he erected as a monument to his wife in the cemetery at Rome, Italy. His bust of Shakespeare, founded on the Chandos portrait, has been highly praised. —Richard Saltonstall's wife, **Sarah Dana** (Loring), author, b. in 1827, has published "Arabesques," four stories of the supernatural (Boston, 1871); "In Extremis, a Story of a Broken Law" (1872); and "Mary Magdalene," a poem (1880). —Henry's son, **Francis Boott,** physician, b. in Boston, Mass., 24 Dec., 1837, was graduated at Harvard in 1859, studied medicine in Pisa and Florence, Italy, and took his degree at Harvard medical-school in 1866. In 1871–'5 he was an instructor there. He is a member of various medical societies, being secretary of the Boston society for medical improvement in 1871–'7, and has contributed to the current literature of his profession.

GREENUP, Christopher, governor of Kentucky, b. in Virginia in 1750; d. in Frankfort, Ky., 24 April, 1818. He served through the Revolution, attaining the rank of colonel, and at the close of the war removed to Frankfort, Ky., then the "dark and bloody ground," where he studied law, and practised his profession. He was chosen to congress for three successive terms, serving in 1791–'7, was governor of the state in 1804–'8, and a presidential elector on the Madison ticket in 1809.

GREENWALD, Emanuel, theologian, b. near Frederick, Md., 13 Jan., 1811; d. in Lancaster, Pa., 21 Dec., 1885. His father consecrated him to the ministry when the boy was only two years old. When quite young he began a private course of study in the classics and theology, under Rev. David F. Schaeffer, at Frederick, Md., and on 18 Oct., 1831, was licensed by the Lutheran synod of Maryland, at Cumberland. In the same year he started west, on horseback, in order to do mission work among the scattered Lutherans. He was prevailed on to settle at New Philadelphia, Ohio, where he remained until the year 1851, and organized several congregations in the surrounding country. In 1842 he founded the "Lutheran Standard," of which he was editor for several years. In 1851 he removed to Columbus, Ohio, where he remained pastor of a small English congregation until 1854. During the latter year he was called to Easton, Pa., where he remained until 1867. In 1859 the degree of D. D. was conferred on him by Pennsylvania college, Gettysburg. In 1867 he removed to Lancaster, Pa., as pastor of Trinity Lutheran church, where he remained until his death. From 1867 he was for years a director of the Lutheran theological seminary at Philadelphia, and in 1873 he was elected president of the ministerium of Pennsylvania, the oldest Lutheran synod in America, which office he held for four years, and then declined re-election on account of old age and failing health. For many years he was chairman of the synod's executive committee, examining committee, and frequently a delegate to the general council. In 1878 he was president of the second Lutheran diet, held in Philadelphia. As a preacher, Dr. Greenwald was simple, yet forcible and interesting. His works include "An Order of Family Prayer" (Philadelphia, 1867); "The Lutheran Reformation" (1867); "The Foreign Mission Work of Louis Harms" (1868); "Christian Benevolence," a sermon (1870); "Baptism of Children" (1872); "Meditations for Passion Week" (1873); "Young Christian's Manual of Devotion" (1873); "Questions on the Gospel for the Church Year" (Lancaster, Pa., 1873); "Questions on the Epistles for the Church Year" (1874); "Sprinkling the True Mode of Baptism" (Philadelphia, 1876); "The True Church, its Way of Justification, and its Holy Communion" (1876); "Romanism and the Reformation" (Lancaster, 1880); "Jesus our Table Guest" (Philadelphia, 1883); and "Meditation for the Closet" (Lancaster, 1885). For children he published "The Child's Book," "The Little Children's Book," and "Sacred Places."

GREENWOOD, Francis William Pitt, clergyman, b. in Boston, Mass., 5 Feb., 1797; d. in Dorchester, Mass., 2 Aug., 1843. He was graduated at Harvard in 1814, studied theology in Cambridge under Dr. Henry Ware, the elder, and on 21 Oct., 1818, was ordained pastor of the New South church, Boston. He resigned in 1820 on account of failing health, and, after a year in Europe, went to Baltimore, where he edited the "Unitarian Miscellany" for two years. He returned to Boston in 1824, and on 29 Aug. became Dr. Freeman's colleague at King's chapel, of which he was sole pastor from 1827 till his death. He visited Cuba for his health in 1837, and in that year and the following was associate editor of the "Christian Examiner." Harvard gave him the degree of D. D. in 1839. Dr. Greenwood was fond of conchology and botany, and was an early member of the Boston society of natural history, to whose journal he was a contributor. His writings are characterized by good taste, poetic imagination, and graceful style. They include "Lives of the Apostles" (Boston, 1827); "History of King's Chapel" (1833); "Sermons to Children" (1841); "Sermons of Consolation" (1842); "Sermons on Various Subjects," edited with a memoir by Hon. Samuel A. Eliot (2 vols., 1844); and "Miscellaneous Writings,"

edited by his son (1846). He also revised the King's chapel liturgy (1827), and published a collection of hymns (1830; 57th ed., 1853).

GREENWOOD, Isaac, mathematician, b. 7 May, 1702; d. in Charlestown, Mass., 22 Oct., 1745. He was graduated at Harvard in 1721, and on 13 Feb., 1728, was chosen to fill the chair of mathematics and natural philosophy founded there by Thomas Hollis, of London, thus being the first man in this country to hold such a professorship. He continued in office till 13 July, 1738, and published an arithmetic (1729), and a philosophical discourse on the death of Thomas Hollis (1731).

GREENWOOD, James M., educator, b. near Springfield, Ill., 15 Nov., 1836. His early education was obtained in the common schools. He removed with his parents, when he was sixteen years old, to Adair county, Mo., where he worked on a farm, studied by himself, and began to teach, also spending a year in Canton seminary. In 1867–'74 he taught mathematics, astronomy, and logic in the normal school at Kirksville, Mo., and in the latter year became superintendent of schools in Kansas City, Mo., where he still remains (1887). He has given much attention to improved methods of instruction, and, besides papers and articles on education, has published "Principles of Education Practically Applied" (New York, 1887).

GREENWOOD, Miles, manufacturer, b. in Jersey City, N. J., 19 March, 1807; d. in Cincinnati, Ohio, 6 Nov., 1885. He removed to Ohio with his father in 1817, settled near Cincinnati, and in 1832 established, on the Miami canal, the Eagle iron-works, which soon became the largest in the west. His buildings were destroyed by fire in 1852, but were soon rebuilt. During the civil war the works were employed in behalf of the government, all other business being suspended. At the beginning of the war Mr. Greenwood made for Gen. Frémont twelve anchors for pontoon-bridges on twenty-four hours' notice. He also built machines that rifled 3,000 smooth-bore muskets a day, cast 150 bronze field guns in a brief period, and built a turret-monitor when other builders declined the contract. Southerners vainly tried to persuade him to cease aiding the government, and his works were set on fire three times, with a loss of $100,000. He organized the first paid fire department in Cincinnati in 1852, and in the same year aided in introducing into that city the first steam fire-engine in the United States. He used to boast that in thus abolishing the old-fashioned fire-engine house and its attendant vices, he had done more for the cause of morality than many preachers. He was one of the founders of the Ohio mechanics' institute.

GREER, James Augustin, naval officer, b. in Cincinnati, Ohio, 28 Feb., 1833. He entered the navy as midshipman, 10 Jan., 1848, became lieutenant, 16 Sept., 1855, and lieutenant-commander, 16 July, 1862. He commanded the iron-clad "Benton" and a division of Admiral Porter's squadron at the passage of the Vicksburg batteries on 16 April, 1863, and in the succeeding engagements on the Mississippi until the fall of that city. He also accompanied the Red river expedition. He was made commander, 25 July, 1866, and in 1873 commanded the "Tigress" in the "Polaris" search expedition. He was promoted to the grade of captain on 26 April, 1876, in 1886 served as president of the examining board, and in the same year was made commodore.

GREEY, Edward, author, b. in Sandwich, Kent, England, 1 Dec., 1835. He was educated by private tutors, was a member of the English naval expedition to Japan in 1855–'6, spent six years on station and shore duty, and learned the language and studied the history of that country. He came to the United States in 1868, was naturalized, and engaged in commercial pursuits in New York. He is the author of the following plays: "Vendome," "Mirah," "The Third Estate," "The College Belles," and "Uncle Abner," and of the following works on Japanese history: "Blue Jackets" (1871); "Loyal Ronins" (New York, 1880); "Young Americans in Japan" (Boston, 1881); "The Wonderful City of Tokio" (1882); "The Golden Lotus" (1883); "Bear-Worshippers of Yezo" (1884); and "A Captive of Love" (1885). He is a member of the Zoölogical and Anthropological societies of London.

GREGG, Alexander, P. E. bishop, b. in Society Hill, Darlington district, S. C., 8 Oct., 1819. He was graduated at South Carolina college in 1838 with the highest honors of his class. He then studied law, was admitted to the bar, and practised at Cheraw, S. C., in the northeastern circuit. Having resolved to enter the ministry, he was baptized and confirmed in St. David's church, Cheraw, in 1843, and became a candidate for holy orders. He was ordered deacon by Bishop Gadsden, 10 June, 1846, and ordained priest in St. Philip's church, Charleston, by the same bishop, 19 Dec., 1847. His first and only parish was that of St. David's, Cheraw, of which he became rector in 1846. He received the degree of D. D. from South Carolina college in 1859. Dr. Gregg was active and efficient in diocesan and church affairs during this period, and in the latter year was elected bishop of Texas. He was consecrated in the Monumental church, Richmond, Va., 13 Oct., 1859, and entered at once on his extensive field of labor. In 1867 he attended the first Lambeth conference in England. At the general convention in 1874 consent was given to a division of the diocese of Texas, and two missionary jurisdictions were set off for northern and western Texas. Bishop Gregg removed to Galveston, retaining the southern portion of the state as his diocese. Between 1852 and 1867 he made several contributions to church literature in the way of sermons, addresses, and triennial charges. He has also published a "History of Old Cheraw," embracing an account of the Indian tribes in the valley of the Pedee, S. C., the first white settlements, the organization of St. David's parish, and the Revolutionary history of that region (1867); and a "Brief Sketch of the Church in Texas," an article in "The Church Encyclopædia" for 1884.

GREGG, Andrew, senator, b. in Carlisle, Pa., 10 June, 1755; d. in Bellefonte, Pa., 20 May, 1835. His parents came from Ireland to New Hampshire, but removed to Delaware in 1732, and to Pennsylvania in 1733. The son was educated in Carlisle, and in Newark, Del., where he served in the militia during the Revolution. From 1779 till 1783 he was a tutor in the College of Philadelphia (now University of Pennsylvania). He was a merchant at Middletown, Pa., in 1783–'9, and then became a farmer in the wilderness of Penn's valley. He was elected a member of congress from Pennsylvania, and served from 24 Oct., 1791, till 3 March, 1807, and was a U. S. senator from the same state, serving from 26 Oct., 1807, till 3 March, 1813, for a part of which time he was president *pro tempore* of the senate. In 1814 he removed to Bellefonte, was appointed secretary of state for Pennsylvania in 1816, and in 1823 was an unsuccessful candidate for governor. He was a fine classical scholar, and a man of vigorous constitution. He left an unfinished sketch of his family history, which has been published in Dr. William H. Egle's "Pennsylvania

Genealogies" (Harrisburg, 1886).—Andrew's grandson, **John Irvin,** soldier, b. in Bellefonte, Pa., 19 July, 1826, was the son of Andrew Gregg, an ironmaster. He volunteered for the Mexican war as a private in December, 1846, became 1st lieutenant of the 11th regular infantry in February, 1847, and was appointed captain on 5 Sept., 1847. After serving through the war, he was disbanded, 14 Aug., 1848. He then engaged in the iron business in Centre county, Pa. He became a captain of Pennsylvania reserves in the early part of the civil war, and was made captain, 6th U. S. cavalry, in May, 1861. He became colonel, 16th Pennsylvania cavalry, in October, 1862, and commanded a cavalry brigade in the Army of the Potomac, from April, 1863, till April, 1865. He participated in numerous battles, including Deep Bottom, where he was severely wounded. For gallant and meritorious services during the war he was brevetted major-general of volunteers, and brigadier-general U. S. army at its close. After the war he was inspector-general of freedmen in Louisiana, and under the establishment of 28 July, 1868, became colonel of the 8th cavalry. He was with his regiment on the Pacific coast till retired for disability incurred in line of duty, 2 April, 1879.—Another grandson, **David McMurtrie,** son of Matthew D. Gregg, soldier, b. in Huntingdon, Pa., 10 April, 1833. He was graduated at the U. S. military academy in 1855, and was assigned to the dragoons, receiving his full appointment as 2d lieutenant in September following. Afterward he served a short time in Jefferson barracks, Mo., and was then ordered to New Mexico and California, and served in the campaigns of 1858–'60 against the Indians. In March, 1861, he was appointed 1st lieutenant, and in May following captain in the 6th cavalry. In January he was appointed colonel of the 8th Pennsylvania cavalry, and was engaged at the battles of Fair Oaks, the seven days' fight, and otherwise during the Virginia peninsular campaign in 1862. He became brigadier-general of volunteers on 29 Nov., commanded a division of cavalry in the Army of the Potomac from December, 1862, till June, 1863, and was engaged at Beverly Ford, Aldie, Gettysburg, Rapidan Station, and New Hope Church. He commanded the 2d cavalry division, 6 April, 1864, to 3 Feb., 1865, in the Richmond campaign, and the cavalry of the Army of the Potomac from 1 Aug., 1864 (when he was brevetted major-general of volunteers), till his resignation, 3 Feb., 1865. He was appointed U. S. consul at Prague, Bohemia, in 1874, and in 1886 became commander of the Pennsylvania order of the loyal legion.

GREGG, James, lawyer, b. in Marion district, S. C., 4 July, 1787; d. 24 Oct., 1852. He was educated at St. David's academy, Long Bluff (now Society Hill), and at the University of South Carolina, where he was graduated with the highest honors in 1808. He was subsequently a tutor in the university, and was professor of mathematics *pro tempore* in the same institution for seven or eight months in 1811. He was admitted to the bar in Columbia in April, 1813, and soon attained note in his profession. Mr. Gregg was chosen intendant of Columbia in 1816, elected to the general assembly of the state in 1822, and served till 1830, when he was elected to the senate, of which he continued a member until 1847. He was also active in state military matters, and became colonel of the 23d militia regiment in November, 1829. —His son, **Maxey,** soldier, b. in Columbia, S. C., in 1814; d. near Fredericksburg, Va., 13 Dec., 1862, was graduated at the College of South Carolina in 1836, studied law, and was admitted to the bar in 1839. He was appointed major of the 12th infantry, 24 March, 1847, and served till the close of the Mexican war. He was a member of the South Carolina state convention in 1861, and of the committee that prepared the ordinance of secession. In the civil war he commanded the 1st South Carolina regiment, and was afterward made a brigadier-general. He distinguished himself in several engagements in Virginia, and was killed at the battle of Fredericksburg.

GREGG, William, Canadian educator, b. in Killycreen, County Donegal, Ireland, 5 July, 1817. He was graduated from Glasgow college in 1843, and Edinburgh university, where he took the degree of M. A. in 1844. Subsequently he studied theology in the College of the Free Church at Edinburgh, and was licensed to preach in February, 1846. Immediately afterward he was sent as a missionary to Canada, and in June, 1847, was ordained minister of the John-street Presbyterian church, Belleville. He retained this pastorate till July, 1857, when he became pastor of Cooke's church, Toronto, and remained there till July, 1872. In 1864 he was appointed lecturer in apologetics in Knox college, Toronto, and taught the theological classes in the Montreal Presbyterian college during part of its first session in 1867. In 1872 he was appointed professor of apologetics in Knox college, which chair he still occupies, and also conducts the classes in church history. He was moderator of the Free Church of Canada in 1861, when the union was effected between it and the United Presbyterian church of that country. He has edited "Prayers for Family Worship" (Toronto, 1873), and is the author of a "History of the Presbyterian Church in Canada" (1885).

GREGORI, Luigi, artist, b. in Bologna, Italy, 8 July, 1819. In 1840 he went to Rome, where he studied under Tomaso Minardi. He received in 1856 the grand gold medal of the Academy of Bologna for historical painting, and lived in the Vatican for several years as the friend of Monsignor de Merode, engaged in restoring the old masters. He was also placed at the head of a commission appointed to decide by whom certain old and valuable pictures were painted. He came to the United States in 1874, and was made director of the art department of the University of Notre Dame, Indiana. He has decorated the church of the university, and painted religious pictures in the cathedrals of Baltimore, Philadelphia, Dubuque, and Detroit. In the main corridor of the University of Notre Dame he has executed a series of large historical pictures, twelve in number, representing scenes in the life of Columbus. He has also painted portraits of Cardinal Gibbons, Gen. Sheridan, and Archbishop Ryan. Queen Margarita, of Italy, sent him a watch set with diamonds, and the University of Notre Dame gave him the grand gold medal for art in 1876. While in Rome he catalogued the library of the Marquis Campani, and published a work on art. He has been successful in pure frescos and colossal figures and in miniatures, and also has merit as a sculptor.

GREGORY, Daniel Seely, educator, b. in Carmel, Putnam co., N. Y., 21 Aug., 1832. He was graduated at Princeton in 1857, and studied in the theological seminary, acting also as tutor in rhetoric in 1859–'60. After holding pastorates in Galena, Ill., Troy, N. Y., New Haven, Conn., and South Salem, N. Y., he became in 1871 professor of metaphysics and logic in Wooster university, Ohio, and in 1875 was transferred to the chair of mental science and English literature. In 1879 he

became president of Lake Forest university, Ill. He has contributed to the "Princeton Review."

GREGORY, Dudley Sandford, philanthropist, b. in Reading, Conn., 5 Feb., 1800; d. in Jersey City, N. J., 8 Dec., 1874. He removed with his father to Albany, N. Y., in 1808. In 1813–'27 he was clerk in the comptroller's office, and rose to the place of chief clerk in the canal department. He then became identified with the legal lotteries carried on for the state for the endowment of schools and colleges, and in 1834 removed to Jersey City, then a small village, and became one of its best-known citizens. He aided in building up the city, was its first mayor, serving three terms, and held many other local offices. He was also elected to congress as a Whig, and served from 1847 till 1849. Mr. Gregory was at one time a director of sixteen different railroads. He was a bountiful giver to churches of all denominations, and to public schools, city parks, and benevolent institutions.—His grandson, **Eliot,** artist, b. in New York city, 13 Oct., 1854, entered Yale in 1871, but was not graduated. He studied art in Rome and Paris, under Carolus-Duran and Cabanel, and is the only American that has exhibited both painting and sculpture in the Paris salon. His pictures include "Soubrette" (1883); "Coquetterie" (1884); "Children," for which he received honorable mention in Paris; and portraits of Gen. George W. Cullum (1880); his uncle, Admiral Baldwin (1882); Mrs. John Sherwood (1885); and Ada Rehan (1887).

GREGORY, Francis Hoyt, naval officer, b. in Norwalk, Conn., 9 Oct., 1789; d. in Brooklyn, N. Y., 4 Oct., 1866. He was in the merchant service in 1807–'9, but became a midshipman in the navy in the latter year. Soon afterward, while serving on the "Vesuvius," and in charge of one of her barges near the Balize, he surprised and captured an English slaver. He was made acting master in 1811, and, while in command of gunboat No. 162, captured a schooner fitting for piratical purposes, disabled and drove away a privateer of greatly superior force, that had been annoying our commerce, and took a Spanish pirate of fourteen guns. He was with Com. Chauncey in all his actions on Lake Ontario, and on 28 June was made lieutenant. In August, 1814, he was taken prisoner and sent to England, where he remained eighteen months. He soon afterward joined one of the frigates cruising against the Algerines, without coming home. In 1821–'3, while in command of the schooner "Grampus," he was active in suppressing piracy on the coasts of Cuba and Mexico, capturing near St. Croix the notorious pirate brig "Pandrita," a vessel far superior to his own in armament and number of men. He was promoted to commander, 28 April, 1828, and to captain, 18 Jan., 1838, and in 1844 commanded the "Raritan" in the blockade of the Mexican coast. His last sea-service was in command of the African squadron in 1849–'52. In July, 1861, he was ordered to superintend the construction of all vessels of war built outside of navy-yards, and was engaged in this duty when he died. He was made rear-admiral on the retired list, 16 July, 1862.

GREGORY, Frank M., artist, b. in Mansfield, Tioga co., Pa., 21 Oct., 1848. He was educated for a business career, but abandoned it for the pursuit of art. He entered the schools of the National academy of design in 1871, and subsequently studied at the Art student's league, and with Walter Shirlaw. He also followed water-color painting, and acquired some note in etching and designing. Among his paintings are: "The Truant"; "Waiting for Repairs"; and "First Snow of the Season."

GREGORY, John Milton, educator, b. in Sand Lake, Rensselaer co., N. Y., 6 July, 1822. He was graduated at Union in 1846, and spent two years in the study of law, but preferring to enter the ministry, became a Baptist clergyman. After a brief pastorate in the east he went to the west in 1852, and was appointed principal of a classical school at Detroit, Mich. His marked success soon attracted attention to his ability as an educator, and he was chosen superintendent of public instruction of the state, serving from 1858 till 1863. In the mean time, in association with President Erastus O. Haven, of the University at Ann Arbor, and Prof. A. S. Welch, of the Normal school, he had established, in 1854, the "Michigan Journal of Education," taking the entire editorial charge. His reports as state superintendent were characterized by remarkable breadth of view and philosophical treatment of educational questions. Declining a re-election after holding this office for five years, he accepted the presidency of the Kalamazoo college, and in 1867 he was called to that of the Illinois industrial university, then just founded at Champaign, where he remained until 1880. During his term of office he also served as U. S. commissioner to the World's fair at Vienna in 1873, commissioner from the state of Illinois to the Paris exhibition of 1878, and member of the board of judges in the educational department of the Centennial exhibition in Philadelphia. From 1882 till 1885 Dr. Gregory was a member of the U. S. civil-service commission. He is the author of a "Handbook of History" and "Map of Time" (Chicago, 1866); "A New Political Economy" (Cincinnati, 1882); and "Seven Laws of Teaching" (Chicago, 1883). During his residence in Michigan he published a "Compend of School Laws," and addresses on educational interests of that state.

GREGORY, Samuel, philanthropist, b. in Guilford, Vt., 19 April, 1813; d. in Boston, Mass., 23 March, 1872. He was graduated at Yale in 1840, and for several years afterward engaged in teaching, lecturing, and writing on educational and sanitary subjects. In 1848 he founded in Boston the New England female medical college, said to have been the first institution in the world for the exclusive medical education of women. Mr. Gregory was secretary of the college till his death. In 1874 it was merged in the medical school of Boston university (homœopathic).

GREIG, John, lawyer, b. in Moffat, Dumfriesshire, Scotland, 6 Aug., 1779; d. in Canandaigua, N. Y., 9 April, 1858. He was educated in the schools of Edinburgh. He came to western New York in 1800, studied law with Nathaniel W. Howell, and after his admission to the bar in 1804 formed a partnership with his preceptor that lasted till 1820. Soon after entering on the practice of his profession he became the agent of the great Hornby estate. He built for himself a spacious residence, and was noted for his refined and elegant hospitality. No stranger of distinction failed to be entertained by him, and Lafayette was one of his guests in 1824–'5. Mr. Greig bore a striking resemblance to Walter Scott, and was once mistaken for Scott on a visit to Edinburgh. He was elected a representative in congress in 1841, and did faithful service during the long extra session of that summer, but he had no taste for public life, and resigned at the end of the session. Mr. Greig became a regent of the State university in 1825 and its chancellor in 1845, and held both offices till his death. He married a daughter of Gen. Israel Chapin, who survived her husband for more than twenty years. They had no children.

GREINER, John, journalist, b. in Philadelphia, Pa., 14 Sept., 1810; d. in Toledo, Ohio, 13 May, 1871. He removed to Ohio when a boy, and became distinguished as a temperance orator. He was an enthusiastic Whig, and in the Harrison campaign (1840) attained celebrity by his election songs, "Old Zip Coon," "The Wagoner Boy," and others. He was state librarian of Ohio from 1845 till 1851, when he was appointed Indian agent for New Mexico, and in 1852 became governor of that territory. He was afterward successively local editor of the "Ohio State Journal," and editor and proprietor of the Columbus "Gazette" and the Zanesville "Times." He was receiver in the U. S. land-office in Santa Fé, N. M., in 1861–'2, and subtreasurer there in 1862–'6.

GRELLET, Stephen, missionary, b. in Limoges, France, 2 Nov., 1773; d. in Burlington, N. J., 16 Nov., 1855. He was known in France as Etienne de Grellet de Mabillier. His parents were wealthy and belonged to the nobility. His father, Gabriel Marc Antoine de Grellet, was comptroller of the mint, the friend and counsellor of Louis XVI., and the proprietor of iron-works and of extensive porcelain manufactories. The son was originally a Roman Catholic, and was educated at the military college of Lyons. At the age of seventeen he entered the body-guard of Louis XVI. During the Revolution his family estates were confiscated, and he and his brothers became prisoners of war and were sentenced to be shot. After the execution of the king he made his escape to Demerara. In 1795 he came to New York, where he shortly afterward joined the Society of Friends. He removed to Philadelphia, and during the prevalence of the yellow fever in 1798 ministered to the sick and afflicted. In 1799 he returned to New York, where he engaged in mercantile pursuits. He afterward made a missionary tour in the southern states as far as Georgia, and in 1801 travelled to New England and Canada. In 1804 he married Rebecca, the daughter of Isaac Collins, the publisher. He visited the south of France in 1807, travelled in England and Germany in 1812, preached in Hayti in 1816, and during the two following years travelled through Norway, Sweden, Russia, Greece, and Italy, and preached before Pope Pius VII., who listened to his exhortations with respect and courtesy. He returned to New York in 1820, and made another missionary tour to Europe from 1831 till 1834, when he retired to Burlington. See "Memoirs of Stephen Grellet," edited by Benjamin Seebohm (Philadelphia, 1868).

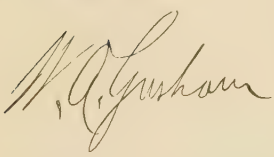
GRENNELL, George, jurist, b. in Greenfield, Mass., 25 Dec., 1786; d. there, 20 Nov., 1877. He was graduated at Dartmouth with the highest honors in 1808, studied law, and was admitted to the bar, beginning his practice in Greenfield. He was prosecuting attorney of Franklin county from 1820 till 1828, and state senator from 1824 till 1827. In 1828 he was elected to congress as a Whig, where he served until 1839. He was a trustee of Amherst from 1838 till 1859. In 1849 he was made probate judge, which office he held until 1853. Subsequently he was clerk of the Franklin county courts until 1865. He was one of the original corporators of the Troy and Greenfield railroad, and was its first president. During his term in Congress he proposed the recognition of the independence of Hayti. The degree of LL. D. was conferred upon him by Amherst in 1854.

GRENVILLE, George, English statesman, b. in England, 14 Oct., 1712; d. there, 13 Nov., 1770. He was educated at Eton and at Christ Church college, Oxford, where he was distinguished as a mathematician. He was admitted to the bar in 1737, and entered parliament in 1741 as a member for Buckingham, which borough he represented until his death. He was a lord of the admiralty in 1744; lord of the treasury in 1747; treasurer of the navy and privy-councillor in 1754; leader of the house of commons in 1761; secretary of state and first lord of the admiralty in 1762; and first lord of the treasury and chancellor of the exchequer in 1763–'5. He introduced plans for taxing the colonies, and was the author of the famous "Stamp-Act," which was one of the causes of the American Revolution. He published "Considerations on Commerce and Finances" (1767) and "The Present State of the Nation" (1769).—His son, **Thomas,** b. in 1755; d. in 1846, was one of the agents employed in negotiating the treaty of peace with the United States in 1782–'3.

GRENVILLE, Sir **Richard,** English navigator, b. in Cornwall, England, in 1540; d. at sea in 1591. At the age of sixteen he served in the German imperial army as a volunteer against the Turks. On his return he was appointed to a command in Ireland, and was made a sheriff of Cork. He represented Cornwall in parliament in 1571, and afterward was made high sheriff of that country, and knighted by Queen Elizabeth. He entered actively into the colonization schemes of Sir Walter Raleigh, who was his cousin, and on 9 April, 1585, sailed from Plymouth in command of seven vessels bearing 108 colonists, which were despatched to Carolina by Raleigh. The fleet touched the West Indies, where it captured two Spanish frigates, and on 20 June reached the mainland of Carolina, or Florida, as it was then called. They encountered a storm, and narrowly escaped being wrecked on the cape, which Grenville named in consequence Cape Fear. They anchored at Wocoken on 26 June, and passing through the Ocracoke inlet made their way to Roanoke island. Grenville and his party explored the country for eight days, and in revenge for the theft of a silver cup burned an Indian village and destroyed the Indian maize around it. Grenville left the colony under the government of Robert Lane, and returned to England with his ships, capturing a Spanish galleon on his way. On his second visit to the colony he found it deserted, as the colonists had returned to England with Sir Francis Drake, owing to trouble with the Indians. In order to keep possession of the country he left fifteen men there and sailed for England. He was made a member of the council that was created in 1588 to devise means of defence against the Spanish armada, and in 1591 he was raised to the rank of vice-admiral and sent in conjunction with Lord Howard to cruise against the Spaniards in the West Indies. He encountered off the Azores a Spanish fleet consisting of fifty-two ships. With only five ships he attacked the enemy, and fought from 3 P. M. until daybreak. During the action four of the Spanish ships were sunk and a thousand men killed. Grenville was wounded early in the engagement, and was finally shot through the body and carried into the cabin. Upon this the rest of the crew surrendered. When the vessel was about to sink he was carried on board a Spanish ship, where he died three days afterward. His name is written Grenville, Greenville, and Granville. The voyage of Sir Richard Grenville in 1585 was related by one of the persons who accompanied him, and an account after their arrival was written probably by Ralph Lane. See Hakluyt's "Voyages."

GRESHAM, Walter Quinton, jurist, b. near Lanesville, Harrison co., Ind., 17 March, 1832. He

was educated in country schools, and spent one year in the state university at Bloomington, Ind., but was not graduated. He then studied law in Corydon, Ind., was admitted to the bar in 1853, and became a successful lawyer. He was elected to the legislature in 1860, but resigned in August, 1861, to become lieutenant-colonel of the 38th Indiana regiment. He was promoted to colonel of the 53d Indiana in December, and on 11 Aug., 1863, after the fall of Vicksburg, was made brigadier-general of volunteers. He commanded the 4th division of Blair's corps in the fighting before Atlanta, and received a severe wound that disabled him for a year, and prevented him from seeing further service. On 13 March, 1865, he was brevetted major-general of volunteers for his gallantry at Atlanta. After the war he resumed practice at New Albany, Ind. He was an unsuccessful Republican candidate for congress in 1866, and in 1867–'8 was financial agent of his state in New York. President Grant, who held him in great esteem, made him U. S. judge for the district of Indiana in 1869, and in 1880 he was an unsuccessful candidate for U. S. senator. He resigned his judgeship in April, 1882, to accept the place of postmaster-general in President Arthur's cabinet, and in July, 1884, on the death of Secretary Folger, was transferred to the treasury portfolio. In October of that year he was appointed U. S. judge for the 7th judicial circuit, which office he still holds (1887). Judge Gresham was a strong supporter of Gen. Grant for a third term in the Chicago convention of 1880, but has not been conspicuous in politics.



GREVYLE, Lord **Charles Montague,** governor of South Carolina, b. 29 May, 1741; d. in January, 1784. He was the second son of Robert, third Duke of Manchester. He was a knight of the shire of Huntingdon, and at one time governor of Jamaica. From 1766 till 1773 he held the office of governor of South Carolina. During his administration, in 1769, the circuit court law was passed, and courts of justice were established at Ninety-Six, Orangeburg, and Camden. Montague street, in Charleston, is named for him.

GREY, Charles, British soldier, b. in England, 23 Oct., 1729; d. 14 Nov., 1807. In 1757 he was aide-de-camp to the Duke of Brunswick, and took part in the battle of Minden, in which he was wounded. He was appointed lieutenant-colonel in 1761, and commanded the 98th regiment at the capture of Belle Isle in 1763. In 1772 he received the commission of colonel. He accompanied Howe to Boston in 1775, and was raised by him to the local rank of major-general. On the night of 21 Sept., 1777, he surprised Gen. Wayne near the Paoli Tavern on the Lancaster road, where the latter was encamped. Grey approached stealthily, and, ordering the flints to be taken from the guns, attacked the patriots with the bayonet, defeating them with great slaughter. For this act he received the name of "No Flint Grey." He took an active part in the battle of Germantown, 4 Oct., 1777, and in the following year destroyed the shipping and stores in New Bedford and Martha's Vineyard. On 7 Sept., 1778, he surprised Baylor's Virginia regiment, which lay at Tappan on the Hudson, and massacred the entire corps of dragoons. In 1793 he was employed in Flanders. At the beginning of hostilities between Great Britain and France in the following year, he was appointed to command the land forces that were sent, in conjunction with the naval armament under Lord Howe, to reduce the West Indies to submission, and captured the islands of Martinique and St. Lucie. In 1795 he was made general. He was raised to the peerage in 1801, received the title of Earl Grey in 1807, and was the father of the celebrated English statesman of that name.

GRIDLEY, Jeremiah, lawyer, b. in Boston, Mass., 10 March, 1702; d. in Brookline, Mass., 10 Sept., 1767. He was graduated at Harvard in 1725, was for several years an assistant in a grammar-school in Boston, studied theology, and occasionally preached. He then studied law, and was admitted to the bar. For a year he edited a weekly newspaper called "The Rehearsal," which was established in Boston in 1731. He soon acquired reputation, was elected a member of the general court from Brookline, and became an opponent of the measures of the British ministry. Notwithstanding this he was appointed attorney-general for the province of Massachusetts Bay. In 1761 while holding this office he defended the "writs of assistance" which the British custom-house officers had applied for to enable them to enter the dwellings of suspected individuals at their discretion, and encountered the powerful opposition of his former pupil, James Otis. In addition to his legal station he was colonel of militia, grand master of freemasons, and president of the Marine society. He contributed many articles of great merit to the "Rehearsal."—His brother, **Richard,** soldier, b. in Boston, Mass., 3 Jan., 1711; d. in Stoughton, Mass., 20 June, 1796, had great reputation as an artillerist. He served as engineer in the reduction of Louisburg in 1745, became in 1755 chief engineer and colonel of infantry in the British army, and in the following year took part in the expedition to Crown Point under Winslow, and constructed the fortifications on Lake George. He served under Amherst in 1758, and subsequently under Wolfe on the plains of Abraham, being at the capture of Quebec. At the conclusion of the war, as a reward for his services, he received Magdalen island from the British government, with half pay for life. He espoused the patriot cause in 1775, and was appointed chief engineer and commander of artillery of the colonial army at Cambridge. He planned the works of Bunker Hill the night before the battle of 17 June, 1775. Although sixty-five years of age, he fought during the entire engagement, and was wounded, being exposed to the severest fire of the enemy. He was active in constructing the fortifications around Boston. On 20 Sept., 1775, he was commissioned major-general by the provincial congress, and had command of the Continental artillery until November.

GRIDLEY, Philo, jurist, b. in Paris, Oneida co., N. Y., 16 Sept., 1796; d. in Utica, N. Y., 17 Aug., 1864. He was graduated at Hamilton college, Clinton, with its first class, in 1816. He then studied law at Onondaga and Waterville, and was admitted to the bar in 1820, beginning his practice in Waterville. A few years later he removed to

Hamilton, Madison co., where he attained eminence at the bar. He served as district attorney for Madison county, and was appointed judge of the 5th judicial circuit. He removed to Utica in 1839, and on the adoption of a new constitution in 1846 was elected one of the judges of the state supreme court, which office he resigned after six years' service. In 1840 a Canadian named McLeod was arrested for participating in the burning of the American steamboat "Caroline," which carried supplies to 500 insurgents on Navy island, Niagara river. The British government demanded his release on the ground that the deed was done by order of his commanding officer, and threatened war unless its demand should be complied with. There was so much excitement on the border that McLeod was transferred to Judge Gridley's court for trial. The prisoner was finally acquitted, as an alibi was proved.

GRIER, David, soldier, b. in York county, Pa., in 1742; d. in York, Pa., 3 June, 1790. He received a classical education, studied law, and was admitted to the York county bar in 1771. He served in the French and Indian war, and when the war for independence began he was commissioned captain of the 6th battalion of the Pennsylvania line, served in the campaign against Canada, was promoted to major in October, 1776, and subsequently to lieutenant-colonel of the 7th Pennsylvania line. He was wounded at the Paoli massacre in September, 1777. At the close of the war he resumed his profession at York, was elected to the assembly in 1783, served as a delegate to the convention to ratify the Federal constitution, and was chosen by the constitutionalists one of the first presidential electors.

GRIER, Robert Cooper, jurist, b. in Cumberland county, Pa., 5 March, 1794; d. in Philadelphia, Pa., 26 Sept., 1870. He was graduated at Dickinson in 1812, and after teaching there one year he returned to Northumberland, Pa., to assist his father in the academy, of which he became principal in 1815. He devoted his leisure to the study of law, was admitted to the bar in 1817, and practised in Bloomsburg, Pa. He then removed to Danville, where he attained eminence in his profession. He supported his mother, and educated a family of ten brothers and sisters. He was appointed judge of the district court of Alleghany in 1838, and removed to Alleghany City, but went to Philadelphia in 1848 and resided there till his death. He was appointed justice of the U. S. supreme court by President Polk on 4 Aug., 1846, and held that office until his death, although he had sent in his resignation in 1869. He was originally a Federalist, but acted with the Democratic party until the civil war, when he supported the national cause.

GRIER, William Nicholson, soldier, b. in Pennsylvania in 1812; d. at Napa Springs, Cal., 9 July, 1885. He was graduated at the U. S. military academy in 1835, and assigned to the 1st dragoons. He was on frontier duty in the Choctaw nation from 1839 till 1840, when he became assistant instructor of infantry and cavalry tactics at West Point, and held the office one year, after which he was engaged in frontier duty in the west. He was appointed captain, 23 April, 1846, and entered on active service at the beginning of the Mexican war. He was brevetted major for gallant and meritorious conduct in the battle of Santa Cruz de Rosales, 16 March, 1848, and was on frontier duty at Fernandez de Taos in 1849. During the two following years he took part in the expedition against the Apache Indians, and was wounded in the skirmish at Too-koon-kurre Butte, 17 Nov., 1849. Subsequently he was in active service on the Pacific coast and in the far northwest, serving in expeditions against the Indians in Washington territory. In 1861–'2 he served as acting inspector-general of the Army of the Potomac, and commanded the 1st regiment of cavalry in the Virginia peninsular campaign. He was present at the siege of Yorktown and the battle of Williamsburg, where he was wounded and brevetted colonel for gallantry. He also took part in the battle of Gaines's Mills and in the seven days' change of base to the James river. He was on court-martial duty in St. Louis, Mo., from September, 1862, till February, 1863, and served as superintendent of volunteer recruiting service and chief mustering and disbursing officer of Ohio. He also held this office in Iowa from March, 1863, till June, 1865, and in Pennsylvania from June, 1865, till April, 1866. He was brevetted brigadier-general, U. S. army, for faithful service during the war on 13 March, 1865. On 31 Aug., 1866, he became colonel of the 3d cavalry. At his own request he was placed on the retired list, 15 Dec., 1870.

GRIERSON, Benjamin Henry, soldier, b. in Pittsburg, Pa., 8 July, 1826. At an early age he removed to Trumbull county, Ohio, and was subsequently engaged in the produce business at Jacksonville, Ill. At the beginning of the civil war he became aide-de-camp to Gen. Prentiss, was made major of the 6th Illinois cavalry in August, 1861, became colonel, 28 March, 1862, and commander of a cavalry brigade in December. He was engaged in nearly all the cavalry skirmishes and raids in western Tennessee and northern Mississippi, and in April, 1863, made a successful cavalry raid from La Grange to Baton Rouge to facilitate Gen. Grant's operations about Vicksburg. He became a brigadier-general of volunteers on 3 June, 1863, major-general, 27 May, 1865, colonel of the 10th U. S. cavalry, 28 July, 1866, and was brevetted brigadier- and major-general, U. S. army, 2 March, 1867, for his raid of December, 1864, in Arkansas. He was in command of the district of the Indian Territory from 1868 till 1873, and was engaged in active scouting, explorations, campaigns against the Kiowas, Comanches, Cheyennes, and other tribes, and in removing intruders from the Indian territory. From 1875 to 1881 he was actively engaged in scouting and exploring the country throughout western Texas, New Mexico, and in campaigns against hostile Indians. Since 13 Nov., 1886, he has commanded the district of New Mexico, with headquarters at Santa Fé, N. M.

GRIFFIN, Charles, soldier, b. in Licking county, Ohio, in 1826; d. in Galveston, Texas, 15 Sept., 1867. He was graduated at the U. S. military academy in 1847, was assigned to the 2d artillery, and was soon after ordered to Mexico, and commanded a company under Gen. Patterson in the campaign from Vera Cruz to Puebla. In 1849 he was promoted to 1st lieutenant, and served in New Mexico against Navajo Indians until 1854. After other frontier service he was instructor of artillery at West Point in 1859–'61. In command of the "West Point battery" he fought at Bull Run, and on 9 June, 1862, was commissioned brigadier-general of volunteers, and took part in the Peninsular campaign, winning distinction at the battle of Gaines's Mill. At Malvern Hill, Gen. Griffin, in command of the artillery, supported his brigade against the assault of Gen. Magruder, drove back the enemy, and contributed signally to the success of the day. He was present at the second battle of Bull Run, and was charged by Pope in his re-

port with refraining from taking part in the action, while he "spent the day in making ill-natured strictures upon the commanding general." Gen. Griffin was arrested for trial on this charge, but was soon released. Having been promoted to the command of a division, he took part in the battles of Antietam and Fredericksburg, and in Hooker's campaign. On 1 Aug., 1864, he was brevetted major-general of volunteers, and on 18 Aug. he received the brevet of colonel in the regular army. He was present at Gettysburg, and was conspicuous in all the engagements from the Wilderness to Five Forks. As commander of the 5th corps, directed by Gen. Grant, he received the arms and colors of the Army of northern Virginia, after the surrender at Appomattox Court-House. On 13 May, 1865, Gen. Griffin was brevetted brigadier- and major-general in the regular army, and on 10 Aug., 1865, was assigned to the command of the district of Maine, with headquarters at Portland. On 28 July, 1866, he was made colonel of the 35th infantry, and in 1867 commanded the Department of Texas, with headquarters at Galveston. On 5 Sept., 1867, while the yellow fever was raging at Galveston, he was assigned to the temporary command of the 5th military district on the removal of Gen. Sheridan, and ordered to make his headquarters at New Orleans. He replied that "to leave Galveston at such a time was like deserting one's post in time of battle." He remained and fell a victim to the fever.

GRIFFIN, Cyrus, jurist, b. in Virginia in 1749; d. in Yorktown, Va., 14 Dec., 1810. He was educated in England, and while there married a lady belonging to a noble family. He gave early adhesion to the patriot cause, was a member of the Virginia legislature, a delegate to the old congress in 1778–'81 and in 1787–'8, and was president in the latter year. He was president of the supreme court of admiralty from its creation until its abolition, was commissioner to the Creek nation in 1789, and was judge of the U. S. court for the district of Virginia from December, 1789, until his death.

GRIFFIN, Ebenezer, lawyer, b. in Cherry Valley, N. Y., 29 July, 1789; d. in Rochester, N. Y. When he was quite young his father removed to Clinton, Oneida co., where the boy received his preparatory education. He entered Union college, but, before completing his course, began the study of law, and was admitted to the bar at Utica in 1811. He engaged in practice in Clinton, where he remained for eight years, and afterward removed to Utica, but in 1825 went to New York city. Among the many important cases in which he was employed as counsel was that of Mather, who was charged with being a conspirator in the abduction of Morgan. Mr. Griffin was retained to conduct the defence, which he did so ably that Mather was acquitted, notwithstanding the state of public feeling. Mr. Griffin continued to practise in New York until 1842, and then removed to Rochester, where he remained until his death.

GRIFFIN, Edward Dorr, clergyman, b. in East Haddam, Conn., 6 Jan., 1770; d. in Newark, N. J., 8 Nov., 1837. He was graduated at Yale in 1790, and studied theology under Jonathan Edwards, of New Haven, who was subsequently president of Union college. He was licensed as a preacher in October, 1792, and in January, 1793, began his ministerial work at New Salem, Conn. In June, 1795, Mr. Griffin was ordained pastor of the Congregational church at New Hartford, and afterward held pastorates at Newark, N. J., and Boston, Mass. Union college gave him the degree of D. D. in 1808, and he became professor of rhetoric in the recently established Andover theological seminary, 21 June, 1809, which chair he filled until 1811. In 1821 he was chosen president of Williams, and remained there till 1836. He was an eloquent and popular preacher, and published "Lectures delivered in Park Street Church, Boston" (Boston, 1813), and "Sixty Sermons on Practical Subjects" (New York, 1844). A selection from his works, with a memoir of the author by Rev. William B. Sprague, D. D., was published after his death (2 vols., 1839). See also "Recollections of Rev. E. D. Griffin," by Parsons Cooke (1856).—His brother, **George,** lawyer, b. in East Haddam, Conn., 14 Jan., 1778; d. in New York city, 6 May, 1860, was graduated at Yale in 1797, studied in the Litchfield law-school, and was admitted to the bar in 1799. He practised in Wilkesbarre, Pa., for six years, and subsequently in New York city. He is the author of "Sufferings of Our Saviour," "Evidences of Christianity," and "The Gospel its Own Advocate" (New York, 1850).—George's son, **Edmund Dorr,** scholar, b. in Wyoming, Pa., 10 Sept., 1804; d. in New York, 1 Sept., 1830, was graduated at Columbia in 1823. He studied law in his father's office for a short time, then studied divinity, and was ordained a deacon in the Protestant Episcopal church in August, 1826. Soon afterward he became assistant minister of St. James's church, Hamilton Square, near New York city, and a little later acted in the same capacity in Christ church, New York city, but was soon forced by failing health to abandon his charge. He sailed for Europe in October, 1828, and returned to New York in April, 1830. In the following May and June he delivered a course of lectures upon Roman, Italian, and English literature in Columbia. His brother Francis published his "Remains," with a memoir by Rev. John MacVicar (1831).

GRIFFIN, Gilderoy Wells, author, b. in Louisville, Ky., 6 March, 1840. He was educated at the University of Louisville, and was admitted to the bar in 1861. After practising for some years, he engaged in journalism. He was appointed U. S. consul at Copenhagen in 1871, at the Samoan islands in 1876, at Auckland, New Zealand, in 1879, and at Sydney, Australia, in 1884. He has published a biographical sketch of George D. Prentice (1869); edited the subsequent edition of "Prenticeana" (Philadelphia, 1871); wrote for it a "Life of Prentice," which he afterward re-wrote and enlarged; "Studies in Literature" (1871); "Life of Charles S. Todd" (1873); "Danish Days" (1874); "A Visit to Stratford" (1875); and "New Zealand, her Commerce and Resources" (Wellington, N. Z., 1884).

GRIFFIN, Nathaniel Herrick, educator, b. in Southampton, L. I., 28 Dec., 1814; d. in Williamstown, Mass., 16 Oct., 1876. He was graduated at Williams in 1834, and afterward studied in Princeton theological seminary for two years. He was tutor for one year in Williams, and in June, 1839, was installed pastor of the church at Delhi, N. Y., where he remained till 1841. After teaching in Brooklyn, N. Y., for two years, he became, in 1846, professor of the Greek and Latin languages in Williams, and in 1853 he was made professor of the Greek language and literature. He resigned in 1857, opened a private school in Williamstown, and from 1868 till his death was librarian of the college. He published the triennial catalogues of Williams for eleven years, prepared the first annual necrological sketches, and published numerous articles in reviews and magazines.

GRIFFIN, Simon Goodell, soldier, b. in Nelson, Cheshire co., N. H., 9 Aug., 1824. He was a teacher for several years, and represented his native

town in the legislature. He subsequently studied law, was admitted to the bar in 1860, and began practice in Concord. At the beginning of the civil war he was commissioned captain in the 2d regiment of New Hampshire volunteers, and was present at the first battle of Bull Run. In October, 1861, he was promoted lieutenant-colonel, and transferred to the 6th New Hampshire regiment, and the command of the regiment devolved upon him. On 7 April, 1862, he commanded an expedition of 600 men, assisted by five gun-boats, to Elizabeth City, N. C., which resulted in the capture of prisoners and many stands of arms, and in the breaking up of a Confederate rendezvous at that place. He commanded his regiment at the battle of Camden, N. C., 19 April, and for its gallantry on this occasion was permitted to inscribe "Camden, 19 April, 1862," upon its colors. On 22 April he was commissioned colonel of the 6th regiment. He was in the second battle of Bull Run, at Chantilly, and at Antietam, where, with his regiment and the 2d Maryland, he charged the stone bridge and carried it in the face of a heavy fire. He was present at Fredericksburg, his regiment losing one third its number, and on 20 May, 1863, he was assigned to the command of the 1st brigade, 2d division, 9th army corps. This brigade, early in June, went to assist Gen. Grant in his operations against Vicksburg, and participated in its capture. He was with his command in the Mississippi campaign of Gen. Sherman, and in the spring of 1864 was assigned to the 2d brigade, 2d division, and commanded it in the battles of the Wilderness and Spottsylvania Court-House, and was commissioned a brigadier-general on Gen. Grant's recommendation. On the night of 16 June Gen. Griffin, in command of his own and Gen. Curtin's brigade, attacked the enemy's intrenched lines in front of Petersburg, carrying their works and capturing 1,000 prisoners, with arms, artillery, and ammunition. On 2 April, 1865, he arranged and led the assault at "Fort Hell," and for gallant conduct was brevetted a major-general, and afterward participated in the pursuit and capture of Gen. Lee's army. He was mustered out in September, 1865, and declined a commission in the regular army. Subsequently Gen. Griffin settled in Keene, N. H., and served in the state legislature in 1866–'8, in the last two years being speaker of the house.

GRIFFIS, William Elliot, author, b. in Philadelphia, Pa., 17 Sept., 1843. He served in the 44th Pennsylvania regiment in 1863, was graduated at Rutgers in 1869, and in 1870 went to Japan to organize schools there on the American plan. He was superintendent of education in the province of Echizen in 1871, and in 1872–'4 held the chair of physics in the Imperial university of Tokio. He is the only American living that has made the interior of Japan his residence and has seen the feudal system there in operation. On his return to this country Mr. Griffis studied theology at New Brunswick, N. J., and in Union theological seminary, New York city, where he was graduated in 1877. He was pastor of the 1st Reformed church in Schenectady, N. Y., in 1877–'86, and in the latter year accepted a call to the Shawmut Congregational church, Boston, Mass. Union college gave him the degree of D. D. in 1884. Dr. Griffis has published the "New Japan Series" of reading-books (5 vols., Yokohama, 1872); guides to Tokio and Yokohama (1874); "The Mikado's Empire" (New York, 1876; 5th ed., 1887); "Japanese Fairy World" (Schenectady, 1880); "Asiatic History" (New York, 1881); "Corea, the Hermit Nation" (1882); "Corea, Without and Within" (Philadelphia, 1885); and "Life of Matthew Calbraith Perry" (Boston, 1887), besides several pamphlets.

GRIFFITH, David, clergyman, b. in New York city in 1742; d. in Philadelphia, Pa., 3 Aug., 1789. His early education was obtained at home, after which he went to England, continued his studies, and was graduated in London as a student of medicine. On his return in 1763, he entered on the practice of his profession, but soon resolved to enter the ministry. He went to England in 1770, and was ordained by the bishop of London on 19 Aug. of that year. The Venerable society appointed him missionary to Gloucester county, N. J., and at the close of 1771 he took charge of Shelburne parish, Loudon county, Va. Here he continued until May, 1776, when he entered the army as chaplain to the 3d Virginia regiment. At the close of 1779 he resigned his chaplaincy, and became rector of Christ church, Alexandria. This position he held until his death. At the close of the Revolution, Mr. Griffith was active in aid of the movement to raise the Episcopal church out of its depressed condition, by proposing a convention for organization, etc. He was a member of the first Virginia convention of clerical and lay deputies, which met in Richmond, Va., in May, 1785, and was appointed a delegate to the general convention held in September of that year. He was appointed secretary of the convention, and the following year received the degree of D. D. from the University of Pennsylvania. At the second Virginia convention of his church in May, 1786, Dr. Griffith was chosen bishop. It was expected that he would accompany Dr. White and Dr. Provoost to England for consecration, but pecuniary difficulties rendered this impossible. In this state of affairs he formally resigned his appointment at the opening of the general convention in 1789. He was intimate with Washington, who was for years his parishioner. It is said that on the night before the battle of Monmouth, Dr. Griffith sought an interview with Washington, and bade him beware of Gen. Charles Lee.

GRIFFITH, Robert Eglesfield, physician, b. in Philadelphia, 13 Feb., 1798; d. 26 June, 1850. He was graduated in medicine at the University of Pennsylvania in 1820, and was physician to the Philadelphia board of health in 1834–'6. He became professor of materia medica in the University of Maryland, Baltimore, in the latter year, and in 1838 accepted the chair of medicine in the University of Virginia. Dr. Griffith became noted as a botanist and conchologist, and gave a large collection of shells to the Philadelphia academy of natural sciences, of which he was vice-president in 1849–'50. He was a member of many other learned societies, wrote many articles on botany, conchology, and medicine, and published "Medical Botany" (Philadelphia, 1847), and "Universal Formulary" (1848; 2d ed., edited by Robert P. Thomas, M. D., 1856). He edited Christison's "Dispensatory," with annotations; Taylor on "Medical Jurisprudence" and on "Poisons"; Müller's "Principles of Physic" (1847); Ryan's and Chitty's works on "Medical Jurisprudence"; and Ballard and Garrod's "Materia Medica." At the time of his death he had begun an extensive work on conchology, and had planned one on "The Botany of the Bible," which he was urged to write by Prof. Asa Gray and other noted botanists.

GRIFFITHS, John Willis, naval architect, b. in New York city, 6 Oct., 1809; d. in Brooklyn, N. Y., 29 April, 1882. His father, John Griffiths, was a shipwright in New York. After working at various occupations, the boy was apprenticed to

his father's trade, and when nineteen years of age laid the lines of the frigate "Macedonia." In 1836 he published in the Portsmouth, Va., "Advocate" a series of articles giving his ideas on naval architecture, and in 1842 gave in New York and other cities the first lectures on that subject ever delivered in the United States, also opening a free school for instruction in ship-building. He favored many improvements, suggested the clipper model of the fast ships built for the China trade, and, on the discovery of gold in California, and as early as 1835 proposed the ram for the bow of war-ships. He made the calculations for the Collins steamers, and in 1850 sent to the World's exhibition in London a steamship model that attracted much attention. In 1853 he began to build for William Norris, of Philadelphia, a steamer intended to cross the Atlantic in seven days, and though, from the failure of Norris, it was not completed according to his designs, it made the fastest time on record between Havana and New Orleans. In 1856 Mr. Griffiths became part proprietor and co-editor of the "Nautical Magazine and Naval Journal," but it was suspended in 1858 on his acceptance of an appointment from the government as special naval-constructor to build the U. S. gunboat "Pawnee," which he fitted with twin screws, a drop bilge, to increase the stability at the least expenditure of propulsion-power, and other new features. The "Pawnee" was the widest and lightest-draught vessel of her displacement that was ever built, and, although drawing only ten feet of water, carried a frigate's battery. In 1864 he invented a timber-bending machine, which he first used in building the ship "New Era" in Boston in 1870. Every frame timber that required curvature was bent from the straight log, and the futtocks were extended in one stick from the keel to the rail. The use of iron in ship-building supplanted this method. In 1871–'2 he erected improved timber-bending machinery for the government, and in 1872 built the U. S. ship "Enterprise" at Portsmouth, N. H. His machines received two prize medals at the Centennial exhibition in 1876. He was the originator of the idea of life-boat steamers, and also showed a model and plans for such steamers at the Centennial. In 1879–'82 Mr. Griffiths edited in New York city a weekly journal entitled the "American Ship." Although many of Mr. Griffiths's innovations in ship-building were opposed by more conservative architects, experience has usually proved the wisdom of his views, and no architect in the United States has been as generally followed by young ship-builders. Other inventions by him are iron keelsons for wooden ships (1848); bilge keels, to prevent rolling (1863); triple screws for great speed (1866); and improved rivets (1880). His most important work is his "Treatise on Marine and Naval Architecture" (New York, 1850; 4th ed., 2 vols., 1854), which was republished in England, and had a wide sale through Europe. Its publication did more to advance American ship-building than any other single influence, and it brought its author orders for models and drawings from nearly every maritime nation. He also published "The Ship-Builder's Manual" (2 vols., 1853); and "The Progressive Ship-Builder" (2 vols., 1875–'6).

GRIFFITTS, Samuel Powell, physician, b. in Philadelphia, Pa., 21 July, 1759; d. there, 12 May, 1826. He was graduated at the University of Pennsylvania in 1780, and after studying medicine abroad for three years began practice in Philadelphia in 1784. He founded the Philadelphia dispensary in 1786, was its physician for seven years, and in 1792–'6 held the chair of materia medica in the University of Pennsylvania. In the pestilence of 1793, and the epidemics of 1797–'9, 1802, and 1805, he remained at his post regardless of personal danger, and was of great service. In 1793–'4 he was active in relieving the destitute French emigrants from St. Domingo, and collected $12,000 to aid them. From 1817 till his death Dr. Griffitts was vice-president of the College of physicians, and was also active in establishing, under the auspices of the Philadelphia yearly meeting of Friends, an institution for the relief of mentally deranged persons. He was one of the editors of the "Eclectic Repertory," and on 1 June, 1820, read before a convention for the formation of a pharmacopœia, held in Washington, an "Essay of a Pharmacopœia," of which he was the principal author.

GRIGG, John, publisher, b. in Cornwall, England, in 1792; d. in Philadelphia, 2 Aug., 1864. He was left an orphan at six, and at twelve went to sea. After making several voyages he spent a year with relatives in Richmond, Va. He removed to Warren, Ohio, about 1810, and was clerk of the court there, but resigned in 1815 and became superintendent of a woollen-factory in Scott county, Ky. He entered a publishing-house in Philadelphia in 1816, and in 1823 began business on his own account, and was very successful. After taking various partners he retired in 1850, with a large fortune, and afterward became a private banker. He gave constantly and largely, though without ostentation.—His son, **John Warner,** b. about 1819; d. in Philadelphia in August, 1869, left $117,000 to various charities in that city.

GRIGGS, Samuel Chapman, publisher, b. in Tolland, Conn., 20 July, 1819. He began business as a bookseller in Hamilton, N. Y., but in 1848 went to Chicago, where he continued in the same calling, and in a few years was at the head of the largest bookselling business in the northwest. In the great fire of 1871 Mr. Griggs was a heavy loser, both the bookstore, with its large stock, and his dwelling-house on Michigan avenue, being destroyed. In 1872 he sold his interest in the business to his partners, and, with John C. Buckbee as junior partner, established another publishing-house. In April, 1887, Mr. Buckbee retired from the firm of S. C. Griggs & Co. The publications of the house comprise more than 70 works, literary, scientific, and academical, some of which have met with a very extended sale, and a large proportion of which reflect credit on the publishers.

GRIGSBY, Hugh Blair, historical scholar, b. in Norfolk, Va., 22 Nov., 1806; d. in Charlotte county, Va., 28 April, 1881. He represented Norfolk in the legislature when scarcely more than a boy, and in 1829–'30 was a member of the State convention with Thomas Jefferson, James Madison, and other noted men. He subsequently devoted himself to literature and agriculture, and was an authority on the history of Virginia. He was president of the Virginia historical society, and became in 1871 chancellor of William and Mary college, which had given him the degree of LL. D. in 1855. He contributed to the "Southern Literary Messenger," and wrote numerous historical discourses, including one on the Virginia convention of 1829–'30 delivered before the historical society in 1853, another on that of 1776 delivered at William and Mary in 1855, and "Discourse on Hon. Littleton W. Tazewell" (Norfolk, 1860).

GRIJALVA, Juan de (gre-hahl'-bah), Spanish adventurer, b. in Cuellar, Spain, in the latter part of the 15th century; d. in Nicaragua, 21 Jan., 1527. His uncle, Velasquez, the governor of Cuba, gave

him command of a flotilla, consisting of four vessels, to explore Yucatan, which Fernandez de Cordova had just discovered, and he sailed from Havana, 1 May, 1518. After a successful fight with Indians at the place where Cordova had been defeated, he continued his route westward, keeping close to the land. The farther he advanced the more cultivated and populous the land appeared, and, some one having exclaimed that he seemed to be in a new Spain, that name was given to the entire country. He afterward penetrated into the country for a short distance, ascending the river of Tabasco, which is still called after his name, and then continued his course along the coast. He traded with the inhabitants, and learned that he was indebted for his friendly reception to the orders of a powerful monarch, named Montezuma. The sight of such rich countries had inspired Grijalva with the desire of taking possession of them, but he was restrained by the orders of Velasquez, who had expressly enjoined him not to make any settlement. Nevertheless he decided to despatch a vessel to Cuba, with an account of his discoveries and with the precious metals he had collected. After sailing still farther to the north, he returned to Havana, where he arrived on 10 Nov. Noticing preparations in a neighboring harbor for a new expedition, he thought that he was to be given command; but Velasquez reproached him bitterly for not planting colonies. The command of the new expedition was given to Cortes. Grijalva afterward settled in Nicaragua, and was slain during an uprising of the Indians in the valley of Ulancha.

GRILLET, John, French missionary, b. in France about 1630; d. in Guiana about 1675. He was a member of the Jesuit society, and was superior of the Jesuit house in Cayenne in 1666 when the English became masters of that colony. He did not take refuge among the savages, like many of his brethren. In 1673 a father-visitor of the society arrived in Cayenne, and appointed Grillet to go on a mission among the Indian tribes that were most distant from the sea, in order to collect information about their habits and state of civilization, as well as about the geography of the country. Grillet asked that Father François Béchamel should be his companion, as the latter thoroughly understood the Galibi language. The two missionaries supplied themselves with the instruments necessary for taking observations, as well as all the requisites for drawing a map of their route, and set out, 25 Jan., 1674. After many fatigues, which ultimately ruined their health, they reached a point 420 miles southwest of Cayenne, and found themselves among a people who had never before seen a European. They returned on 17 June. Father Grillet sent a narrative of his journey to France, accompanied by a letter dated 2 Sept., 1674. It was published under the title "Journal du voyage qu'ont fait les pères Jean Grillet et François Béchamel dans la Guyane, l'an 1674." It was inserted in the second volume of Gomberville's "Relation de la rivière des Amazons" (Paris, 1679–'80), and afterward in the "Voyage around the World" of Woods Rogers (Amsterdam, 1716). It contains the first account of the savages of Guiana.

GRIMES, Bryan, soldier, b. in Pitt county, N. C., 2 Nov., 1828; d. near Bear Creek, Pitt co., N. C., 14 Aug., 1880. His grandfather, William, was a patriot of the Revolution. Bryan was graduated at the University of North Carolina in 1848, and engaged in planting until he entered the Confederate army in 1861 as major of the 4th North Carolina regiment. He served throughout the war, and attained the rank of senior major-general in "Stonewall" Jackson's corps, his division making the last charge at Appomattox. After the war he returned to agricultural pursuits. While driving at nightfall along the public road, two miles from his residence, he was fired upon and killed. The assassin was never discovered, but was supposed to be a sympathizer with the accused in a criminal suit in which Gen. Grimes was an important witness.

GRIMES, James Wilson, statesman, b. in Deering, Hillsborough co., N. H., 20 Oct., 1816; d. in Burlington, Iowa, 7 Feb., 1872. He was graduated at Dartmouth in 1836, and in the same year went west and began to practise law in Burlington, Iowa, then in what was known as the "Black Hawk Purchase," in the territory of Michigan. From 4 July, 1836, till 12 June, 1838, it was part of Wisconsin territory, and in 1837–'8 Mr. Grimes was assistant librarian of the territorial library. After the formation of Iowa territory he was a delegate to its assembly in 1838 and 1843, and in 1852, after its admission to the Union, was a member of the legislature. He was governor of the state in 1854–'8, having been elected by Whigs and Free-soil Democrats, and while holding the office did much to foster Free-soil sentiment in his state. On 28 Aug., 1856, he wrote an official letter to President Pierce protesting against the treatment of Iowa settlers in Kansas. He was elected to the U. S. senate as a Republican in 1859, and re-elected in 1865. His first speech, delivered on 30 Jan., 1860, was a reply to Robert Toombs, who had accused Iowa of passing laws in violation of the rights of sister states, and after this he spoke frequently, and was known as a hard-working member of the senate. In 1861 he was a delegate to the peace convention. He was a member of the committee on naval affairs from 24 Jan., 1861, till the end of his service, and was its chairman from December, 1864. He strongly advocated the building of iron-clads, and the abandonment of stone fortifications for harbor defence. Mr. Grimes was noted for his independence of character, which frequently brought him into conflict with his party associates in the senate. Thus, although he favored a vigorous prosecution of the war, he considered President Lincoln's enlargement of the regular army in 1861 a dangerous precedent, and later he opposed a high protective tariff. In the impeachment trial of Andrew Johnson, Mr. Grimes was one of the few Republican senators who voted "not guilty," and this act brought upon him a storm of condemnation which lasted but a short time, owing to the evident fact that his vote had been strictly in accordance with what he considered his duty. Mr. Grimes had a stroke of paralysis in 1869, and in April of that year went abroad, resigning his seat in the senate on 6 Dec. He returned in September, 1871, apparently improved, but died soon afterward of heart disease. Mr. Grimes founded a professorship at Iowa college, at Grinnell, and gave money for scholarships there and at Dartmouth, receiving the degree of LL. D. from both colleges. He also established a free public library in Burlington, Iowa. See "Life of James W. Grimes," by William Salter (New York, 1876).

GRIMKÉ, John Faucheraud, jurist, b. in South Carolina, 16 Dec., 1752; d. in Long Branch, N. J., 9 Aug., 1819. He studied law in London, and was one of the Americans there who petitioned George III. against the measures that infringed on colonial rights. He returned home at the beginning of hostilities, and fought through the Revolution as lieutenant-colonel of artillery. He was elected a judge of the superior court in 1783,

and in 1799 became senior associate, and thus virtually chief justice. He was also frequently a member of the legislature, speaker of the house in 1785–'6, and a member of the convention of 1788 that adopted the Federal constitution. Judge Grimké, during the latter part of his life, became involved in much litigation, which made him unpopular. Owing to this, and to some hasty action on his part, he was impeached before the legislature in 1811, but the charges were not sustained. Princeton gave him the degree of LL. D. in 1789. He published "Revised Edition of the Laws of South Carolina to 1789," "Law of Executors for South Carolina," "Probate Directory," "Public Law of South Carolina" (Philadelphia, 1790), and "Duty of Justices of the Peace" (2d ed., 1796).—His son, **Thomas Smith,** reformer, b. in Charleston, S. C., 26 Sept., 1786; d. near Columbus, Ohio, 11 Oct., 1834, was graduated in 1807 at Yale, and during one of his vacations travelled with President Timothy Dwight. Abandoning his intention of studying for the ministry, he became a lawyer in deference to his father's wishes, and attained distinction at the bar and in politics. On 17 March, 1827, he advocated, in an address before the Bar association of South Carolina, the codification of the laws of that state. He was a member of the state senate in 1826–'30, and in 1828 made a speech in support of the general government on the tariff question. One of his finest efforts was his argument on the South Carolina test-oath question in March, 1834. He was a pioneer in the temperance cause, standing at first almost alone in that work, and one of the most distinguished members of the American peace society. He aided these and other reforms both pecuniarily and by his writings, and his public addresses in their favor won him much respect and sympathy. He advocated absolute non-resistance, holding that even defensive warfare is wicked, and his ideas met with much ridicule. When asked what he would do if he were mayor of Charleston, and a piratical vessel should attack the city, he is said to have replied that he would marshal the Sunday-school children in procession, and lead them to meet the invader. Though a fine classical scholar, he opposed both classics and mathematics as elements of an education, and urged the adoption of more extensive religious teaching. He was also one of the earliest advocates of reform in spelling, which he practically carried out in his later writings, making not only the changes advocated by Noah Webster, but others since advised by the Spelling-reform association, though not generally adopted, such as the omission of final silent *e*. In October, 1834, he delivered an address on "American Education" before the Western literary institute at Cincinnati, Ohio, and died suddenly of cholera a few days afterward while on his way home. He was much respected and beloved, even by those who did not agree with his peculiar ideas. He published "Addresses on Science, Education, and Literature" (New Haven, 1831).—Another son, **Frederick,** b. in Charleston, S. C., 1 Sept., 1791; d. in Chillicothe, Ohio, 8 March, 1863, was graduated at Yale in 1810, and removed to Columbus, Ohio, in 1818. He was for some time presiding judge of the Ohio court of common pleas, and in 1836–'42 was a judge of the state supreme court, resigning, in the latter year, to devote his time to philosophical studies. He published an essay on "Ancient and Modern Literature" and a work on the "Nature and Tendencies of Free Institutions" (Cincinnati, 1848). His works, with his latest revisions, were published collectively after his death (1871).—A daughter, **Sarah Moore,** reformer, b. in Charleston, S. C., 6 Nov., 1792; d. in Hyde Park, N. Y., 23 Dec., 1873. After the death of her father, she and her sister Angelina, afterward Mrs. Theodore D. Weld (*q. v.*), having long been convinced of the evils of slavery, emancipated their negroes and left their home. In her own account of the event, Miss Grimké says: "As I left my native state on account of slavery, deserted the home of my fathers to escape the sound of the driver's lash and the shrieks of the tortured victims, I would gladly bury in oblivion the recollections of those scenes with which I have been familiar. But it may not, can not be; they come over my memory like gory spectres, and implore me with resistless power in the name of humanity, for the sake of the slave-holder as well as the slave, to bear witness to the horrors of the southern prison-house." Miss Grimké went to Philadelphia in 1821, and became one of the most active members of the Anti-slavery society, also advocating women's rights. She lectured in New England, and afterward made her home with the Weld family, teaching in their school, which was established in Belleville, N. J., in 1840. She published in 1827 an "Epistle to the Clergy of the Southern States"—an effective anti-slavery document—and afterward wrote "Letters on the Condition of Woman and the Equality of the Sexes" (Boston, 1838). She also translated Lamartine's "Joan of Arc" (1867).

GRIMSHAW, William, author, b. in Greencastle, Ireland, in 1782; d. in Philadelphia, Pa., in 1852. He emigrated to the United States in 1815, and lived many years in Philadelphia. Among his works were an "Etymological Dictionary" (Philadelphia, 1821); "Gentlemen's Lexicon," and "Ladies' Lexicon" (1829); "Merchants' Law Book," "Form Book," "American Chesterfield," "Life of Napoleon," and school histories of England, France, Greece, the United States, Rome, South America, and Mexico, with questions and keys. He also published revised editions of Goldsmith's histories of Rome and Greece, of Ramsay's "Life of Washington," and of Baine's "History of the Wars Growing out of the French Revolution."
